15. 	<p>Getting Started with TJBOT Introduction TJBOT is a kit developed at IBM to help people get started with their Watson AI service. It comes with a friendly little robot that you build yourself, a Raspberry Pi 3, and all the parts you need to make your robot wave, blink, talk,.....</p> <p>Listed under: Development Board - Kits Projects, Robotics - Automation Projects</p>
16. 	<p>Using the PSoC 6 Pioneer Board with the Pioneer IoT Add-on Shield Introduction The PSoC 6 is the latest addition to Cypress’s powerful PSoC series of processors. The PSoC 6 Pioneer IoT Add-On Shield is the development tool associated with this processor line, sporting an onboard debugger, Arduino compatible headers, CapSense widgets, and more, all tied to a PSoC.....</p> <p>Listed under: Development Board - Kits Projects</p>
17. 	<p>Raspberry Pi Stand-Alone Programmer Introduction With the power of Raspberry Pi, Python, avrdude, a custom HAT with cable adapter, we developed our own spin on AVR programming that turned out pretty darn robust. In addition to creating a stand alone solution, it was a great experiment to learn more.....</p> <p>Listed under: Raspberry Programmer Projects</p>
18. 	<p>Remote Monitoring of Weather Using Raspberry Pi In this Project I am going to show you how to make a Remote Weather monitoring system using Raspberry Pi3 I am using PubNub Cloud service for this,Free...which is PubNub is a global Data Stream Network (DSN) and realtime infrastructure-as-a-service (IaaS) company based in San.....</p> <p>Listed under: Metering - Instrument Projects, Phone Projects, Sensor - Transducer - Detector Projects, Temperature Measurement Projects</p>
19. 	<p>Telemonitoring System With Raspberry Pi Telemonitoring Telemonitoring is defined as the use of information technology to monitor patients at a distance. Telemonitoring allows reduction of chronic disease complications thanks to a better follow-up; provides health care services without using hospital beds; and reduces patient travel, time off from work, and overall costs. Telemonitoring can help.....</p> <p>Listed under: Home Automation Projects</p>
20. 	<p>Raspberry PI Wireless Display Receiver In industrial automation &amp; other areas most of the time, we want data to be viewed at control room or head office with far distance, Thats why i made Raspberry Pi Wireless Display Receiver ,As RPi made its 10th Million sale this year on its Birthday.....</p> <p>Listed under: LCD Projects, Video - Camera - Imaging Projects, Wifi / Wlan Projects, Wireless projects</p>
21. 	<p>Raspberry Pi Zero Helmet Impact Force Monitor How much impact can the human body handle? Whether it’s football, rock climbing, or a bicycle accident, knowing when to seek immediate medical attention after a collision is incredibly important, especially if there are no obvious signs of trauma. This tutorial will teach you how.....</p> <p>Listed under: Security - Safety Projects</p>
22. 	<p>Setting up a Raspberry Pi 3 as an Access Point Introduction Note: This tutorial was based on instructions found on this blog. The Raspberry Pi 3 comes with a built-in wireless adapter, which makes it easy to configure it as a WiFi hotspot to share Internet or host your own internal web site. The first part of this guide.....</p> <p>Listed under: Wireless projects</p>
23. 	<p>Headless Raspberry Pi Setup Introduction A “headless” computer is one that operates without a monitor, keyboard, or mouse. The Raspberry Pi works great as an inexpensive computer that can help people learn to program and create fun, interesting projects (without many repercussions if you break something—just reflash the SD card!). The.....</p> <p>Listed under: Other Projects</p>
24.  How to Use Remote Desktop on the Raspberry Pi with VNC	<p>Introduction If you like the idea of a headless computer setup for your Raspberry Pi (i.e. one without a keyboard, mouse, or monitor) but want access to the full graphical desktop, then you’re in luck! By using a Virtual Network Computing (VNC) program, you can access a.....</p> <p>Listed under: Wireless projects</p>
25. 	<p>Python GUI Guide: Introduction to Tkinter Introduction Python is generally more popular as a sequential programming language that is called from the command line interface (CLI). However, several frameworks exist that offer the ability to create slick graphical user interfaces (GUI) with Python. Combined with a single board computer, like the Raspberry.....</p> <p>Listed under: Other Projects</p>
26. 	<p>Using the A111 Pulsed Radar Sensor with a Raspberry Pi Introduction Experimental Products: SparkX products are rapidly produced to bring you the most cutting edge technology as it becomes available. These products are tested but come with no guarantees. Live technical support is not available for SparkX products. Does your project require high-precision, cutting-edge distance, speed,.....</p> <p>Listed under: Sensor - Transducer - Detector Projects</p>
27. 	<p>Using Wemos D1 mini to control a brushless motor with ESC and servo signals I’ve recently become interested in making “machines” of various sorts. I was sorting through some of my RC (radio control) plane “stash” the other day and came across various brushless motors and electronic speed controllers (ESC) like these. In RC, Brushless ESCs are usually connected.....</p> <p>Listed under: Motor Projects</p>
28. 	<p>Run a K40 Laser Cutter from Your Raspberry Pi with K40 Whisperer I bought a Chinese K40-style laser cutter about three weeks ago and I’ve been spending quite a bit of time playing with it learning how best to use it. It’s an eminently hackable design, and while mine could cut 3mm acrylic OK ‘straight out of the box’,.....</p> <p>Listed under: CNC Machines Projects</p>

29.

In acrylic Perspex, Lucite, Plexiglass using your cordless drill driver I recently bought a laser cutter (running on a Pi) and started working with acrylic (Perspex). I've sawn, routed and drilled Perspex before. It machines beautifully as long as you're not too 'greedy' with your cuts (and if you're too greedy, it cracks). In exploring the material,..... Listed under: CNC Machines Projects

30.

New Raspberry Pi model 3B+ 1.4 GHz, 330Mbit Ethernet, 802.11ac, PoE It's Pi day (if you do dates in the illogical MM/DD/YY format) so Raspberry Pi is releasing a new version of the Pi 3B. It's called the 3B+, which is logical because it has more to offer than the 3B and is also in keeping with previous..... Listed under: Internet - Ethernet - LAN Projects

31.

How Much Power Does Raspberry Pi 3B+ Use? Power Measurements Since the original Pi came out I've been interested in how much power it consumes. It's become something of a launch week tradition to publish a new chart and some data. So much so that several people ask for it on launch day. This time..... Listed under: Battery Projects

32.

Octopod: Smart IoT Home/Industry Automation Project Octopod, a uniquely shaped full automation system that allows you to monitor your industry and keep security with AI and smart RFID locks. Things used in this project Hardware components Arduino UNO & Genuino UNO Anduino Arduino MKR WiFi 1010 Either this or any other..... Listed under: Home Automation Projects

33.

LoRa gateway and node boards run on Raspberry Pi power Pi Supply is Kickstartering lot LoRa Gateway and IoT LoRa Node pHAT add-ons for the Raspberry Pi, as well as a LoRa Node that works with the Micro:bit. An Arduino node is also in the works. Pi Supply, which has produced a variety of Raspberry..... Listed under: Wireless projects

34.

Raspbian Desktop OS on an Old Netbook Old Netbook with Windows XP Home is likely something you have forgotten about. Breathe new life into the hardware with Raspbian OS desktop. Things used in this project Hardware components Intel Netbook PC (various manufacturers) For this article, I am referencing the HP Mini 110..... Listed under: Raspberry Programmer Projects

35.

Smart Home Hub With Raspberry Pi + Homebridge + Resin OS Want to use a device that HomeKit doesn't support? Get Raspberry Pi running with Homebridge using Resin OS and change you home forever. Things used in this project Hardware components Raspberry Pi Zero Wireless Pimoroni Red/White Raspberry Pi Zero Case AC/DC Micro-B USB Adapter 2A..... Listed under: Wireless projects

36.

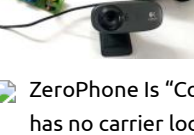

How to Build a Raspberry Pi FM Transmitter Be it a boring afternoon, a monotonous job or a lonely long drive FM radio stations have always kept us entertained. While on the contradictory it should also be agreed that sometimes these FM stations get very boring with the RJ blabbering irrelevant stuff or..... Listed under: Radio Projects

37.

Voice controlled Home automation using Amazon Alexa on Raspberry Pi Have you ever thought about a speaker which can be controlled by your voice!!! What if we can control our home appliances this way and make these appliances smarter? Voice assistants becoming more popular as we are heading towards an era of AI and IoT based systems. .... Listed under: Sound - Audio Projects

38.

ZeroPhone Is "Coming Soon": A Raspberry Pi-Based, Linux-Powered Phone For Just \$50 ZeroPhone is an open source, Linux-powered, \$50 smartphone. It has no carrier locks, bloated apps, or data mining, and it doesn't depend on big companies - instead, its open source hardware and software give you as much control over your phone as possible. ZeroPhone is..... Listed under: Phone Projects

39.

Raspberry Pi Car HUD Objective The goal of our project is to use the Raspberry Pi and create a touchscreen enabled Heads Up Display (HUD) for an automobile. The HUD would display useful, real time information through an easy-to-ready GUI onto a PiTFT screen. Some example information includes the..... Listed under: Car Projects

40.

WarpPI Calculator, Step-by-step algebra calculator for Raspberry Pi. WarpPI Calculator Step-by-step algebra calculator for Raspberry Pi. This project is experimental and strictly related to my calculator, designed to run on an embedded hardware. It works but many fundamental features aren't complete. If you really want to build and test it on your computer..... Listed under: Calculator Projects

41.

Getting started with Embedded Linux Single board computers (SBCs) have been credited with rekindling an interest in electronics across all age groups, young and old. SBCs themselves have been around for a very long time and can be found in many industrial automation systems, but it was the advent of..... Listed under: Internet - Ethernet - LAN Projects

42.

M3 Pi: Raspberry Pi OBD-II Touchscreen Car Computer Abstract There are a wide range of off-the-shelf OBD-II car computers available for purchase, but the majority of them are either prohibitively expensive or simply unreliable. Furthermore, almost all of these devices are closed-box systems that cannot be expanded or modified. As such, this project..... Listed under: Car Projects

43.

Autonomous Quadcopter for Target Tracking Objective There is a wide range of applications for Unmanned Aerial Vehicles that have been made possible through recent advancements in technology. One application uses a quadcopter for surveillance of a region. In this project, we attempted to automate a quadcopter for tracking targets. The..... Listed under: Radio Projects

44. Face Recognition System Introduction Using the Raspberry Pi and some additional peripherals, we have designed and built a face recognition system. In this system there is a camera which will detect the faces presented before it and if shown one face at a time, it will track that..... Listed under: Featured, Video - Camera - Imaging Projects

45. Goodnight Pi: Reducing Raspberry Pi Power Consumption Introduction The Raspberry Pi is a powerful platform to build a variety of projects on. Its full Linux operating system and large variety of peripherals make it extremely useful for a large range of applications that a traditional microcontroller could not handle. However, the Raspberry..... Listed under: Clock - Timer Projects

46. Smart Pen: Final Project for ECE5725 Introduction Nowadays, in order to gain the handwriting results, people often rely on the capacitive touch screen, stylus pen, or other similar devices. They are functional and precise, but not always flexible. Our project combines Raspberry Pi with IMU to build a product that can..... Listed under: Robotics - Automation Projects

47. Raspberry Pi Car HUD Objective The goal of our project is to use the Raspberry Pi and create a touchscreen enabled Heads Up Display (HUD) for an automobile. The HUD would display useful, real time information through an easy-to-ready GUI onto a PiTFT screen. Some example information includes the..... Listed under: Car Projects

48. N5DUX Raspberry Pi Ku-Band Outernet Receiver Project Description Outernet is a service intended for providing web-based information to individuals without access to the web. It is a startup computer and still going through much revision. The service will surely morph over time as interest and finances grow, but for now it's an..... Listed under: Wireless projects

49. Raspberry Pi Controlled Health Monitor System Introduction Health is always an important concern. However, the health of modern people is always interfered by various potential but dangerous factors, such as high blood pressure, and abnormal heart rate. High blood pressure, also called hypertension, increases the burden of the heart to pump..... Listed under: Medical - Health based Projects

50. N5DUX Raspberry Pi ISS iGate Project Description This project is an APRS iGate for ARISS program's digipeater aboard the International Space Station. I have a 2m FM radio tuned to 145.825 MHz. As the ISS passes over my location, the radio passes the received signal from the ISS to a Terminal..... Listed under: Radio Projects

51. Voice Controlled Car Objective The main objective of this project is to exploit the “IoT” potential of Raspberry Pi computer to control a Remote Car using the Voice Commands. The Raspberry Pi with a Microphone connected to it will receive the Voice Commands and will control the Remote..... Listed under: Car Projects

52. N5DUX Raspberry Pi WebSDR Receiver Project Description I created my first Raspberry Pi WebSDR receiver in the Fall 2014. I had long intended to setup a WebSDR station, but grad school and work can really keep you busy. The first receiver on the air worked well until a suprise electrical storm..... Listed under: Radio Projects

53. Raspberry Pi gets its own app store with latest OS update The latest release of the official Raspbian OS will make it easier to find the best software for the credit card-sized board. A large factor in the runaway success of the \$35 Raspberry Pi is how easy it is to get started with the tiny..... Listed under: Raspberry Android

54. N5DUX Raspberry Pi Generic Setup Description This is a howto document created as a basis for all my other Raspberry Pi Progjects. Here, I list the basic hardware needed as well as the steps necessary to create your own basic Raspberry Pi setup. This is just the beginning of several..... Listed under: Memory - Storage Projects

55. Physical Computing – Scratch 2.0 for Raspberry Pi Story This is my 3rd tutorial with a focus on Scratch and Physical Computing. Regarding this topic, I have already published: Physical Computing - Scratch for Arduino, where as the name says, I explored how to use Scratch and Arduino to interact with the physical..... Listed under: LED Projects

56. Flexible Smartwatch Description This project aims to build a thin, flexible smartwatch. It's wrap-around display and touchscreen will allow it to display more data at a glance than current devices. Besides telling time and displaying notifications, the watch will feature pulse rate, blood oxygen, and step sensors..... Listed under: Clock - Timer Projects

57. SIMULATION RASPBERRY PI EMULATOR FOR WINDOWS 10 USING QEMU In this article, you are going to learn how to run Raspbian on your Windows 10 PC. If you really enjoy this article, consider checking out my TechWizTime YouTube Channel. And for an awesome source of Raspberry Pi Accessories, check out my Raspberry Pi Amazon..... Listed under: Raspberry Programmer Projects

58. \$35 NanoPi K1 Plus is a Raspberry Pi-like computer with twice the RAM (and a different CPU) FriendlyElec’s latest single-board computer looks like a Raspberry Pi 3 and has a lot of the same features, including a 40-pin header, WiFi, and a quad-core ARM Cortex-A53 processor. But while the Raspberry Pi 3 Model B+ uses

a 1.4 GHz Broadcom BCM2837 system-on-a-chip, FriendlyElec's NanoPi..... Listed under: Development Board - Kits Projects

59.  Inspection Drone with Walabot Capability Over the past year I have been working on various projects for making commercial inspection drones practical and safe, Here are a few links from my other projects. I refer you to them for the discussions regarding the requirements for commercial inspection work. NXP Flexio..... Listed under: Robotics - Automation Projects

60.  Building an API for Your Raspberry Pi Zero W Wouldn't it be interesting to have an API to control our hardware, like Arduino or Raspberry Pi? We now have the tooling to make this possible and easy. Having an API for our hardware allows us to remotely control and/or monitor our hardware with code..... Listed under: Other Projects

61.  Controlling Widgets using Raspberry Pi This demonstration features the uLCD-220RD-Pi, a display module pack for the Raspberry Pi. The uLCD-220RD-Pi is made up of a uLCD-220RD 1.38" round TFT LCD display module, a 4D Serial Pi Adaptor, and a 5 way interface cable, for quick and easy connection to a..... Listed under: LED Projects

62.  Using Serial Communication (RS232 protocol) – Example 4 Introduction Communication plays an important role in distributed applications. It allows devices in a system to communicate with each other in order to exchange information or coordinate to perform some tasks. Depending on the communication requirements of the application such as wired / wireless, short..... Listed under: Sensor - Transducer - Detector Projects

3.  8 superb — and cheap — Raspberry Pi alternatives As great as the Raspberry Pi is -- and let's be honest, all of the devices in that family are excellent, especially for the money -- it's not the only such device available to buy, and some of the rival systems are arguably better as..... Listed under: Wireless projects

4.  TalkingPi: voice control module for Raspberry Pi A new Raspberry Pi extension module called Talking Pi, manufactured by Joy-it and marketed by Conrad Business Supplies, serves as an extension to allow the control of lights, individual power sockets or devices by voice command. Talking Pi is equipped with a bracket holding 433-MHz..... Listed under: Sound - Audio Projects

5.  Google Voice Assistant Using Asterisk PBX on Raspberry Pi Hardware components: Raspberry Pi Zero Wireless × 1 VOIP (SIP) Phone such as Grandstream GXP1620 Alternately, use a VOIP Softphone for PC (see below) × 1 Software apps and online services: VOIP Softphone Need either a VOIP physical phone or Softphone Alternate VOIP Softphone Only..... Listed under: Sound - Audio Projects

66.  Raspberry Pi rival: Android friendly, 4K-capable Asus Tinker Board gets upgrade Asus has souped up its Raspberry Pi rival, the Asus Tinker Board, adding on-board storage it says will make the board even faster. The new Asus Tinker Board S is broadly similar in spec to the original, but adds 16GB of eMMC storage, which Asus promises will boost..... Listed under: Raspberry Android

67.  The best accessories for your Raspberry Pi Vivek Nanda has been a technical editor and content manager for over 20 years at B2B magazines in the electronics industry. He enjoys creating contextual content, crafting content strategy and working with online product development teams. In 2017, The MagPi Magazine – the official Raspberry..... Listed under: Sensor - Transducer - Detector Projects

68.  Dewalt Raspberry Pi Development Laptop Hardware components: Raspberry Pi 3 Model B x 1 Breadboard (generic) x 1 Arduino LCD Screen x 1 Pi cobbler x 1 OpenBuilds 12V/29A Power Supply x 1 1N4007 – High Voltage, High Current Rated Diode x 1 STORY Ok let me start by..... 88.		Raspberry pi wifi router prank Introduction Do your neighbors leech off your wifi? Got a raspberry pi? We're going to build a wifi router that redirects users to a website of our choice regardless of what URL they request. In our case, we're going to redirect users to People of..... Listed under: Wifi / WLAN Projects
89.		How To Hack An Apple Time Capsule With A Raspberry Pi Introducing the "Pi Capsule." It's currently the only Apple Time Capsule you can plug into your TV...,does this make it an Apple TV? 😊 Ok, ok, let's say you have an old Apple Time Capsule laying around that doesn't work anymore... (there's quite a few..... Listed under: Wifi / WLAN Projects
90.		Transfer MP3 songs in Raspberry Pi to Android Phone using Bluetooth Introduction Chances are you have lots of mp3 files stuck in a PC like I do. I wanted to listen to the songs when I am out. So that's my motivation for making this instructable. Scope This instructable will show: How to install Bluetooth in..... Listed under: Bluetooth Projects
91.		High-End Sound with 7 Inch Touchscreen Control Based on Raspberry Pi and Max2Play With the arrival of the new official Raspberry Pi Touchscreen, we were excited to find applications for it in our Max2Play system. Since audio applications have been one of our main focuses from the start, we immediately thought of a combination of sound card and..... Listed under: Sound - Audio Projects
92.		Ambilight TV I have been always amazed by Philips Ambilight TV. Unfortunately they were pretty expensive, and this is why I have looked for an easy cheap solution to be able to create the same user experience. This was my first Raspberry Pi project, and it's pretty..... Listed under: LED Projects
93.		Raspberry with cam in birdhouse First of all, I'm French and I apologize for my bad English. Before to start, I drew a plan for my birdhouse in order to build it. First, you can see my youtube video here: <a href="https://youtu.be/S3MB3YABeRU">https://youtu.be/S3MB3YABeRU</a> After, I decided to add a camera to see..... Listed under: Development Board - Kits Projects
94.		Cheap 5 volt power adapter Every want to make a portable Pi and all you have is a 12 volt battery? Or have you made a project using a LCD with a 12 volt battery and another then another 5 volt battery for the Raspberry Pi? This instructable will show..... Listed under: Battery Projects
95.		Raspberry Pi IoT ticket printer for online stores Do you have an online store? Are you a maker? Do you want to optimize the selling process? If you answer yes to all the questions, please keep reading because this is the instructable you are looking for. Also if you say no to one..... Listed under: Internet - Ethernet - LAN Projects
96.		Raspberry Pi Bluetooth LE Controller for WS2812B (NeoPixels) Bluetooth Low Energy (aka BLE/Bluetooth 4.0/Bluetooth Smart) is the most recent incarnation of Bluetooth technology developed by the Bluetooth SIG (the organization that maintains the specification). This communication protocol is designed for applications where data needs to be transferred in small amounts at relatively low..... Listed under: Bluetooth Projects, LED Projects
97.		Raspberry Pi Home Automation – Control lights, computers, CCTV and more! Hey guys, first of all I'd like to introduce myself to everyone. My name is Jack, commonly known as Jackk or JackkTutorials over on YouTube where I do technology tutorials but mainly cover Hacking & Security and other useful things that you wouldn't normally know..... Listed under: Home Automation Projects

98.		<p>THE Drone Pi NOTE: THIS INSTRUCTABLE IS BEING WRITTEN This project is a quadcopter powered by a Multiwii and controlled with a Raspberry Pi 2 B. This quadcopter has a particularity because he's using 2 different controllers and he could be piloted with 2 different devices : a..... Listed under: Robotics - Automation Projects</p>
99.		<p>Raspberry Pi Based Wireless FM Microphone A wireless microphone is a microphone without a physical cable connecting it directly to the sound recording or amplifying equipment with which it is associated. Also known as a radio microphone, it has a small, battery-powered radio transmitter in the microphone body, which transmits the..... Listed under: Sound - Audio Projects</p>
100.		<p>ARUPi – A Low-Cost Automated Recording Unit for Soundscape Ecologists This instructable was written by Anthony Turner. The project was developed with lots of help from the Shed in the School of Computing, University of Kent (Mr Daniel Knox was a great help!). It will show you how to build an Automated Audio Recording Unit..... Listed under: Sound - Audio Projects</p>
101.		<p>Analog sensor input raspberry pi using a MCP3008: wiring/installing/basic program So now that we bought the MCP3008 ADC let's get it up and running! Note: This is my first instructables submission so if something is wrong just tell me so and if you like my style leave a comment, also I'm from the Netherlands so..... Listed under: Sensor - Transducer - Detector Projects</p>
102.		<p>Raspberry Pi I/O Breakout cable and plugboard adaptor This is the second in a series of Instructables aimed at documenting all the electronics-related activities that go on at So Make It; Southampton Makerspace (on the South coast, UK) Requests are more than welcome! This simple Instructable intentionally goes into way too much detail,..... Listed under: Development Board - Kits Projects</p>
103.		<p>Toy Truck Powered by Raspberry Pi Here is a great way to impress your friends when you're out and about at the park, by modifying a broken toy truck/car with a Raspberry Pi and Adafruit's DC &amp; Stepper Motor Pi HAT, to existing electronics. And for the controller to..... Listed under: Robotics - Automation Projects</p>
104.		<p>DIY cheap glove controller and propeller car Here, in this instructable I'll show you how to make the cheapest glove for controlling your robots or any other Arduino or Raspberry Pi based projects and for demonstration example I'll also include how a little tutorial how I made a car controlled by this..... Listed under: Robotics - Automation Projects</p>
105.		<p>Reading a Rotary Encoder from a Raspberry Pi I wanted to attach a knob to my Raspberry Pi to act as a volume control for my MPD-based jukebox. Traditionally volume control devices are implemented with potentiometers acting as inputs for amplifiers. A potentiometer is a hardware device with a knob or a..... Listed under: Other Projects</p>
106.		<p>Build your Internet Controlled Video-Streaming Robot with Arduino and Raspberry Pi &lt;The Instructable and the code are ready. Enjoy! Leave a comment with your feedback!&gt; I'm @RedPhantom (aka LiquidCrystalDisplay / Italy), a 14 years old student from Israel learning in the Max Shein Junior High School for Advanced Science and Mathematics. I'm making this project for..... Listed under: Robotics - Automation Projects</p>
107.		<p>Neon A Shop Open/Closed Makerspace Sign on Raspberry Pi 2 (El Paso, TX) Neon is the name we gave to the open/closed sign we have at the entrance of our makerspace. This sign is not only an open/closed sign but it does a whole lot of things. At the makerspace we currently have access keys so this lets..... Listed under: Temperature Measurement Projects</p>
108.		<p>Netbook Laptop Build for \$ 160 – Raspberry Pi Powered. Hey Everyone! I'm 13, and I was inspired by online projects and cool computer builds to see if I could build a laptop. This may not be the greatest tutorial ever, but this laptop has 512 mb of ram, a 1ghz processor, with wifi, around..... Listed under: LCD Projects</p>
109.		<p>Raspberry Pi based answering Ganesha This project is about using Raspberry Pi with USB microphone and Speaker for interactive answering machine. We are calling it Talking Ganesha. In Hindu Culture, God Ganesha is called as God of Knowledge. We have created this project just to create Talking Ganesha in..... Listed under: Sound - Audio Projects</p>
110.		<p>Raspberry Pi. Create your first Connected Light Create your first connected light using Raspberry Pi. Control and monitor a connected light from mobile, tablet and desktop using Lelylan &amp; MQTT. It takes 15 minutes   \$36 (eth) or \$44 (WiFi) in hardware   basic level. Step 1: Hardware For this tutorial you..... Listed under: LED Projects</p>
111.		<p>HACCSY – Hackerspace Access Control and Check in System HACCSY abbreviation stands for Hackerspace Access Control and Check in System and that's pretty much what it does. HACCSY app is meant to run on a Raspberry Pi that's connected to internet and the front door electric strike lock. It does the job of a simple..... Listed under: LCD Projects</p>

