

List of Projects using Raspberry Pi with advance view:

1.

Pi Car Build a Semi-autonomous, 4WD Raspberry Pi Car with a camera stream! Story This is a guide on how to build my Pi Car! When I discovered the Raspberry Pi I was eager to learn electronics and coding in order to create cool gadgets. However, with..... Listed under: Car Projects

2.

Raspberry Pi and Arduino Laptop Since the day I heard about and got to play with the Raspberry Pi a few years ago, I've wanted to build a Raspberry Pi-powered laptop. Story Introduction: Raspberry Pi and Arduino Laptop Since the day I heard about and got to play with the..... Listed under: Other Projects

3.

Energy Monitoring through a Raspberry Pi In this application we will setup a CE current monitor with a Raspberry Pi and display current readings for circuits through a web interface Story Introduction In this Article we are going to monitor the energy consumption (cost) of some circuits in a home or..... Listed under: Other Projects

4.

Alexa NodeMCU Smart Home Automation With Your Own HUB In this project you can make your own personal Smart Home HUB that which you can add, modify and control all the appliances you want. HUB on Raspberry Pi First we will setup the HUB on our Raspberry Pi Go through the steps on this..... Listed under: Home Automation Projects

5.

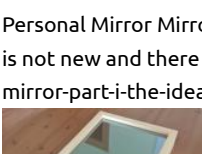

Raspberry Pi Zero AirPlay Speaker A combination of modern and classic touches in this Pi Zero AirPlay speaker. Story Looking for a project to build around the Raspberry Pi Zero, I came across the pHAT DAC from Pimoroni. This little add-on board adds audio playback capabilities to the Pi..... Listed under: Sound - Audio Projects

6.

RPi 3 BLE Cat Door IoT cat door using a Raspberry Pi 3, Node-Red and BLE tracking tags! Story The goal of this project is to build a motorized pet door so we can control which animals can come into the house. For this we are using BLE..... Listed under: Other Projects

7.

Personal Mirror Mirror with Face Recognition and Personal News Story The Personal Mirror Motivation The idea to create a mirror with additional information is not new and there are a lot of projects with instructions in the web to create such a mirror. (e.g. here: <http://michaelteeuw.nl/post/80391333672/mag-mirror-part-i-the-idea-the-mirror>) My idea is to..... Listed under: Other Projects

8.

Control GPIO and Pi Camera using Raspberry Pi + Telegram App How to Control Raspberry Pi Camera and GPIO pins with Telegram via the Internet Story The Telegram app is taking the techie community by storm. Maybe not all your friends use it, but it has enough features to make it fascinating for people..... Listed under: Video - Camera - Imaging Projects

9.

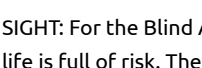

Temperature controlled fan Control a fan using a relay at a specific temperature threshold. Story I noticed that the media furniture where I have most of my media related devices (bluray-player,gaming consoles, etc.) was getting very warm whenever I was using these.I felt the urge to..... Listed under: Temperature Measurement Projects

10.

Solar-Powered Squirrel Kam (Pi Zero W) UPDATED Combines basic woodworking (house/feeder) with a Pi Zero W/cam powered by batteries/solar & turned on/off w/ an ATtiny85 and BH1750. Story Background I live half a mile above sea level and am SURROUNDED by animals... bears, fox, turkeys, deer, squirrels, birds. Spring has arrived and..... Listed under: Solar energy projects

11.

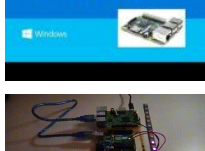

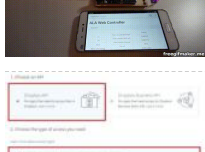

SIGHT: For the Blind A pair of smart glasses for the blind. Powered by Android Things and TensorFlow. Story Ever thought how is the life of a blind person? life is full of risk. They can't even walk alone through a busy street or through a park. They..... Listed under: Other Projects, Sensor - Transducer - Detect

Projects

12.  Smart Intercom Real-Time system that allow to pass only authorized/invited people, using Face-Recognition or NFC cards. Story with demonstration Testing push-button The principle of operation: Person approaches to the intercom Looks at the camera The system compare his face with authorized people If it finds it, then..... Listed under: Phone Projects
13.  Windows 10 IoT Core : Speech Controlled Robot Story In earlier days of computer, interaction with computer was held via punch-cards, trackball, light-gun, keyboards and even via touch screen. All of these devices requires some kind of physical contact to operate them. With decade-by-decade, new technology improves over the old one. Wireless input devices become popular..... Listed under: Robotics - Automation Projects
14.  Blinds (Or Any AC Power Motor) Control How to control several roller shutters with inexpensive relay boards (not ruining them) with physical buttons and remotely simultaneously. Story Intro Just bought a new house and wanted to automate everything, starting with the blinds. What seemed to be an easy project turned out to be..... Listed under: Other Projects
5.  Cheap Alexa Printer From An Old Receipt Printer Upcycle an old receipt printer into a voice assistant/Internet of Things printer! I am a fan of recycling old tech and making it useful again. A while ago, I had acquired an old, cheap thermal receipt printer, and I wanted a useful way to re-purpose it..... Listed under: Other Projects
6.  MQTT Alarm Control Panel for Home Assistant A control panel powered by Raspberry Pi 3 using a touchscreen and Android Things to communicate with Home Assistant over MQTT. Story Overview This project is an MQTT Alarm Control Panel for pairing with Home Assistant's Manual Alarm Control Panel component or with any home automation platform..... Listed under: Clock - Timer Project
7.  Distributed Air Quality Monitoring (Using Taxis!) Monitor air quality on a street-by-street level using Android Things, Google Cloud and taxis! Story When my family moved to Lima, Peru a few months ago, I was excited at the prospect of being able to do my daily commute along the seaside. Unfortunately,..... Listed under: Car Projects
18.  Smart Garden Smart Garden is a plant environmental monitoring system. Story Inspiration I want to start gardening, but I knew I would not keep up the regular schedule of watering the plants and making sure that they remain healthy. So, I recruited a micro-controller and a set of sensors..... Listed under: Metering - Instrument Projects
19.  Network Monitoring using Raspberry Pi 3 and Node Red Using the R-Pi 3 and Node Red I created a simple network monitoring application. Story I used a plain Raspberry Pi 3 connected to my home network to monitor some network devices and servers I am running in my home. Monitoring Statistics I used Node-Red..... Listed under: Internet - Ethernet - LAN Projects
20.  Home Smart Home Smart home system using MediaTek Linkit, Xbee, Arduino, Orange PI and Azure Story Introduction Let's see what we need to set up a smart home system using MediaTek Linkit. Since there are a lot of experts here to guide you on the hardware hook up, I will read..... Listed under: Home Automation Projects
21.  Windows IOT – Automate your power outlets Control your home power outlet from anywhere in the world using Raspberry Pi, ZigBee, Arduino (Azure enabled) Story Introduction In this project we will see how to control the power outlets of your home natively and remotely using Raspberry Pi running on Windows..... Listed under: Wireless Projects
22.  Web-Controlled LED Animations with Raspberry Pi and Arduino Set up your Arduino and Raspberry Pi to control lighting and animations on an RGB LED strip from your smartphone or PC. Story Project Overview Arduino Light Animation (ALA) is an Arduino library for controlling LEDs and running colorful animations with the minimum amount of code..... Listed under: LED Projects
23.  Weather Monitor Collects data and uploads it to Dropbox! Controllable through the Sense HAT joystick. Story Note: Feel free to use my code, but remember to credit me. (brendan-lewis@hackster) I have read a lot about weather stations, so I decided to make my own weather station code and..... Listed under: Sensor - Transducer - Detector Projects
24.  Raspberry Pi / Hologram SMS Controlled AC Power Switch Using the Nova Hologram, IoT Relay and a Raspberry Pi, easily make a remote smart switch so you can turn devices on/off remotely. Story SMS Controlled Remote Power Switch Occasionally, our ISP modem loses connection and requires a power cycle to get going again. I..... Listed under: Development Board - Kits Projects

25.

Safe Deposit Box with two-factor authentication A safe-deposit box that requires 2FA to open. Built with resin.io and Authy. Description is mostly about bringing Things to The Internet, but it's also about bringing The Internet to Things. Two-Factor Authentication (2FA) has been offered by mission critical services..... Listed under: Security - Safety Projects

26.

Automated Garden Gardening is a very long term project taking a little time every day. Why not automate it? This is the second project using my automated garden, but this time everything will be controlled by Cayenne so it will be a lot easier. Also I added..... Listed under: Home Automation Projects

27.

Curved Lane Detection Story Introduction In any driving scenario, lane lines are an essential component of indicating traffic flow and where a vehicle should drive. It's also a good starting point when developing a self-driving car! Building on my previous lane detection project, I've implemented a curved lane detection..... Listed under: Sensor - Transducer - Detector Projects

28.

RFID Register Clock in and out of locations with Mifare RFID cards for an accurate register of movements on and off site locations. I wanted to build a connected device that had the ability to identify and record the movements of people on and off locations..... Listed under: RFID - NFC Projects

29.

MiniZ: Tiny Streaming Radio Based on Classic Zenith "Cube" Like the look and feel of vintage radio, but want Pandora, internet radio or your own music? This project is for you! Story Inspiration I used to love playing around with my Dad's big 1940's Zenith radio, tuning stations across America and..... Listed under: Radio Projects

30.

Build Your Own Amazon Echo Using a RPi and ReSpeaker HAT How to build your own Amazon Echo using a Raspberry Pi and ReSpeaker Mics HAT. Story Introduction ReSpeaker 2-Mics Pi HAT is a dual-microphone expansion board for Raspberry Pi designed for AI and voice applications. This means that you can build a more powerful and..... Listed under: Sound - Audio Projects

31.

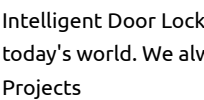

Digital Light Sensor A Windows 10 IoT core application that switches on an LED based on digital light sensor reading. Story It took some time to figure out reading the status of the Digital Light Sensor is straightforward and it simply depends on reading the GPIO pin value!..... Listed under: Sensor - Transducer - Detector Projects

32.

Raspberry Pi Smart Car Use a Raspberry Pi to make your "dumb" car smarter! Story INSPIRATION I love the idea of smart cars, but it's not for me to justify purchasing a whole new car just to get a couple of bells and whistles. For the time being, I'm..... Listed under: Car Projects

33.

Intelligent Door Lock An Alexa enabled door lock with face recognition and remote control. Story Overview Security and accessibility is the main concern in today's world. We always try to keep our house secure and at the same time we want to make our home devices easy accessible..... Listed under: Wifi / IoT Projects

34.

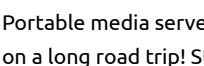

DIY Virtual Alike NEST Thermostat with Node-RED Create your own DIY virtual alike NEST thermostat to set and control the temperature of your home wherever you are from your desired device. Story Hi all! What's up Makers?! This is my first project I would like to share with Hackster community! 😊 I..... Listed under: How To - DIY - Projects, Temperature Measurement Projects

35.

Alexa Voice Controlled Tello Drone Fly a Tello drone using only your voice with Node-RED and Raspberry Pi. Story In this tutorial, I show you how to control a DJI Tello drone using only your voice. The drone works with Amazon's Alexa voice assistant to respond to voice-prompted commands. First Step..... Listed under: Wireless projects

36.