112. Raspberry Pi 4x4x4 LED Cube I've been fascinated with LED cubes for a while now, but haven't been able to bring myself to build an Arduino-based cube. They turn on quickly and nicely, yes, but writing the code is a horrible mess of bits and bytes. The Raspberry Pi's Python-based..... Listed under: LED Projects

113. RasPi Two-Player Arcade Coffee Table Here is my version of the Raspberry Pi arcade coffee table. I got the idea from other great instructables on here and wanted to share my experience with the build. The table can play games from multiple video game eras including NES, SNES, Sega, Playstation,..... Listed under: Game - Entertainment Projects

114. Monitor an older UPS status with a Raspberry Pi Here is a small mod I made for an OPTI-UPS VS575C. The ups has a serial port and works well with Windows, along with a serial to USB adapter and the Opti-UPS 'Sentry' software, the UPS can tell Windows when it has switched to battery..... Listed under: Other Projects

115. DIY Ambient Lighting with Hyperion. Works with HDMI/AV Sources || Raspberry Pi This is an expansion of my previous Ambient Lighting build. Take a look at it first: <http://www.instructables.com/id/Build-your-own-Amb...> This time I will add a new function to my DIY Ambient Lighting. Until now It only works with the Raspbmc software. That means that I can not..... Listed under: Other Projects

116. Portable Raspberry Pi (RetroPie Handheld) Build Guide Part 1 This is a guide for making a portable handheld retroPie system. this is only a guide, this is not really a detailed step by step how-to, although you will see how easy(or hard) it can be. this assumes you are not a beginner and you..... Listed under: Development Board - Kits Projects

117. Rolling Alarm Robot Ever find yourself turning off your alarm clock without realizing it only to wake up an hour later and have to race out the door? In this build we are going to build a robot alarm clock that makes you work to turn it off!..... Listed under: Robotics - Automation Projects

118. Runnerpi: a wifi-streaming POV camera For my IRL game The Chase, I need multiple, body-mountable, wifi-connected, live-streaming cameras. Requirements: real time streaming on demand - meaning I can switch it on remotely decent picture (hd not required...yet) mount to body or objects via gopro accessories available via local wifi network..... Listed under: Video - Camera - Imaging Projects, Wifi / WLAN Projects

119. Raspberry PI night vision goggles. Very simple and cheap Infra-Red night vision googles, using a model A raspberry pi, a NOIR camera and Quantum FPV Goggles. For a while now I have been playing with Multicopters, and whilst I prefer to make the models myself and fly them properly with..... Listed under: LED Projects

120. Drinking Dog – Dogs watering and spying system Drinking Dog is an easy project that can help you to take care of your pet. During the summer, when i leave at home my dog for several hours, i have the problem that water inside its bowl become warm in few time. Then i've..... Listed under: Home Automation Projects

121. How a headless Raspberry Pi can tell you its IP address By now, most Instructables users are at least familiar with the Raspberry Pi. It's a full 32-bit computer in the dimensions of a man's wallet. You may even own one and love that it can control lots of electronic objects while still streaming media or..... Listed under: LCD Projects

122. Join the IOT with your Weather Station – CWOP Do-Wop, Do-Wop the CWOP.... In this New Instructable by SwitchDoc Labs you will learn What is CWOP (Citizens Weather Observation Program) How to connect a Raspberry Pi based Weather Station to CWOP What Software Do You Need? How to Register at CWOP How to See..... Listed under: Temperature Measurement Projects

123. Internet of Things (IoT) Extension Lead Hi Makers! Intro It's about time I shared this one with you all. This project has been going so long, you would not believe. I started this before our Hack Space existed [2011 ish?], and has continued to be in a transient 'not finished, might..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

124. RaspiTrap V1.0 Hi all, I want to present my Raspberry Pi project. An animal friendly mousetrap with photo, video and email function. You may ask, why somebody would build such a mousetrap? Why not? Video on Youtube Step 1: C.A.D. Design First of all I tried the..... Listed under: Video - Camera - Imaging Projects

125. Minimal RaspberryPI base This is a plan for immobilising a Raspberry PI in a domestic environment, without children or pets, in order to run it without killing it with static. I have no idea whether this level of precaution is required, but it's been about two weeks, and..... Listed under: Temperature Measurement Projects

126.

Home automation with node js , raspberry pi and heimcontrol In tutorial will make overview of using heimcontrol platform (is NodeJs application for home automation Open Source under MIT license) Some of there features: Responsive :The responsive design allows you comfortable control of your home devices using your smartphone or tablet. Everywhere : Open your..... Listed under: Home Automation Projects

127.

Home Monitoring – Support A Loved One Remotely We cannot be around the ones we love as much as we would wish. It is hard enough being there for your children but what about parents who might live hours away up the motorway or just across town. I know from my personal situation..... 197.		Configuration Utilities for XBee Radios Xbee Radios I purchased two XBee Series 1 Module (Freescale 802.15.4 firmware) from Adafruit. These are manufactured by Digi and are low-power module with wire antenna (XB24-AWI-001). They have a 250 kbps RF data rates and operate at 2.4 GHz. These radios use the IEEE 802.15.4 networking protocol and can perform point-to-multi-point or peer-to-peer networking ,..... Listed under: Radio Projects
198.		NetWorker – an advanced web server with a microcontroller An Internet connection would be a valuable addition to many projects, but often designers are put off by the complexities involved. The 'NetWorker', which consists of a small printed circuit board, a free software library and a ready-to-use microcontroller-based web server, solves these problems and..... Listed under: Internet - Ethernet - LAN Projects
199.		PCB designing and isolation milling using only free Software In this Instructable I will show you how to design and fabricate your own PCBs, exclusively using free software that runs on Windows as well as on a Mac. Things you need: computer with internet connection cnc mill/router, the more accurate the better 45°/20° V-Bit..... Listed under: Development Board - Kits Projects
200.		Solar Phone Charging Back Pack Step 1: Materials and Tools Materials (1) backpack. There are 2 requirements when choosing a good backpack for this project: room to install your solar panels and a pocket to store your cell phone. The Drifter square backpack is perfect for this project. (1) portable..... Listed under: Phone Projects, Solar energy projects
201.		Build an Intruder detector with Raspberry Pi and robomq.io Device, sensors and systems connecting together are driving the next generation of applications creating the Internet of Things (IoT). robomq.io provides an open standard based platform to connect your devices and sensors to the back end applications, systems, processes and people, enabling you to build..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
202.		Analogue Sensors On The Raspberry Pi Using An MCP3008 inputs which means it is a bit of a pain to use many of the available sensors. I wanted to update my garage security system with the ability to use more sensors so I decided to investigate an easy and cheap way to do it..... Listed under: Sensor - Transducer - Detector Projects
203.		LED Rubik's Cube With Arduino In this instructable I'll show you how you can build your own LED Rubik's cube. This project was done for an introductory electronics course at Pomona College. Groups were given approximately two months to complete a project of their choosing, the only requirement being that..... Listed under: LED Projects
204.		Access Control of Door and Home Security by Raspberry Pi Through Internet 1 INTRODUCTION In this modern world crime has become ultra modern too! In this current time a lot of incident occurs like robbery, stealing unwanted entrance happens abruptly. So the security does matters in this daily life. People always remain busy in their day to..... Listed under: Home Automation Projects, Security - Safety Projects

205.		Model Railway Automation This note introduces my experiences of using the Raspberry Pi to automate a model railway. Two aspects are covered: •Sending commands to a DCC controller •Detecting a train’s position. Sending commands to a DCC controller The RPi is connected to a Hornby Elite DCC controller. .... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
206.		Raspberry Pi GPIO and LED Flash an LED - Works Remotely In this exercise you update your Pi, install the GPIO tools, and write a program to flash an LED ten times. If you use PuTTY to log in remotely, you could flash LEDs on another continent. I have tried. .... Listed under: LED Projects
207.		Solar Powering My Home! My home has been solar powered since June 2013 and the power system has proven its reliability. I'm a proud owner of an OFF GRID solar power system. I decided to publish this instructable to let fellow DIYers know the basics to design and install. .... Listed under: Home Automation Projects, Solar energy projects
208.		On/Off Project – Switch a light on/off using your smart phone f you found this article after doing a search on Google, welcome! On this website you will find plenty of content around DIY home automation using open-source hardware. Enjoy the article! I have been asked a lot about writing tutorials using the Raspberry Pi for home automation, as well. .... Listed under: Phone Projects
209.		Solar powering a Raspberry Pi for Bitcoin mining Introduction: As a simple one-GPU bitcoin miner, the recent growth in ASIC (Application specific integrated circuit) bitcoin mining hardware has been a real gamechanger. In my case, there are some disadvantages to the change, namely having to spend the few bitcoins I have mined on. .... Listed under: Solar energy projects
210.		Air Pollution Detector This device is intended to provide the user with a cost-efficient means of determining air quality. Our sensor focuses on the five components of the Environmental Protection Agency's Air Quality Index: ozone, particulate matter, carbon monoxide, sulfur dioxide, and nitrous oxide. This device detects all. .... Listed under: Sensor - Transducer - Detector Projects
211.		Home automation with Raspberry Pi 2 and Node-RED Node-RED is a visual tool for wiring the Internet of Things that can be run on a Raspberry Pi and allows for rapid prototyping of projects. In this tutorial we will first set up Node-RED on a Raspberry Pi 2, before creating a flow that. .... Listed under: Home Automation Projects
212.		Raspberry Pi in a NES Case – Part 1 – Wiring up the front panel and external connectors Raspberry Pi is a great project computer, it's cheap (\$35), runs Linux (or Risc OS) and has lots of resources available around it. When mine arrived, I didn't really know what to use it for, but then it hit me: I can build an emulator. .... Listed under: Game - Entertainment Projects
213.		Resources – Computing Club Sessions – Raspberry Pi 2 – Python Overview This is an opportunity to look at another language (Python), another IDE (IDLE) and have another go at Scissors, Paper, Stone. Hardware This is going to use the GPIO pins (the two rows of 13 pins - 26 in total) on the Pi. We'll. .... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
214.		Talking to a ZWave Switch using open-zwave Z-Wave is a wireless communications protocol designed for home automation, specifically to remotely control applications in residential and light commercial environments. The technology uses a low-power RF radio embedded or retrofitted into electronics devices and systems, such as lighting, home access control, entertainment systems and. .... Listed under: Home Automation Projects
215.		Raspberry Pi Garage Door Opener with GaragePi Introduction When I was little, I used to push the garage door button from inside the garage and then run out the garage while it’s closing... carefully jumping over the sensor so I don't trip the safety mechanism. It was easy back then and a. .... Listed under: Home Automation Projects
216.		How To Use GPIO Pins On Raspberry Pi – Buttons And LED Tutorial What Are The GPIO Pins on Raspberry Pi? A great feature on the Raspberry Pi is the GPIO pins (stands for General Purpose Input Output). These GPIO pins on Raspberry Pi can be found in 2×13 header pins which can perform tasks include SPI, I2C, serial UART, 3V3. .... Listed under: LED Projects
217.		Design Your Home with Autodesk Homestyler Autodesk Homestyler is a free online home design software, where you can create and share your dream home designs in 2D and 3D. The online tool allows you to either upload your existing floor plan or create a new one with simple drag and drop. .... Listed under: Home Automation Projects
218.		Announcing OpenSprinkler Beagle (OSBo) v1.0 Following the sneak-peak preview, I am excited to announce that OpenSprinkler Beagle (OSBo) v1.0 is now officially released! OpenSprinkler Beagle is an open-source sprinkler / irrigation extension board for the BeagleBone Black. It uses four GPIO pins to control an unlimited number of sprinkler valves. .... Listed under: Wireless projects
219.		beakn v0.3 : DIY Lync Status Light with a RaspberryPi, .NET, Mono and MQTT I’m continuing to build out “beakn” my DIY Lync Status light. This is what I’m calling a “maker experience” project. I want to know what a maker goes through to build things so I’m building it with as many different platforms as possible. I've built. .... Listed under: How To - DIY - Projects
220.		Raspberry Pi OpenCV Pan & Tilt Face Tracker Create your own face tracking, pan and tilt camera on the Raspberry Pi! This tutorial will demonstrate use of the OpenCV (computer vision) library to identify and track faces on the raspberry pi using two servos and a USB webcam. For the interested, I previously. .... Listed under: Video - Camera - Imaging Projects

238. Remote Logic The Raspberry Pi is often hailed for its incredibly cheap price. Other low-cost development and educational boards are available (e.g., the Beaglebone), but for some of these systems, the additional peripherals that are required can quickly amplify the cost. The Raspberry Pi, however, is designed..... Listed under: Wireless projects

239. Aaron’s piHouse Monitor ntroduction I have been using microcontrollers for a long time now. I started in college as part of the program and have never stopped. Professionally, educationally, hobby, I've done projects of all types. Recently I decided to try something with a Raspberry Pi. It is..... Listed under: Home Automation Projects

240. Home Automation with Raspberry Pi The Surveillance System this year I planned to travel with my family to China for a few weeks, so we had to leave alone our house. While being on vacation, I wanted to check sometimes if everything was alright at home. So I decided to..... Listed under: Home Automation Projects

1. Part 2: How to build a High-Definition FPV UAV using a Raspberry PI with HD camera, using a high speed WiFi link This is the second part of a 2-part series on 'How to build a High-Definition FPV UAV using a Raspberry PI with HD camera, using a high speed WiFi link. In my first post on the subject (located here), I discussed the parts I used, and..... Listed under: Video - Camera - Imaging Projects, Wireless projects

2. 3D Printing MouseAir V2 – Part 1 / Raspberry Pi Project The Mouse Air project has been around in various stages since April of 2014. The goal of the project (conceived in a bar, the Fedora in Coeur d’Alene Idaho and named by Sarah, the most excellent bartender there. And some BlueMoon Beer.) was to be able..... Listed under: How To - DIY - Projects

3. Gertboard Open Collector Drivers: ULN2803APG If you were wondering how to use the open collector drivers on the Gertboard version 1, then you have come to the right place. As shown in the diagram, the red area marked out is the open collector driver section. The ULN2803APG is a Darlington..... Listed under: Development Board - Kits Projects

244. Raspberry Pi – homemade level converter for serial communication rs232 3.3 volts to 5 volts TTL for AVR microcontroller I found that the Raspberry Pi serial interface rs232, described in a older post by myself, was too bulky. Pi and AVR should be connected through a less amount of wires. So I’ve searched the best hints to solder a cheap and uncomplicated level converter,..... Listed under: Home Automation Projects

245. PIE1 – Raspberry Pi Sends Live Images from Near Space HAB (High Altitude Ballooning) is a growing hobby where enthusiasts use standard weather balloons to put small payloads typically 100g-1kg into “near space” at altitudes of around 30km or so, carrying a tracking device (so the balloon position is known throughout the flight) and usually..... Listed under: Video - Camera - Imaging Projects

246. Raspberry Pi – RGB LED conversion I was looking at the cost of an Arduino and Ethernet shield and thinking that they are quite expensive compared with a Raspberry Pi. So time to update my Arduino RGB LEDs project to run on a RPi. As noted all over the web the..... Listed under: LED Projects

247. Section 3: Building the Turing Machine Introduction In this project, we shall build a 3-symbol Turing machine using 11 bicoloured LEDs to represent the cells on the tape. Green represents a 1, red represents a 0 and a blank is represented when the LED is off. We shall call these the..... Listed under: LED Projects

248. Pi Ball – A Spherical and Interactive Raspberry Pi 2 Case Here were my requirements - Use a Pi (Raspberry Pi 2 in the case) - Spherical case, that can be bounced, kicked, thrown - Accelerometer onboard to monitor the motion of the ball - Wireless everything! Wireless keyboard/mouse, networking, sound and video (Pi Ball in..... Listed under: Game - Entertainment Projects

249. Temperature Measurement for Lab and Science Projects Introduction Every lab (home, office, school) needs temperature measurement capabilities. Measuring temperature for science experiments is hard – all sorts of materials, liquids, and chemicals may be involved or a large temperature range may need to be covered. The sensor used for this (a thermocouple)..... Listed under: Temperature Measurement Projects

250. A GSM/GPRS & GPS Expansion Shield for Raspberry Pi Today we present an expansion shield for Raspberry Pi to control the very effective GSM/GPRS SIM900 and SIM908 (with GPS) modules: in this way it is possible to extend the functionality of Raspberry Pi for mobile applications (eg: remote control) and, by employing the SIM908..... Listed under: Wireless projects

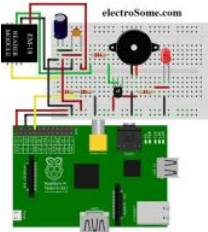

251. Solar Power on the Raspberry Pi – SunAir designed to charge LiPo batteries from Solar Panels and power your Pi. First SunAir Kickstarter Update (Dec 7, 2014) Published here. An earlier generation of this project was used in Project Curacao. You also can track the sun, detect low power conditions and more.

- 

252. Project Coffee: Es(pi)resso Machine ome time ago, I embarked on a project to control my Gaggia Classic Espresso machine with a Raspberry Pi. Obviously, you can buy a fully automatic “bean to cup” machine... but where’s the fun in that! This project started out with the simple idea of..... Listed under: Home Automation Projects
- 

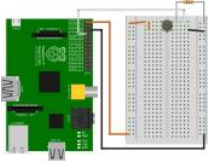

253. G0MRP 29.45 MHz Receiver Project In 2007/8 AMSAT-UK put considerable work into a proposal to the European Space Agency (ESA) to place an Amateur Radio payload on the mass dummy on the maiden flight of the VEGA launcher. Known as iSTAR (Integrated Suite for Teaching and Amateur Radio) it was..... Listed under: Wireless projects
- 

254. Interfacing EM-18 RFID reader with Raspberry Pi RFID (Radio Frequency Identification) uses electromagnetic fields to read, monitor and transfer data from tags attached to different objects. It is not necessary that the cards are to be in visibility of the reader, it can be embedded in the tracked object. The tags can..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
- 

255. Controlling Domestic Hot Water Supply with Raspberry Pi Contents Background Hardware Pi Wiring Heating System Wiring Software Remote Access Gas Consumption Impact Background I want to implement a Raspberry Pi controlled heating and hot water system. On the hot water side, the objectives are Primary Always ensure there is sufficient hot water available..... Listed under: Home Automation Projects
- 

256. Dual DC motor control using pwm with the Raspberry Pi This project uses two IRF 630 MOS-FET transistors for pulse width modulation and two relays to change the direction of the two motors. . The circuit diagram is below. The two IRF 630 MOS-FETs are connected to the GPIO 15 and 18 pins of the..... Listed under: Motor Projects
- 

257. Home Weather Display In this project, we use a Grove DHT (Digital Humidity and Temperature) sensor as a Raspberry Pi temperature sensor. This project uses a Grove OLED display, connected to the Raspberry Pi, to show the temperature and humidity. You can use this project as designed: a simple weather station for..... Listed under: Home Automation Projects
- 

258. Home Energy Monitoring System The Purpose (Mission) Monitor, archive and analyze energy consumption in the house Visualize historical consumption data Access data remotely from Web Eventually include data from other sensors, like temperature, pressure, humidity, motion, light, security, etc. UPDATE: Temperature/Pressure sensors added: Additional Sensors for Home Energy Monitor..... Listed under: Home Automation Projects
- 

259. Connect a sensor to your Raspberry Pi to warn you when there are noxious gases about! o detect a fart with the Raspberry Pi, we need to use a sensor that is responsive to one or more of the volatile sulphuric compounds which make up 1% of flatulence (i.e. the compounds which make farts smell). Essentially, we need to give the..... Listed under: Sensor - Transducer - Detector Projects
- 

260. XMOS startKIT: Building an XMOS and Raspberry Pi Robot XMP-1 Introduction The XMOS startKIT from Farnell (or Newark) is a very low cost (£12 including VAT) processor platform that works well with the Raspberry Pi. Together is possible to construct robotics applications with almost no soldering required. The XMOS startKIT is a near-credit-card sized board..... Listed under: Robotics - Automation Projects
- 

261. Control an LED from your web browser or smartphone using Raspberry Pi A first project – Internet controlled LED In this simple, inexpensive project you can connect a light emitting diode to your Raspberry Pi, and turn it on and off using any web browser. There’s even an app for Apple, Android and Windows smartphones. Prerequisites To run this..... Listed under: LED Projects
- 

262. Usb Hub Schematic Cy7c65632, cy7c65634 hx2vl™ very low power usb 2.0 hub controller cypress semiconductor corporation • 198 champion court • san jose, ca 95134-1709 • 408-943-2600. Click here to receive the iogear newsletter and / or discounts: stay connected; facebook; twitter - iogear news; twitter - iogear..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
- 

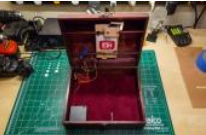

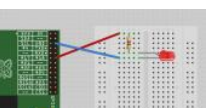

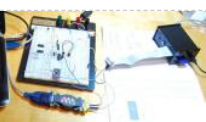

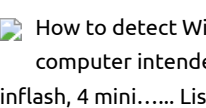

263. More Raspberry Pi Electronics Experiments – Gertboard and Potentiometer-Controlled LED Cluster More Raspberry Pi Electronics Experiments – Gertboard and Potentiometer-Controlled LED Cluster Posted on February 3, 2013 by rakanalysis One of the things which alerted me to the potential of the Raspberry Pi as an electronics control system was the announcement of the Gertboard before the Raspberry..... Listed under: LED Projects
- 

264. Interfacing HC-SR04 Ultrasonic Sensor with Raspberry Pi Ultrasonic distance sensors are designed to measure distance between the source and target using ultrasonic waves. We use ultrasonic waves because they are relatively accurate across short distances and don't cause disturbances as they are inaudible to human ear. HC-SR04 is a commonly used module..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
- 

265. My Raspberry Pi Powered Garage Monitor Update #1: Garage Monitor Memory Leak: Part 1. Update #2: I should point out that the arm on the switch I ended up using bent so it stopped working after about a month of use. I really need to figure out a way to mount..... Listed under: Home Automation Projects
- 

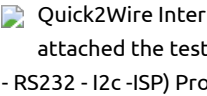

266. 8 Interesting DIY Raspberry Pi Case Ideas The Raspberry Pi is a small, credit-card sized ARM computer that costs a measly \$25. For the money you'll get a full system-on-chip computer capable of running a variety of ARM-optimised operating systems, USB and Ethernet connectivity but no case. Future versions of the unit..... Listed under: How To - DIY - Projects

267.		Driving a bi-polar stepper motor with the SN754410NE double H-bridge and a Raspberry Pi Bi-polar stepping motors use only two coils and are easily recognized because they only have four wires. Most unipolar steppers can be used in bipolar mode by ignoring the two centre taps. Because bi-polar stepping motors produce the rotating magnetic field by reversing the current..... Listed under: Motor Projects
268.		WeatherPiArduino Weather Board WeatherPiArduino is a weather station controller board designed to interface to Arduino and Raspberry Pi computers. It is an interface board developed by SwitchDoc Labs to allow the user to easily build a fully functioned Weather Station while allowing customization of functions. WeatherPiArduino is derived..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
269.		Raspberry Pi Face Recognition Treasure Box Overview Face recognition is an exciting field of computer vision with many possible applications to hardware and devices. Using embedded platforms like the Raspberry Pi and open source computer vision libraries like OpenCV, you can now add face recognition to your own maker projects! In..... Listed under: How To - DIY - Projects
270.		Mobile Raspberry Pi Computer: Build your own portable Pi-to-Go w, yes, the Raspberry Pi Computer, a credit card size mini PC that only cost \$35. There are so many possibilities and uses for these small nano PCs. People have made them into PVRs (personal video recorders), retro gaming machines, weather stations, in-car PCs, jukeboxes,..... Listed under: How To - DIY - Projects
271.		Remote Controlling a Car over the Web. Ingredients: Smartphone, WebSocket, and Raspberry Pi. At Kaazing, we have been experimenting with using a smartphone as a remote control for quite some time now. Those familiar with our demos may have seen our Zing-Pong demo (which is a “Pong”-style game using smartphones to control the paddles over WebSocket) or our..... Listed under: Wireless projects
272.		Back in Black – a DIY raspberry pi Boombox: Wire it Up – Power Power The BinB boombox has a different power setup from the prototype - it can be battery powered or AC powered. If you want to run the boombox often on battery, the recommended choice is an SLA (Sealed Lead Acid) battery of good quality. These..... Listed under: How To - DIY - Projects
273.		ICStation 4X4X4 Light Cube Kit for Arduino UNO CSTATION 4x4x4 Light Cube kit uses 64 cuboid LED,and controlled by Arduino. Expansion board uses two 74HC595 shift register chips, using eight I/Os can light the 4x4x4 Light Cube,it’s hardware resources needed is less than other 4x4x4 light cubic expansion board(needs 20 I/Os to control)..... Listed under: LED Projects
274.		Interface LED with Raspberry Pi Solution Connect an LED (see “Opto-Electronics”) to one of the GPIO pins using a 470Ω or 1kΩ series resistor (see “Resistors and Capacitors”) to limit the current. To make this recipe, you will need: Breadboard and jumper wires (see “Prototyping Equipment”) 1kΩ resistor (see “Resistors..... Listed under: LED Projects
275.		Raspberry Pi – RS232 Serial Interface Options (Revisit) In the previous article Raspberry Pi - Installing a RS232 Serial Port we discussed how to install a RS232 port on the Raspberry Pi. This is a follow up article to suggest a few alternative interface options as the XBit RS232 level-shifter board has been..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
276.		Simulink Offers Easy, Graphical Programming for Raspberry Pi & Arduino Every hardware hobbyist has experienced that painful moment when you smell smoke and discover that it's coming from your hardware project. It's a rite of passage. Wouldn't it be nice if you could test your hardware before burning it? At the Open Hardware Summit, held..... Listed under: How To - DIY - Projects, Raspberry Programmer Projects
277.		1-wire temperature sensor DS1820 at Raspberry Pi (GPIO directly) To measure the indoor or outdoor temperature with the Raspberry Pi, there are several possibilities. This article describes the version with the minimal amount of external components. This is based on the DS18S20 temperature sensor and the software emulation of the 1-wire protocol. The DS18S20..... Listed under: Temperature Measurement Projects
278.		Raspberry Pi Serial Port Many of the GPIO pins on the Pi have other special uses. The most useful of these are the serial port pins #8 and #10, which are transmit and receive for an RS-232 serial port. By default this port will output diagnostic messages during boot..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
279.		Hacking the Lego EV3: Build Your Own Object Sensor “Eyes” Although the Lego Mindstorms EV3 kit comes with a variety of cool sensors, wouldn’t it be awesome to build your own custom sensing device? This project will show you how to create your own unique object sensors for your Lego EV3 controller using basic electronic..... Listed under: Sensor - Transducer - Detector Projects
280.		How to detect WiFi access points using Raspberry Pi As you can see – this system is used as a mobile wireless network (WLAN) detection point. A small computer intended to be used for WLAN collection, including from UAVs. Hardware: IBM Power PC 405GPR processor, 64 MB SDRAM, 16 MB of built-inflash, 4 mini..... Listed under: Wireless projects
281.		Multi-Cell LiPo Charging Overview Lithium Polymer Batteries pack a lot of power in a small package. But they can be tricky to charge safely. The Adafruit LiPo Chargers all provide a charging cycle designed to safely charge 3.7v Lithium Polymer cells. But what if your project needs more..... Listed under: Battery Projects
282.		28BYJ-48 Stepper Motor Control System Based On Arduino With ICStation Team introduces to you this stepper motor control system based on the ICStation UNO compatible with Arduino. It uses a ULN2003 chip to drive it. The working voltage is DC5V. It is widely used on ATM machine, inkjet printer, cutting plotter, fax machine, spraying equipment,..... Listed under: Motor Projects

283. Touch Pi: Portable Raspberry Pi Overview In this project we're building a portable Raspberry Pi using the model A+, PiTFT 3.5" display, Powerboost 500C and a 2500mAh lithium polymer battery. We designed this very simple case in CAD - It's a two part enclosure that's fasten together with screws. All the..... Listed under: Development Board - Kits Projects

284. Quick2Wire Interface Board – Assembly and Troubleshooting TESTS (1) On the Quick2Wire boards there is a 3-pin male header with pins for 5V, 3.3V, GND. I attached the test circuit to 5V and GND — it glowed as it should. Same for 3.3V and GND. So I decided that the board was..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

285. Know all about Raspberry Pi Board Technology The Raspberry pi is a single computer board with credit card size, that can be used for many tasks that your computer does, like games, word processing, spreadsheets and also to play HD video. It was established by the Raspberry pi foundation from the UK..... Listed under: Development Board - Kits Projects

286. Control stepper motors with Raspberry Pi and node.js Continuing the journey on how to control things with node.js on the Raspberry Pi I set up 2 stepper motors and controlled them in real time with Hydna. You can can read futher on how to install Hydna on Raspberry Pi here. The to pins..... Listed under: Motor Projects

287. Interface I2C with the Raspberry Pi Note: Full source (still not finished) is available github.com/drcrane/raspberryrfid. The Raspberry Pi has a few different interfaces available to it, one is I2C (a protocol created by Philips and used in many places, it is the basis of VESA DDC!). I had the opportunity recently..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

288. Raspberry Pi GPIO driving Servo I have experimented with GPIO on the Raspberry Pi, just turning an LED on and off here. But since then Ben Croston has improved the RPi GPIO Python library to do most of the work in C and I can confirm that it is a..... Listed under: How To - DIY - Projects

289. Raspberry Pi B+ for Sound source Still I need good PC for ripping and have to buy source from internet(online). if do you have Good DAC probably reproduce good sound from Raspberry Pi B+ Music server.Raspberry Pi B+ is very small PCB actually small PC for kids in UK.but for Audiophile..... Listed under: Sound - Audio Projects

290. Some fun with 16 RGB LEDs and a Raspberry 3.14159 RGB LEDs consist of a red, a green and a blue LED conveniently encapsulated in one package. Theoretically one such should be able to produce any colour of the rainbow, but I have restricted my project - for reasons explained later - to just red,..... Listed under: LED Projects

291. Lunchbox Internet Radio Guide What I've made is a radio with 6 buttons and a 20x4 LCD screen. There is an "ON" button, and "OFF", "BACK", "PLAY", "STOP" and "NEXT". It is connected to the internet via WiFi, and it powered by a USB hub connected through a Pi-Supply..... Listed under: Radio Projects

292. Connecting SNES sockets to the Raspberry Pi: An assembly guide In a previous post, I described my idea of a universal console with the Raspberry Pi. I presented, what I called, the SNESDev-RPi, which is an SNES-controller interface for the Raspberry Pi. A core element of this interface is a SNES-adaptor PCB that I recently..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

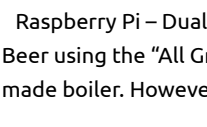

293. Raspberry Pi Serial Port and Breakout Board erial port to the Raspberry Pi and breaks out some of the Pi's pins for experimentation. The interface board was designed to be simple and used for initial experimentation. It can be built on a single-sided PCB using home-made PCB fabrication methods. KiCad source files..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

294. TNC-X for Raspberry Pi (Packet radio) AX25 TNC-Pi is a special version of TNC-X designed to interface directly with the Raspberry Pi computer. It can connect to the Pi either via the Pi's serial port, or via the I2C protocol. In the latter case, a single Pi can support multiple TNC-Pi's at..... Listed under: Radio Projects

295. Using the Raspberry Pi GPIO with Python So you got your Raspberry Pi, installed an OS and using it just like your computer. Great! Now what? You didn't buy a Raspberry Pi just to replace your computer, did you? Well, Raspberry Pi can do a lot more... much more than your computer..... Listed under: Development Board - Kits Projects

296. Raspberry Pi – Dual Element Homebrew Boiler/HLT and Fermentation Fridge Controller The purpose of this device is to allow someone who makes Homebrew Beer using the “All Grain” method, to control the temperature and timings of various parts of the beer making process when used in conjunction with a home made boiler. However, the physical device,..... Listed under: Home Automation Projects

297. NES Controller on the Raspberry Pi Part 1: The Hardware & Driver Some time back, I joked that the Raspberry Pi's GPIO port really stood for Game Port IO... So to make that joke come true, I present a way of interfacing the NES Joysticks to the Raspberry Pi. First you..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

298. Banana Pi BPiDuino UNO Board Module, compatible with for Arduino UNO, available for Raspberry Pi Quick Details Package: plastic bag sealed; carton box packed; Model Number: BPI UNO Type: Drive IC Brand Name: BPI Place of Origin: Guangdong, China (Mainland) Dissipation Power: 3W Operating Temperature: -10 ~ 65°C Supply Voltage: DC 5V Application: Computer Specifications Banana Pi BPiDuino UNO Board..... Listed under: Development Board - Kits Projects

299. Expansion Shield for RaspberryPi compatible with Arduino Let's expand RaspberryPi functionalities with a shield that is compatible with the Arduino pinout and with an onboard analog to digital converter with 16-bit resolution. Further expansions that we will present in the future will allow you to add a DAC, a number of additional..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

300.  ICStation 16 Music BOX DIY Kit Sound Module 1.Features 16-tone box under your control, arbitrarily issued 16 kinds of interesting analog sound, both an electronic toy can also be used as a doorbell or alarm. 2.A suite of profiles: Kit Model: BOX-16 Operating voltage :4.5-5V PCB size: 48mm (length) \* 42mm (wide) Control..... Listed under: How To - DIY - Projects

301.  Switching mains electricity with a Raspberry Pi and a remote control Home electronics can open up a new dimension in home automation especially when used with an Arduino or Raspberry Pi. There is however a very real danger when using mains electricity, including risk of electricution and danger of electrical fires if the components are not..... Listed under: Home Automation Projects

302.  Make a torch and burglar alarm in Scratch with the CamJam EduKit and ScratchGPIO First steps Like many projects, this one began with Lego. To stop the breadboard sliding all over the place, I created a Lego housing for it and the Raspberry Pi that would keep them conveniently together. My Raspberry Pi is in a PiBow case, which..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

303.  What is a serial-to-parallel shift register? A serial-to-parallel shift register (or SIPO: Serial In Parallel Out) lets you take a sequence of signals on one output, and split them up into several separate outputs. For example, if you don't have enough GPIO pins on your Raspberry Pi, Arduino, or other computer/microcontroller,..... Listed under: [How To - DIY - Projects](#)

4.  Raspberry Pi Motor Controller Overview An AVR, typically an ATmega168P, is controlled from the Pi via the 3.3V UART, and provides the PWM signals to the Motor Driver. Features Controlled via the UART on the Pi GPIO Header. Up to 2A bi-directional current per channel at up to 46V..... Listed under: Motor Projects

5.    Lighting an LED using a Breadboard & a Raspberry Pi Lights, Jumpers & the Resistance – Jumper wires are typically 22 gauge solid-core wires with insulation pre-stripped and readied for insertion in or out. Resistors resist the flow of electrical current, thereby controlling WHERE and HOW FAST it flows. [Thought experiment: If controlling water, using..... Listed under: LED Projects

306.  Make an alarm clock with a Raspberry Pi Breadboard If you're new to electronics and the Raspberry Pi (RPI), you might not be familiar with the breadboard. The idea of the breadboard is to allow you to connect up electrical components without needing to solder wires or any other elaborate procedure. It's basically..... Listed under: Clock - Timer Projects

307.  AngelBlocks – Maker Kit Introduction AngelBlocks is an open source smart home building block system that is suitable for a wide range of users. Homeowners with little or no technical skills will find AngelBlocks intuitive and easy to use. Makers, hackers, and developers will love AngelBlocks because they can..... Listed under: Home Automation Projects

308.  Super Mega Ultra Pi Boy 64 Thingy Build Getting Started! I had recently bought an original Gameboy DMG from Good Will for a whopping \$5.00, condition unknown. Taking a gamble, I purchased it and took it home to find that it had severe damage caused by a battery that exploded and leaked all..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

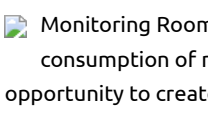

309.  Raspberry Pi gains Wolfson HD audio card Newark Element14 and Wolfson have launched an HD-ready Wolfson Audio Card for the Raspberry Pi with 192kHz sampling, MEMS mics, and I/O including S/PDIF. The Wolfson Audio Card extends and enhances the Linux-ready Raspberry Pi's audio features beyond its native HDMI output with onboard HD..... Listed under: Sound - Audio Projects

310.  ULN2803 8-channel RC Servo Port for Raspberry Pi Bring in some muscle to your output pins with 8 mighty Darlington's! This driver chip contains 8 drivers that can sink 500mA from a selectable 5V or DC input voltage supply and has kickback diodes included inside for driving coils. This will let your little..... Listed under: Motor Projects

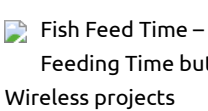

311.  Monitoring Room Temperatures with Moteino's and Raspberry Pi Introduction Following on from using a Raspberry Pi to capture the electricity consumption of my home, I have over the last 2 years installed Solar Thermal Hot Water panels and very recently Solar PV. This meant that I had an opportunity to create something I..... Listed under: Temperature Measurement Projects

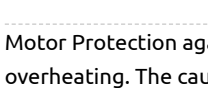

312.  Send Raspberry Pi Data to COSM The combination of connecting a Raspberry Pi to COSM makes creating a internet of things much easier than it has been in the past. The Pi with it's easy access to ethernet / WiFi and COSM's drop dead simple usability will graph all sensor data..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

313.  Fish Feed Time – Wireless Socket Control with the Raspberry Pi Overview Being a bit of an unnecessary geek, I've decided to pimp out my fishtank with a Feeding Time button! "What's one of those?" I hear you ask! Well... As it's a Marine Reef tank, it's a bit fiddly to feed some of the corals..... Listed under: Wireless projects

314. **Motor Protection against Single Phasing and Overheating** The rise in temperature level of a motor during its operation beyond a permissible limit is known as overheating. The causes of motor overheating are motor overloading, distortion in the supply voltage, impaired cooling capability, unbalanced supply voltages

etc. Because of overheating, we can face..... Listed under: Motor Projects

315.

Quick2Wire Analogue Board – Connecting to Raspberry Pi This is a short report on how to connect Quick2Wire’s analogue board directly to a Raspberry Pi. The key is the pinout for for the six-pin boxed headers on the Q2W board. I ignored the 5V and Int lines, running lines only for 3.3V, GND,..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

316.

Piezo Ring Tones with Raspberry Pi The ringtone text transfer language (RTTTL) is a way to represent music data for play on older mobile phones. The format was created by Nokia for thier phones, but it also works with GPIO pins and a piezo buzzer. This project shows how to use..... Listed under: Sound - Audio Projects

317.

Hooked on Arduino & Raspberry Pi Infrared Fan Speed Control This project demonstrates using an infrared light beam to measure the speed of a fan, and PWM to adjust the speed to a preset value. I used a small 12 Vdc fan from a PC CPU heat sink. It will run..... Listed under: Wireless projects

318.

Raspberry Pi Launches New Model B+ The Raspberry Pi Foundation today announced the final revision of the original Raspberry Pi development board. The Raspberry Pi development board since its introduction has actually sold over 3 million units globally, indicating the undoubtable success of the hardware platform. One of the major reasons..... Listed under: Development Board - Kits Projects

319.

Raspberry Pi B+ Power Protection Circuit The circuit functionality is mostly obvious. There is polyswitch F1, a self-resetting fuse which protects the RPI from overcurrent condition. There is the Transient Voltage Suppressor (TVS) diode D5 which protects the RPI against static discharge and possibly overvoltage condition. However, the function of mosfet..... 378. Raspberry Pi & Arduino: a laser pointer communication and a LDR voltage sigmoid Plugging the laser module on Arduino Isn't easy to plug a module when you have no datasheet or some wiring schemes, the chances are that you'll probably burn it if you provide a current greater than the supported. The module I have was bought on..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

379. Raspberry Pi Controls LEGO Power Functions Train Project Description LEGO Power Functions RC infrared control is specified in LEGO Power Functions RC v120.pdf But I wanted to know what my controller (8879 LEGO Power Functions IR Speed Remote Control) was actually sending. So I hooked it up to a scope. Right STOP..... Listed under: Wireless projects

380. 1. Simple way to control 12V DC Motor using Raspberry Pi's GPIO port and NPN transistor I needed to control a DC motor from my Raspberry Pi's GPIO port as part of my time-lapse dolly project. I had to be able to turn the motor on for approximately 150ms which would in turn move the dolly along by 3mm. Parts 12VDC..... Listed under: Motor Projects

384. Digital Music Stand: Raspberry Pi + Touchscreen IMSLP is one of the greatest things to happen in the classical music world in recent memory. For those who don't know, IMSLP.org is an online library of any and all sheet music that is no longer under copyright protection. You can find pretty much..... Listed under: Sound - Audio Projects

386. Debug GPIO with LED During the daily device driver development routine, we often need to understand the behavior of the GPIO pins to understand if there is I2C traffic or if our driver is handling the coming interrupts and so on. Sometimes is not enough to mount the debugfs..... Listed under: LED Projects

388. How to Read Inputs Using Signal in Raspberry Pi The Raspberry pi is a mini computer which is designed in a single board with all the essential components required for running an operating system. The Raspberypi board is powerful enough to run large operating systems like Linux, Mac and Windows. Linux operating systems especially..... Listed under: How To - DIY - Projects

389. Python Web Server for your Raspberry Pi You know some basic Python or you want to learn some and you want to make a website, a web server, a web crawler, etc. - But where do you start? Services like Heliohost or Vlexofree are great for free Python website hosting, but they..... Listed under: Raspberry Programmer Projects

390. How to Use Timer in Raspberry Pi The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on Chip). This SoC has the powerful ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller having the peripherals like timers,..... Listed under: Clock - Timer Projects

391. Connect Raspberry Pi to Projector or TV When we have a meeting in a meeting room, we need to connect our laptop to a projector to show our desktop. But sometimes, several persons need to show their desktop, they need to change their laptop. This is complex and waste some time. Currently,..... Listed under: Wireless projects

392. Raspberry Pi Sensor and Actuator Control Typically as a programmer you will work with data on disk, and if you are lucky you will draw pictures on the screen. This is in contrast to physical computing which allows you as a programmer to work with data sensed in from the real..... Listed under: Sensor - Transducer - Detector Projects

393. How to connect a Lego Mindstorms NXT Ultrasonic Sensor to the Raspberry Pi Abstract Directly connect a Lego Mindstorms NXT Ultrasonic Sensor to a Raspberry Pi. A TCA9517 I2C bus buffer and an additional GPIO pin for SCL is necessary. A short C++ program to read the measured distance is provided. Introduction Raspberry Pi (Pi), despite some shortcomings,..... Listed under: Sensor - Transducer - Detector Projects

394. Bartop Mini Retro Arcade – Raspberry Pi and Customised Icade "Approaching" middle age, wanting an excuse to play with a Raspberry Pi, and having great memories of 80s games (mainly spectrum, sega master system, neo geo, and Atari ST) i decided to build a mini arcade machine / retro emulator. Hopefully some of the things..... Listed under: Game - Entertainment Projects

395. Servo Motor with Raspberry Pi and PWM After my dad and I got an LED to dim using Pulse Width Modulation on my Raspberry Pi, we decided to try to spin a servo motor. We had a bunch of old servo motors on my robotics team at school so I used one..... Listed under: Motor Projects

396. Social Alarm Clock Authors: Alexandru Radovici, Ioana Culic, Maria Tudor - Wylodrin Bogdan Doinea - Cisco Networking Academy This document describes how to build a Social Alarm Clock by a team of five people: a manager, a product designer, two engineers and a programmer. Introduction We are going..... Listed under: Clock - Timer Projects

397. Cubieboard/Raspberry Pi case from old external drive This is the case I made for my Cubieboard/Raspberry Pi which, back in the day, was an external cd writer drive. This case includes: Power supply Silent HDD mount Fan with speed control The first step (for which I, unfortunately, don't have any pictures) is..... Listed under: Other Projects

398. Running an Nginx, PHP, and MySQL Webserver on the Raspberry Pi For my project, I am going to be hosting a website on the Raspberry Pi. I want to be able to set the alarm on the alarm clock through the website and have the C++ program interact with the MySQL database to get alarm times..... Listed under: Clock - Timer Projects

399. Raspberry Pi Scoreboard This is a simple project that tries to use the Raspberry Pi as a Scoreboard.. on a character LCD What we will do in this project is write a python script that will use httplib and rplcd to connect to the internet and display the..... Listed under: LCD Projects

400. Controlling Raspberry Pi with Pi Buddy This is a short tutorial to exhibit the abilities of the Pi Buddy app Step 1: Setting up the Pi In order for the Pi to receive command from the device you must have the necessary files and dependancies installed. Pi Buddy runs off of..... Listed under: Raspberry Programmer Projects

401. Simple GPIO Control using Pi4J The following example demonstrates the simple control of a GPIO pin on the Raspberry Pi. Source Code The source code for this example is included in the github repository: <https://github.com/Pi4J/pi4j/tree/master/pi4j-example/src/main/java/ControlGpioExample.java> /\* \* #%L \* \*\*\*\*\* ORGANIZATION : Pi4J \* PROJECT : Pi4J :: Java..... 404.

DIY Raspberry Pi Connection Board Featured The PCB I did the project in eagle cad placing one Raspberry Pi 2x13 femal connector (step 2.54mm - 0,01") and then placing 4 pin header strip 1x13 with enlarged pads. I need these pads only for soldering the wires to the pcb. After this..... Listed under: Development Board - Kits Projects

405.