Portable media server and access point Stream videos (and other media) to mobile devices/tables while on the go. Great for streaming video to iPads in the car on a long road trip! Story Background The reason for creating this project in the first place was because I hate Apple. Both my..... Listed under: Interfacing Projects

- RS232 - I2c -ISP) Projects

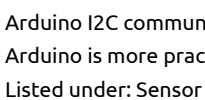

37.  Creating A Raspberry Pi Universal Remote With LIRC This project allows anyone to turn a Raspberry Pi into a universal remote using (LINUX Infrared Remote Control). Story Recently I have been working on a project that would allow anyone to turn a Raspberry Pi into a universal remote. To do this I..... Listed under: Wireless projects

38.  Raspberry Pi 2, 480*320 TFT LCD Displays Windows 10, SPI Pi 2, TFT LCD 480*320, SPI & Touch Screen on Windows 10 IoT, working more can be found at <https://www.youtube.com/c/thebreadboardca> Story OK, so i think I am outdoing myself with this one ILI9486 320 LCD 65K colour display TSC2046 touch screen controller..... Listed under: LCD Projects

39.  LoRa – Raspberry Pi – Single Channel Gateway – Cheap! LoRa Single Channel Gateway on a Raspberry Pi. Low part count, only require HopeRF LoRa module (~\$10) and a Raspberry Pi. Story Description Do you want to get started with LoRaWAN, but don't have a gateway near you? These instructions help you turn a..... Listed under: Development Board - Kits Projects

40.  Autonomous Driving AI for Donkey Car Garbage Collector Use a TensorFlow SSD MobileNetV2 DNN on the Raspberry Pi plus Pi Camera to build an autonomous car capable of object detection. Story This project will show how to transform a (Raspberry Pi + Pi Camera) powered RC car into one capable of object..... Listed under: Car Projects, Sensor - Transducer - Detector Projects

41.  Arduino I2C communication with Raspi 2 WIOT Using Arduino to do a communication between sensors and Windows for IOT. Personally, I believe that the Arduino is more practical when wanting to implement an interaction with sensors, since it is already available at a time, and has a much larger number of pins..... Listed under: Sensor - Transducer - Detector Projects

42.  Security Camera Security camera project using Windows 10 IoT Core. This project is part of Microsoft's Hack the Home initiative, which provides makers with free, open-source components for effortless interfacing with devices and services that makers use most to protect their homes. Home security systems are a growing field of..... Listed under: Security - Safety Projects

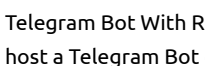

43.  Windows 10 IoT Core for Raspberry Pi 3 Model B+ The hardware and software that we need to run Windows 10 IoT Core on Raspberry Pi 3 Model B+. Story Introduction Raspberry Pi 3 Model B+ is the latest new hardware released by Raspberry Pi.org, which is equipped with a 1.4GHz 64-bit quad-core processor, dual-band wireless..... Listed under: Development Board - Kits Projects

44.  Make Your Own Google Voice HAT Make your own AIY Projects Kit Google Voice HAT. Google made their AIY projects kit available to Pi users for free through the MagPi Magazine Issue 57. However, since then, there has been no word yet on the retail availability of the kit. So to..... Listed under: Sensor - Transducer - Detector Projects

45.  Helium Air Quality Sensor A Helium-based air quality sensor and solar setup. As environmental concerns and awareness increase, I decided to build and deploy an array of wireless, self-contained, weather-resistant, solar-powered air quality sensors, also known as WSPAQS. The sensor array measures CO2 levels and VOCs. (What's a VOC, you..... Listed under: Sensor - Transducer - Detector Projects

46.  Sensor Telemetry 2.0.1 Sensor Telemetry 2.0.1 Drive temperature data to Microsoft Azure IoT Hub and monitor the data remotely using a Windows Universal application. Digitally Remastered! Story UPDATED: The Sensor Telemetry project has been digitally remastered and Updated as of May 17th, 2017 and renamed to Sensor Telemetry 2.0.1..... Listed under: Sensor - Transducer - Detector Projects

47.  Getting started with the RAK 831 LoRa Gateway and RPi3 This project takes you through all the steps required to get your RAK 831 LoRa Gateway module up and running with wifi as the backhaul. Story Introduction This step-by-step guide is aimed at developers who want to develop their very own LoRa gateway using the..... Listed under: Development Board - Kits Projects

48.  Telegram Bot With Raspberry Pi Host a Telegram Bot on your Raspberry Pi and chat with your brand new IoT device! Story Learn how to use the Telegram Bot to host a Telegram Bot on your Raspberry Pi, and use the messaging app to interact with your device. Step 1: Open..... Listed under: Phone Projects

49. Windows 10 IoT Core for Adafruit SPI Touchscreen Run Windows 10 applications on an Adafruit SPI touchscreen for Raspberry Pi. Follow instructions to install the display driver and touch. Story How it Works This project explains how to use the Adafruit PiTFT capacitive touch screen for Raspberry Pi. To support the screen, a..... Listed under: LCD Projects

50. Home Automation system using Raspberry Pi A Home Automation system using a Raspberry Pi 2 and Windows 10 IoT Core including the Home Automation App. Story Update 2: The project is still growing and a lot of new features are already implemented (like a Twitter-Client and the integration of Telegram-Bots). Please check the GitHub..... Listed under: Home Automation Projects

51. Raspberry Pi Automated Plant Watering with Website Set up your Pi to automatically take care of a house plant by reading a moisture sensor and watering when needed. Story This post starts with two facts: I have a penchant for killing plants. People in Holland grow things really well indoors. After reading about..... Listed under: Sensor - Transducer - Detector Projects

52. Possessed Portrait – Updated DIY jump scare portrait from scratch using Raspberry Pi 3 B, Python and AtmosFX Videos unliving portraits. It's October again and I wanted to come up with a Halloween project using a Raspberry Pi. I saw a few haunted portraits scattered here and there but none..... Listed under: Sensor - Transducer - Detector Projects

53. Real-Time Face Recognition: An End-to-End Project We will learn step by step, how to use a PiCam to recognize face in real-time. Our last tutorial exploring OpenCV, we learned AUTOMATIC VISION OBJECT TRACKING. Now we will use our PiCam to recognize faces in real time, as you can see below: [video width="480" height="380"]..... Listed under: Sensor - Transducer - Detector Projects

54. Smart Security Camera IoT Raspberry Pi security camera running OpenCV for object detection. The camera will send an email with image of any objects it detects. Story Check out this video to see a summary of the build steps and the completed camera: Building Housing..... Listed under: Security - Safety Projects

55. Rover Rover Simple to get started yet infinitely expandable. There is something about robots that have captured my imagination as far as I can remember. They are my comfort zone whenever I embark on new Maker adventures; as soon as I get past the "blinking LED" project,..... Listed under: Robotics - Automation Projects

56. Amazon Alexa Controlling a Chromecast [OUTDATED] Having Amazon Alexa, via an Amazon Echo, control a Google Chromecast via a Raspberry Pi running a Python script. Story Doing the Impossible: Google Chromecast and Amazon Alexa Ever since the release of Amazon Echo, people have been asking for one thing. --..... Listed under: Sensor - Transducer - Detector Projects

57. Smart Bartender Why spend lots of money going out for drinks when you can have your own smart personal bartender at your service right in your home? Story Tired of paying \$12 for a small drink at the bars? Well be tired no more. You can have..... Listed under: Sensor - Transducer - Detector Projects

58. Windows IoT: Facial Recognition Door Build an automated door that unlocks itself using facial recognition. Home security systems are a growing field of projects for Makers. A self-built system is not only less expensive than a bulky professional installation, but it also allows for total control and customization to suit your..... Listed under: Sensor - Transducer - Detector Projects

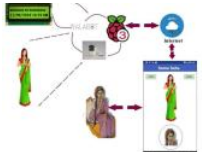

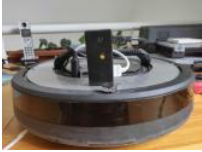

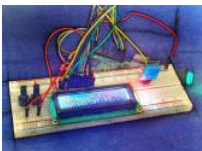

59. Walabot Mobile Trigger Use mobile phone to config Walabot and define actions by sending trigger to IFTTT or turn on relays. Walabot can apply to many applications. But to adjust Walabot parameters (Arena, angle and threshold value to detect) is quite a tricky part. Walabot Trigger can help..... Listed under: Sensor - Transducer - Detector Projects

Phone Projects

60.  **Walabot Touchpad** Walabot Touchpad A low profile solution that can turn any surface into a touchpad for your laptop. Imagine using a book, a table, or a wall as a touchpad. Combined with projector technology, you can replicate touch screens on any surface. This project aims to bring..... Listed under: Sensor - Transducer - Detector Projects
61.  **Nox – A House Wandering Robot (ROS)** Nox is a nice (and time-consuming) robot which uses SLAM (ROS) with a Kinect to navigate an environment. Nox is a differential-drive robot built using ROS, Raspberry Pi and Arduino. I started the project as a robot base with navigation I could then use..... Listed under: Robotics - Automation Projects
62.  **HomeBeta: Safety Device for Lonely People!** A HomeBeta safety device based on IoT to know and address people coming home with the need for a person to be present. Story Story of HomeBeta What is the main use of HomeBeta? 1. Get to know and address people coming to home through a digital..... Listed under: Security - Safety Projects
3.   **Roomberry Surveillance Robot: Roomba + Pi Zero + Camera** Roomberry is a surveillance robot based on Roomba using a Raspberry Zero W and a camera module. Years ago I started doing some tests to control a Roomba remotely using an Arduino Uno with a RN-1 WiFly module. Last month I decided to revitalize the idea but..... Listed under: Robotics - Automation Projects
4.  **Toilet Tracker (Powered by Walabot)** Toilet tracker can tell you either the toilet is clean or not. It also shows either it is engaged or not. Story Introduction Have you ever found a dirty toilet especially in public place? It is very common in my place. Some people forget to flush. Listed under: Sensor - Transducer - Detector Projects
5.  **Industrial IoT Gateway (Part II – Android Things-Based)** An industrial IoT Gateway using Android Things. Part II: Modbus TCP/RTU implementation. Story This is the continuation work on the Industrial IoT Gateway project using Android Things. Here you can find the Modbus implementation and further details you are not familiar with..... Listed under: Raspberry Android
66.  **UWP Controlled Wireless Netduino Car** Build a wireless Netduino car with UWP control. Netduino is an impressive hardware platform that runs applications built with .NET MicroFramework, which is quite easy for C# and .NET enthusiasts to build IoT things. In this project, a UWP controlled wireless Netduino car is designed based on Netduino..... Listed under: Wireless projects
67.  **Exhibit: The Primal Display** Exhibit: The Primal Display This very simple prototype connects an LCD to a Raspberry Pi to display any data you need, like readings from a temperature sensor. Story Introduction LCD is a very useful add-on to any project. This very simple prototype connects LCD to Raspberry..... Listed under: Sensor - Transducer - Detector Projects
68.  **Building a Sensor Network for an 18th Century Gristmill** Monitoring 100 year old factory processes are hard, but it gets easier, safer and more reliable with a Network of nRF24L01 RF transmitters. Story The modern factory process relies heavily on digital technology to monitor different parts of the facility. With digital technology, factories have..... Listed under: Sensor - Transducer - Detector Projects
69.  **Android Things Dungeon Adventure Game** A one-dimensional dungeon adventure game built using an LED strip, an accelerometer sensor and a Raspberry Pi 3 running Android Things. Story Why we built it Liverpool MakeFest is a family-friendly event celebrating digital technologies, hardware, hacking and making. We participated with a stand..... Listed under: Game - Entertainment Projects
70.  **Walabot Powered Smart Camping Safety Device** The idea of this project is building a camping safety device based on Walabot and Raspberry Pi. Story Getting Started with Walabot Introduction See through walls, track objects, monitor breathing patterns, and more using the power of radio frequency with the Walabot! [gallery size="large" ids="17273,17274,17275"]..... Listed under: Security - Safety Projects

71. **GoPiGo v2 with Windows IoT** Improving on the Windows 10 IoT project for Raspberry Pi 3. This project is an extension of the CSharp project provided by Dexter Industries on GitHub <https://github.com/DexterInd/GoPiGo>. There were a few glitches for my GoPiGo2 and some features that I wanted to have working.

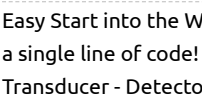

used in..... Listed under: Robotics - Automation Projects

72.

Walabasquiat: An Interactive Generative Art Installation! Walabasquiat is an interactive generative art installation using the Walab imaging sensor, Raspberry Pi, and Android. Story Idea 🧠💡 In the mid-1990s, William Latham amazed the world with his Organic application and screensavers - introducing the public to bizarre, other-worldly forms rendered using..... Listed under: Sensor - Transducer - Detector Projects

73.

Easy Start into the World of IoT with MQTT MQTT is a messaging protocol for the IoT. In this example, we show how quickly you can get up and running with a single line of code! Story The Internet of Things is getting everywhere - so more important it is to understand the principals..... Listed under: Sensor - Transducer - Detector Projects

74.

Smart Lock A smart Lock solution with mobile clients and RasPi server. Story Concept that describes workflow An ordinary electromagnetic door lock is used as a standard solution in many office buildings. It is normally closed, and in order to open it, you use either..... Listed under: Security - Safety Projects

75.

Beret Beret is an educational project to program the Rainbow HAT on Android Things using a visual language built on Blockly. Story Beret is an educational project to program the Rainbow HAT on Android Things with a visual language built on Blockly (which is a library)..... Listed under: Raspberry Android

76.