Adding a Joystick to the Raspberry Pi Joysticks are really fun to use. They are also much more intuitive than other input devices. Adding a joystick to your Raspberry Pi opens a lot of new doors. You can now use the Raspberry Pi and the joystick to control a robot, a camera, ..... Listed under: Development Board - Kits Projects

406.

Internet Radio with Raspberry Pi Since long past times, when Gugliemo Marconi has amazed the entire World broadcasting his radio signals from the Elettra ship, a subject held dear by electronic engineers has been radio transmission. After these years, the scenario has changed a lot, firstly with the appering of..... Listed under: Radio Projects

407.

Raspberry Pi Picture Frame he picture frame has come a long way since the last post. I now have the wooden frame for it built and almost done but we will come back to that in a minute. Since the last update I have completely remade some of the..... Listed under: Video - Camera - Imaging Projects

408.

Raspberry Pi Sous Vide WIP This project is to build a Raspberry Pi sous vide machine that can be controlled via the web or via a walk up GUI interface. The main goal is to get something fully functional for cheaper than most commercially available solutions, which start at about..... Listed under: Internet - Ethernet - LAN Projects

409.

I2C + Raspberry Pi + Arduino Uno + RPi Camera Board UPDATE: I've revised the circuit design. I no longer recommend connecting the Arduino Uno to the Raspberry Pi's I2C pins together without the use of a logic level shifter. The revised design uses one from www.adafruit.com. As part of a larger project I'm doing right..... Listed under: Video - Camera - Imaging Projects

410.

Raspberry Pi Arcade Game High Score Display for Multiple Locations This Instructable will show you how to use a Raspberry Pi board with an existing computer monitor to create an arcade game high score display for your home or office. You and your family or your co-workers can keep an eye on the latest high..... Listed under: Game - Entertainment Projects

411.

Using both ownCloud and Adufruit's WebIDE on the Raspberry Pi Long story short, I installed both of the aforementioned programs on my Raspberry Pi but, in doing so, I was able to navigate to only ownCloud. After doing some digging around the internets, I found the solution. As smithg400 on Raspberry Pi's forums pointed-out, both WebIDE..... Listed under: Internet - Ethernet - LAN Projects

412.

HC-SR04 Ultrasonic Range Sensor on the Raspberry Pi In previous tutorials we've outlined temperature sensing, PIR motion controllers and buttons and switches, all of which can plug directly into the Raspberry Pi's GPIO ports. The HC-SR04 ultrasonic range finder is very simple to use, however the signal it outputs needs to be converted..... Listed under: Sensor - Transducer - Detector Projects

413.

Build Your First IOT with a Raspberry Pi, DHT11 sensor, and Thingspeak. IOT or Internet of Things is a hot topic! According to the experts everything will be connected to the internet and all our devices and their data will soon be just an IP address away from us. So where do you start if you want..... Listed under: Sensor - Transducer - Detector Projects

414.

Internet controlled SCALEXTRIC Race the Raspberry Pi! We wanted to see if we could control the speed of a car via the internet. When we looked for tips on where to start we found that quite a few people had had a crack at it, but the documentation was all..... Listed under: Internet - Ethernet - LAN Projects

415.

Raspberry Pi Bluetooth+Airplay Audio Receiver combo Let's make a bluetooth audio receiver allowing you hook up your R-Pi to your stereo and use your phone as the sound source. To be honest, this is not a unique project. Plenty of people have attempted to get a bluetooth receiver working, some (less)..... Listed under: Wireless projects

416.

Cloud-based Electronic-Design Tools Gain Traction Suppose you want to create an electronic circuit and a corresponding printed-circuit board for it. What software will you use? Unless you already have a favorite, it might be hard to decide: There's a dizzying array of options, ranging from free software typically targeted at..... Listed under: Other Projects

417.

Raspberry Pi I2c Interfacing and Programming I2C is a multi-device bus used to connect low-speed peripherals to computers and embedded systems. The Raspberry Pi supports this interface on its GPIO header and it is a great way to connect sensors and devices. Once configured you can connect more than one device without..... Raspberry Pi Prototyping Kit This is a basic prototyping kit for the Raspberry Pi. It will allow you to quickly and easily prototype your hardware the needing to buy new kit each time. It is also compact, portable, and a lot more durable than most prototyping kits..... Listed under: Development Board - Kits Projects
419.

Single 3.7V Li-ion cell power back-up for Raspberry Pi I have a small application continuously running on Raspberry Pi board. Sometimes, in my country, we have (short time) mains power failures. In such situation, my Raspberry board, powered by the wall adapter, turns off immediatly, without any attention for open files, transmissions in act,..... Listed under: Other Projects
420.

PiGI – Raspberry Pi Geiger-Müller Interface Geiger counters are basically just devices which enable us to measure ionizing radiation. In the context of human activity we have to deal with natural radiation sources and artificial ones. Some of the materials emitting ionizing radiation are used to create electricity, others were used..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
421.

An Illustrated Introduction to the Raspberry Pi The Raspberry Pi was originally designed to be a tool for hands-on learning about how computers work. It is also a tool that can be used to make all sorts of creative programming projects. The point of the Pi is to be accessible, and I..... Listed under: Raspberry Programmer Projects
422.

Raspberry Pi / Lego Ball Machine In previous posts I detailed how to: Build a Lego marble pump Use C# and Pulse Width Modulation to control motors with the Raspberry Pi Use C# and OpenCV with the Raspberry Pi Camera Module Each one of those projects are pretty interesting in their..... Listed under: Game - Entertainment Projects
423.

LapPi – A Raspberry Pi Netbook The Raspberry Pi is a remarkable machine. Lightweight, powerful, and until now it was completely tethered to a wall socket. The LapPi is built to free the Pi! It's made from a mixture of spare parts, unallocated electronics, and scrapped components & cables I have..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
424.

Monitor your home temperature using your Raspberry Pi At the end of the project you will have a WWW dashboard that looks similar to this: Multiple Sensors Display a temperature history graph per sensor What you need: Raspberry Pi Model A or B The following parts are available through the PrivateEyePi Store:..... Listed under: Sensor - Transducer - Detector Projects
425.

Build a Raspberry Pi-Based Cable Shutter Release for Sony Cameras Replacing a simple and inexpensive remote cable release for your camera with Raspberry Pi may seem like a classic case of over-engineering, but using the tiny machine to control the camera opens up a whole new world of photographic opportunities. Using a simple Python script, you..... Listed under: Video - Camera - Imaging Projects
426.

Controlling DC Motors Using Python With a Raspberry Pi Objective What we plan to do is safely connect one or two motors to the Raspberry Pi with as few components as possible. Once we have the electronics put together on the breadboard, I will show you how to control them easily using Python to..... Listed under: Motor Projects
427.

The “Raspberry Pi” Pie For the "Pi/E Day Contest" on instructables, I wanted to make a pie which I have not made before. I kept thinking what to do and as I saw a few Raspberry Pi Science projects on Instructable, I got an idea of making a Raspberry..... Listed under: Other Projects
428.

MBeat USB-M7HUB 7 port hub The Raspberry Pi is often not able to supply enough power to USB peripherals through it’s own power supply and a USB hub is recommended to ensure power drops don’t cause problems in the processor. This means you will need two plug packs. One to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
429.

Raspicase: Caja para Raspberry Pi (English version here) Bueno, despues de investigar para que podía usar mi Raspberry Pi comprada en raspipc.es , me di cuenta que gracias al sistema operativo Xbian podía conseguir un media center con acceso a los ficheros de mi NAS, a los de un disco..... 434. The Minnow Board – A New Small Form Factor We attended an "Internet of Things" meeting here this week, and Scott Garman introduced us to a new small form factor, the MinnowBoard. The MinnowBoard is very high performance single board computer (SBC) using a 1Ghz Intel Atom processor, but unlike most SBC's it has..... Listed under: Development Board - Kits Projects

435. Arduino watches for a kitchen catastrophe I guess I should start by admitting that this article was inspired by my own stupidity. When I was a kid, I left a frying pan on a lit stove. I was probably confused by the tactile controls on the vitroceramic hob. Unfortunately, I unwittingly..... Listed under: Home Automation Projects

436. Aeroponics with Raspberry Pi and humidity sensor This instructable will teach you how to install an Aeroponics system that is controlled by Raspberry Pi. Aeroponics is plant-cultivation technique that has the roots hanging and is suspended in the air. Nutrient solution is sent to them in form of a fine mist. Aeroponics..... Listed under: Sensor - Transducer - Detector Projects

437. Raspberry Pi Meet Arduino Shield SKU:DFR0311 Introduction What happens when a Pi meets an Arduino? A simple example would be, when building a mobile robot, we use the Raspberry Pi to extend its vision and get a nice tiny monitor. Meanwhile, Arduino handle nicely with the motor driving part and delivers..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

438. Remaking MSR206 RS232 magnetic card reader to USB As you might have noticed, sometimes I work as freelancer in electronics =) It applies not only to fixing PC electronics and mobile phones, but also to repairing, modifying and designing my own solutions in consumer electronics. One of the projects I worked on yesterday..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

439. Simple Raspberry Pi Shutdown Button Since the Raspberry Pi foundation decided to leave out an off button to safely shutdown the Raspberry pi, I'll show you a simple method I came up with to build one, so there are no more excuses for yanking the power cable out of your..... Listed under: Development Board - Kits Projects

440. Intermission Sound Control with Raspberry Pi A few times a year I volunteer to an arts organization and serve as their “house sound and light guy.” I usually run sound and do the lights for the traveling acts if they don’t have a tech with them. The auditorium is in a..... Listed under: Sound - Audio Projects

441. Analog Sensors Reading with Raspberry Pi and Zabbix Supervisor Analog Sensors Reading with Raspberry Pi as Interface The Raspberry Pi has no built in analogue inputs which means it is a bit of a pain to use many of the available sensors. We need a A/D interface easy to configure in the RPi and..... Listed under: Sensor - Transducer - Detector Projects

442. Raspberry Pi Android App communication Hello everyone Because app's are being used almost everywhere, I decided to make my own tutorial on how to make an app and connect to a MySQL database hosted on a raspberry pi. For exchanging the data between the server and the client, I'm going..... Listed under: Raspberry Android

443. Talking to the Formula AllCode robot using the Raspberry Pi The Formula AllCode robotics course is great for makers to test their skills and capabilities or for introducing learners to programming and robotics in a fun and motivating way. The robot is compatible with hardware from Raspberry Pi to Android to iPhone, Windows PC’s, MAC..... Listed under: Car Projects

444. RasPI-Surv: a Raspberry-based scalable SMS remote controlled video surveillance system RasPI-Surv, based on: A system controller based on Raspberry PI A practical (and modifications-friendly) command/telemetry interface via SMS messages, using the very well known SIM-900 module from ITEAD. A set of wireless video cameras with good motion detection feature A internet router/modem with wireless access..... Listed under: Wireless projects

445. Arm/Disarm Using a Switch Project Description In this project I will show you how to arm/disarm an alarm zone using a tactile switch connected to your Raspberry Pi. Software Edit the globals.py file by typing the following command at the command prompt: Configure the arm/disarm variables as per figure.....

Home media center using raspberry pi Using Raspberry pi and a hdmi/vga display from a old desktop monitor, you can create you own home media center. This project is a very simple project and requires minimum prerequisite knowledge of programming/embedded systems design. All components used are off the shelf ! Here are..... Listed under: Home Automation Projects

Raspberry Pi – TESLA BT-100 printer program using GPIO Raspberry Pi BT-100 printer program v0.1 (May 2013) Usage: bt100-tlc [options] SIGNAL GPIO -h print help -D turn debug on OUT\_LEFT: 17 -B bidirectional print OUT\_RIGHT: 27 -t file input text file ..... Listed under: Other Projects

Serial hookup JeeNode to Raspberry Pi One way to connect an RFM12B to a Raspberry Pi is to simply plug in a JeeLink, using the built-in USB capabilities of the RPi. But that’s a bit of a detour – why go through USB? Since the JeeNode’s FTDI connector can use 5V..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry Pi Christmas Tree Light Show This project involves using a Raspberry Pi to drive 8 AC outlets which are connected to Christmas Tree light sets. The AC lights are simple one color strands of lights, but to give a more dynamic range to the light show there is also a..... Listed under: LED Projects

Control raspberry from twitter OBJECTIVE: Use the Raspberry Pi to monitor a Twitter feed and control a mechanical device.If you are not interested in the details of the build and just want to see the result you can watch the vid below. RESULT: Success!!! You can control the "The..... Listed under: Internet - Ethernet - LAN Projects

STLs and Raspberry Pis It’s a weird one. When it first came out, people were struggling to figure out what to do with it. A surprising feature for something that sold out very quickly – the Raspberry Pi. Well, we’ve now come up with another use for them –..... Listed under: Radio Projects

How to turn an USB camera with Raspberry Pi into an Onvif IP Camera? Introduction At this instructable, we will make a new interesting Camera solution, which have never seen before! I would like to show you how can you make connection your USB camera and Raspberry Pi with Camera SDK. The goal is to turn your webcam to..... Listed under: Video - Camera - Imaging Projects

Raspberry Pi 2 Weather Station Our hackerspace (Bloominglabs) recently received an ADS-WS1 weather station from a generous benefactor. Additionally, we were selected by Instructables for the Raspberry Pi 2 hackathon so we got some RPi2’s to hack on. For my project, I decided to use an RPi2 to put our..... Listed under: Temperature Measurement Projects

Raspberry Pi as IR Remote (LIRC) If you are like me and hate to look for TV/projector/speakers remote, you will be happy to know that you can use your Raspberry Pi and your computer or phone to act as IR remote. What you need? Raspberry Pi 940nm IR diode (preferable super..... Listed under: Wireless projects

Raspberry Pi Weather Station Build a personal weather station with Raspberry Pi that emails you the temperature, humidity, and rainfall. \*In a couple of weeks I will be adding a barometric pressure sensor to calculate chance of rain. Step 1: Supplies You will need: Raspberry Pi b and power..... Listed under: Temperature Measurement Projects

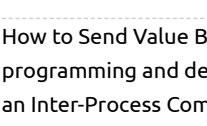

Vertical Hydroponic Farm We call our project RUFs, for Robotic Urban Farm System A vertical hydroponic garden Allowing for high density yields and shorter growth cycles Reducing resource consumption - water, fertilizer and space Labor saving - no weeds or soil to till Higher consistency of crops with..... A Raspberry Pi setup on a desk with a camera module and a monitor, used for a home security system.

Home Security Email Alert System using Raspberry Pi In this tutorial we will look at how to setup up your raspberry pi to take picture of the intruder who enters your home and send an email to you whenever you are not at your home. Step 1: What You'll Need Raspberry Pi running..... Listed under: Security - Safety Projects

533.

A small, green, single-board computer, the Intel Minnowboard.

\$199, 4.2" computer is Intel's first Raspberry Pi competitor The Minnowboard: More expensive, more powerful, more open. With the Raspberry Pi, Arduino Due, and BeagleBone, the world is full of cheap, tiny computers that can be used by creative developers in everything from robots to space flight. One thing these platforms have in common is an..... Listed under: Development Board - Kits Projects

534.

A Raspberry Pi connected to a power supply unit (PSU) via a relay switch.

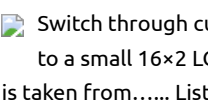

Pi on / off PSU relay switch As everyone is aware the Pi has no on / off power supply switch the only way to turn it off is to physically remove the micro USB cable or to turn off the main adapter / pull plug from the wall. Turning off from..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

535.

A Raspberry Pi connected to a PiPlay module, which is used for playing audio and video.

PiPlay a raspberry pi aplay server Hello, In this instruct able, I will be showing you how to make a raspberry pi airplay server.To start off, you will need to get a raspberry pi. The model A, B or B+ will work.To allow the raspberry pi to run, you will need..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

536.

A Raspberry Pi connected to a 16x2 LCD screen, used for displaying custom data.

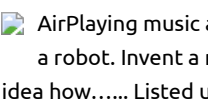

Switch through custom data with 16x2 LCD screen and Raspberry Pi Introduction After starting my circuit testing with some LEDs and switches I moved up to a small 16x2 LCD screen (HD44780 controller) with the Raspberry Pi. The configuration of the LCD pins and base code for output to the 16x2 LCD screen is taken from..... Listed under: LCD Projects

537.

A wooden handheld device with a Raspberry Pi inside, featuring a screen and buttons.

Wooden Raspberry Pi Handheld Hello, this is a step-by-step instruction on how to make a wooden raspberry pi handheld. Step 1: Things you need First you need a raspberry pi, no matter if you are using a model A or B. I used a raspberry pi model B because..... Listed under: LCD Projects

538.

A Raspberry Pi connected to an iPad, used for playing music and video.

AirPlaying music and video from iPad to Raspberry Pi—it's as easy as... There are so many incredible things you can do with a Raspberry Pi. You could build a robot. Invent a new kind of musical instrument. Or send the tiny computer nearly into outer space on a picture-taking balloon adventure. Sadly, I have no idea how..... Listed under: Sound - Audio Projects

539.

A Raspberry Pi connected to a garage door opener, used for streaming video of door status.

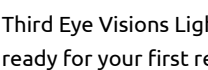

Raspberry Pi Garage Door Opener with streaming video of door status. This Instructable modifies two other guides. Just got a Magnetic Sensor hooked up with door status on page. Step 1: Do these Instructables First You need do this Instructable @http://www.instructables.com/id/Raspberry-Pi-Garage-Door-Opener Then do this one @ http://pimylifeup.com/raspberry-pi-webcam-server/ Next I will show what I changed to make..... Listed under: Sensor - Transducer - Detector Projects

540.

A Raspberry Pi connected to a digital compass module (HMC5883L) on a breadboard.

Interfacing Digital Compass (HMC5883L) with Raspberry Pi 2 using Python3 Initially, I was working on a maze solving robot. Instead of using ultrasonic and infrared on Arduino Mega for wall following like my friends did, I try to do something different using the digital compass and Raspberry Pi 2. This experience is totally new for..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

541.

A Raspberry Pi connected to an LED, used for lighting up.

Third Eye Visions Lighting Up An Led Using Your Raspberry Pi and Python Once you've setup your Raspberry Pi according to my getting started tutorial, you are ready for your first real project. Let's light up an led using the Python programming language and the GPIO pins on..... Listed under: LED Projects

542.  Wooden Raspberry Pi picture frame The Raspberry Pi is an interesting, versatile and powerful low cost computer that can be used for various applications. I have one dedicated as an entertainment center running OpenELEC. It was quite easy to set the system up, integrate it into my network and hook..... Listed under: Other Projects

543. Raspberry Pi PCF8563 Real Time Clock (RTC) Having recently received my Raspberry Pi, one of the first things I wanted to do was hook up a real-time clock chip I had lying around (a NXP PCF8563) and learn how to drive I2C from the BCM2835 hardware registers. Turns out it's quite easy..... Listed under: Clock - Timer Projects

544. ICStation DIY Kit 5V to 12V Step-up Power Converter Module DIY K Description 5V to 12V booster module is based on MC34063 chip booster module, can realize the input 5V voltage, stable output of 12 v voltage. A, Principle that This circuit mainly include filter capacitance, booster chip MC34063 and resistance, lose Into the voltage through the..... Listed under: How To - DIY - Projects

545. Portable Raspberry Pi (V4) The Raspberry Pi. Its a \$35 computer the size of a credit card. Being very small, its great for its portability. However, this is usually the problem as it is hard to make it portable. Over the past year and a half, I have worked..... Listed under: LCD Projects

546. Raspberry Pi driven 128x32 LED sign This is a 128x32 pixel LED display built from 8 "P10" LED Panels and a Raspberry Pi board. The code its running is takes UDP data from another computer and displays the pixels in either one or two bits per pixel. The sign is pictured..... Listed under: LED Projects

547. 11 Arduino projects that require major hacking skills—or a bit of insanity Raspberry Pi has received the lion's share of attention devoted to cheap, single-board computers in the past year. But long before the Pi was a gleam in its creators' eyes, there was the Arduino. Unveiled in 2005, Arduino boards don't have the CPU horsepower of..... Listed under: Development Board - Kits Projects

548. DIY: Temperature Monitoring and Regulation for HomeBrew Beer brewing is a fun hobby, whether you wanna just brew something easy from a kit, or take the time to fine-tune your preferred style. With every batch, there are always two things that weigh heavy on a brewer's mind: risk of contamination or, depending..... Listed under: How To - DIY - Projects, Temperature Measurement Projects

549. Turn the Raspberry Pi into a Bluetooth Device Introduction I have a Bluetooth Radio USB device that was gathering dust when I stumbled upon it. So I thought I should put it to use with Raspberry Pi. This instructable is about my learning journey of adding a bluetooth interface to Raspberry Pi. Target..... Listed under: Bluetooth Projects

550. A Raspberry Pi controlled mini CNC Laser engraver [last update Jan 18,2014] About the capability of the engraver Due to the size limit of DVD drives, the machine can only engrave within an area of 36 mm by 36 mm.. So it can do little pieces of wood, plastic board or part of iPhone cases, but not..... Listed under: How To - DIY - Projects

551. DIY Social Integration Kit- Raspberry Pi A number of sensor applications in recent years collect data which can be directly associated with human interactions. one can use the sensor data in order to model the underlying relationships and interactions. It also leads to a number of challenges, since such data may..... Listed under: How To - DIY - Projects

552. The Raspberry Pi – Lapdock Connection Now that you have your nifty new Raspberry Pi, you'll need a display for it. Teensy analog monitors are pretty cheap, but what you really want is a decent HDMI display. Unfortunately, they're expensive, running from \$150 on up into the thousands for the huge..... Listed under: LCD Projects

553. Rhe PeaterPiPyr – a simplex repeater using the Raspberry Pi This page describes how to use at \$25-\$35 Raspberry Pi single board computer, a USB sound card, some Python code, and a two-way radio to create a simplex repeater. A simplex repeater is also known as a store-and-forward voice repeater. Unlike a traditional duplex repeater..... Listed under: Radio Projects

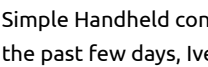

554. Creating a \$99 parallel computing machine is just as hard as it sounds Ten months ago, the chipmaker Adapteva unveiled a bold quest—to create a Raspberry Pi-sized computer that can perform the same types of tasks typically reserved for supercomputers. And... they wanted to sell it for only \$99. A successful Kickstarter project raised nearly \$900,000 for the..... Listed under: Development Board - Kits Projects

555. Setting up phpMyAdmin and MySQL on Raspberry Pi As part of my ongoing efforts to create a really awesome alarm clock with my Raspberry Pi, I had to set up some MySQL databases. I have very little experience with MySQL, and the idea of setting up tables, users, and all that jazz via..... Listed under: Raspberry Programmer Projects

556. Raspberry Pi Heat Sink Project Difficulty: Easy Project Time: Less than 5 minutes Materials Needed: Thermal compound Small heat sink (I got mine from an on-board graphics processor on an old computer) Tools Needed: Hack saw (With metal cutting blade) Vice File (Optional) Screw Driver (Optional) Knife (Optional) Step..... Listed under: Development Board - Kits Projects

**Solar Driveway Light to MSP430 Wireless Sensor Node** The basic idea of this project is to convert a \$3-4 solar light found at Lowes and Home Depot hardware store (here in the US) into a wireless remote sensor node. The node will utilize an MSP430G2553 MCU and a nRF24L01+(w/ spirilis library) wireless module..... Listed under: Sensor - Transducer - Detector Projects, Wireless projects

**1979 Bang & Olufsen Raspberry Pi Internet Radio** This is a 1979 Bang & Olufsen Beocord 1500 cassette recorder that I've converted into a standalone Raspberry Pi internet radio. The analogue VU meters are driven by the Pi via a DAC (Digital to Analogue Converter) circuit, with the current time, station and track..... Listed under: Radio Projects