UW-Makeathon: Gastric Cancer Screening Device Low cost imaging and fluid sampling device for gastric adenocarcinoma screening in East Asia with high prevalence and poor resources. Story Team and Intro We are a team of 2 medical students and one undergraduate. We are rookie makers and hackers. Thank you for reading about our..... Listed under: Medical - Health based Projects

77.

Pocket Pi Attempt to make a Pocket Pi made with parts I had laying around. Story Reasoning. I've seen some really good Portable builds such as Ben Heck's Portable Pi and stuff like this and thought I'd try one out myself using parts I have laying about as a quick week..... Listed under: Other Projects

78.

Raspberry Pi Amateur Radio Digital Clock Build a 12/24 hr UTC digital clock using low-cost TM1637 4-digit displays and a Raspberry Pi Zero W. Story Overview Amateur Radio Operators (aka HAM Radio) use 24 hour UTC (Universal Coordinated Time) for much of the operation. I decided to build a digital clock..... Listed under: Radio Projects

79.

Raspberry Pi Based IoT Project Connecting DHT11 Sensor The goal of this tutorial is to enable you to capture and send data to cloud from your Raspberry Pi Based IoT Project Connecting DHT11 Sensor. Story Tutorial on Connecting NodeMCU to Thingsio.ai Cloud Raspberry Pi 3 Model B is the earliest model of..... Listed under: Sensor - Transducer - Detector Projects

80.

Raspberry Pi Home Security System with Camera and PIR Sensor Detecting motion with PIR sensor and sending the Raspberry Pi camera image as email. Things used in this project Hardware components [gallery ids="17076,17077,17078"] Software apps and online services gmail account ssh connection Story I have make recently a new project and I thought it would..... Listed under: Sensor - Transducer - Detector Projects

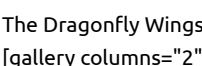

81.

Cellular IoT: Smart Garbage Can Our Smart Garbage Can is equipped with sensors that can monitor the level of Garbage in your can and alert if it needs removal. Story What Did You Create? Our smart garbage sensor was created with a Raspberry Pi Zero, some sensors, and lots of..... Listed under: Sensor - Transducer - Detector Projects

82.

The Dragonfly Wings The dragonfly was a collaboration between many many people. These wings are all that remain after it was burnt at Burning Man..... [gallery columns="2" size="large" ids="17029,17030"] The dragonfly was a Burning Man project created in my backyard by Richerd Chan, Elya Le, and a...

Listed under: Game - Entertainment Projects

83.

Rapid Headless WiFi Connection to a Raspberry Pi BerryLan is an app for Raspberry Pi entry level fans. It's a tool that helps you wil Raspberry WiFi setup. Story Intro: Rapid Headless WiFi Connection to a Raspberry Pi With BerryLan BerryLan is a software tool for Raspberry Pi entry level fans. It's..... Listed under: Wifi / WLAN Projects

84.

Scary IoT Pumpkin with Motion-Triggered Servo Pumpkin with smart LED strip, PIR motion detector and servo motor to scare ever people. It's wireless and easy to control with Node-RED. [video width="900" height="674" mp4="https://projects-raspberry.com/w content/uploads/2018/11/output_Tt6kKFnYZX.mp4" autoplay="true"][/video] Story So what do I expect from it? It must be intera and react to motion,..... Listed under: LED Projects, Motor Projects

85.

Petoi Nybble Hi there, This is Rongzhong from Pittsburgh. Eight months after my first post on OpenCat, I have quite a lot to updat importantly, I'm going to launch my first kitten on Indiegogo on Monday, Oct 22nd! The kitten's name is Nybble. Links will be post Listed under: Robotics - Automation Projects

86.

CrowdFarming A fully automated box with the sensors, switches, camera, and Messenger bot for growing lettuce. We've created a box for growing lettuce with a bunch of sensors and switches, and a camera, of course, because everything becomes better if you livestreaming it. That's..... Listed under: Medical - Health based Projects

87.

UW-Makeathon Bio-View: A modular bioreactor for cell culture Multichamber real-time imaging device for cell cultures under diff conditions. For: Isthmus Engineering Award, Best Project Award. Story Bio-View: Project Goals and Insight Real-time imaging of liv under physiological conditions (5%CO2 atmosphere under 37 degrees celsius) provides valuable insight towards better understand stem..... Listed under: Other Projects

88.

UW-Makeathon: Space Auto Sorter for Sustaintability Using visual recognition and machine learning for the sorting of potential 3D printable materials in space. NASA OTW, Best Pr., Rookie, Isth Story As we move forward with space exploration, it is important to our carbon footprint. 3D printing in space is a more efficient..... Listed under: Medical - Health based Projects

89.

Control Your Smart Home with Mails A smart home offers a lot of possibilities. If you want to access via the Internet, there are still some risks. Story A smarthome offers a lot of possibilities. Today, almost everything can be interconnected in this context, providing more convenience, quality of living,..... under: Phone Projects

90.

Desired State Configuration for Circuits Blinking an LED using a Domain Specific Language applied through a Module Twin to a Do container running Johnny 5 on a Raspberry Pi. Story Overview: Azure IoT Edge allows for intermittent connected devices to obtai desired properties through "Module Twins." These twins can..... Listed under: Development Board - Kits Projects

91.

DIY Power Logger Using I2C & Python Make your own power logger for electronics that you use in the house using INA219 chip, S OLED display, Raspberry Pi 3, and Python. Story The drive for this project was the inspiration from (my opinion) a well known You which presents electronics circuits,..... Listed under: How To - DIY - Projects

92.

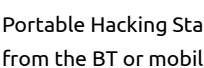

UW-Makeathon: Fully Automated Watering System A simple application of cooling plate to copndence water from air Story Gene Idea: Our project is Fully Automated Watering System (FAWS). The essential idea is to build an automatic IoT system which hydrate potted plants by condensation of water from air. A thermometric..... Listed under: Home Automation Projects

93.

DRV8825-Stepper-Motor-Driver-on-RPi-3-Win10-IoT Windows IoT Core on RPi 3 running two stepper motors using DRV8825 stepp motor drivers. There are two examples to use DRV8825. Things used in this project Hardware components [gallery size="medium ids="16338,16339,16340"] Story Connect two DRV8825 to RPi. No.1: GPIO26 to DIR, GPIO19 to..... Listed under: Motor Projects

94.

Portable Hacking Station RPi Zero W (Like Watch Dogs) Station to perform WiFi network audits, using Raspberry Pi Zero W and Raspberry Pi 3, with conr from the BT or mobile data cell phone. Story A station to perform WiFi network audits, using Raspberry Pi Zero W and Raspberry Pi 3, with connection..

Listed under: Wifi / WLAN Projects

95.

R2D2pi R2D2 toy shell brought to life using a Raspberry Pi Zero W. Story My daughter got an R2D2 toy believing it was electronica controlled, just to find out that it was only an empty shell. She was very disappointed, so I said I could probably..... Listed under: R - Automation Projects

96.

KatLight – The Coolest IoT Wonderlamp An IoT lamp with gesture seonsor, temperature sensor, and multiple light effects. Story In a very special woman, I needed a very special and unique present. Something really cool. How about a NeoPixel lamp, that can be controlled with a smartphone.And why not adding..... Listed under: LED Projects

97. Alexa-Enabled Touchscreen “Tablet” I built an Raspberry Pi-powered Alexa device with a screen (to complement my Compost Professor project). Story Overview A few years ago, I made the Mystic Mirror - a magic mirror with Alexa built in. I also made a display last year for my Compost Professor project. disclosure..... Listed under: Phone Projects

98.

Kuman TFT 3.5 RetroPie 2018 Story Like Manuel said Understanding that many people have problems configuring their Kuman TF display on the Raspberry Pi together with RetroPie, I have decided to make this step-by-step of how to install the Kuman TFT 3.5" which you can connect directly to the..... 102.

ANAVI Play pHAT Put your Raspberry Pi to work: with ANAVI Play pHAT you can make it an IoT hub during the day and a retro gami machine during the night! Story ANAVI Play pHAT is a super simple, low cost, open source hardware add-on board for Raspberry.. Listed under: Game - Entertainment Projects

103.

IoT Car This project was done to create an understanding of IoT and how one can step into it. Story Introduction This project is gc help the newbies understand Internet of Things (IoT) and how they can start working on this. For anyone, this term..... Listed und Projects

104.

Led Blinking using Raspberry Pi – Python Led blinking is one of the beginner circuits which helps one to get acquainted with GPIO Raspberry Pi. Here we use Python language to write the code for blinking Led at one second intervals. Components required One ohm resistor Jumper cables..... Listed under: LED Projects

105.

Accessing Raspberry Pi through SSH SSH stands for Secure Shell. It is a secure channel created over an insecure network. The chan consists of a server and a client. This channel uses public key cryptography and can be used for secure transmission of passwords, log in, command execution etc..... Listed under: Internet - Ethernet - LAN Projects

106. Using Raspberry Pi through VNC Contents 1 Setup VNC server on RaspberryPi 2 Accessing through VNC 3 To Automate the above Process on Boot Virtu Network Computing (VNC), is a graphical desktop sharing system used to remotely control a computer's desktop from another computer. It uses Remot

Frame Buffer Protocol (RFB). It transmits..... Listed under: Internet - Ethernet - LAN Projects

107.

Using Switch with Raspberry Pi – Python Contents 1 Raspberry Pi GPIO Pin Out 2 Pull Up and Pull Down 2.0.1 Pull Down 2.0.2 Pull Up 3 Circuit Diagram 4 Python Programming I hope that you already go through our tutorial, LED Blinking using Raspberry Pi. Detecting switch status is one of the basic step in learning Raspberry Pi GPIO operations..... Listed under: LED Projects

108.

Interfacing HC-SR501 PIR Motion Sensor with Raspberry Pi Contents 1 Working of PIR sensor HC-SR501 1.1 Adjustment 2 Circuit diagram 3 Python Program 4 Output All living beings radiate energy to the surroundings in the form of infrared radiations which are invisible to human eyes. A PIR (Passive infrared) sensor can be used to detect these passive radiations. When..... Listed under: Sensor - Transducer - Detector Projects

109.

Using UART on Raspberry Pi – Python Contents 1 Freeing up UART pins on Raspberry Pi GPIO 2 Using Python 2.1 Installing pySerial 2.2 Example Program UART stands for Universal Asynchronous Transmitter / Receiver, a popular serial communication interface which provides full duplex communication between two devices. The term universal means that transmission speed and data format are the same. Listed under: Other Projects

110.

Interfacing DS18B20 Temperature sensor with Raspberry Pi Contents 1 Circuit Diagram 2 Sensor not detecting after OS update 3 Reading temperature using Terminal 4 Terminal Output 5 Python code 6 Output DS18B20 is a commonly used temperature sensor providing 9 bit to 12 bit digital Celsius temperature measurements. The sensor communicates over one wire. Each sensor has..... Listed under: Sensor - Transducer - Detector Projects

111.

Gesture Controlled Robot Using Raspberry Pi Have you ever tired of controlling everything with buttons? Thought of controlling something with simple hand movements by sitting on your lazy couch? If yes, then you are at the right site. In this tutorial we are going to control a robot driven by two..... Listed under: Robotics - Automation Projects

112.

LIVE CAMERA STREAMING RASPBERRY PI – MOTION SETUP Raspberry Pi is a handy little computer that is used by hobbyists and tinkerers all alike. Due to its compact size, powerful processor and less power consumption it can be used for anything and anywhere. In this tutorial, I will show you how you can..... Listed under: Robotics - Automation Projects, Video - Camera - Imaging Projects

113.

RASPBERRY PI WIFI ROBOT CONTROLLED FROM ANDROID SMART PHONE Let us build a robot that can be controlled using your smartphone wirelessly over WiFi, Yes; a WiFi Robot using Raspberry Pi. Here, I will be using an App RootSaid – WiFi Command Center to send UDP commands to the listener (robot). The listener accepts the..... Listed under: Robotics - Automation Projects, Wifi / WLAN Projects

114.

MANAGE MULTIPLE RASPBERRY PI USING MOBILE PHONE Raspberry Pi is a small credit card sized, light weight and compact computer available which is used by both professions, hobbyist and of course hackers alike. Raspberry Pi 3 B+ is the newest version of the Raspberry Pi family. This mini computer can do (almost)..... Listed under: Wifi / WLAN Projects, Wireless projects

115.

RASPBERRY PI HOME AUTOMATION Let us build a home automation system that can control electrical appliances such as lights, fans, gates etc using our mobile phone from anywhere around the world. All you need is a Raspberry Pi, some relays and an android phone. Lets get started. Components Required..... Listed under: Sensor - Transducer - Detector Projects

116.

NEW RASPBERRY PI 3 MODEL B+ FEATURES AND PURCHASE Raspberry Pi is a small credit card sized, light weight and compact computer available which is used by both professions, hobbyist and of course hackers alike. Two years ago, Raspberry Pi 3 Model B was released which was the first 64-bit member of the pi family,..... Listed under: Development Board - Kits Projects

117.

MATRIX VOICE ALEXA RASPBERRY PI EASY SETUP In this tutorial, I show you how to set up MATRIX Voice Alexa in your MATRIX Voice/Creator Device. Before going into this, it would be good if you know what a MATRIX Voice is and what it can do. Click Here to learn more about..... Listed under: LED Projects

118.

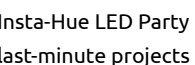

MATRIX VOICE ALEXA ROBOT USING RASPBERRY PI In the previous post we showed you how to create a home automation system using MATRIX Voice. Now we have decided to take it to the next level. He tinkered around with the code and made a Robot that can be controlled via MATRIX Voice;..... Listed under: Robotics - Automation Projects

119.

MATRIX VOICE GOOGLE ASSISTANT – MATRIX VOICE PROJECT In the last post, we built a Robot that can be controlled via Amazon Alexa using MATRIX Voice installed in a Raspberry Pi. In this tutorial, we will install and setup MATRIX Voice Google Assistant. Yes Google Assistant using your own MATRIX Device and Raspberry Pi. MATRIX Voice..... Listed under: Raspberry Android, Sensor - Transducer - Detector Projects

120.  MATRIX ALEXA HOME AUTOMATION – MATRIX VOICE/CREATOR & RASPBERRY PI So what all things we have now? A A Raspberry MATRIX Voice, Alexa configured to work with MATRIX Voice and IFTTT. What to do next? How about some home automation? In th I will show you how to set up a Matrix..... Listed under: Home Automation Projects
121.  HAND GESTURE CONTROLLED ROBOT WITH WIRELESS SURVEILLANCE Welcome to our new DIY series – Spinel Crux – A DIY Adv Hand Gesture Control Robot using Raspberry Pi for Wireless Surveillance Project. Yes, of course, building and tinkering with a DIY is fun. In this series, we will build a Raspberry Pi Rover Robot which can..... Listed under: Wireless projects
122.  How to Check and Calibrate a Humidity Sensor How accurate is your humidity sensor? Find out with this project. Humidity sensors commonplace, relatively inexpensive, and come in many different varieties. Too often, we check the datasheet, use them with an interface, and (as long as the values “look reasonable”) we accept the..... Listed under: Sensor - Transducer - Detector Projects
123.  How to Generate a High-Precision Waveform Using a DAC and a Custom PCB In this article, we'll develop firmware that will serve a basis for high-precision, high-speed signal generation. I recently designed an arbitrary waveform generator (AWG) PCB that is built around a C8051F360 microcontroller and a TxDAC from Analog Devices. These two ICs communicate via a parallel interface..... Lis under: Sensor - Transducer - Detector Projects
124.  Capture Moving Timelapse Video with this Motion Control Camera Slider I've enjoyed capturing timelapse videos ever since I found myself in possession camera that could do them. I love the way they transform the mundane into the surreal, whether it's the ability to see a transform taking place that's too slow to observe..... Listed under: Video - Camera - Imaging Projects
125.  Build a DIY Thermocam The basic idea of my low-cost thermal imager started with my physics class in 2010. Our teacher bought a : point infrared thermometer, also called a pyrometer, and asked if anyone wanted to use it for a science competition later that yea friend and I..... Listed under: Temperature Measurement Projects
126.  Program a Light-Up Felt Menorah Everyone has their own holiday traditions. Mine is trying to make an LED menorah for Hanukkah Jewish Festival of Lights. This year, Hanukkah starts on the night of Tuesday, December 12, and, as always, I didn't leave myself a l time to play..... Listed under: LED Projects
127.  Livestream-Interactive Confetti Cannon Ok, I'll admit, this one is a little silly – but ever since I've been doing live broadcasts on the regular, I've wanted to increase the number of ways that live stream audiences can interact with the broadcast. I was inspired by p like Twitch Plays..... Listed under: Game - Entertainment Projects
128.  Build a Ballistic Parachute Recovery System for Your Drone Starting on December 21, 2015, the Federal Aviation Administration (F began requiring hobbyists to register their Unmanned Aerial Systems – often referred to as drones. After two days of registration database contained 45,000 aircraft dedicated and designed for personal use. This mandate was set..... Listed under: Robotics - Automation Projects
129.  Transform a 25-Watt Semi-Flexible Panel into a Practical Battery Charger Sunlight may be free, but transforming it into usable ele is not. I learned this back in 1965 when I bought some surplus silicon solar cells from dealer Herbach and Rademan (now H&R Com Inc.). Those 0.75"×0.75" cells cost around \$2.49 each or \$19.30 today..... Listed under: Solar energy projects
130.  Raspberry Pi Plex Server If you have a backup of your digital media, it's nice to have a convenient way to play it back. Running a de media server is the usual way to do this, but a computer that's up all the time can be pretty expensive in..... Listed under: Game - Entertainment Projects
131.  Light Up the Room With These LED Earrings Before attending a fancy event, my friend asked me to create her some earrings that light up. I needed to design something that would be lightweight, but I also wanted it to be wearable without the battery for ever use. I started with a..... Listed under: LED Projects
132.  Gas Pump Skimmer Scanner Build a dashboard gadget that scans constantly for potential gas pump card skimmers What's worse t gazing over your credit card statement and seeing payments you didn't authorize? You frantically mark up your statement with a r before you make that call to your..... Listed under: Sensor - Transducer - Detector Projects
133.  Insta-Hue LED Party Heels I'm one of those people who is always late to a party because I can't decide what to wear. I'm also someone who creates elab last-minute projects for those parties. This project — I call them my Insta-Hue Heels — was designed and created in..... Listed under: LED Projects

134.

DIY Braille Embosser This project started when I met Alvino. He is originally from the Bahamas and he was born unable to see. Tod Alvino has migrated to Canada where access to braille embossers is subsidized by the government, but still they're expensive, and are costly. I..... Listed under: How To - DIY - Projects

135.

Custom Canine Wheelchair A friend needed a wheelchair for their French Bulldog at short notice. They were unable to afford the commercial wheelchairs available online. I rose to the occasion to design something for an adorable dog, and the results were fantastic! Murray loved her chair! I've since..... Listed under: Medical - Health based Projects

136.

Edge-Lit LED Signs Noisebridge is committed to providing a 24/7 accessible space in San Francisco available to all hackers and makers. They are losing their lease as of August 2018 and are currently fundraising to find a new location. Two things that most any hacker can benefit from are better..... Listed under: LED Projects

137.

Light Up Leather Arm Braces Wearable microcontrollers have found their way into cosplay, fashion, and daily wear but are usually expensive. In this Skill Builder we'll explore techniques for including leather in your wearables by examining my forearm bracer project. It uses a built-in Adafruit Gemma and RGB NeoPixels..... Listed under: LED Projects

138.

Craft A Minecraft Creeper Robot When I wrote my new book Make: Minecraft for Makers, you know I had to include a monster Creeper project. Here's how you can build a motorized Creeper, with a metal skeleton and wooden skin. Aside from the fact that this thing certainly doesn't blow..... Listed under: Robotics - Automation Projects

139.

Impact Reactive Snare Drum Lights [gallery columns="2" size="large" ids="15808,15809,15810,15811"] At a Less Than Jake concert I noticed that Vinnie Fiorello's drums had LED lights inside. They would periodically change colors while the roadie set up the band's gear but stayed one solid color during the performance. Less Than Jake have..... Listed under: LED Projects

140. Aya Aya is an interactive robot that stores your picture to recognize and interact with you. Winner of Hack the North 2017 & Best Use of AWS. Story Inspired by When we saw what Amazon did with Alexa and what Google did with home, we were sure..... Listed under: Robotics - Automation Projects

154.

Getting Started with the Raspberry Pi Zero Wireless Introduction The Raspberry Pi is a popular Single Board Computer (SBC) in the full computer packed into a single board. Many may already familiar with the Raspberry Pi 3 and its predecessors, which comes in a factor that has become as highly recognizable..... Listed under: Wireless projects

155.

Setting Up the Pi Zero Wireless Pan-Tilt Camera Introduction This tutorial will show you how to assemble, program, and access the Raspberry Pi Zero Wireless Pan-Tilt Camera. [caption id="attachment_15562" align="aligncenter" width="500"] SparkFun Rasp Pi Zero W Camera Kit[/caption] Required Materials You'll need a microSD card, a sufficient power supply, and a micro-B USB Cable Listed under: Wireless projects

156.

Pi Servo Hat Hookup Guide Introduction The SparkFun Pi Servo Hat allows your Raspberry Pi to control up to 16 servo motors via I connection. This saves GPIO and lets you use the onboard GPIO for other purposes. Furthermore, the Pi Servo Shield adds a serial terminal connection which will allow you..... Listed under: Development Board - Kits Projects, Motor Projects

157.  **Lumenati Hookup Guide Introduction** The Lumenati line of LED boards is designed to give your projects an edge in their lighting capabilities. Based on the APA102C addressable LED, these LEDs employ a 2-wire communication protocol consisting of a clock line and a data line. While this requires one more wire than..... Listed under: LED Projects

158.  **Qwiic HAT for Raspberry Pi Hookup Guide Introduction** This Qwiic HAT for Raspberry Pi is the quickest and easiest way to utilize SparkFun's Qwiic ecosystem while still using that Raspberry Pi that you've come to know and love. This Qwiic HAT connects the I2C (GND, 3.3V, SDA, and SCL) on your Raspberry Pi..... Listed under: Development Board - Kits Projects

159.  **Getting Started with TJBot Introduction** TJBot is a kit developed at IBM to help people get started with their Watson AI service. It comes with a friendly little robot that you build yourself, a Raspberry Pi 3, and all the parts you need to make your robot wave, blink, talk, and more. Listed under: Development Board - Kits Projects, Robotics - Automation Projects

160.  **Using the PSoC 6 Pioneer Board with the Pioneer IoT Add-on Shield Introduction** The PSoC 6 is the latest addition to Cypress's powerful PSoC series of processors. The PSoC 6 Pioneer IoT Add-On Shield is the development tool associated with this processor line, sporting an onboard debugger, Arduino compatible headers, CapSense widgets, and more, all tied to a PSoC..... Listed under: Development Board - Kits Projects

161.  **Raspberry Pi Stand-Alone Programmer Introduction** With the power of Raspberry Pi, Python, avrdude, a custom HAT with cable and more, we developed our own spin on AVR programming that turned out pretty darn robust. In addition to creating a stand alone solution for AVR programming, this was a great experiment to learn more..... Listed under: Raspberry Programmer Projects

162.  **Remote Monitoring of Weather Using Raspberry Pi** In this Project I am going to show you how to make a Remote Weather monitoring system using Raspberry Pi3 I am using PubNub Cloud service for this,Free...which is PubNub is a global Data Stream Network (DSN) realtime infrastructure-as-a-service (IaaS) company based in San Francisco..... Listed under: Metering - Instrument Projects, Phone Projects, - Transducer - Detector Projects, Temperature Measurement Projects

163.  **Telemonitoring System With Raspberry Pi** Telemonitoring is defined as the use of information technology to monitor patients at a distance. Telemonitoring allows reduction of chronic disease complications thanks to a better follow-up; provides healthcare services without using hospital beds; and reduces patient travel, time off from work, and overall costs. Telemonitoring can help reduce healthcare costs. Listed under: Home Automation Projects

164.  **Raspberry Pi Wireless Display Receiver** In industrial automation & other areas most of the time, we want data to be viewed at control room or head office with far distance, That's why I made Raspberry Pi Wireless Display Receiver ,As RPi made its 10th Million sale this year on its Birthday..... Listed under: LCD Projects, Video - Camera - Imaging Projects, Wifi / WLAN Projects, Wireless projects

165.  **Raspberry Pi Zero Helmet Impact Force Monitor** How much impact can the human body handle? Whether it's football, rock climbing, or a bicycle accident, knowing when to seek immediate medical attention after a collision is incredibly important, especially if there are obvious signs of trauma. This tutorial will teach you how..... Listed under: Security - Safety Projects

166.  **Setting up a Raspberry Pi 3 as an Access Point** Introduction Note: This tutorial was based on instructions found on this blog. The Raspberry Pi 3 comes with a built-in wireless adapter, which makes it easy to configure it as a WiFi hotspot to share Internet on your own internal web site. The first part of this guide..... Listed under: Wireless projects