**PiRacerX – Android controlled RC car using Raspberry Pi** Short description: We made a car, wich acts as wifi acces point. Users conect to our car and then, they are able to acces our webpage. There you'll be able to download application. After the application is installed, the phone makes an UDP session with..... Listed under: Car Projects, Raspberry Android

**Raspberry Pi and ZenMINER Heatsink and Fan** I wanted to overclock my ZenMINER which is a Raspberry Pi booting from a custom Raspbian image. The device is normally warm to the touch after it has been running for 30 minutes. This unit will be in service 24/7, so it definitely needed extra..... Listed under: Other Projects

**Raspberry Pi Analog to Digital Conversion Experiments and Howto** The Raspberry Pi is a great little educational computer, but all models of the Raspberry Pi miss a critical ingredient for electronics experiments – an Analog to Digital converter. I am constantly working on upgrading my lab, and one of my needs is to measure..... Listed under: How To - DIY - Projects

**Control Stepper Motors With Raspberry Pi: Tutorials and Resources** The title of the article can be as well as ‘Let’s build robots using stepper motors and the Raspberry Pi,’ because everything you need is a good example of where you can learn how to control the spin direction, speed, and the rotation of a..... Listed under: Motor Projects

**HY28B Touch Display with Raspberry Pi** There are quite a few displays out there that can be used with the RPi. Apart from those having an HDMI adapter or being connected via the composite output most bare bones displays have a parallel or serial data interface. Both of these last two..... Listed under: LCD Projects

**An LCD Expansion Shield for your RaspberryPi** Today we introduce a great LCD expansion shield for Raspberry Pi that allows you to create an interface to control applications without the need to constantly keep a monitor, keyboard and mouse connected. Cool! Isn't it? The enhanced value of a micro PC as Raspberry..... Listed under: LCD Projects

**DIY Stripboard/Veroboard Enclosure for Raspberry Pi (Part 2) 16-LED Stripboard Top Schematics, Soldering, and Testing** I had decided to design the top board of the enclosure with several LEDs, 3 LEDs on both side, and a Raspberry fruit (6 red LED) and 2 leaves (4 green LED) in the middle. Before getting started,..... Listed under: LED Projects

**Raspberry Pi Internet Weather Station** This Instructable will show you how to build a really cool Raspberry Pi Internet-based weather station. Actually, to call this build a "weather station" is a bit of an under statement. This build could easily be extended to provide much more than simply the weather..... Listed under: Internet - Ethernet - LAN Projects

**Raspberry Pi and Breadboard (Raspberry Leaf)** If you are using your Raspberry Pi with Breadboard, and you have lots of connections to make, then the Pi Cobbler from Adafruit is pretty neat. However, sometimes you only need to make a couple of connections and the Cobbler is overkill and a few..... Listed under: Development Board - Kits Projects

**X100/105/200/300 Function Expansion Board for Raspberry Pi B/B+** The X100 expansion board designed for use on the Raspberry Pi (RPi) computer platform. The board supplies RPi with a regulated +5V from a wide-range voltage source and also contains a real-time clock, a RS232 master port, a HDMI to VGA converter, 3-port USB hub,..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

**Microcontrollers: The Basics Overview** Different kinds of computers are designed for different purposes. The computer at the heart of your laptop is optimized for different pupposes than the one in your phone or the one in your mouse. The simplest computers are those that are designed to take..... Game - Entertainment Projects

Projects

Make Raspberry Pi a Multi-User Desktop Introduction I want my daughter to use the Raspberry Pi for her school work and learn programming. I could buy her a Raspberry Pi or I could share my Raspberry Pi with her. I chose to share the Raspberry Pi with her. After completing this..... Listed under: Raspberry Programmer Projects

Web control four rotator, fifteen relays and many other features that come from Raspberry PI RemoteQTH server. Main functions: Control the four rotators using the light buttons, rotary encoder and with a two-line display for each rotor. Same control remoted via web interface or telnet - only click to map and confirm rotating. Rotator module can directly control the motor of the..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Wireless projects

Real Time Clock for RaspberryPi I bought a Real Time Clock module (RTC) about 6 months ago and I've only just taken it out of its anti-static bag. With two potential projects in mind that may require an RTC, I opened the packet, wired it to my RaspberryPi and then.....not..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry pi Tracer interface Everything started with the fact that the MT-5 display wasn't what I really needed. I was in the need of checking the charging from the device using the battery: my trusty Raspberry pi (1 B at the time). I managed to stumble over this instructable..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Circuit for Photodiode-Pi Interface Here's a diagram I did today for the interface between the photodiode and the Raspberry Pi. First, the photodiode allows small amounts of current to flow when light is shone on the device. this current is amplified by the BJT (so, just a normal transistor..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Mini Arcade Cabinet Project Cabinet is made from 6mm mdf with 12mm mdf base. My own design inspired by full size cabs and other designs ive seen around. Parts - Raspberry pi model B with 8gb sd running retropie 2.3 7" lcd and control board removed from an old..... Listed under: Game - Entertainment Projects

XBMC Media Center with Raspberry Pi Media Centers are useful tools that allow users to organize and play their media, including videos, music, and pictures. Media Centers make it possible to stream content from multiple computers to a home entertainment system or other central location. In this tutorial, we will show..... Listed under: Sound - Audio Projects

Read analog data, in Java Raspberry PI mportant: This document goes along with the code at <https://github.com/OlivierLD/raspberry-pi4j-samples/>. In the sources, refer to ADC The goal here is to read analog data from a Java program running on a Raspberry Pi. For this example, we will be using a potentiometer like this one..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

How to Use Signal Values and Messages to Read Multiple Inputs Those who have worked on simple microcontrollers know how difficult it is to continuously check for an input pin status without affecting the other task of the microcontroller like displaying and SSD, playing a music etc. In a Multitasking environment of an Operating system like..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

A simple analog proximity sensor with digital interface (for Raspberry Pi) [last update: Feb 7, 2014] Raspberry Pi has a Broadcom BCM2835 chip, which controls 26 GPIO (general purpose input/output) pins. There are C library or RPi.GPIO python package available online that can be used to control the pins. The RPi.GPIO package is by default included in most Raspberry Pi system, such..... 589.

Raspberry Pi B+ boot from SD Card The new Raspberry Pi model B+ uses Micro SD cards(WOOHOO!!!), wait what if I have SD cards from my old Pi's I want to use? That is what this instructables was created to help you do. Thanks to the Raspberry Pi foundation and the community..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

590.

Linux-powered quadcopter has three cameras A startup called Pleiades is over a third the way to its Kickstarter goal for funding a hackable Linux quadcopter that starts at \$520. Spiri, which runs Ubuntu Linux with Robot Operating System (ROS) extensions on a dual-core Freescale ARM SoC, is an airborne craft..... Listed under: Video - Camera - Imaging Projects

591.

Raspberry Pi based Motor Speed Control The main objective of this project is to develop a speed-control system, for a DC motor, that alters voltages applied to the armature by using a Raspberry Pi board.The speed of the DC motor is directly proportional to the voltage applied across its terminals. Hence,..... Listed under: Development Board - Kits Projects

592.

Raspberry Pi Firewall and Intrusion Detection System Maybe you think "Why should I protect my private network? I've got no critical information on my computer, no sensitive data". Are your emails really public? Don't you have some photos you don't want to upload to Facebook, because they're private. Do you really don't..... Listed under: Security - Safety Projects

593.

3D camera (with Raspberry Pi) Although 3D camera's are usually said to be really intricate, hence their price, it turned out the basic principles aren't really that difficult to replicate. Granted it is troublesome to get the quality of professional products, compared to their cost, this is a neat homebuilt..... Listed under: Video - Camera - Imaging Projects

594.

Raspberry Pi: 3x3x3 LED Cube If you do a web search for LED cubes, you will notice that they have been built so many times and anything less than 8x8x8 is a bit of a waste of time. Knowing all of this, and basically because I am bored out of..... Listed under: LED Projects

595. PiLarm: Portable Raspberry Pi Room Alarm I’m always on the lookout for those teachable moments. Inspiration struck me when my 5-year-old asked for help in keeping his little brother from sneaking into his room. I spotted the perfect time to teach him about inputs, outputs, and programming. Learning is easier when…… Listed under: Home Automation Projects

596. Raspberry Pi supercapacitor micro-UPS seeks funding Nelectra is crowdfunding a supercapacitor based micro-UPS for Raspberry models B and B+, enabling brownout protection and “last gasp” shutdown sequences. Bratislava, Slovakia based Nelectra’s first product was a generic “Juice4Halt” supercapacitor based micro-UPS (uninterrupted power supply) module aimed at single board computers used in…… Listed under: Solar energy projects

597. Simple Raspberry Pi Input Output. Tricopter This is a simple input output switch/LED for a Raspberry Pi, What this allows is for the user to tell the raspberry Pi to do a selection of tasks without the Raspberry Pi being connected to a TV/Monitor or Keyboard/Mouse. WHY?? Well I wanted to…… Listed under: Development Board - Kits Projects

598. How to build your own Quadcopter Autopilot / Flight Controller Contents Introduction Reading the Radio Inputs Controlling the motors Determining Orientation Acrobatic / Rate mode control Stabilised Control Final Product - video and full code Other ideas: Safety Optional: Raspberry Pi Optional: Autonomous Flight Introduction This article will walk you through building your own controller…… Listed under: Game - Entertainment Projects

599. Raspberry Pi Lamp LAMP Server I was using a Raspberry Pi as a LAMP server. I also needed a new lamp for more lighting. My brain then decided I should combine the two, thus creating a Lamp LAMP server. Fun and completely nerdy at the same time. Here is how…… Listed under: LED Projects

600. Geolocation Tracker (GPRS + GPS) with SIM908 over Arduino and Raspberry Pi The new shield designed for Arduino and Raspberry Pi integrates the SIM908 module which counts with both GPRS and GPS technologies what allows to easily perform realtime tracking applications. The idea is simple: read the GPS coordinates (longitude and latitude) and send them by using…… Listed under: GPS Based Projects

601. 
$$X(t) = 2\pi f t$$
$$X(t) = \frac{1}{2\pi f} t$$
$$4\pi^2 f^2 = \frac{1}{L C}$$
$$f = \frac{1}{\sqrt{L C}}$$
$$f = \frac{1}{\sqrt{L C}}$$

Pi in the Sky transceiver – Raspberry Pi Frequency Synthesiser (Part 1) Method 1 The simplest way to generate a frequency is to apply a voltage to a crystal, the piezo-electric effect will take over and the crystal with resonant at a particular frequency. However, as this was going to be a multiband, multimode transceiver; crystals could…… Listed under: Radio Projects

602. Cardboard Raspberry Pi Wifi Internet Radio What to do with the small cardboard box full of Raspberry Pi related junk, besides watch it sit slowly collecting dust. Surely it should be doing something interesting? Failing that it could be a wifi radio, I suppose. Notes on how I converted a cardboard…… Listed under: Radio Projects, Wifi / WLAN Projects

603. Using CircuitDraw to create electronics diagrams Today I will show you how to use Estimcad CircuitDraw to create diagrams for electronics and robotics projects. This is the second article in a series outlining the installation and use of CircuitDraw.Other Articles: Introduction to CircuitDraw Using CircuitDraw to create electronics diagrams Adding secondary…… Listed under: RFID - NFC Projects

604. Complete tutorial for a raspberry pi beginners . This instructable helps you to setup raspberry pi for the first time without hdmi monitor .By the end of this tutorial you can see the raspberry pi desktop screen from your server laptop. difficulty level:- 1/5 Not required any technical knowledge My current project: (Check…… Listed under: Raspberry Programmer Projects

605. Interfacing an SPI ADC (MCP3008) chip to the Raspberry Pi using C++ (spidev) In this entry I will demonstrate how to interface the MCP3008; an SPI-based analog to digital converter (ADC) integrated chip, to the Raspberry Pi. This enables the Raspberry Pi to interpret analog voltages that are in turn typically emitted by analog-based sensors to reflect a…… Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

606. Raspberry Pi 2 (Model B+) Setup This is awesome: the newest version of Raspberry Pi (as of 2/25/15) has come out. It's called the Raspberry Pi 2 Model B+. This little board is 6X faster than a Raspberry Pi Model B+ and has 1GB of RAM, which the B+ didn't have…… Listed under: Development Board - Kits Projects

607. raspberrypi-home-automation A node.js based home automation system based around the Raspberry Pi. For background around this project: Installation To get started, clone the repository and install the required dependencies. git clone https://github.com/anders94/raspberrypi-home-automation.git cd raspberrypi-home-automation npm install Hardware The Raspberr Pi needs a little bit of circuitry…… Listed under: Motor Projects

608. Add a \$15 Display to the Raspberry Pi The Raspberry Pi is a great little board and packs a lot of punch. But many times you just need a small display to show some information from your project. It can be the local weather, system status, an interactive menu or anything that you…… Listed under: LCD Projects

609. Arduino/Raspberry Pi 2 LED Matrices Does anyone know if I can use a single Arduino or Raspberry Pi to control two 32x32 LED matrices as sold on the Adafruit website? Here is a tutorial where you can wire the 32x32 matrix. Ideally, I'd like to be able to control them…… Listed under: LED Projects

Raspberry Pi GPIO Protection After damaging the GPIO port on our raspberry pi while designing a new solar monitoring system we decided it was a good idea to build a buffer/level translator to protect the GPIO pins from over voltage and ESD spikes. The board would need..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Home-Made Raspberry Pi Cobbler Looking at the Raspberry Pi Cobbler in Adafruit's wonderful collection of RPi accessories, I decided that it would be a much better method of connecting the the RPi GPIO to a breadboard than an old IDE cable with wires stuck in the end. I didn't..... Listed under: Home Automation Projects

MoPi is mobile, hot-swap and 24/7 power for the Raspberry Pi. I want one! (how to order) Something not working? Raise an issue. (In early 2014 we ran a Kickstarter campaign to fund the first production version, which is due for delivery in June 2014. If you missed it, you can get one from Pimoroni.)<sup>1</sup> Contents..... Listed under: Solar energy projects

Setting up a VNC Server on your Raspberry Pi If your Raspberry Pi is purposed to do a task that normally does not require a monitor, mouse and keyboard (or any human interaction for that matter), sometimes it is useful to access your Raspberry Pi's operating system without having to connect a monitor, mouse..... Listed under: Development Board - Kits Projects

DIY Alarm Monitoring System w/ Raspberry Pi + Foscam + Sensors The Raspberry Pi is an amazing device. Although not the most powerful mini computer out there, it bolsters a tremendous support community, tons of hardware add-ons and coding libraries to your heart's desire. The Raspberry Pi also makes an affordable media player but so much..... Listed under: How To - DIY - Projects

USB sound card Description. Designing and building a USB sound card is no longer a head ache because we have got the PCM 2702 integrated circuit from Texas Instruments. The PCM2702 is an integrated 16 bit digital to analog converter that has two digital to analog output channels..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Lego Dashboard Mount for Raspberry Pi When I got my Raspberry I've decided to develop an algorithm of real time lane and vehicle detection. I got it done. Now it's time to put the Raspberry Pi on my car's dashboard. However, I would not like to leave it fixed on the.....

Controlling your TV or any infrared device with a Raspberry Pi Although the Internet of Things is relatively new, controlling devices remotely is as old as sin; devices have been using IR remotes for ages. There is a lot of untapped potential from the infrared devices sitting in your home. Besides the raspberry pi, you can..... Listed under: Wireless projects

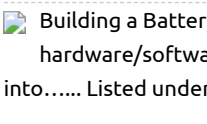

Customize and build your own smartphone using a Raspberry Pi and 3D printing For anybody who can remember when the first smartphones came out such as the original Blackberry, the technology was groundbreaking and changed the way we interact with each other and the world-at-large. Over the years, the various iPhone models have updated to make living in..... Listed under: Other Projects

Turning your Raspberry Pi into an HTPC In this instructable, I will show you how to turn your Raspberry Pi into an HTPC with a Linux distribution called Raspbmc. From the About section of Raspbmc's website: Raspbmc is a minimal Linux distribution based on Debian that brings XBMC to your Raspberry Pi..... Listed under: Raspberry Programmer Projects

Board for the Raspberry Pi – Battery Board V0 Two big features of the Raspberry Pi development board are its versatility (due to open e) and its compact size. I had read a couple of different project articles on the web on how to use a USB Wi-Fi adapter to convert the Pi Phone Projects

How much power can be provided through USB? We can see that the 5 volt line (+5V0) is powered directly from the USB input power, through a 1.1A, 6V Polyfuse (miniSMD). I believe this means that the 5V input is current limited to 1.1A (maximum hold current, not peak). Let's assume that you're..... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Raspberry Pi OLED Internet Bandwidth Display This is a bandwidth monitor using a Raspberry Pi and an OLED display to graphically show the internet bandwidth into and out of our house. A video showing it working is above. Sometimes if the internet is slow or not working very well it can..... Listed under: LCD Projects

A Raspberry Pi Build Light for TeamCity in Mono Some Background... After I bought my Raspberry Pi I went through a little period of uncertainty that most other owners have, asking myself "how do I make this thing useful?" It didn't take long before one of my colleagues created a GitHub repository for a..... Listed under: LED Projects

Controlling LIRC From the Web In this post I will cover how to create a web interface + API for LIRC, the Linux Infrared Remote Control project. I will be using NodeJS and a RaspberryPi in this post, but the ideas generalize to other languages and hardware. This post will.....

Geiger Counter – Radiation Sensor Board for Raspberry Pi tutorial Contents Manifesto The Board The Geiger Tube Types of radiation Supported Geiger Tubes Testing Sources Actuators From CPM to Sieverts Source Code Schematic Participate Buy Links and Documentation NOTE: All the code examples in this tutorial use the arduPi library. You can see the documentation..... Listed under: Sensor - Transducer - Detector Projects
642.		Use Raspberry Pi to Create Obstacle Avoiding Robot Chassis Raspberry Pi is quite suitable for robot creation. Its GPIO pins could be used to control the motors and sensors, and itself could work as a server, and get controlled via Internet. The Plan I am going to create a robot chassis, which could automatically..... Listed under: Motor Projects
643.		Raspberry Pi – Jack of all trades. Raspberry Pi is a sort of jack of all trades when it comes to being a single board computer based on the Arm processor. It can be a desktop, media player/streamer, web server, forensics machine, and do most of what all linux based machines can..... Listed under: LCD Projects
644.		Jig To Load a Bootloader and Upload Sketches To ATmega328P Note: I only write about what I know. Although there are many Arduinos and Arduino type products, I only have experience with the Arduino Uno Rev3. Likewise, the only Atmel microcontroller I know is the ATmega328P. A Little Background (well not so little) I have..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
645.		Bluetooth Speakers using Raspberry Pi hi guys long time since i wrote a tutorial, this tutorial tells you how you can use any old speaker lying around your house into a wireless bluetooth speaker, this can also be an cheap bluetooth audio device receiver for your car. This is not..... Listed under: Bluetooth Projects
646.		Raspberry Pi Powered Lego Car Two things have happened recently that have contributed to my tinkering hobby. Firstly - My Raspberry Pi arrived after a long (but worth it) wait. Secondly - My two girls (8 and 5) have got in to Lego and so slowly but surely I've been..... Listed under: Game - Entertainment Projects
647.		Raspberry Pi PC remote power switch control board The default I/O port of SD card is 8081, you can change it. Use putty, ID pi, password 5585, key “sudo nano /etc/apache2/ports.conf”, find out 8081 to change your desired port. Features: Plugs directly onto the Raspberry Pi GPIO socket Fits Directly over the Raspberry..... Listed under: Development Board - Kits Projects
648.		Raspberry pi print server A print server that tastes of pi. This project assumes that you have the latest version of raspbian (which can be downloaded at) https://www.raspberrypi.org/downloads/raspbian/. And an active internet connection. (When imaging the SD card be careful to select the right device otherwise BOOM! There goes..... Listed under: Other Projects
649.		rpp – Raspberry Pi PIC Programmer using GPIO Introduction Microchip PIC® 8-bit microcontrollers are quite popular amongst hobbyists, and I've used them for a long time in several of my projects. They are very cheap, use only 35 assembly instructions that are easy to learn, and most importantly they use flash memory, which..... Listed under: Raspberry Programmer Projects
650.		Control Android from Raspberry Pi Have you ever wanted to control your android smartphone or tablet directly from your Raspberry Pi? No? Me neither. I just thought it would be interesting to see if you actually could. You could use this feature to display your android screen during a presentation..... Listed under: Raspberry Android
651.		Raspberry Pi – Driving a Relay using GPIO There's something exciting about crossing the boundary between the abstract world of software and the physical 'real world', and a relay driven from a GPIO pin seemed like a good example of this. Although a simple project, I still learned some new things about the..... Listed under: How To - DIY - Projects
652.		Raspberry Pi and Arduino via GPIO UART In an attempt to get my Raspberry Pi talking to my Arduino I'm exploring various different options. The first was to just use the USB connection, but that was too simple. So, here is how to connect the two using the UART on the GPIO..... Listed under: Development Board - Kits Projects
653.		Medicine Reminder using Arduino Sometimes patients forget to take the medicine at the required time of medicines. And sometimes patient also forgets which medicine He/She have to take at required time. And it is difficult for Doctor/Compounder to monitor patients around the clock. To avoid this problem, we have..... Listed under: Medical - Health based Projects
654.		Web Based, Raspberry pi controlled, 2 channel relay mains control box. Using some off the shelf relays and some basic electronics components coupled with a Raspberry pi with basic HTML, PHP and javascript programming, this Web Based relay control box can be used to turn on or off devices that are connected to the box's plugs..... Listed under: Internet - Ethernet - LAN Projects
655.		Tank Day 23: Range and Bearing Step 1: Choose Sensors Two sensors were chosen for the Raspberry Tank's first foray into detecting its environment: An ultrasound rangefinder (SRF02) and a 3-axis compass (CMPS10), both ordered from robot-electronics.co.uk. Beyond their I2C interface, these devices were chosen largely for cost reasons, though they..... Listed under: Game - Entertainment Projects, Robotics - Automation Projects

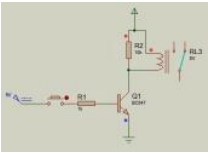

656. Simple Raspberry Pi B+ case In this instructable I will show you how to build a simple case for the Raspberry Pi B+. I used a template I found on the internet, which should be used for a paper case, but I decided that for me a paper case is..... Listed under: Other Projects

657. ircam raspberry pi shield — first steps Here are some first passes at a Raspberry Pi shield design. I don't quite yet know what I'm doing, but here's the rough idea I'm aiming at. I'm not sure how sensible it is, so I'd love to get any feedback! It'd be nice to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

658. Temperature based device Control system using LM35 A temperature based device control system which uses AT89s52 and LM35 temperature sensor is an embedded system which controls external devices(mainly an household appliances heater,fan,coolers and many more) by monitoring the temperature obtained from temperature sensor. This project called temperature based device control system can..... Listed under: Temperature Measurement Projects

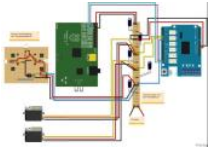

659. Safe and simple AC PWM Dimmer for arduino / Raspberry pi Dimmer With MOSFET This circuit shows that dimmers intended for use at mains voltage do not always have to contain a triac. Here, a MOSFET (BUZ41A, 500 V/4.5A) in a diode bridge is used to control the voltage across an incandescent bulb with pulse-width modulation..... Listed under: PWM Projects

660. ESP8266 + Raspberry Pi Electricity Monitor I have always been monitoring my utility meters in the old fashioned way. First I wrote them down in a little ledger (yep, I'm that old), later I wrote a spreadsheet for it and the last few years I'm using the ECAS smartphone app to..... Listed under: Metering - Instrument Projects

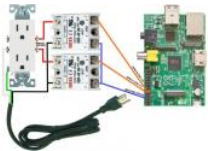

1. RaspiDuinoRover – (Yet another) iPhone driven moving Raspberry Pi and Arduino rover Architecture RaspiDuinoRover is made of three main parts: A Raspberry Pi which receives commands from a remote device through a TCP connection, and sends these commands to an Arduino Uno through an I2C connection. The same TCP channel is used to send back the remote..... Listed under: Development Board - Kits Projects

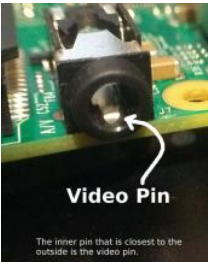

2. Raspberry Pi and Button Press Example Hi there. This post is not going to be on JavaScript but it will be a bit more centered on the Raspberry Pi and what I did today. As pointed out in an old blog post, I'm working on a software that creates streams of..... Listed under: Other Projects

663. Using the Raspberry Pi to control AC electric power We were trying to figure out if a Raspberry Pi could be made to control a device that is powered by 120 volts AC. Our first idea was to build a device based on this wiring diagram, which would have let us control two electric..... Listed under: Solar energy projects

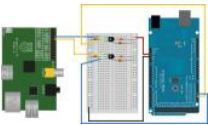

664. Raspberry Pi 2: Quick n' Easy RCA Hello world, today I am bringing you another instructable at the request of another member. I recently made an instructable about booting the Raspberry Pi from a usb flash drive (Boot the Raspberry Pi from USB). In that instructable I had my RCA connection "jerry-rigged" ..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

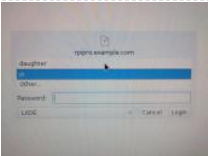

665. Setting up Raspberry Pi using SSH So you just bought a Raspberry Pi (RPI) because you heard of it and you want to figure out what you can do with it ( like I did some time ago ). But now you have it you are watching ad it and asking..... Listed under: Development Board - Kits Projects

666. Arduino Pi Step 1: Step 1: Connecting the Arduino and Raspberry Pi This step assumes you are using the external UART for connecting the Raspberry Pi with an Arduino Mega 2560. It's also possible to use this with another Arduino. The Arduino uses 5V logic but the..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

667. Beautify Raspberry Pi Login Screen Introduction The login screen that greets the user can be modified to make it more interesting and colourful. The login screen and greeter means the same thing in this instructable. Scope This instructable will show how to: Change image on greeter Add text messages Prerequisite..... RDM6300 RFID with PIC18 Dev Board After getting a simple LED-blink program working, I moved on to the RFID portion of my project. It's the simplest of the three major parts (RFID, SD card, and MP3) because it's basically just configuring the UART to receive and check the..... Listed under: RFID - NFC Projects

716.