167.  **Headless Raspberry Pi Setup** Introduction A "headless" computer is one that operates without a monitor, keyboard, or mouse. The Raspberry Pi works great as an inexpensive computer that can help people learn to program and create fun, interesting projects (without many repercussions if you break something—just reflash the SD card!). The..... Listed under: Other Projects

168.  How to Use Remote Desktop on the Raspberry Pi with VNC Introduction If you like the idea of a headless computer setup for your Raspberry Pi (i.e. without a keyboard, mouse, or monitor) but want access to the full graphical desktop, then you're in luck! By using a Virtual Network Computing (VNC) program, you can access a..... Listed under: Wireless projects
169.  Python GUI Guide: Introduction to Tkinter Introduction Python is generally more popular as a sequential programming language than one called from the command line interface (CLI). However, several frameworks exist that offer the ability to create slick graphical user interfaces (GUI) with Python. Combined with a single board computer, like the Raspberry..... Listed under: Other Projects
170.  Using the A111 Pulsed Radar Sensor with a Raspberry Pi Introduction Experimental Products: SparkX products are rapidly produced to bring you the most cutting edge technology as it becomes available. These products are tested but come with no guarantees. Live technical support is not available for SparkX products. Does your project require high-precision, cutting-edge distance, speed,..... Listed under: Sensor - Transducer - Detector Projects
171.  Using Wemos D1 mini to control a brushless motor with ESC and servo signals I've recently become interested in making "machine" projects of various sorts. I was sorting through some of my RC (radio control) plane "stash" the other day and came across various brushless motors and electronic speed controllers (ESC) like these. In RC, Brushless ESCs are usually connected..... Listed under: Motor Projects
172.  Run a K40 Laser Cutter from Your Raspberry Pi with K40 Whisperer I bought a Chinese K40-style laser cutter about three weeks ago. I've been spending quite a bit of time playing with it learning how best to use it. It's an eminently hackable design, and while mine can cut 3mm acrylic OK 'straight out of the box',..... Listed under: CNC Machines Projects
173.  How to tap a thread in acrylic Perspex, Lucite, Plexiglass using your cordless drill driver I recently bought a laser cutter (running on a Raspberry Pi) and started working with acrylic (Perspex). I've sawn, routed and drilled Perspex before. It machines beautifully as long as you're not too 'greedy' with your cuts (and if you're too greedy, it cracks). In exploring the material,..... Listed under: CNC Machines Projects
174.  New Raspberry Pi model 3B+ 1.4 GHz, 330Mbit Ethernet, 802.11ac, PoE It's Pi day (if you do dates in the illogical MM/DD/YY format) and we're releasing a new version of the Pi 3B. It's called the 3B+, which is logical because it has more to offer than the 3B and is also in keeping with previous..... Listed under: Internet - Ethernet - LAN Projects
175.  How Much Power Does Raspberry Pi 3B+ Use? Power Measurements Since the original Pi came out I've been interested in how much power it consumes. It's become something of a launch week tradition to publish a new chart and some data. So much so that several people ask for it on launch day. This time..... Listed under: Battery Projects
176.  Octopod: Smart IoT Home/Industry Automation Project Octopod, a uniquely shaped full automation system that allows you to monitor your industry and keep security with AI and smart RFID locks. Things used in this project Hardware components Arduino UNO & Geiger Counter Arduino Arduino MKR WiFi 1010 Either this or any other..... Listed under: Home Automation Projects
177.  LoRa gateway and node boards run on Raspberry Pi power Pi Supply is Kickstartering lot LoRa Gateway and IoT LoRa Node pHAT a board for the Raspberry Pi, as well as a LoRa Node that works with the Micro:bit. An Arduino node is also in the works. Pi Supply, which has produced a variety of Raspberry..... Listed under: Wireless projects
178.  Raspbian Desktop OS on an Old Netbook Old Netbook with Windows XP Home is likely something you have forgotten about. Breathe new life into the hardware with Raspbian OS desktop. Things used in this project Hardware components Intel Netbook PC (various manufacturers) For this article, I am referencing the HP Mini 110..... Listed under: Raspberry Programmer Projects
179.  Smart Home Hub With Raspberry Pi + Homebridge + Resin OS Want to use a device that HomeKit doesn't support? Get Raspberry Pi running with Homebridge using Resin OS and change your home forever. Things used in this project Hardware components Raspberry Pi Zero Wireless Pimoroni Red/White Raspberry Pi Zero Case AC/DC Micro-B USB Adapter 2A..... Listed under: Wireless projects
180.  How to Build a Raspberry Pi FM Transmitter Be it a boring afternoon, a monotonous job or a lonely long drive FM radio stations have always kept us entertained. While on the contrary it should also be agreed that sometimes these FM stations get very boring with the DJ blabbering irrelevant stuff or..... Listed under: Radio Projects
181.  Voice controlled Home automation using Amazon Alexa on Raspberry Pi Have you ever thought about a speaker which can be controlled by your voice!!! What if we can control our home appliances this way and make these appliances smarter? Voice assistants becoming popular as we are heading towards an era of AI and IoT based systems. Listed under: Sound - Audio Projects

182.  ZeroPhone Is "Coming Soon": A Raspberry Pi-Based, Linux-Powered Phone For Just \$50 ZeroPhone is an open source, Linux-powered, \$50 smartphone with no carrier locks, bloated apps, or data mining, and it doesn't depend on big companies - instead, its open source hardware and software give you much control over your phone as possible. ZeroPhone is..... Listed under: Phone Projects

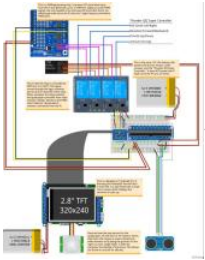

183. Raspberry Pi Car HUD Objective The goal of our project is to use the Raspberry Pi and create a touchscreen enabled Heads Up Display (HUD) for an auto. The HUD would display useful, real time information through an easy-to-ready GUI onto a PiTFT screen. Some example information includes the..... Listed under: Car Projects

184.  WarpPI Calculator, Step-by-step algebra calculator for Raspberry Pi. WarpPI Calculator Step-by-step algebra calculator for Raspberry Pi. This project is experimental and strictly related to my calculator, designed to run on an embedded hardware. It works but many fundamental features aren't complete. If you really want to build and test it on your computer..... Listed under: Calculator Project

185.  Getting started with Embedded Linux Single board computers (SBCs) have been credited with rekindling an interest in electronics all age groups, young and old. SBCs themselves have been around for a very long time and can be found in many industrial automation systems, but it was the advent of..... Listed under: Internet - Ethernet - LAN Projects

186.  M3 Pi: Raspberry Pi OBD-II Touchscreen Car Computer Abstract There are a wide range of off-the-shelf OBD-II car computers available for purchase, but the majority of them are either prohibitively expensive or simply unreliable. Furthermore, almost all of these devices are closed-box systems that cannot be expanded or modified. As such, this project..... Listed under: Car Projects

187.  Autonomous Quadcopter for Target Tracking Objective There is a wide range of applications for Unmanned Aerial Vehicles that have been made possible through recent advancements in technology. One application uses a quadcopter for surveillance of a region. In this project, we attempted to automate a quadcopter for tracking targets. The..... Listed under: Radio Projects

188.  Face Recognition System Introduction Using the Raspberry Pi and some additional peripherals, we have designed and built a face recognition system. In this system there is a camera which will detect the faces presented before it and if shown one face at a time it will track that..... Listed under: Video - Camera - Imaging Projects

189.  Goodnight Pi: Reducing Raspberry Pi Power Consumption Introduction The Raspberry Pi is a powerful platform to build a variety of projects on. Its full Linux operating system and large variety of peripherals make it extremely useful for a large range of applications that a traditional microcontroller could not handle. However, the Raspberry..... Listed under: Clock - Timer Projects

190.  Smart Pen: Final Project for ECE5725 Introduction Nowadays, in order to gain the handwriting results, people often rely on the capillary touch screen, stylus pen, or other similar devices. They are functional and precise, but not always flexible. Our project combines a Raspberry Pi with IMU to build a product that can..... Listed under: Robotics - Automation Projects

191. Raspberry Pi Car HUD Objective The goal of our project is to use the Raspberry Pi and create a touchscreen enabled Heads Up Display (HUD) for an auto. The HUD would display useful, real time information through an easy-to-ready GUI onto a PiTFT screen. Some example information includes the..... Listed under: Car Projects

192.  N5DUX Raspberry Pi Ku-Band Outernet Receiver Project Description Outernet is a service intended for providing web-based information to individuals without access to the web. It is a startup computer and still going through much revision. The service will surely morph over time as interest and finances grow, but for now it's an..... Listed under: Wireless projects

193. Raspberry Pi Controlled Health Monitor System Introduction Health is always an important concern. However, the health of modern people is always impacted by various potential but dangerous factors, such as high blood pressure, and abnormal heart rate. High blood pressure, also called hypertension, increases.....

burden of the heart to pump..... Listed under: Medical - Health based Projects

194.

N5DUX Raspberry Pi ISS iGate Project Description This project is an APRS iGate for ARISS program's digipeater aboard the Interna Space Station. I have a 2m FM radio tuned to 145.825 MHz. As the ISS passes over my location, the radio passes the received signal the ISS to a Terminal..... Listed under: Radio Projects

195.

Voice Controlled Car Objective The main objective of this project is to exploit the “IoT” potential of Raspberry Pi computer to cont Remote Car using the Voice Commands. The Raspberry Pi with a Microphone connected to it will receive the Voice Commands and control the Remote..... Listed under: Car Projects

196.

N5DUX Raspberry Pi WebSDR Receiver Project Description I created my first Raspberry Pi WebSDR receiver in the Fall 2014. I had intended to setup a WebSDR station, but grad school and work can really keep you busy. The first receiver on the air worked well t surprise electrical storm..... Listed under: Radio Projects

7. Raspberry Pi gets its own app store with latest OS update The latest release of the official Raspbian OS will make it easier to find the best software for t credit card-sized board. A large factor in the runaway success of the \$35 Raspberry Pi is how easy it is to get started with the tiny..... Listed under: Rasp Android

198.

N5DUX Raspberry Pi Generic Setup Description This is a howto document created as a basis for all my other Raspberry Pi Project I list the basic hardware needed as well as the steps necessary to create your own basic Raspberry Pi setup. This is just the beginni several..... Listed under: Memory - Storage Projects

7.  DIY Portable Mini Monitor In this project I will show you how I used a 1280x800 LCD Kit to build a battery powered portable mini monitor which is useful for your DSLR camera, your Raspberry Pi or to extend the viewing field of your computer. Let's get started! Step 1: Introduction..... Listed under: LCD Projects
8.  RainBerry: Compact, Weatherproof Case for Raspberry Pi A+ and Pi Camera RainBerry case is a compact, aesthetically designed, weatherproof case for Raspberry Pi and Pi camera. This project was born out of a need to monitor and protect the garden using a Pi camera with computer vision. Step 1: Features of RainBerry Case For most..... Listed under: Video - Camera - Imaging Projects
9.  Battery Operated Cardboard HDMI Retro TV Stand for your Raspberry Pi Your Raspberry Pi deserves its own screen and stand! What if you could have your Raspberry Pi with the living room TV? Give your Pi its own stand and battery so you can operate it anywhere in the house or in the office. Imagine having your own retro..... Listed under: Battery Projects
290.  Make Raspberry Pi into a LDAP Server to Store User Account Data and Password Introduction An LDAP server provides the following benefits: Authenticates all the users of Raspberry Pis and computers in your network Store files stored /etc directory Store contact details that can be used by email clients My personal reason of running an LDAP server is..... Listed under: Memory - Storage Projects
291.  How to create a Scratch game with Makey Makey controller on a Raspberry Pi In this instructable you'll learn how to make a simple Scratch game on a Raspberry Pi; to make the game more fun you will be controlling it using real world objects (fruit and vegetables) via Makey Makey. You will need: A Raspberry Pi..... Listed under: Game - Entertainment Projects
292.  Centro de cómputo para Niños con Raspberry Pi Estos serán los primeros pasos de la Raspberry Pi y para ello necesitaremos: Raspberry Pi 2 Adaptador a micro USB Tarjeta micro SD (de 8 gb) Cable HDMI Cargador Ratón Teclado para computadora En caso de contar con un Kit de inicio no necesitas..... Listed under: Interfacing (USB - RS232 - I2C - ISP) Projects
293.  Raspberry pi NAS/UPNP MP3 Streaming Torrent Box headless Raspberry pi NAS/UPNP MP3 Streaming Torrent Box headless I have a Raspberry Pi model B and a desktop HDD and wanted to host all my music and videos. For this I will be using Raspbian Wheezy for the UPNP streaming for..... Listed under: Sound - Audio Projects
294.  Using IR Remote with Raspberry Pi without LIRC I wanted to get an IR remote input to Raspberry Pi. I managed to get LIRC installed and tested. Everything was OK, except the very last step. When I wanted to pass the IR remote key value to a Python program it doesn't pass correctly. It passes..... Listed under: Sensor - Transducer - Detector Projects