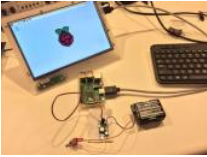

Telegram on Raspberry Pi In one of our last tutorials we have installed WhatsApp on Raspberry. Whatsapp at the moment is definitely the most famous app for messaging services, but there are also many alternatives although little known. One of these is Telegram. "Telegram is a cloud-based mobile and..... Listed under: Other Projects

717.

Raspberry Pi Arcade A few months ago, I decided that I wanted an all-in-one arcade machine. I started looking for some info on how to build one, and immediately, the name "Raspberry Pi" came up. This Christmas, I got a couple of them. I started experimenting with a..... Listed under: Home Automation Projects

718.

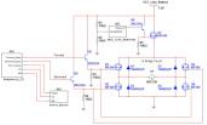

Raspberry Pi powered by batteries In this instructable I will show you how to properly supply power to a Raspberry Pi or Pi 2 with a battery pack or any voltage between 2.9 -32 volts DC. I will be using a efficient Pololu Step-Up/Step-Down Voltage Regulator and a toggle switch..... Listed under: Solar energy projects

719.

Raspberry Pi B & B+ boot SD card for PROTA OS (HTML5 UI) Follow this instructable to get your PROTA OS up and running on your Raspberry Pi without pulling too much hair. NOTE for your understanding PROTA OS is an alternative, headless-oriented OS for Raspberry Pi for people like me who seek I-just-want-to-plug-and-use. Burning the image, I'd..... Listed under: Other Projects

720.

H Bridge Control using Raspberry Pi / Micro controller I am looking for input on this circuit that I have designed. I am currently working on a project called the Net-EEL RC Car. It is an RC car that will be controllable using Network Socket Servers / Clients. Therefor, you will be able to..... Listed under: Other Projects

721.

Raspberry Pi & the Neo 6M GPS Previously I built a project where I connected a Neo-6M to an Arduino, but this time around, I wanted to show how to use a GPS with the Raspberry Pi. Now there are several USB solutions, and apps that work with them, but I wanted..... Listed under: GPS Based Projects

722.

Automated Aeroponics System Using Raspberry Pi In this Instructable, we'll learn how to make an Aeroponics system that's controlled via the Raspberry Pi, and uses the Raspberry Pi Camera module to take photos of your plants. Aeroponics is a pretty unconventional method of gardening, but that's what makes it fun!Aeroponics makes..... Listed under: Home Automation Projects

723.

Old PC Accessories + Raspberry PI = DoorCam & surveillance Kit Step 1: You will need Raspberry PI B (this project is based on B+ model) 5V Raspberry PI power supply A couple of PC speakers TV/Monitor with composite input and its power supply 3.5mm jack to RCA A/V cable Compatible webcam (see at: [http://elinux.org/RPi\\_USB\\_Webcams](http://elinux.org/RPi_USB_Webcams)) Three..... Roberts 747 – DIY Raspberry Pi internet radio/streamer Roberts 747, great radio from 1990. Fully working in very good condition. Found it on antique sale after a long hunt for something like this. I have a spare Raspberry Pi model B V1 home as a spare and it was just catching dust for..... Listed under: Radio Projects,

Wireless projects

**Blinking LED using 8051** This is the first project regarding 8051 and of course one of the simplest, blinking LED using 8051. The microcontroller used here is AT89S51 In the circuit, push button switch S1, capacitor C3 and resistor R3 forms the reset circuitry. When S1 is pressed, voltage..... Listed under: LED Projects

**Piulator Portable Game System via Raspberry Pi** This project was a lot of fun to put together. I was looking for a good Christmas present for my nephew, and decided that a Raspberry Pi influenced project would be cool. He likes gaming and computers, so this made sense. I made an identical..... Listed under: Game - Entertainment Projects

**Shrink Your Raspberry Pi With MicroSD Card Slot** The Raspberry Pi itself is about the size of a credit card, but it only has a standard full sized SD card slot. When you plug in a standard full sized SD card into it, the card sticks out of the outline of the Raspberry..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

**Low Power Raspberry Pi Fileserver** This is a low power home file server I built from a raspberry pi and two USB drive cases. I've mapped it as a network drive on all of my home computers, so we have one common repository for files, documents, and pictures. It's set..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

**How to use and Arduino shield with the Raspberry Pi** Adding Arduino shields to the Raspberry Pi can be a very big pain. You end up having a mess of wires running around and setting up the software is a challenge in it's own right. Here is a simple solution to start using your own..... Listed under: Other Projects

**MCP3008 Raspberry Pi Breakout hat** Howdy Y'all Back when I was working on the Raspberry Pi portable emulator that became the backseat system. I thought that I would want to use an analog joystick like several of the other builds. However I was trying to get it to work via..... Listed under: Development Board - Kits Projects

**ThingSpeak Temperature Monitor with Raspberry Pi** Step 1: What You'll Need A RaspberryPi BrickPi 9 V battery – for powering the BrickPi board and sensor Dexter Industries Thermometer Step 2: Signup for Thingspeak First signup for the new account in thingspeak at <https://www.thingspeak.com> Step 3: Login to Thingspeak Login to your..... Listed under: Sensor - Transducer - Detector Projects

**Itreaduino Plus – ARM Cortex-A8 Dev-Platform** ITEAD studio is based in Shenzhen, China, which is located with China's biggest electronics market as well as one of the most integrated electronic supply chains in the world. A vast number of exciting and innovative products are designed, sourced and manufactured around us every..... Listed under: Other Projects

**AirPlay Radio with Raspberry Pi and WiFi** Before I started working for Pelagicore I won two Raspberry Pi's (short RP) which they sponsored. One because I was one of the first people on the foss-gbg mailinglist which they started. It is for people from Gothenburg and surroundings who would like to join..... Listed under: Wifi / WLan Projects, Wireless projects

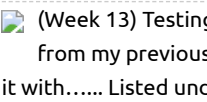

**Raspberry Pi FPV on RC TerraDrone** My progeny loves operating our Nerf TerraDrone named James. He is able to animate James while trying to stay out of sight so I got the idea of using the Pi Surveillance Project by Michael Castor from the April/May 2015 edition of Make Magazine to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Video - Camera - Imaging Projects

**How to Make a Arduino+Raspberry Pi Robot Platform** This is not the definitive story on Pi and Arduino orchestration. Just my version. Step 1: Berryboot 1. Get Berryboot. Berryboot will allow you to download several Raspberry Pi images. Step 2: SD Card Preperation Now extract the zip files to a blank SD card..... Listed under: Robotics - Automation Projects

**Raspberry Pi 2 Media Center: Kodi on XBian Overview** This guide walks through the construction and configuration of a home media center from parts to running system. After following these steps, you will have a running Kodi media server on a Raspberry Pi 2 in an Altoids tin case, ready for you to..... Listed under: Video - Camera - Imaging Projects

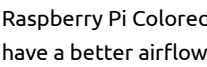

**(Week 13) Testing with 16x2 LCD screen and Raspberry Pi using Fritzting** Here, i want to testing between 16x2 LCD screen with Raspberry Pi. As you can see from my previous blog, the circuit have been construct based on this connection. If there had no problem with all the connection, I will proceed to combine it with..... Listed under: LCD Projects

**Using the Raspberry Pi to control an ATX power supply** I'm really enjoying my new 3d printer, but I just can't leave my laptop connected to the printer all the time. I know that i could simply use SD cards or use another host computer, but there are better options. In order to untether myself..... Listed under: Other Projects

**Simple Snap Together Raspberry Pi Wood Case** This is a simple low cost wood case for the Raspberry Pi version 1 rev B that I built based off the Adafruit Pi Box (<http://www.adafruit.com/products/859>). Assembly is simple, all the pieces snap together so no glue or nails are needed. I used this project..... Listed under: Other Projects

**Raspberry Pi Colored Server Case Mod** The purpose of this mod is to create a case for the Raspberry Pi, based on Adafruit's case created by Mike Doell. It will have a better airflow and be easily identifiable by color. For this project you'll need: Heatsink Heatsink compound A Mike Doell..... Listed under: Other Projects

745.

Interfacing a VFD display to the raspberry pi I’m in the process of building a home automation controller using my Raspberry Pi, and I figured it would be cool if it could display the current song and artist on my Pandora player. There were many options for a display — I could go……. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

DTRONIXS Mini PiIO Protoboard Hot on the heels of the PiFace, to add to my collection of Raspberry Pi interface boards comes the Mini PiIO Protoboard from DTRONIXS. Top photo is the base board sitting on a Raspberry Pi, the 2nd one is the board made up with a..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Make animation from Openclipart’s SVG with Raspberry Pi This is an Instructable which describes the process of making an animation from Openclipart's SVG. Openclipart library is a collection of 100% license-free art that you can use for any purpose. I will explain this Instructable for the Raspberry Pi user. If you are a..... Listed under: Other Projects

Seven-Segment Display A 7-segment display is a great way to display numbers using your Propeller. You can find these in many products that need to display numbers in a simple way, like clocks, kitchen appliances, or digital scales. This display uses seven LEDs arranged in a special..... Listed under: LED Projects

Installing RetroPie/EmulationStation onto Raspberry Pi 2 Model B+ (Playstation 1 Emulator Included!) Goal Installing RetroPie through Raspberry Pi’s OS (Raspbian) and also enabling Playstation 1 Emulator in RetroPie. I'll also teach you how to write images on your Mac or Windows PC as well (no worries :D). This tutorial is for Raspberry Pi 2 B+ Models. Any..... Listed under: Other Projects

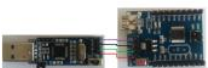

Control your old film camera with a Raspberry Pi Vintage Pi Recipe Using the techniques provided here, you can control a film SLR camera and a USB GPS receiver with a Raspberry Pi. Using Raspberry Pi to control motors, LEDs, digital cameras, and other sorts of modern peripherals is nothing new. However, you can..... Listed under: Video - Camera - Imaging Projects

Make a secret IR-camera security raspberry pi unit Did you ever wanted to know what's going on in your room, when you're not at home? Did you ever wanted to know who's entering your room and grubbing around in your things? Did you want to have a robot friend you can send messages..... Listed under: Video - Camera - Imaging Projects

826.  ICStation STM8 Minimum System Board 1.Features 1.Control chip is STM8S003F3P6 2.All pins can be available,and mark pins,but male pins should be welded by customers in person(Customers should provide your own male pins) 3.Support SWIM debug mode 4.There be two power supply mode,USB MINI wire and 2.54 male pin 5.You can..... Listed under: Development Board - Kits Projects

827. All Weather Solar Powered Raspberry Pi Here I am going to show you how to set up a solar panel, buck convertors and batteries to create a solar power solution that will keep your pi powered 24/7. A great idea for your personal server or timelapse projects. The solar panel is..... Listed under: Solar energy projects

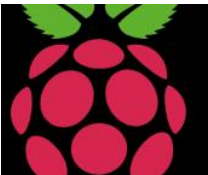

828.  Red Heart-Shaped Flash LED DIY Kit 18pcs LEDs Description Red Heart-Shaped Flash LED DIY Kit 18pcs LEDs Circuit board with 1.5mm high-quality all-glass plate processing technology, the pad large, thick wire, fly line rarely (only 3), component layout and beautiful, copper surface using environmentally friendly antioxidant treatment. Using 9 SMD components, easy welding..... Listed under: How To - DIY - Projects

829.  Raspberry Pi Sega Mega Drive/Genesis II Case I received my Raspberry Pi and decided I needed a case. I didn't have much available to me in terms of laser cutters, 3D printers or woodwork skills etc. so I thought laterally. I'd previously had the idea of using the Pi as an emulator so I thought,..... Listed under: Other Projects

0.  How to Send a Temperature Emergency SMS Using Tracking Kit (GPRS + GPS) Contents Introduction Step 1: Connection Step 2: The code Links and Documentation 1. Introduction Go to index This tutorial allows the user to measure the temperature of an object. When the temperature is 0°C or less, a text message is sent to a mobile phone..... Listed under: GPS Based Projects

1.  Reduce overhead due to network drive on Raspberry Pi Problem We add a line entry to /etc/fstab when Raspberry Pi needs to automatically mount a network drive. The problem with this approach is that: Raspberry Pi needs to mount the network drive from the point of when booting up to shutting down. In other..... Listed under: Raspberry Programmer Projects

2.  Make An Auto-Locking Office Door with Smartphone Proximity Sensor Psst – want some high tech protection for your home office, or a secret lock for your “workshop” (ok, you got me, it’s actually a dungeon/gaming room) that the kids won’t be able to figure out? We’ve got you covered. Let’s build a DIY smart lock that..... Listed under: Sensor - Transducer - Detector Projects

833. Weather station based on Raspberry Pi This is a simple project for a weather station. Initially it reads temperature, pressure and humidity. Next step is to measure wind direction and after that wind speed. The base of the project is a Raspberry Pi A+ which was chosen by its small consumption,..... Listed under: Temperature Measurement Projects

834.  Raspberry Pi digital Hall sensor in JAVA All right this is the review on the next two lessons on linear hall sensors. Lesson 02 uses an analog linear hall sensor and an analog to digital conver IC ADC0832. The lesson 03 uses a linear hall sensor with added comparator, which allows some..... Listed under: Sensor - Transducer - Detector Projects

835. How to Repair a Broken Raspberry Pi SD Card Slot It's pretty easy to break the SD card slot on a Raspberry Pi (I broke mine by dropping it on the SD card). If you break yours, there's no need to cry over spilled Pi. Replace the disappointing SD card slot with a new one..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

836.  Easy DIY baby crying detector with Raspberry Pi In this instructable we will learn how to make a simple yet effective baby monitor that detects and alerts you whenever the baby is crying. We used Philips Hue as an alert system but you can choose a different item or channel to get notified..... Listed under: Sensor - Transducer - Detector Projects

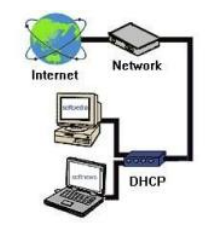

837. Raspberry Pi world web cam Concept: The broadband Internet that you use in your house for 24\*7 might be costing you around \$9 to \$35 per month , add another \$150 (one time ) to it and you have your own home surveillance system which will monitor your home 24\*7..... Listed under: Video - Camera - Imaging Projects

838.  How to make a Raspberry Pi Arcade with no programming Setting up a Raspberry Pi arcade is actually really easy, thanks to a Linux distribution called RetroPie. You don't need to do any programming or setup, just install the image on an SD card. This will allow you to use the arcade with a keyboard..... Listed under: Game - Entertainment Projects

839. Home (Room) Temprature and Humidity Monitor with Web Based Chart – Raspberry Pi Simple way to monitor your, Home ,room, garage small factory or any other places Temperature and Humidity from anywhere in the world via internet. It very fun and very simple. Step 1: The Concept The Raspberry Pi will get the Home(Room) Temperature and the Humidity..... Listed under: Temperature Measurement Projects

840.		GPS Module for Arduino and Raspberry Pi Introduction Ingredients: 1 x GPS module 1 x Antenna 1 x Arduino Uno or 1 x Starter Kit for Raspberry Pi 1 x Two small wires (Red and Black) 1 x PC Preparation Time: The GPS module for Arduino and Raspberry Pi..... Listed under: GPS Based Projects
841.		Raspberry Pi GPIO Expansion Cable from a Used IDE Cable Rev B of the Raspberry Pi ships with a 26 pin GPIO port and my first dilemma after bringing up my Pi was, how was I going to break out the Pi's GPIO pins so that I could easily access them for design work? I..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
842.		Breadboard One   A typical Mixed Signal Circuit. We designed Breadboard One as the first BitScope Ed project because it's a simple mixed signal circuit which explains the key elements of modern mixed signal systems. A Mixed Signal Circuit is one which has both analog and digital components. In analog circuits the currents..... Listed under: Development Board - Kits Projects
843.		Setup a Raspberry Pi PHP web server Lighttpd is a lightweight web server, with all the essential functions of a web server, PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language. This is a tutorial on how to install Lighttpd and PHP on..... Listed under: Internet - Ethernet - LAN Projects
844.		Raspberry Pi and Arduino Connected Over Serial GPIO Raspberry Pi Serial GPIO Configuration 0. If you have not seen my article on how to remote access your Raspberry Pi, take a look here: <a href="http://blog.oscarliang.net/setup-raspberry-pi-for-remote-access/">http://blog.oscarliang.net/setup-raspberry-pi-for-remote-access/</a> 1. In order to use the Raspberry Pi's serial port, we need to disable getty (the program that displays..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
845.		Raspberry Pi based wall avoiding robot – FabLab NerveCentre Please note: This instructable is not complete - but may be helpful Published to allow the excellent people at Derry's NerveCentre to take the code out to schools I hope to get back to this but my current job is keeping me from it for..... Listed under: Robotics - Automation Projects
846.		Power over Ethernet for Raspberry Pi I recently purchased a Cisco Catalyst 3560 48 port PoE Switch and soon realized that I didn't need 48 ports. I soon started thinking of ways of using that power for other needs like charging phones or running devices. It then hit me that I..... Listed under: Internet - Ethernet - LAN Projects
847.		Raspberry Pi Kodi network media player for less than \$60! Kodi (also known as XBMC) is a great network media player that can access not just the files on your USB and network, but great internet content such as Youtube, Syfy, HGTV and more. Kodi is a piece of software that you can download and..... Listed under: Sound - Audio Projects
848.		Multichannel Professional Data Logger on Raspberry Pi – Part 1 See the Part 2 for the hardware and Part 3 for the software implementation. In this series of articles I'll explain how to build a multichannel Data Logger, capable of collecting voltage, current and temperature measurements over the specified intervals of time. Our alternate goal..... Listed under: Temperature Measurement Projects
849.		USB relay module for Windows, Linux, Raspberry Pi USB is a very well documented and reliable interface. Nearly every computer system today is equipped with one or more USB host connectors. Sometimes you need some inputs and outputs for tasks surrounding your PC or you have a cool idea for an automation with..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
850.		Back-of-Monitor Raspberry Pi Mount As Raspberry Pi computers begin to appear all over the world, people start wondering what to do with them. The first thing I wondered (after I got it up and running) was "how the heck am I going to get this mess of cables off..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
851.		Remote control with Raspberry Pi and Phidget WebService Enable your Raspberry to control relay, led, sensor and digital input remotely with Phidget WebService. "The Phidget WebService is a background process that broadcasts all events and data from a USB Phidget over the network: It uses link local addressing which allows you to use..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
852.		Temperature Monitoring on the Raspberry Pi Overview The Raspberry Pi is a small single-board computer (SBC) developed here in the UK, by Raspberry Pi Foundation. It runs various versions of Linux on ARM and has a set of I/O pins which you can use to attach external components such as sensors,..... Listed under: Temperature Measurement Projects

853.	 <p>Adafruit ProtoPlate for the Rasbperry Pi As part of my Big Trak refurbishment (not going as well as I wanted it to), I decided to use the Adafruit ProtoPlate to mount the additional electronics on. If you're not familiar with it, then this is it: So it's a double-sided..... Listed under: LED Projects</p>
854.	 <p>MAME gaming table with Raspberry Pi Inspired by similar projects online, I've been working with a neighbour to build a pair of coffee-table MAME-based retro gaming tables. The more compact one is mine; the larger with two sets of controls is his. Photos of both are used in this instructable. These use..... Listed under: Game - Entertainment Projects</p>
855.	 <p>Driving the Max7219 with the Raspberry Pi The max7219 lets us control lots and lots of LEDs using just a few Raspberry Pi pin-outs. No hassles with multiplexing, latching, refreshing or using up all your outputs – it handles everything for us. We just send commands to the max7219 and we can..... Listed under: LED Projects</p>
856.	 <p>An elegant, stacking, Real Time Clock for Raspberry Pi If you want to build a good Real Time Clock for your Raspberry here's the tutorial you were looking for! This is a revised and simplified version for Instructables made out of this article at my personal blog. Difference is mainly in the structure and..... Listed under: Clock - Timer Projects</p>
857.	 <p>How to connect a Raspberry Pi to a Wi-Fi network So you want to connect a Raspberry Pi to the internet, but your computer lacks an ethernet connection, or you lack an ethernet cable. What to do? What you need: Raspberry Pi microSD card HDMI cable USB power adapter (that can provide at least 600mA..... Listed under: Wireless projects</p>
858.	 <p>Raspberry Pi as a 3g (Huawei E303) wireless (Edimax EW-7811Un) router Aim: Set up the Raspberry Pi as a wireless router using the Raspbian OS. The internet connection will be provided by a Huawei E303 USB 3g dongle on the safaricom network in Kenya, though the setup should be similar on most Huawei dongles and 3g..... Listed under: Wireless projects</p>
859.	 <p>A Mobile Robot with Vision Based Obstacle Avoidance Abstract: The purpose of this report is to discuss and demonstrate the concept of designing and implementing a mobile robot capable of visually detecting and avoiding obstacles using a USB webcam. The system was ported to the Raspberry Pi hardware, a Linux based US\$35 computer.This..... Listed under: Phone Projects, Robotics - Automation Projects</p>
860.	 <p>GPIO for Raspberry Pi B, B+, Pi 2 running PROTA Pi OS (HTML5) Some of us believe greater can be fulfilled when technology upbuilds and completes the great, prior products of our efforts. It's the basic fundamentals how all of us evolved. GPIO I've experienced is in a way a shortcut that trims down to the simple core..... Listed under: Wireless projects</p>
861.	 <p>Pan / Tilt face tracking with the raspberry pi With some effort I have found that controlling two servo motors to allow a webcam to pan/tilt while tracking a face in real time using the raspberry pi not as impossible as it may at first seem. With some careful tweaking and code optimization I was..... Listed under: Sensor - Transducer - Detector Projects</p>
862.	 <p>Lightning! The Lightning Detector for Raspberry Pi Weather Station In this Instructable you will learn: How to a connect a Lightning Detector to a Solar Powered Weather Station How to design and position the lightning detector for best performance How to gather data to see the Lightning story as it happens How to wire..... Listed under: Solar energy projects</p>
863.	 <p>Raspberry Pi case with built in surface mount for less than \$2 I own two RPI's one is a media server for my prerecorded TV shows; the other is hooked up to a Motorola Lapdock to run experiments and for educational purposes. I am an engineer who volunteers for the Boy Scouts of America I teach computers..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects</p>
864.	 <p>Raspberry Pi based Solar Street Light PROJECT DESCRIPTION The project is designed for LED based street lights with auto intensity control using solar power from photovoltaic cells interfaced to a Raspberry Pi board. As awareness for solar energy is increasing, more and more individuals and institutions are opting for solar energy..... Listed under: Solar energy projects</p>
865.	 <p>Raspberry Pi 2 DIY LED LAN device counter Do you know how many devices are on your local network? That is what we where wondering at our hackerspace HackBergen. Yes, there are available programs and Apps to scan your network, but we can also scan with the Raspberry Pi (RPi) and show the..... Listed under: LED Projects</p>

completed in phases and..... Listed under: Development Board - Kits Projects

881.
- Create a video player with Dolby Digital/DTS output You have an older home theater receiver with an S/PDIF input (optical or RCA) and want to play movies with DTS or Dolby Digital soundtracks? This guide shows how you can get 5.1 sound output from a Raspberry Pi even if your AV receiver does..... Listed under: Video - Camera - Imaging Projects