295.  Reuse Unwanted Infrared Remote Control to Shutdown and Reboot Raspberry Pi Introduction This remote control in the picture u control a fan until the fan stopped working. I threw away the fan and saved the remote control unit. This is definitely my personal favourite instructable because it is is useful for lazy people like me..... Listed under: Robotics - Automation Projects
296.  How to Install and configure Raspbian on Raspberry Pi 2 (Linux/windows/mac) Watch the YouTube Video Here The raspberry pi 2 v announced in February 2015 with a awesome tag of it being "6 times faster". With a 900 MHz quad core broadcom processor and i ram, the performance is evident. With faster boot times,..... Listed under: Raspberry Programmer Projects
297.  Wall Mounted SqueezePlayer with Raspberry Pi Build a wall-mounted "SqueezePlayer"-based network music player using Squeeze Jivelite and a Raspberry Pi. I built this project because Logitech has stopped making its "Squeeze" line of networked music players the server software is open source, and because I continue to have several network..... Listed under: Sound - Audio Projects
298.  Wall Mounted SqueezePlayer with Raspberry Pi Build a wall-mounted "SqueezePlayer"-based network music player using Squeeze Jivelite and a Raspberry Pi. I built this project because Logitech has stopped making its "Squeeze" line of networked music players the server software is open source, and because I continue to have several network..... Listed under: Sound - Audio Projects
299.  How to Make a Raspberry Pi Case From an Altoids Tin If you have a Raspberry Pi computer board, you can make a great case for it (an Altoids mint tin. You'll need: 1 Raspberry Pi computer board 1 Altoids mint tin 1 Plastic gift card 1 Dremel or Small drill 1 Tin sni Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
300.  A Raspberry Pi-based Truly Random Number Generator Random numbers are essential for all kinds of things, especially cryptogra Computers, however, can only produce pseudorandom numbers, which can be "guessed" by using sophisticated software. Truly ra numbers are hard to come by. Luckily, with a few wires and a Ras Pi, one can..... Listed under: LED Projects
301.  USB Powered Hub Hack For Raspberry Pi External Harddrive Step 1: Intro Hi I recently got a Raspberry Pi to use as a HTPC running Raspmc. But came into problems where the Rpi does not provide enough bus power on its USB ports to power a 2.5" external harc So I decided to add..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
302.  Low power usage USB speakers – ideal for raspberry pi I am in the middle of building a raspberry pi bartop gaming cabinet that run battery. One of the issues I ran into was that the 7" monitor I was using had no speakers, and other speakers took up too much po from the..... Listed under: Sound - Audio Projects
303.  Instamorph Raspberry Pi Case Bloominglabs has had two Build Nights recently, Instamorph and Raspberry Pi 2 / Adafruit. I have combined the two to make a case for the Raspberry Pi from Instamorph.Instamorph makes a nice material for making cases, as it's sturdy, but easy to modify as..... Listed under: Other Projects
304.  Easy Node.JS + WebSockets LED Controller for Raspberry Pi Hi, in this instructable, I'll show you how to create a lightweight and incredibly responsive web server with WebSockets. I'll use it to control a LED using an Arduino but the concept can be applied to n other projects. Since this project does not use..... Listed under: LED Projects
305.  Set up Telegram Bot on Raspberry Pi On 24 June, 2015, Telegram published the Bot API, enabling machines to talk Telegram. From day on, not only can human use Telegram, so can machines. For those who don't know what Telegram is, it is a messaging app, very like WhatsApp. This..... Listed under: Phone Projects

306.  IoT Motion Controlled Servos Secure and reliable real time data streaming is essential for IoT. I've seen plenty of demonstrations involving applications or "push button here, LED on over there" type hardware, but a friend and I wanted to make something that more interactive... a way to almost..... Listed under: LED Projects

307. Tabletop Arcade Mame Box for Raspberry Pi Hello! Welcome to the build of a 2-player tabletop Arcade emulator! The box is constructed of laser-cut 6mm Baltic Birch, and aside from the wooden parts, you will need. A Raspberry Pi - I used a B+, but B will also fit. Look forward to..... Listed under: Game - Entertainment Projects

308. User Signalled Process System in Raspberry Pi The Raspberrypi board is powerful enough to run large operating systems like Linux and Windows. The Multi-tasking Operating Systems can run several processes at a time creating an effect of parallel processing with the help of the high speed processor. The Linux Operating Systems..... Listed under: Other Projects

309. Testing & Setting the USB current limiter on the Raspberry Pi B+ One of the features of the new Raspberry Pi B+ is improved power handling – particularly around the USB interfaces. There is a device connected to the power to the USB ports that is quite clever – it controls the power and “soft starts” the..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

310.  Marz – Prototype I Final Report: Campus App Introduction: We wanted to design a tool that helps campus-going individuals out with finding places within their university and organizing their college tasks. The Campus App is a smartphone application that uses fine GPS data to provide a map of campus for user. It..... Listed under: Wireless projects

311.  Group 9 – Prototype I Final Report: Remote Piano Pedal Controller Introduction: As a group, we feel that everyone should be able to enjoy the things they love to do despite their limitations. Our project is designed to enable people who are unable to use their legs to operate the pedals of a piano and to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

312.  Boards – Breakout the Pi – I2C, UART, GPIO and More This post will be one in a series for all the components available to literally break out the expansion ports from the Pi. This series will cover Breadboarding components to connecting the various Shields and plates that are designed specifically for the Breakout..... Listed under: Development Board - Kits Projects

313. CCTV surveillance using Raspberry Pi Overview For Security purposes, we usually need to capture every motion in specified areas. To fulfill this requirement, CCTV cameras were introduced a few years ago. However, this brought along some challenges such as the following: The ordinary security cameras run continuously, in turn recording..... Listed under: Security - Safety Projects

314. Hermanizer Power Pedal – A DIY Fuzz Box For Christmas gift to my brother I thought I'd try to make a guitar effect pedal. The main feature would be to have a nice sounding distortion effect, classic rock fuzz. I also found an article on Instructables by Harrymatic discussing adding a timer IC..... Listed under: How To - DIY - Projects

315. Monitoring My Central Heating Boiler Hardware Since I was replacing the PC with a Pi, I have only listed the Pi-specific hardware here because the relay unit remains the same: Model B Pi Piface Digital interface card Dallas Semiconductor (Maxim) DS9490R 1-Wire U/I adapter Dallas Semiconductor (Maxim) DS18S20 1-Wire thermometers..... Listed under: Temperature Measurement Projects

316. PROJECT 2 – Driving a Liquid Crystal Display Introduction You can use the Pi to drive a Liquid Crystal Display (LCD) to display all sorts of information: it could be date, time, system status, disk utilisation, MAC and IP address, etc. The most common LCD is one based on Hitachi HD44780 chip..... Listed under: LCD Projects

317. Raspberry Pi on a Portable B&W CRT Last week at hacklab.to, my friend Igor brought in a Panasonic TR-1030P. This is a black and white CRT, with an astonishingly small 35mm (1.37") screen diagonal, circa 1984. A great find for \$5 at Value Village. A good set of teardrop pictures can be..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

318. Raspberry Pi Temperature Sensor A few weeks ago, I purchased a Raspberry Pi. After reading Eben Upton's Raspberry Pi User Guide particularly the two chapters on which he focuses attention on the GPIO, I had an idea for my first project. The post covers the first iteration of a..... Listed under: Sensor - Transducer - Detector Projects

319. Raspberry Pi Flashing Led Simple Circuit Diagram Raspberry pi blog - news, announcements, ideas, Looking for raspberry pi news, product announcements, fun project ideas, and stories from the global pi community? read the official raspberry pi blog.. Raspberry adafruit industries, unique & fun diy, Adafruit's goal to help the world..... Listed under: LED Projects

320. Talking to a Bluetooth Serial Module with a Raspberry Pi Bluetooth is a very low cost and flexible way to add wireless communication to your projects. However, it can also be a bit tricky to set up. In this post we show you how to set up a Raspberry Pi with a USB Bluetooth dongle..... Listed under: Bluetooth Projects

321. Raspberry Pi powered heating controller (Part 1) TL;DR: It should be fairly straight forward to add a Raspberry Pi controlled heating hot water system to a standard UK domestic set up and, more importantly, remove it again without messing with the existing set up. At a minimum you'll need a Raspberry..... Listed under: Home Automation Projects

322. LED candle with Raspberry Pi The General Purpose Input/Output pins (GPIO) give you power to interact with the real world using a Raspberry Pi. This project will get you comfortable with using the GPIO pins, which will form the backbone of the final project. Traditionally the 'Hello World' program for..... Listed under: LED Projects

323. Raspberry Pi Webcam Robot – Best Video Streaming Tutorial It is always cool to add a camera to your remote controlled car or robot that you can see where it's heading exactly and probably use a wifi enabled smartphone or tablet to view the video as well. It's very easy now to do this using a..... Listed under: Robotics - Automation Projects

324. Control Your Pi with Webiopi Webiopi is a fantastic framework for controlling your RPi over the web. I found it a steep learning curve but once you've got your head around a few ideas it provides a very powerful way of bringing your RPi to life. I am primarily using it..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

325. RaspiRobot Board V2 ** Works with the Raspberry Pi2 ** The RasPiRobot Board V2 is an expansion board designed to turn your Raspberry Pi into a robot controller! This board comes fully assembled and includes a switched-mode power supply so you can supply your Raspberry Pi from a..... Listed under: Robotics - Automation Projects

326. Raspberry Pi – BI-COLOR RIGHT ANGLE LED – 2xGPIO Moving on from "My first GPIO LED", I decided to take a look at a different LED I had in my possession, an L-59BL/1. This LED has 3 pins and I had no idea what they were for, so I Googled it and found this..... Listed under: LED Projects

327. Autoadvent: Raspberry Pi controlled LED Advent candles A couple weeks ago my Dad mentioned to me it would be cool if advent candles automatically lit themselves according to the date. (One candle is lit starting the 4th Sunday before Christmas with an additional candle being lit for each of following Sundays). I..... Listed under: LED Projects

328. Emulate a Bluetooth keyboard with the Raspberry Pi Today, we'll be learning how to use a Raspberry Pi to act as a Bluetooth keyboard, and writing our own program to relay input to the client device. This will provide a useful insight into how a protocol like Bluetooth works, how sockets work, and..... Listed under: Bluetooth Projects

329.  The best Raspberry Pi power supply Ok, since we already documented a little about the importance of a good PSU (Power Supply) when audio quality is your main concern. As stated earlier, the raspberry pi power supply is also responsible for proper functioning of this tiny device, as a poor..... Listed under: Other Projects

330.  How to Build a Handheld, Raspberry Pi-Powered Game Console The Raspberry Pi is a great little mini-computer for playing classic video games from your childhood. But, thanks to its small size, it's also possible to turn it into a portable handheld game console that plays your favorite titles, from NES to N64. I call..... Listed under: Game - Entertainment Projects

331.  Raspberry Pi chats to Arduino Well I got the Pi working, so what next? After a tiny amount of pondering I decided to get it chatting to an Arduino using the serial interface. I'll try and note down everything relevant so this'll be as much a guide to doing it as..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

332.  Raspberry Pi Web-Enabled Irrigation Bypass Project A Better Solution The problem with rain sensors lies within how they are engineered. My particular rain sensor works by using absorbent cork discs to detect moisture. When it rains, the discs swell-up with water, depress a switch which disables the watering. The watering is..... Listed under: Internet - Ethernet - LAN Projects

333.  Best Voice Recognition Software for Raspberry Pi The best voice recognition software out of three we tested, and how to set it up on a Raspberry Pi. On a mission to find the best voice-recognition software for Raspberry Pi, I installed and tested three different systems. Two were internet-dependent and one was offline..... Listed under: Feature, Video - Camera - Imaging Projects

334.  Raspberry pi touchscreen LCD: The Best LCD Tutorial Touchscreen displays are always one of the coolest things that you can add to a Raspberry Pi. Having a neat display always boosts the overall funk of your project. You can build upon a prolific number of applications using portable TFT LCD displays. Maybe create..... Listed under: LCD Projects