882.
- Raspberry Pi Motion Sensitive Camera Using a Raspberry Pi, a Raspberry Pi camera module, a PIR motion sensor, a USB WiFi adapter, a handful of parts, and a couple of Python programs, you can construct a camera that will automatically snap photos or record short videos when something moves in..... Listed under: Video - Camera - Imaging Projects

883.
- Turning your Raspberry Pi into a personal web server LAMP is an acronym that stands for LinuxApacheMySQLPHP and are components required to run a Dynamic HTML webpage. This instructable will demonstrate how you can turn your Raspberry Pi into a personal web server. The steps to install all of the components are relatively straight..... Listed under: Other Projects

884.
- Raspberry Pi Temperature and Light Sensor Design Required 2 x DS18B20, 2 x 4.7k resistor The DS18B20 is a rather useful sensor because you can read more than one of them using the same GPIO pin. The Raspberry Pi is able to recognise the input from each separate sensor. This system..... Listed under: Sensor - Transducer - Detector Projects

5.
- Dual Project: AirPlay-Pi and new life for an old radio Hey, Welcome to my first ever post on Instructables! The Project you're about to read over is setting up a Raspberry Pi to use 'AirPlay' and how I used it, which clashes with the second part, the new life for my old radio. Step 1:..... Listed under: Radio Projects

6.
- Raspberry Pi Internet Radio / Music Player Introduction In the March 2012 issue of Nuts and Volts I wrote an article entitled "Build Your Own Wifi Internet Radio" about how to build an Internet radio using a repurposed wireless router. While this project worked fine (and still does) it had limitations driven..... Listed under: Internet - Ethernet - LAN Projects

887.
- Detecting a button press through GPIO using Raspberry pi If you want to build electronic devices, at some point you're going to need to read data through GPIO. In this exercise, we're going to read the value of a push button on a breadboard. Set up the circuit as shown in the pictures on..... Listed under: Sensor - Transducer - Detector Projects

888.
- engravR: Build a Pi-Powered Laser Engraver using Raspberry pi, engravR is a Raspberry Pi-powered laser engraver built primarily from two old DVD-RW drives. The idea of using DVD drives to make a laser engraver is not particularly new, but most systems use an Arduino and external stepper drivers. The advantage of using the Pi..... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

889.
- GSM Remote Control – GSM Module Raspberry Pi, This GSM Mobile is used for our Remote Control (for example Gate Control, Temperature Control....). We use the word ‘module’ because, unlike what we did in our remote control projects, this time around the mobile phone is not mounted on a printed board, but rather on..... Listed under: GPS Based Projects

890.
- Raspberry Pi – Stepper Motor Control & Breakout Board Overview Many of the previous Raspberry Pi projects I had been working on were based on fairly simple GPIO logic to turn things on and off. Today I wanted a little more of a challenge so I started working to control a stepper motor from..... Listed under: Motor Projects

891.
- LCD Library (HD44780U) The wiringPi LCD devLib allows you to drive most of the popular 1, 2 and 4-line LCD displays that are based on the Hitachi HD44780U or compatible controllers. It allows you to connect multiple displays to a single Raspberry Pi. The displays can be connected..... Listed under: LCD Projects

892.
- Motion Sensor using Raspberry Pi This example shows how to use Raspberry Pi® hardware to interface to a motion sensor and control an external LED. Introduction Raspberry Pi target enables you to create and run Simulink® models on Raspberry Pi hardware. The target includes a library of Simulink blocks for..... Listed under: Sensor - Transducer - Detector Projects

893.
- How to Connect an LED to your Raspberry Pi The easiest way to turn on an LED using the Raspberry Pi is to wire it up to the +3.3v or +5v pins of the General Purpose Input Output (GPIO) header and ground (0v), making sure to place a resistor in series with the LED..... Listed under: LED Projects

894.  Analog Gauges Using I<sup>2</sup>C on the Raspberry Pi I've been intending to try driving Switec X25.168 motors using the MCP23008 I<sup>2</sup>C I/O port expander chip from an Arduino, but it occurs to me that it might be more interesting to try this on a Raspberry Pi. If it works, it will demonstrate a..... Listed under: Clock - Timer Projects

895. A Slice of Raspberry Pi Adding an Envelope Detector to convert an RF input to a DC output I connected the ADC Pi module to the GPIO header and stacked the DDS module on top. PCB support spacers were used to hold the modules together and to take the strain..... Listed under: Sensor - Transducer - Detector Projects

896. A project log for FirePick Delta, the Open Source MicroFactory Software Topology and Theory of Operation OpenPnP is the high-level brains of the machine, that does the seemingly-simple stuff like "pick up that part" and "put it over there". Lots of libraries and sub-systems feed information to it, and it passes information to the various..... Listed under: Sensor - Transducer - Detector Projects

7. An introduction to GPIO and physical computing on the Raspberry Pi One powerful feature of the Raspberry Pi is the row of GPIO (general purpose input/output) pins along the edge of the board, next to the yellow video out socket. These pins are a physical interface between the Pi and the outside world. At the simplest..... Listed under: LED Projects

8. Raspberry Pi Shutdown Circuit with Sleep mode Raspberry Pi is a great platform to be used in a robot project, but it has a severe limitation: by default it does not have a built-in power button. As a Linux-based system Raspberry Pi requires to be shut down gracefully before switchin off power..... Listed under: Robotics - Automation Projects

9. Portable Raspberry pi with battery pack 2.0 This was my second project I have worked on for Instructables. I think I did a great job and I hope you do too. For this project you will need: Where I got them: -Raspberry pie (with a case if possible) ..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

900. Raspberry Pi with the IO Expander A month ago my Raspberry Pi arrived and since then I have been wanting to control external devices with it. Like any other newbie, I was eager to do something with it as soon as possible and spent hours and hours reading and trying out..... Listed under: LED Projects

901. Internet of Things Toilet Uploads Events to the Cloud (Raspberry PI) Internet of Things Toilet uploads flush events and toilet paper roll change out events to Google Drive spreadsheet. How does it work? – An aquarium liquid level sensor float switch detects toilet tank level; flushing lowers the level closing the switch. A photo cell located..... Listed under: Internet - Ethernet - LAN Projects

902. Raspberry Pi Twitter Monitor The Twitterverse Like it or not, Twitter is a force to be reckoned with. Millions of people use Twitter to talk about general happenings in the world and their lives. Large events like conventions, elections, and uprisings have a habit of crashing the Twitter servers..... Listed under: Internet - Ethernet - LAN Projects

903. Raspberry Pi – John Jay's 8 LED & Button Breakout Board Overview In a previous article I demonstrated how to build your own Raspberry Pi GPIO testing board that included buttons, slide switches, and LEDs. Since that time, I learned about a retired engineer in Georgia named John Jay who is producing awesome little companion electronic boards..... Listed under: LED Projects

904. RPi 5V PSU construction using Raspberry pi A 5V power supply for the Raspberry Pi - Construction How To Due to various problems with the power supply for the RaspberryPi, a home made PSU might be a solution for some of you. You will need some experience with construction of electronic circuits,..... Listed under: Battery Projects

905. Measuring temperature with RASPBERRY PI One of the main characteristics of the environment in which we live is the temperature and therefore its measurement is quite important. The easiest way to measure it is by using Maxim integrated 1-Wire sensors. This way you can connect up to 10 sensor to..... Listed under: Temperature Measurement Projects

906. TFT LCD display with 320×240 resolution for RASPBERRY PI RASPBERRY PI is credit card size computer, which price is only about 35Euro. This makes it accessible to a wide range of people. Despite its low price it is equipped with Broadcom's SoC BCM2835, it contains very powerful ARM1176JZF5 CPU running at 700MHz, with floating..... Listed under: LCD Projects

922.  How To Setup A Web Server On Your Raspberry Pi This page aims to summarise the steps required to install a webserver with PHP support on a Raspberry Pi. This will allow the Pi to server HTML and PHP pages to users on the same network. This is a useful mechanism to view images and/or..... Listed under: Internet - Ethernet - LAN Projects, News & Updates

923.  Control Pi-Plate with Spark Core The ppDAQC board from Pi-Plates.com is an inexpensive yet powerful solution for expanding the input/output capabilities of the Spark Core. And since Pi-Plates are stackable, it is a simple task to scale up the I/O capabilities of a single Core. All that is required for..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

924.  Invisible dog trainer With a pressure sensor, led and speaker you can turn your Pi into an invisible dog trainer that trains your dog to get off the couch. When the dog sits on the couch, the led blinks and the dog receives the command "Get off the..... Listed under: Sensor - Transducer - Detector Projects

925.  3: More LEDs and a Button So we now have a traffic light/pelican (Tux!) crossing simulator. The 2nd Red LED is connected to wiringPi pin 3, (GPIO-22), and the 2nd Green LED is connected to wiringPi pin 4, (GPIO-23). Test them as before with the gpio command, e.g. for i in..... Listed under: LED Projects

926.  Knight Rider & Cylon Lights for the Raspberry Pi The most obvious application for a Raspberry Pi is re-creating the sliding red lights found on "KITT" from Knight Rider or the Cylons in Battestar Galactica. This can all be done with pure electronics but that doesn't involve any programming and therefore isn't as cool..... Listed under: LED Projects

7.  Raspberry Pi 1- Wire Digital Thermometer Sensor (DS18B20) While searching for a simple way to measure temperature using my Raspberry Pi I came across the DS18B20 1-wire digital temperature sensor. This promised an accurate way of measuring temperature with a few wires and almost no external components. The device only cost a few pounds..... Listed under: Sensor - Transducer - Detector Projects

8.  My GPS disciplined Rubidium OCO Frequency Standard and NTP server project Part 1 he Doctor: People assume that time is a strict progression of cause to effect, but actually from a non-linear, non-subjective viewpoint—it's more like a big ball of wibbly wobbly... timey-wimey... stuff. Amy Pond: It's spacey-wacey, isn't it? —Dr. Who? Though delightfully silly, there is..... Listed under: GPS Based Projects

929.  Drive a 16x2 LCD with the Raspberry Pi Overview Adding a LCD to any project immediately kicks it up a notch. This tutorial explains how to connect a inexpensive HDD44780 compatible LCD to the raspberry pi using 6 GPIOs. While there are other ways to connect using I2C or the UART this is..... Listed under: LCD Projects

930.  Java ME 8 + Raspberry Pi + Sensors = IoT World (Part 1) Learn how to connect sensors to the Raspberry Pi and control them with Java. Published September 2014 The latest release of Java ME 8 includes a powerful API for controlling devices such as LEDs, relays, LCDs, sensors, motors, and switches. This article is the first..... Listed under: Sensor - Transducer - Detector Projects

931.  Controlling an LED For this part of the tutorial you will need: Usb to Micro USB cable. Ethernet Cable. A computer. An SD card (4GB or bigger). A breadboard Female to male jumper cables or the Adafruit Assembled Pi Cobbler Breakout. 330 Ohm resistor. A bit of Electronics A..... Listed under: LED Projects

932.  BeagleBone and Raspberry Pi gain FPGA add-ons At the Maker Faire in New York City, ValentFX showed off two open source FPGA boards that stack with BeagleBone and Raspberry Pi SBCs, and also unveiled BBot, a BeagleBone-based drink serving robot built with an earlier FPGA board version. The FPGA add-on boards use..... Listed under: Robotics - Automation Projects

933.  Totally Wireless Bird House Making of DIY bird house project with Raspberry Pi and Arduino Here is a detailed explanation how to make a totally wireless surveillance style bird house. About the design The main advantage of this device is that it is completely wireless, so you can hang..... Listed under: Wireless projects

934.  Tank Day 9: Power to the Pi Last time around, we proved that the Raspberry Pi could indeed be integrated into a Heng Long Tiger I RC tank, and so control its functions. That's a significant achievement, but there's plenty more to do. Firstly and most importantly, we can't yet drive the..... Listed under: Other Projects

935.  Connecting an Arduino and Raspberry Pi The use case of the GPIO pins on the Raspberry Pi are rather limited and since I have an Arduino Mega 2560 lying around I can easily connect the two. In the next couple of weeks I'll explain my process of connecting the Arduino with..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

936.   Operating a Simple Switch and LED on the Raspberry Pi GPIO, as may have been explained in other tutorials, stands for General Purpose Input/Output and a GPIO pin can be set high (taking the value 1) by connecting it to a voltage supply, or set low (taking the value 0) by connecting it to ground..... Listed under: LED Projects

937. Adding a Real Clock Time to your Raspberry Pi The Raspberry Pi doesn't have a little coin-battery-powered 'Real Time Clock' (RTC) module, which keeps time even when the power is off, or the battery removed. To keep costs low and the size small, an RTC is not included with the Raspberry Pi. If your..... Listed under:

Clock - Timer Projects

938. Control your Pi’s Desktop from any Mobile Device One of the great things about a Raspberry Pi is that it can fit in your shirt pocket, but out of the box if you want to use it you need to hook it to a keyboard, mouse, bulky monitor, etc... nearly defeating the Pi’s..... Listed under: Phone Projects

939. How to Access Raspberry Pi Directly through the Ethernet Port of PC The Raspberry pi is a single board minicomputer which has only the essential hardware included so as to meet the goal of low cost. The board is Raspberry pi board runs on ARM11 processor but is available at extremely cheap price. The board is designed..... Listed under: Development Board - Kits Projects

940. PiHub Hello! Welcome to another Instructable from NextFab. In this Instructable we will be showing you how to construct your very own PiHub. What is a PiHub you ask? The PiHub is a free standing, desktop information center that uses a simple LCD screen and 5..... Listed under: LCD Projects

941. Adding shutdown/restart pushbutton for Raspberry Pi This article deals with adding a push button on the Raspberry Pi’s GPIO pins and writing a daemon that handles push button events. If we press the push button for less than 2 seconds, we want the daemon to shutdown the system and if the push button is..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

942. Raspberry pi 2 water alarm with t cobbler plus This is our first try with the raspberry pi 2 We wanted to create an headless water alarm Parts used: Raspberry Pi 2 Funduino water sensor 1k resistor Red Led Adafruit T-cobbler Plus Large breadboard (too large ;-p) Step 1: Setup of the PI 2..... Listed under: Sensor - Transducer - Detector Projects

943. Self Signalled Process System Using Raspberry Pi The Raspberry pi is a mini computer which is designed in a single board with all the essential components required for running an operating system. The Raspberry pi board runs on the Broadcom controller chip which is a SoC (System on Chip). This SoC has..... Listed under: Development Board - Kits Projects

944. MrRobot – Ubuntu Mobile app enabled Robotics( Raspberry Pi and arduino involved) Project MrRobot is an Ubuntu Mobile app enabled Robotics which has the feature of voice, touch and shake control to interact with the Rapiro robot. This project is done within 28 hrs in Ubuntu Shenzhen Hackathon by our team E-minors. All the code is onpensourced..... Listed under: Robotics - Automation Projects

945. Raspberry Pi and I2C devices of different voltage After my recent posts on using the MCP23017 I/O expander with the Raspberry Pi several people have queried the connection of an I2C device running at 5v to the Raspberry Pi’s 3v3 I/O. The reason why this is safe in this case is that on..... Listed under: Other Projects

946. AUTOMATIC DOOR OPENER CONTROLLED THROUGH SLACK The post was originally posted on http://www.visuality.pl/posts NodeJS Based Office Door Opener with using Raspberry Pi and Slack. Sesame At one of the hackathons we decided to automate our door opening process. It was a pain to do this manually because lots of clients and..... Listed under: Other Projects

947. Build up a vehicle Week 01 January 9, 2013 (1 hour): Meet as a team after class to discuss preliminary project proposal.it is decided that we are going to build up a vehicle like a Google street car. January 10, 2013 (2 hours): Met as a team after class..... Listed under: Car Projects

948. Cycle Chaser Project animations from the rear of your bicycle. The framerate depends on the speed you are moving at. A couple years ago, I created a dynamic bike headlight with a Raspberry Pi and a small, battery-operated projector. I’ve been eager to explore what else I..... Listed under: Sensor - Transducer - Detector Projects

949. Long-Range Wireless Broadcasts: Raspberry Pi Slow Scan Television (SSTV) Camera In this project the Raspberry Pi with the PiCam is used as a wireless camera which can transmit images over long distances, usually hundreds of meters! Images are transmitted by amateur radio (ham radio) using slow scan television (SSTV) on the 2 meter band (144.5MHz)..... Listed under: Wireless projects

950. Laboratory ‘Weather Station’ This article describes how to make a network enabled weather station that may be used to monitor ambient air temperature, humidity, and barometric pressure in the laboratory. Usage Example When conducting experiments on the rotating turntable in the GFD laboratory it is often desirable to..... Listed under: Sensor - Transducer - Detector Projects

951. How to build a RaspberryPi Cluster RaspberryPi was invented as educational device to inspire children to study computer science. Nevertheless, in a couple of years it has become the toy of computer scientists, engineers and curious of every age. This project is our successful attempt to build an educational RaspberryPi Cluster composed by..... Listed under: How To - DIY - Projects

952. Raspberry Pi SID Player Project overview: The Raspberry Pi SID player is a device which allows you to play music from the Commodore 64 computer using original audio hardware (the "SID" chip) through the Raspberry Pi. In addition to supporting the vast library of classic game music from the..... Listed under: LCD Projects

953.

Controlling an Effect with Real Sensors For this lab you need your Satellite CCRMA kit, a laptop computer with Ethernet adaptor to program it, and some headphones with a mini 1/8" (2.54mm) stereo jack. You are also invited to bring the following optional items, but they are by no means required:..... Listed under: Sensor - Transducer - Detector Projects

954.

How to send SMS from a PHP website through HTTP by using Raspberry Pi Background of sending SMS from website with Raspberry Pi Are you curious about the most easiest way to send SMS from your website? Nowadays, I have become really interested in the field of Internet of Things (IoT), therefore I thought it would be cool to..... Listed under: Internet - Ethernet - LAN Projects

955.

Pi-Rex – Bark Activated Door Opening System with Raspberry Pi (DISCLAIMER: Not meant as a security solution or a lesson in good dog behavior. It's an experimental proof of concept to play with the application of embedded computing to solve particular use cases) Sleep deprivation has been driving me mad recently. And it's all down..... Listed under: Home Automation Projects

956.

Macro Pi – Focus Stacking using Raspberry Pi Here's another in the series of articles of photographic uses for the Raspberry Pi SBC (Single Board Computer). This time, it's re-purposing an old flatbed scanner as a macro rail for focus stacking images in macro photography. The Plan There's a common issue with shooting..... 7.

Atlas Scientific and Raspberry Pi This Instructable will you show you how to interface with Atlas Scientificsensors using a Raspberry Pi. There are 3 main ways to do this: By hooking a keyboard, monitor, and mouse up to the Pi and using it as a stand alone computer. By connecting..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

8.

RPi Garage Door Opener for Rentals The problem with renting a unit, is that we are unable to modify much of the furniture in the house without upsetting our landlords. But we would still like to do it, and it is possible to do a few things. Our particular rental unit..... Listed under: Home Automation Projects

9.

Raspberry Pi Cloud IP Camera with POE I was inspired by scavix's work with the instructable Raspberry Pi as low-cost HD surveillance camera so I decided to make my own Raspberry PI based IP camera that also features POE and supports integration with the Google Drive. The video streaming can be simply..... Listed under: Video - Camera - Imaging Projects

960.

Reading Analogue Sensors With One GPIO Pin Unlike some other devices the Raspberry Pi does not have any analogue inputs. All 17 of its GPIO pins are digital. They can output high and low levels or read high and low levels. This is great for sensors that provide a digital input to..... Listed under: Sensor - Transducer - Detector Projects

961.

Audio Solution with Control and Visualization on a Raspberry Pi with Touchscreen (Squeezebox Touch functionality) We present you a possibility to select and control your Raspberry Pi audio player directly through a touch display. Our setup is based on the Squeezebox technology and therefore also enables multi-room audio solutions. Our idea was to find a simple and affordable way to..... Listed under: Sound - Audio Projects

962.

London Underground line status with Neopixels In this quick tutorial, we'll put together a snazzy London Underground tube line status checker using a Raspberry Pi and Adafruit's awesome Neopixel LED rings, to recreate the classic Underground roundel! We'll light up the Neopixel LEDs using the official colours of the Tube lines,..... Listed under: LED Projects

963.

Raspberry Pi Music Fingers Creating music is always fun, but making it with your own DIY musical instrument is much better !! Whether you are a professional musician looking for that next new instrument to try or an amateur enthusiast who has basic knowledge of electronics, use the Raspberry..... Listed under: Development Board - Kits Projects, Sound - Audio Projects

964.

Making a datalogger for a Kamstrup electricity / gas meter with Raspberry Pi! About Raspberry Pi So finally I received my new Raspberry Pi. This is a small, low power ARM linux board featuring a ethernet adapter, 2 USB ports and even a full-HD HDMI port for a mere \$30!. Check out [www.raspberrypi.org](http://www.raspberrypi.org) for more information. After running..... Listed under: Other Projects

965.

Honda Accord Raspberry Pi based onboard computer Intro So I had this crazy idea about fitting onboard computer to my 04' Honda Accord Tourer (Exec trim with premium speaker system – non-navi version). Been googling this and digesting available information, finally stumbled upon this excellent Engineering(DIY) project, blog and associated forum –..... Listed under: Car Projects

966.

Raspberry Pi Robotics #1: GPIO Control This video explains how to connect LEDs to a Raspberry Pi's general purpose input-output (GPIO) pins, and how to write Python code to turn them on and off. This video shows how to construct a Pololu Zumo robot chassis, how interface it to a Raspberry..... Listed under: LED Projects

967.

Plant Micro Climate Some plants require pretty specific environments to thrive. Many beautiful plants grow best in a climate that is nothing like the climate where you live. Orchids are a perfect example of this. They require cool temperatures and very high humidity, nothing like the environment where..... Listed under: Development Board - Kits Projects

968.

Front door bolt unlocker Opens your front door! see video of the end result (<http://www.youtube.com/watch?v=9qZrc6Llg1o>) Parts: - 4x AA Switchable Battery Pack + case - Continuous Rotation Servo. (You can also a regular servo, with some modifications to the software) I used - Futaba S148 - Bread board - ..... Listed under: Home Automation Projects
969.

DIY Infrared Motion Sensor System for Raspberry Pi During the month of July 2015, I completed a high school internship at Colorado State University, and one of the projects that I worked on was that of a infrared proximity sensor for Raspberry Pi. This short range infrared sensor can be attributed to a ..... Listed under: Sensor - Transducer - Detector Projects
970.

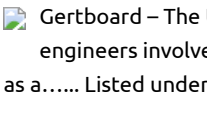

Lunch Box Computer with Raspberry Pi This is a quick and easy project to build a portable Raspberry Pi computer that fits right in a lunch box. It's a good first Pi project since it requires no coding, soldering or tooling of any kind. All you have to do it acquire ..... Listed under: Development Board - Kits Projects
971.

Breakout RaspberryPi This instructable is video game of breakout on RaspberryPi. It is easy to make this video game. Let's make and fun!! Step 1: Materials 1. RaspberryPi (I used RasberryPi rev2) ※include keyboard,mause,monitor,SDcard 2. Tact switch × 4 3. Electrical resistor × 4 4. Some jumper. .... Listed under: Game - Entertainment Projects
972.

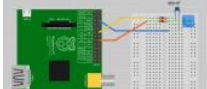

Building the MonkMakes Raspberry Pi Robot Kit The latest product from MonkMakes is a robot kit that I have designed using the RaspiRobot Board v2 (RRB2). The kit is available from MonkMakes. Overview The kit comprises: \* a robot chassis, including two gearmotors and a 6 x AA battery holder. \* a ..... Listed under: Robotics - Automation Projects
973.

Gertboard – The Ultimate Raspberry Pi Add-on Board The Gertboard is an add-on board designed by Gert van Loo who is also one of the hardware engineers involved in the original design of the Raspberry Pi. The board was originally sold by Farnell/Element14 in kit form but has just been re-launched as a ..... Listed under: Development Board - Kits Projects
974.

Picture – The 3D Printed Raspberry Pi Camera. Way back at the beginning of 2014 I published an Instructable camera called the SnapPiCam. The camera was designed in response to the newly released Adafruit PiTFT. It's been well over a year now and with my recent foray into 3D printing I thought now. .... Listed under: Video - Camera - Imaging Projects
975.

Analog Sensors without Analog Inputs on the Raspberry Pi The Raspberry Pi does not have any analog inputs, but that does not mean that you can't use some types of analog sensors. Using a couple of resistors and a capacitor, you can use a "step response" method to measure resistance. Which is just great. .... Listed under: Sensor - Transducer - Detector Projects
976.

Internet controlled SCALEXTRIC with Raspberry Pi! With this project I can use dataplicity ([dataplicity.com](http://dataplicity.com)) and a Raspberry Pi to control the speed of a car on a SCALEXTRIC system from the internet. I had a look around for tips on where to start and found a few people had had a ..... Listed under: Internet - Ethernet - LAN Projects
977.

Configuring the Raspberry Pi ethernet port for remote control This instructable will show how to quickly configure the Raspberry Pi ethernet port and run it remotely. This eliminates the need to connect a monitor, keyboard and mouse to use the device. This is a very basic Instructable for PC/Windows users or other not familiar. .... Listed under: Internet - Ethernet - LAN Projects
978.

Beaglebone Black Web Control Using WebPy Ever wanted to create a way to control your garage door using your phone maybe collect data and view it from your laptop. There is a single board computer called the Beaglebone Black which is an extremely powerful device that allows you to control its. .... Listed under: LED Projects
979.

Pulse Width Motor Control My last project had me digging through old robotics parts to find an H-Bridge Motor Controller. I found one that had several TTL chips on the circuit as well and it reminded me of a trick some of you may find useful. First, lets define. .... Listed under: Motor Projects
980.

Raspberry Pi Bluetooth In/Out Board or “Who’s Home” I wanted to create an electronic In/Out Board. The type you may have to record who is present or not in a company or home. It is usually placed by the front entrance so anyone can see who is in or out. I also wanted. .... Listed under: Bluetooth Projects
981.

All-in-One Raspberry Pi Getting Started Guide Raspberry Pi, one of the most ingenious invention for makers and hackers. Before we get started into the nitty gritty details of getting it setup, we first must ponder over the question that what the Raspberry Pi actually is? Raspberry Pi is a linux based. .... Listed under: Development Board - Kits Projects
982.

How to make a DIY home alarm system with a raspberry pi and a webcam Traditional wireless CCTV cameras are cheap but anyone with a wireless receiver can view your signal. On the other hand, IP cameras are secure but they can be quite expensive and usually the video quality is poor—unless you go for a really expensive model. Lately. .... Listed under: Home Automation Projects, How To - DIY - Projects

1028.		How to make your own portable Raspberry pi This tutorial show you how to make your own portable rapsberry pi, with a screen, access to USB, Ethernet and HDMI ports open to access on the side of the case. This is by no means a good tutorial, it is simply a way of..... Listed under: How To - DIY - Projects
1029.		Raspberry Pi Media Server – MiniDLNA Hey. In this instructable I will be showing you how to make a raspberry pi media server using MiniDLNA. This will allow you to stream your photos, videos and music around your network. This is my first instructable so sorry if it isn't very good..... Listed under: Raspberry Programmer Projects
1030.		Raspberry Pi (security) Slow Scan Television Camera For project updates, visit: AgriVision - Raspberry Pi SSTV Camera. The goal of this project is to use the Raspberry Pi with the PiCam as a wireless camera which can transmit images over long distances, usually tenths of kilometers. Images will be transmitted by amateur..... Listed under: Video - Camera - Imaging Projects
1031.		Controlling a Raspberry Pi RC Car With a Keyboard In this intermediate tutorial you will learn how to operate a hacked RC car with a keyboard using a model B Raspberry Pi device using Python. The key points in this tutorial include: • Configuring the virtual Pulse Width Modulation (PWM) for the GPIO pins..... Listed under: Car Projects
1032.		Raspberry Pi Smartphone Controlled Rc Car Use your raspberry pi to control a 1/10 scale RC car via a web page hosted wirelessly on your PI. All you need to do is set up your PI to use your mobile as a hotspot then log onto the appropriate web page (hosted..... Listed under: Car Projects
1033.		Raspberry Pi water alarm system Instructions for employing a Raspberry PI as a water alarm system Version 1.0, published in Jan 2015 The Raspberry Pi reads the status of one or two water sensor device(s) on one or two of its GPIO pins. When water is detected the Raspberry Pi..... Listed under: Clock - Timer Projects
1034.		Python and Raspberry Pi Temperature Sensor It's been quite a long time, when I'd first posted this RPi sample. Time passed, I'd gathered some feedback form the community, took into account the comments, and this sample is ready to be published at Instructables for the public interested in microcontrollers and the..... Listed under: Sensor - Transducer - Detector Projects, Temperature Measurement Projects
1035.		Vintage DAC for RaspberryPi audio Idea... I was curios about some old school R2R DACs namely the BurrBrown PCM56P. They where used in the late 80's in some of the better CD players like SonyES222/DenonDCD1500/MaranzXY whatsoever. There is some discussion in certain forums about their more or less superior sound..... Listed under: Sound - Audio Projects
1036.		LOG Raspberry Pi with car monitor So this Lazy Old Geek (LOG) decided to buy a Raspberry Pi. Now the Pi itself is really small (see picture) but the first problem I found was that with the all the cables connected, it's not very stable. The cables, especially my HDMI cable..... Listed under: Car Projects
1037.		Arc Software Consultancy using the Raspberry Pi I know it has been ages since I posted here so I thought I would put something up for Halloween. I have a brilliant and simple project here. It's easy to understand and, more importantly, it actually does work. I accidentally scared myself with it..... Listed under: Development Board - Kits Projects
1038.		Making Your Apartment Buzzer Party Friendly With Raspberry Pi and Twilio Amy Ciavolino's friends were stuck outside of her apartment waiting to be let in to the party. They repeatedly pressed Amy's apartment buzzer with no luck. The buzzer was too quiet, and Amy's party was too loud. Throughout the night, the cycle repeated: Amy's friends..... Listed under: LED Projects
1039.		Wireless Raspberry Pi Radio: Pianobar * This entire process should take about 20 minutes Pianobar is a free/open-source, console-based client for the personalized online radio Pandora. Feature: play and manage (create, add more music, delete, rename, ...) stations rate songs and explain why they have been

selected upcoming songs/song history..... Listed under: Radio Projects

Raspberry Pi Garage Door Opener Hello Everyone! This instructable explains how I setup a Raspberry Pi to open my garage door using a smarthphone. While this has been done before, I thought I'd post my solution. This was my first hardware project and instructable ever and I'm sure I made..... Listed under: Home Automation Projects

Home Automation Raspberry and Phidgets In previous tutorials we used Raspberry Pi to drive Phidgets InterfaceKit. We have also set up a web server on Raspberry. In this tutorial we will use the information gathered to create an Home Automation System managed with a Web Application. You need: a Raspberry..... Listed under: Home Automation Projects

Raspberry Pi auto-boot Ever want your Raspberry pi project to have a script that interfaces with I2C to start automatically after a power cycle? Would you like the vnc session to start at power up as well? This instructable will show how to make a perl script that..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects, Raspberry Programmer Projects

DIY tACS: Hardware for machine-human telepathy experiments These are instructions for building a computer-controlled tACS device. Transcranial alternating current stimulation (tACS) is a form of neuronal stimulation that operates by running an alternating current through the human brain. This current can be any waveform from random noise (tRNS is the official research term..... Listed under: How To - DIY - Projects

Intel Edison Spectrophotometer This instructable will explain how to build a fairly basic. Of course, this device is nothing compared to a commercial spectrophotometer, but it will allow the builder to understand how such a device works to using it for DIYbio. Know-how The spectrophotometry is the quantitative..... Listed under: Metering - Instrument Projects

Raspberry PI Camera Spinner 3D Print This Instructable is for a 3D printed camera-spinner module for the Raspberry PI Camera board. As part of a larger project (a portable Raspberry PI computer), I needed a way to implement a front and rear facing Raspberry PI Camera board. Fitting two camera boards..... Listed under: Video - Camera - Imaging Projects

Mho PlayGround Circuit Scribe Siempre he querido jugar el juego de Adafruit Industries de "Mho Playground" pero solo esta para iOS y yo tengo Android, así que decidí hacer mi propia versión en el mundo real, les presento "Mho Playground Circuit Scribe" Beta, con arduino UNO, processing y circuit..... Listed under: Game - Entertainment Projects

BristleSwarm: Explorations into Swarm Robotics A growing branch of robotics research is the study of swarm organization, emergent behavior and artificial intelligence through the use of autonomous robotic agents. In this Instructable, I'm going to walk you through a one week project that I created as part of my Masters..... Listed under: Robotics - Automation Projects

Raspberry Pi Medal Light You love the Olympics but you don't have time to check if your country has won any medals. Using IFTTT and Ledborg on the Raspberry Pi, you can know get notified of any medal just by looking at your Pi (and then tell the whole..... Listed under: LED Projects

Charlieplexing with the Raspberry Pi I've always been interested in Charlieplexing, but never had any means to get into it. When I got my Raspberry Pi, I figured it would make a great platform to learn how to Charlieplex. There are already a ton of Instructables on Charlieplexing out there,..... Listed under: LED Projects

Raspberry pi arcade project Hello their "young" follower, in this projects of mine I've will be telling you about one of my little inventions and in return i would like you to hit the vote button for me in the "contents" tab for more interesting projects and ideas. "my..... Listed under: Game - Entertainment Projects

How to connect Stepper motors to a Raspberry Pi The page demos how to connect 28BYJ-48 stepper motors to a Raspberry Pi. These small stepper motors are available on ebay for £3.99 + p+p. They're not very powerful, but they make for convenient testing with a Raspberry Pi, as they will run straight off..... Listed under: Motor Projects

Raspberry Pi Doorbell (Python) Raspberry Pi Along came the Raspberry Pi and I noticed that it had a GPIO (General Purpose Input Output) interface. Ok I have to admit – I didn't really know what that was until I read up on the Raspberry Pi and reports were saying.....

1069.

Interface to Wireless Driveway Sensor I have a driveway that is over 300 feet long and it is nice to have some advance notice that someone is driving or walking in. Previously, I have used a very expensive IR beam-break detector. It gave a lot of false alarms and eventually..... Listed under: Sensor - Transducer - Detector Projects, Wireless projects

1070.

Making an autonomous boat using a Raspberry Pi (WiP) The wave of enthusiasm for the Raspberry Pi has driven many people to wonder at the possibilities, and marvel at it's simplicity. The credit card sized SBC is perfect for just about anything. Maybe even for crossing the Atlantic Ocean. FishPi is a project with the goal of..... Listed under: Game - Entertainment Projects

1071.

Pulse Oximeter Data Capture with Raspberry Pi My daughter has some health issues that requires her to be hooked up to a pulse oximeter at night that monitors her oxygen level and heart rate. We have night nurses so we can sleep, but sometimes we wake up at night and want to..... Listed under: Video - Camera - Imaging Projects

1072.

RaspberryPi Pulse Width Modulation Demonstration This instructable is a demonstration of the settings used to control the hardware Pulse Width Modulation (PWM) on a RaspberryPi. If you are just fading an LED the default settings are good enough, but if you are trying to control a servo, a stepping motor,..... Listed under: PWM Projects

1073.

RaspbAIRy – the RaspberryPi-based Airplay speaker With the delivery of my second RaspberryPi I finally got the chance to start this long-planned project: I wanted to replace my old bathroom radio with a more contemporary device by building a network-enabled speaker. Because I'm a user of several iDevices, the idea of making..... Listed under: Sound - Audio Projects

1074.

Robot for the Office Tele-Presence (sort of) robot for the office. Work from home and yet attend the boring meetings. Scare vendors into telling the truth about their products. Chase tiny children when they come to the office for the Hallowe'en or Christmas parties. Step 1: Gather Tools and..... Listed under: Robotics - Automation Projects

1075.

iPhone remote controlled lamp This project uses the iPhone and a raspberry pi to remote control the lamp. Both the iPhone and the raspberry pi are connected to the wifi router. The lamp on/off commands are sent from iPhone and received by the raspberry pi embedded system. Then the..... Listed under: Phone Projects

1076.

Raspberry pi – simple 2x2x2 led cube I built this pretty simple 2x2x2 led cube for my raspberry pi, and wanted to share what i learnt. This is my first time using transistors so the circuit is probably not perfect, but it works as i intended it to. Here is what you..... Listed under: LED Projects

1077.

Raspberry Pi Web Server — Nginx – PHP – MySQL This tutorial will describe how to install and set up a light web server on Raspberry Pi that supports PHP and MySQL. Apache is the most widely used server, but Raspberry has limited resources so it is better to opt for a system that uses..... Listed under: Raspberry Programmer Projects

1078.

LiPo to MicroUSB adapter In anticipation of my Raspberry Pi arriving I have created a LiPo (Lithium Polymer) to Micro USB adapter. This adapter converts the power from a 2s – 4s LiPo to a regular 5v. This is then outputted through a Micro USB to be plugged into a..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1079.

The RR.O.P. – RaspRobot OpenCV Project FIRST: I used a translator to help me , because I 'm not fluent in English ,I apologize for the bad english . My intention really is to collaborate . SECOND: My thanks to you I got an award in the "MICROCONTROLLER CONTEST SPONSORED BY..... Listed under: Robotics - Automation Projects

1080.

PICAXE Raspberry Pi ADC In this instructable I will show you how to use a cheap PICAXE micro-controller as a multiple channel analogue to digital converter. We will be using I2C to access the PICAXE, which will be writing the adc values into the memory registers. The Raspberry Pi..... Listed under: Development Board - Kits Projects

1081.

RaspiRover Hello! I have done a little wifi robot with a Raspberry Pi and other components. Let me present it! Ps: be indulgent, it's my first instructable! Step 1: Things You'll Need You will need: - a Raspberry Pi (35 Eur) - raspberry cam (17,50 Eur)..... Listed under: Game - Entertainment Projects

1082.

Portable raspberry pi (the easy way) Today I will be showing you another project you can do with a raspberry pi. i've seen some people doing this project in a really complex way and i was basically just wasting money on screens and additional components, i decided to come up with..... Raspberry Pi + Java + NTX2 Radio Transmitter Introduction For the past 12 months or so after reading about the exploits of Dave Akerman and his first launching of a Raspberry Pi into near space I've been tinkering with the idea of launching a balloon myself. Although there isn't a huge HAB community..... Listed under: Radio Projects

1157.

SNESDev-RPi: A SNES-Adapter for the Raspberry Pi You already might have heard of the Raspberry Pi. It is a credit-card sized PC from the Raspberry Pi Foundation and is going into mass production and distribution these days. There is a huge demand for "the Pi" and the first orders are limited to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1158.

How to make VoIP calls from Raspberry Pi Introduction Have you ever thought about using your Raspberry Pi for VoIP telephony purposes? It sounds interesting, isn't it? If so, but you did not find out yet how to implement this VoIP-SIP solution, this tutorial helps you to achieve your goals. This is the..... Listed under: Raspberry Programmer Projects

1159.

GPS Module for Raspberry Pi Tutorial Ingredients: 1 x Raspberry Pi 1 x GPS shield for Raspberry Pi 1 x Antenna 1 x Two small wires (Red an Black) NOTE: If you don't have a Raspberry Pi you can get one buying a Raspberry Pi Starter Kit. Difficulty: Medium - Preparation..... Listed under: GPS Based Projects

1160.

Electronic drums using a Raspberry Pi and ±200g accelerometers. Introduction As it was mentioned on my website in my previous article, using accelerometers as drum triggers is deadly easy. So why not pushing it further, and try to develop a full drum kit? A few months have passed since I first had the idea..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1161.

Design Project: Control a Pan-Tilt Platform with Raspberry Pi and Smartphone This is purely the design for the projected. Presented is a detailed paper design of a smartphone controlled pan-tilt camera platform for exploring telepresence and POV drone and robot interaction and control. Introduction A pan-tilt platform can be used to position various instruments and tools,..... Listed under: Phone Projects

1162.

Raspberry Pi Birdbox Camera Hi there! This is a step-by-step guide to creating a Raspberry Pi Birdbox Camera that features real-time video streaming, motion detection, infra-red LEDs for night vision and has a cheap Power-over-Ethernet solution. I starting making this with my 11 year old son for his Primary..... Listed under: Video - Camera - Imaging Projects

1163.

Reading and writing from GPIO ports from Python This tutorial covers the setup software and hardware to read and write the GPIO pins on a Raspberry Pi running the latest Raspbian operating system. We will showing how to read from a physical push-button from Python code, and control an LED. Related categories: Tutorial..... Listed under: Development Board - Kits Projects

1164.

PiMiDi: A Raspberry Pi Midi Box, or How I Learned to Stop Worrying and Love MIDI This is my second instructable on using the Raspberry Pi for digital audio, check out my first instructable for how to set up and control custom audio effects on a Raspberry Pi. If you like them, please vote for me!! If you like messing with..... Listed under: Sound - Audio Projects

1165.

Durio BASIC + Raspberry Pi B+ (Assembled) This is a Durio Sound BASIC and Raspberry Pi B+ (Assembled). Includes: • Durio Sound BASIC board x1 • Raspberry Pi B+ x1 • M3 Nylon Screws 5mm x8 • M3 Nylon Standoffs 18mm x4 • 0.1" Jumper x2 • Fully assembled, ready to use!..... 1310.		Simple timelapse camera using Raspberry Pi and a coffee tin Whilst developing BerryCam I thought it would be pretty cool to create a timelapse camera that could be left outdoors over a period of time, to capture a sequence of images that could be later joined together into a video clip. From the outset thoughts..... Listed under: Video - Camera - Imaging Projects
1311.		Raspberry Pi Multi-Room Audio (Mobile/Tablet/PC Controlled) I have been lurking on Instructables for a few years but have never posted one myself. Now I have bought a home of my own it's time to undergo some projects and share them with the community. In my first project I'm going to show..... Listed under: Sound - Audio Projects
1312.		Raspberry Pi as low-cost HD surveillance camera This instructable describes how to build a surveillance cam based on a Raspberry Pi micro-computer which records HD video when something moves in the monitored area. Live picture can be viewed from any web browser, even from your mobile while you're on the road. What..... Listed under: Video - Camera - Imaging Projects
1313.		Web Controlled 8-Channel Powerstrip Greetings, fellow Raspberry Pi enthusiasts. We are about to create a multi-purpose gadget that is sure to impress! My primary reason for building this to to control my Christmas lights, but that is only one of many possible uses. Basically you can plug in up..... Listed under: Home Automation Projects
1314.		Wireless Christmas Light Timer with Raspberry Pi and Python Update 1/14/2014: Thanks to everyone who voted for this project in the Hardware Hacking Contest! Looking forward to my new maker pen. Update 12/31/2013: looking for a more advanced version of this project? Check out my new multi-channel voice-controlled version. We all know you could..... Listed under: LED Projects
1315.		Raspberry Pi Temperature & Humidity Network Monitor OK, Instructables is really having some strange issues, Once again the Intro disappeared, now the history is gone, and I've had to recreate the Intro from a PDF download. I had some issues with Kingston SD Cards, but the SanDisk cards I'm using now have..... Listed under: Temperature Measurement Projects

# List of Project Ideas using raspberry with advance view:

This list of projects may not be fully mature as the upper one is. but i assume its good to have in this whole pdf book.

1.

Building a Raspberry Pi Cluster Once upon a time... So this is how this story began... The Raspberry Pi has fascinated us geeks from the time it was first announced. We were thrilled to hear that Eben will be presenting at WSO2Con, and even more thrilled when Sanjiva suggested that..... Listed under: Ideas
2.

Smallness über alles: Intel’s tiny, Haswell-based NUC desktop reviewed A couple of months back, Intel sent us the latest version of its "Next Unit of Computing," or NUC for short. The NUC is sort of a side-project for Intel. It's a some-assembly-required desktop computer aimed at hobbyists who like playing with new tech and..... Listed under: Ideas
3.

Raspberry Pi as Hi-Fi player with RuneAudio This Instructable will show you how to turn your Raspberry Pi in a Hi-Fi music player with surprising sound quality when used in combination with an USB DAC. We are going to introduce here RuneAudio, a free and open source software that we developed to..... Listed under: Ideas
4.

Mini Projection-Mapped Landscape This Instructable about creating a simple sculpture that is augmented with projection mapping, designed to run on the Raspberry Pi, built with OpenFrameworks. Projection Mapping is a process that relies on knowledge of the physical space, graphics software, and installation of the hardware necessary to..... Listed under: Ideas
5.

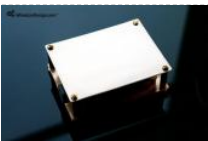

DIY Head Mounted Display In this instructable I will show you how to make a DIY head mounted display (HMD) that uses a raspberry pi and a 7 inch composite or HDMI display. UPDATE: 20 000 views! Please vote for this project in the Formlabs contest, if I won..... Listed under: Ideas
6.

Build your own Mini Arcade Cabinet with Raspberry Pi The Porta-Pi Mini Arcade is a desktop-sized, fully functional, mini arcade cabinet measuring just under 13 x 9 x 10 inches (HxWxD). This Porta-Pi Arcade turns your Raspberry Pi in a mini arcade machine. Of course you could stuff any other retro console inside, but..... Listed under: Ideas
7.

Twin Raspberry Pi B+ Rack “Case” So I have built and bought several Raspberry Pi cases. Before I could get a RasPi I owned several high quality paper cases. Once it came out I graduated to cardboard, leather, Legos, and purchased cases. I would buy a Pi and create or buy..... Listed under: Ideas
8.

Easy \$10 Copper Raspberry Pi Case I wanted to make a nice case for my Raspberry Pi that anyone could easily build using common hand tools and easy to find, cheap materials. The total cost of material was about \$10. The only tools that are needed are a pair of tin..... Listed under: Ideas