335.  Raspberry Pi – Head Mounted Display Tutorial Head mounted displays are definitely the latest fad that's going around town now. You might have seen several wearable displays such as the Google Glass, and many others including virtual reality systems like the Oculus Rift. Head mounted displays are primarily used for video sharing,..... Listed under: How To - DIY - Projects

336.  Raspberry Pi GPIO with PIR motion sensor: Best tutorial This tutorial, based on the latest Raspberry Pi B+/model 2, will show you how to interface a PIR motion sensor with the Raspberry Pi. And also guides you to use the GPIO pins on it. The GPIO pins on the Raspberry Pi are critical when it..... Listed under: Sensor - Transducer - Detector Projects

337.  The Best way to Connect Raspberry Pi to Laptop display What are the stuff required to do this? Raspberry Pi. Ethernet Cable. Laptop Card with Raspbian. Micro USB Cable. (Optional) Components required for setting it up the first time: HDMI/ AV Display. Keyboard Mouse. How does it work? To connect Raspberry Pi to..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

338.  Solar Power, Weather and the Raspberry Pi Solar Power, Weather and the Raspberry Pi SwitchDoc Labs is in the process of building a Solar Powered Raspberry Pi Weather Station. The design will be released as a SwitchDoc Appnote, an Instructable and a series of videos on SwitchDoc.com. We are right in..... Listed under: Solar energy projects

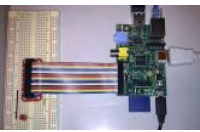

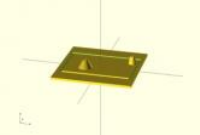

339.  USB MIDI interface The RPC is a MIDI controller and implements the age-old 1980s serial MIDI bus, and the Protosynth must be capable of interfacing with it. But in general use a USB device port is much more practical than the three ubiquitous MIDI ports; it allows for easy connecting..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

340.  Raspberry Pi – MSP 430 – LCD DEM16101 LCD unusable No matter how hard I tried, I couldn't figure out how to use it. I think I managed to talk to the KS066 controller correctly (I reliably reset the controller using the initialization sequence) but I could not figure out how to set the voltage..... Listed under: LCD Projects

341.  Nokia 5110 graphics tutorial Okay, here's the deal. There are some tutorials on youtube showing how to get graphics to show on the nokia 5110 and that's great. If you just want a simple way to do that, go and watch them instead but there are a few problems..... Listed under: Phone Projects
342.  Use RPi, Azure, and Cortana to Automate your Home! Introduction There is new technology all around us and only more coming every day. Our micro controllers are getting faster, are phones getting smarter, and the cloud is becoming stronger. With all this new technology everyone is asking themselves: How can I utilize it all?..... Listed under: Home Automation Projects
343.  IOT: iPhone Controlled Mini Fan Step 1: Materials iPhone Mac with xcode RFDuino RFDuino Battery Shield RFDuino USB Shield Battery Wires TIP120 2.2kOhm resistor Diode DC Motor Fan blade for DC Motor Step 2: Circuitry Setup the circuitry as shown in the diagram the servo is small enough, we..... Listed under: Phone Projects
344.  WS4E – Ham Radio And Other Stuff The Arduino Fox Hunt Transmitter will be documented in another post, in this post I want to document the Raspberry SSTV Field Day Beacon. The one thing that I don't like about the Raspberry Pi is that it only has digital input/output logic lines..... Listed under: Radio Projects
345.  Reading analogue data on a Raspberry Pi using MCP3002 I got a bit disappointed with my little bus pirate yesterday. I'll investigate to update it to fix the odd SPI behaviour another time, but for now, its on to trying to read the MCP3002 SPI ADC chip directly using Raspberry Pi. However,..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
346.  Interfacing an I2C GPIO expander (MCP23017) to the Raspberry Pi using C++ (i2cdev) The I2C Bus The I2C bus is a two wire bus developed by Phillips/NXP (4-wire if you want to include power and ground), that is used to connect a single master device to up to 120+ slave peripheral devices. The master device is typically a..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
347.  Raspberry pi as an nrf24l01 base station with python for smart home or internet of anything projects Internet connectivity is an important part of various micro-controller projects, specifically those using the atmega328p with arduino ide/avr-gcc. NRF24L01 modules provide an inexpensive and reliable wireless link. In many projects, an additional avr/arduino is hooked up to a computer with internet connectivity for linking the..... Listed under: Internet - Ethernet - LAN Projects
348.  Configuration Utilities for XBee Radios XBee Radios I purchased two XBee Series 1 Module (Freescale 802.15.4 firmware) from Adafruit. These are manufactured by Digi and are low-power module with wire antenna (XB24-AWI-001). They have a 250 kbps RF data rate and operate at 2.4 GHz. These radios use the IEEE 802.15.4 networking protocol and can perform point-to-multi-point or peer-to-peer networking ,..... Listed under: Radio Projects
349.  NetWorker – an advanced web server with a microcontroller An Internet connection would be a valuable addition to many projects but often designers are put off by the complexities involved. The 'NetWorker', which consists of a small printed circuit board, a free software library and a ready-to-use microcontroller-based web server, solves these problems and..... Listed under: Internet - Ethernet - LAN Projects
350.  PCB designing and isolation milling using only free Software In this Instructable I will show you how to design and fabricate your own PCBs, exclusively using free software that runs on Windows as well as on a Mac. Things you need: computer with internet connectivity, mill/router, the more accurate the better 45°/20° V-Bit..... Listed under: Development Board - Kits Projects
351.  Solar Phone Charging Back Pack Step 1: Materials and Tools Materials (1) backpack. There are 2 requirements when choosing a good backpack for this project: room to install your solar panels and a pocket to store your cell phone. The Drifter square backpack is perfect for this project. (1) portable..... Listed under: Phone Projects, Solar energy projects

352.  Build an Intruder detector with Raspberry Pi and robomq.io Device, sensors and systems connecting together are driving the next generation of applications creating the Internet of Things (IoT). robomq.io provides an open standard based platform to connect y devices and sensors to the back end applications, systems, processes and people, enabling you to build..... Listed under: Interfacir - RS232 - I2c -ISP) Projects
353.  Analogue Sensors On The Raspberry Pi Using An MCP3008 inputs which means it is a bit of a pain to use many of the available sen: wanted to update my garage security system with the ability to use more sensors so I decided to investigate an easy and cheap wa it..... Listed under: Sensor - Transducer - Detector Projects
354.  LED Rubik's Cube With Arduino In this instructable I'll show you how you can build your own LED Rubik's cube. This project was do an introductory electronics course at Pomona College. Groups were given approximately two months to complete a project of the choosing, the only requirement being that..... Listed under: LED Projects
355.  Access Control of Door and Home Security by Raspberry Pi Through Internet 1 INTRODUCTION In this modern world crime has bec ultra modern too! In this current time a lot of incident occurs like robbery, stealing unwanted entrance happens abruptly. So the s does matters in this daily life. People always remain busy in their day to..... Listed under: Home Automation Projects, Security - Sa Projects
356.  Model Railway Automation This note introduces my experiences of using the Raspberry Pi to automate a model railway. Two aspe covered: •Sending commands to a DCC controller •Detecting a train's position. Sending commands to a DCC controller The RPi is connected to a Hornby Elite DCC controller..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
357.  Raspberry Pi GPIO and LED Flash an LED - Works Remotely In this exercise you update your Pi, install the GPIO tools, and write a p to flash an LED ten times. If you use PuTTY to log in remotely, you could flash LEDs on another continent. I have tried..... Listed ur LED Projects
358.  Solar Powering My Home! My home has been solar powered since June 2013 and the power system has proven its reliability. I'm a owner of an OFF GRID solar power system. I decided to publish this instructable to let fellow DIYers know the basics to design and install..... Listed under: Home Automation Projects, Solar energy projects
359.  On/Off Project – Switch a light on/off using your smart phone f you found this article after doing a search on Google, welcome! Or website you will find plenty of content around DIY home automation using open-source hardware. Enjoy the article! I have been a lot about writing tutorials using the Raspberry Pi for home automation, as well..... Listed under: Phone Projects
360.  Solar powering a Raspberry Pi for Bitcoin mining Introduction: As a simple one-GPU bitcoin miner, the recent growth in ASIC (Appl specific integrated circuit) bitcoin mining hardware has been a real gamechanger. In my case, there are some disadvantages to the change, namely having to spend the few bitcoins I have mined on..... Listed under: Solar energy projects
361.  Air Pollution Detector This device is intended to provide the user with a cost-efficient means of determining air quality. Our senso focuses on the five components of the Environmental Protection Agency's Air Quality Index: ozone, particulate matter, carbon mo sulfur dioxide, and nitrous oxide. This device detects all..... Listed under: Sensor - Transducer - Detector Projects
362.  Home automation with Raspberry Pi 2 and Node-RED Node-RED is a visual tool for wiring the Internet of Things that can be run or Raspberry Pi and allows for rapid prototyping of projects. In this tutorial we will first set up Node-RED on a Raspberry Pi 2, before creating a flow that..... Listed under: Home Automation Projects
363.  Raspberry Pi in a NES Case – Part 1 – Wiring up the front panel and external connectors Raspberry Pi is a great project computer, it cheap (\$35), runs Linux (or Risc OS) and has lots of resources available aroundn it. When mine arrived, I didn't really know what to u for, but then it hit me: I can build an emulator..... Listed under: Game - Entertainment Projects
364. Resources – Computing Club Sessions – Raspberry Pi 2 – Python Overview This is an opportunity to look at another language (Pyth another IDE (IDLE) and have another go at Scissors, Paper, Stone. Hardware This is going to use the GPIO pins (the two rows of 13 26 in total) on the Pi. We'll..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

365.  Talking to a ZWave Switch using open-zwave Z-Wave is a wireless communications protocol designed for home automation, specifically remotely control applications in residential and light commercial environments. The technology uses a low-power RF radio embedded retrofitted into electronics devices and systems, such as lighting, home access control, entertainment systems and..... Listed under: Home Automation Projects

366.  Raspberry Pi Garage Door Opener with GaragePi Introduction When I was little, I used to push the garage door button from inside the garage and then run out the garage while it's closing... carefully jumping over the sensor so I don't trip the safety mechanism. It was back then and a..... Listed under: Home Automation Projects

367.  How To Use GPIO Pins On Raspberry Pi – Buttons And LED Tutorial What Are The GPIO Pins on Raspberry Pi? A great feature on the Raspberry Pi is the GPIO pins (stands for General Purpose Input Output). These GPIO pins on Raspberry Pi can be found in 2x13 header pins which can perform tasks include serial UART, 3V3..... Listed under: LED Projects

368.  Design Your Home with Autodesk Homestyler Autodesk Homestyler is a free online home design software, where you can create and share your dream designs in 2D and 3D. The online tool allows you to either upload your existing floor plan or create a new one with simple drag and drop..... Listed under: Home Automation Projects

369.  Announcing OpenSprinkler Beagle (OSBo) v1.0 Following the sneak-peak preview, I am excited to announce that OpenSprinkler Beagle (OSBo) v1.0 is now officially released! OpenSprinkler Beagle is an open-source sprinkler / irrigation extension board for the Beagle Black. It uses four GPIO pins to control an unlimited number of sprinkler valves..... Listed under: Wireless projects

370.  beakn v0.3 : DIY Lync Status Light with a RaspberryPi, .NET, Mono and MQTT I'm continuing to build out "beakn" my DIY Lync Status Light. This is what I'm calling a "maker experience" project. I want to know what a maker goes through to build things so I'm building it with many different platforms as possible. I've built..... Listed under: How To - DIY - Projects

371.  Raspberry Pi OpenCV Pan & Tilt Face Tracker Create your own face tracking, pan and tilt camera on the Raspberry Pi! This tutorial will demonstrate use of the OpenCV (computer vision) library to identify and track faces on the raspberry pi using two servos and a USB webcam. For the interested, I previously..... Listed under: Video - Camera - Imaging Projects

372.  1: A single LED Before we even get started with the GPIO, let's make an LED light up by simply wiring it to the +3.3v supply and 0v. We have a yellow wire from the Pi's +3.3v supply to the breadboard and this connects to an LED then..... Listed under: LED Projects

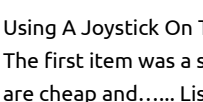

373.  Morse Code on an LED Difficulty: beginner This tutorial will guide you through safely connecting up an LED to your Raspberry Pi and being able to turn it on and off from Python. Then you will write a program to take input from the keyboard and send it out in..... Listed under: LED Projects

374.  Connecting a 16x32 RGB LED Matrix Panel to a Raspberry Pi Overview Everyone loves a colorful LED screen! Our 16x32 RGB LED display is a low cost, and easy-to-use arrangement of bright LEDs - just like the ones used in Times Square! This display makes a fantastic addition to your Raspberry Pi. It is pretty easy..... Listed under: LED Projects

375.  How to make a Raspberry Pi surveillance and alarm It's the 1st of July, and hopefully you are lucky enough to go on holiday soon, a great way to make a useful project right before leaving home alone! This is a cheap but powerful system of surveillance and alarm that you can know it's..... Listed under: How To - DIY - Projects

376.  Using A Joystick On The Raspberry Pi Using An MCP3008 While browsing eBay looking at electronics stuff I found a few interesting items to connect to the Raspberry Pi. The first item was a small 2-axis analogue joystick. They are similar to the thumb-sticks you would find on a modern games console controller. These modules are cheap and..... Listed under: Game - Entertainment Projects

377.  A cheap Bluetooth serial port for your Raspberry Pi While working on my Arduino based robot vehicle project the idea came to me the Bluetooth module that I'm using as a remote control receiver for my robot would make a great addition to my Raspberry Pi. In article I describe how to..... Listed under: Bluetooth Projects

378.  Gertboard-Pi Potentiometer Controlled Motor In the potmot (for potentiometer-motor) test we use a potentiometer ("pot") connected to the analogue to digital converter (A/D) to get an input value, and this value is used to control the speed and direction of the motor. It is set up so that at one extreme, the..... Listed under: Motor Projects

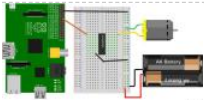

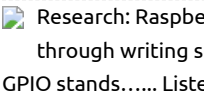

379.  Expanding the Raspberry Pi with PiFace and Pi Rack The marvellous Raspberry Pi, essentially a cheap, small PC, is a great device for education or home projects like media streaming. Out of the box though, it is not ideal for controlling other devices other than by ethernet. What if you wanted to..... Listed under: Home Automation Projects

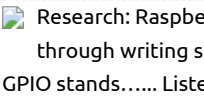

380.  Build Raspberry Pi robots: Best Tutorial for beginners If you are a beginner to Raspberry Pi and were looking for a simple hardware project, then look no further. This tutorial will show you to develop a python based robot which avoids obstacles and navigates freely. Obstacle avoiding robots are fairly common and easy..... Listed under: Robotics - Automation Projects

1.  Raspberry Pi Control Motor Speed Controlling a motor is one of the most exciting things you can do with your Raspberry Pi. Motor power-hungry components. They often require more power than the 3V3 your Raspberry can provide. That's the reason we will connect the motor to an external power..... Listed under: Motor Projects

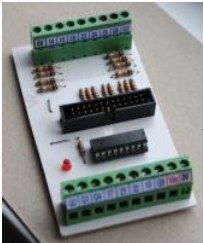

2.  Research: Raspberry Pi – Pins, Buttons and Circuits In a previous post I wrote about how you can control the function of the Raspberry Pi's software through writing scripts, but one of the remarkable things about the Pi is that it is also capable of interacting with the physical world through its GPIO pins..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

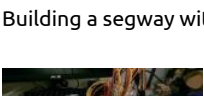

3.  Raspberry Pi STL in a Box I promised more details in the future about the Raspberry Pi STL build. Well, against all odds, I'm going to deliver! The project exists purely to solve a problem with getting audio between two sites for a hospital radio station. They currently do it a costly..... Listed under: Radio Projects

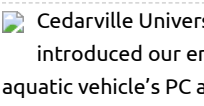

384.  A Raspberry Pi Interface Board The Raspberry Pi computer is eminently suitable for interfacing. It has 17 GPIO lines which can be programmed to be either inputs or outputs as well as various other functions. They are very low power lines however, and on their own can only drive tiny LEDs..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

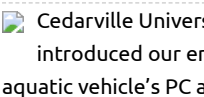

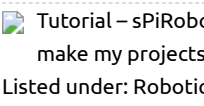

385.  Building a segway with Raspberry Pi Step 1: Materials Raspberry Pi, AC-to-DC 5V power adapter, plastic enclosure I am using Raspberry Pi 2, with Raspbian installed. Cost \$45.0 USB WiFi adaptor, I'm using Edimax WiFi adaptor. Cost \$10.0 DC motors x2, wheels x2, car frame, acrylic sheet motor bracket x2,..... Listed under: Robotics - Automation Projects

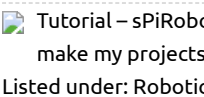

386.  Raspberry Pi:- USB, Ethernet, crashing and other problems Do you have frustrating issues with your Raspberry Pi Are you experiencing problems with your Pi, you can't explain or figure out why? You bought what you thought were good accessories (Keyboard, Mouse, WIFI adapter and cables), well read on, you may discover your problem..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

387.  Cedarville University builds RoboBoat vehicle with 4 Raspberry Pi's, MATLAB and Simulink In Part 1, Sergio described the RoboBoat Competition and introduced our entry, the Cedarville University RoboBoat team. In this article, we will go into depth with regards to how we programmed our autonomous aquatic vehicle's PC and five Raspberry Pi's using MATLAB and Simulink. Last..... Listed under: How To - DIY - Projects

388.  Tutorial – sPiRobot : Control & See what your Robot is seeing from Anywhere Why sPiRobot ? If you are following my blog I always use Arduino Boards to make my projects, but for this I use Raspberry Pi as a brain of my Robot. That's the reason I called this "PiRobot". Materials ? 1x Raspberry Pi 1x Webcam..... Listed under: Robotics - Automation Projects

389.  Remote Logic The Raspberry Pi is often hailed for its incredibly cheap price. Other low-cost development and educational boards are available (e.g., the Beaglebone), but for some of these systems, the additional peripherals that are required can quickly amplify the cost. The Raspberry Pi, however, is designed..... Listed under: Wireless projects

390.

Aaron's piHouse Monitor ntroduction I have been using microcontrollers for a long time now. I started in college as part of the pro and have never stopped. Professionally, educationally, hobby, I've done projects of all types. Recently I decided to try something v Raspberry Pi. It is..... Listed under: Home Automation Projects

391. Home Automation with Raspberry Pi The Surveillance System this year I planned to travel with my family to China for a few weeks, so we had to leave al house. While being on vacation, I wanted to check sometimes if everything was alright at home. So I decided to..... Listed under: Home Automation Proj

392.

Part 2: How to build a High-Definition FPV UAV using a Rasperry PI with HD camera, using a high speed WiFi link This is the second a 2-part series on 'How to build a High-Definition FPV UAV using a Rasperry PI with HD camera, using a high speed WiFi link. In my post on the subject (located here), I discussed the parts I used, and..... Listed under: Video - Camera - Imaging Projects, Wireless p

393. 3D Printing MouseAir V2 – Part 1 / Rasperry Pi Project The Mouse Air project has been around in various stages since April of 2014. The goal of the (conceived in a bar, the Fedora in Coeur d'Alene Idaho and named by Sarah, the most excellent bartender there. And some BlueMoon Beer.) was to b able..... Listed under: How To - DIY - Projects

394.

Gertboard Open Collector Drivers: ULN2803APG If you were wondering how to use the open collector drivers on the Gertboard ve then you have come to the right place. As shown in the diagram, the red area marked out is the open collector driver section. The ULN2803APG is a Darlington..... Listed under: Development Board - Kits Projects

395. Raspberry Pi – homemade level converter for serial communication rs232 3.3 volts to 5 volts TTL for AVR microcontroller I found that the Raspberry interface rs232, described in a older post by myself, was too bulky. Pi and AVR should be connected through a less amount of wires. So I've searched best hints to solder a cheap and uncomplicated level converter,..... Listed under: Home Automation Projects

396. PIE1 – Raspberry Pi Sends Live Images from Near Space HAB (High Altitude Ballooning) is a growing hobby where enthusiasts use standard weather balloons to put small payloads typically 100g-1kg into "near space" at altitudes of around 30km or so, carrying a tracking device (so the balloon posit known throughout the flight) and usually..... Listed under: Video - Camera - Imaging Projects

397. Raspberry Pi – RGB LED conversion I was looking at the cost of an Arduino and Ethernet shield and thinking that they are quite expensive compared v Raspberry Pi. So time to update my Arduino RGB LEDs project to run on a RPi. As noted all over the web the..... Listed under: LED Projects

398.

Section 3: Building the Turing Machine Introduction In this project, we shall build a 3-symbol Turing machine using 11 bicoloured L represent the cells on the tape. Green represents a 1, red represents a 0 and a blank is represented when the LED is off. We shall c these the..... Listed under: LED Projects

399.  Pi Ball – A Spherical and Interactive Raspberry Pi 2 Case Here were my requirements - Use a Pi (Raspberry Pi 2 in the case) - Spherical case, that can be bounced, kicked, thrown - Accelerometer onboard to monitor the motion of the ball - Wireless everything! Wireless keyboard/mouse, networking, so and video (Pi Ball in..... Listed under: Game - Entertainment Projects

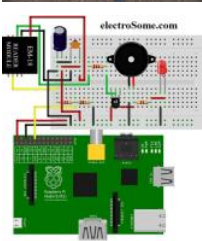

400.  Temperature Measurement for Lab and Science Projects Introduction Every lab (home, office, school) needs temperature measurement capabilities. Measuring temperature for science experiments is hard – all sorts of materials, liquids, and chemicals may be involved large temperature range may need to be covered. The sensor used for this (a thermocouple)..... Listed under: Temperature Measurement Projects

401.  A GSM/GPRS & GPS Expansion Shield for Raspberry Pi Today we present an expansion shield for Raspberry Pi to control the very effective GSM/GPRS SIM900 and SIM908 (with GPS) modules: in this way it is possible to extend the functionality of Raspberry Pi for mobile applications (eg: remote control) and, by employing the SIM908..... Listed under: Wireless projects

402.  Solar Power on the Raspberry Pi – SunAir designed to charge LiPo batteries from Solar Panels and power your Pi. First SunAir Kickstarter Update (December 2014) Published here. An earlier generation of this project was used in Project Curacao. You also can track the sun, detect low power conditions and Works perfectly with..... Listed under: Solar energy projects

403.  Project Coffee: Espresso Machine Some time ago, I embarked on a project to control my Gaggia Classic Espresso machine with a Raspberry Pi. Obviously, you can buy a fully automatic “bean to cup” machine... but where’s the fun in that! This project started out the simple idea of..... Listed under: Home Automation Projects

404.  GOMRF 29.45 MHz Receiver Project In 2007/8 AMSAT-UK put considerable work into a proposal to the European Space Agency (ESA) to place an Amateur Radio payload on the mass dummy on the maiden flight of the VEGA launcher. Known as iSTAR (Integrated Suite Teaching and Amateur Radio) it was..... Listed under: Wireless projects

405.  Interfacing EM-18 RFID reader with Raspberry Pi RFID (Radio Frequency Identification) uses electromagnetic fields to read, monitor and transfer data from tags attached to different objects. It is not necessary that the cards are to be in visibility of the reader, it can be embedded in the tracked object. The tags can..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

406.  Controlling Domestic Hot Water Supply with Raspberry Pi Contents Background Hardware Pi Wiring Heating System Wiring Software Remote Access Gas Consumption Impact Background I want to implement a Raspberry Pi controlled heating and hot water system on the hot water side, the objectives are Primary Always ensure there is sufficient hot water available..... Listed under: Home Automation Projects

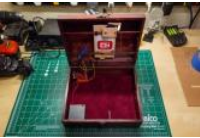

407. Dual DC motor control using PWM with the Raspberry Pi This project uses two IRF 630 MOS-FET transistors for pulse width modulation and two relays to change the direction of the two motors. . The circuit diagram is below. The two IRF 630 MOS-FETs are connected to the GPIO 15 and 18 pins of the..... Listed under: Motor Projects

408.  Home Weather Display In this project, we use a Grove DHT (Digital Humidity and Temperature) sensor as a Raspberry Pi temperature sensor. This project uses a Grove OLED display, connected to the Raspberry Pi, to show the temperature and humidity. You can use the project as designed: a simple weather station for..... Listed under: Home Automation Projects

409.  Home Energy Monitoring System The Purpose (Mission) Monitor, archive and analyze energy consumption in the house Visualize historical consumption data Access data remotely from Web Eventually include data from other sensors, like temperature, pressure, humidity, motion, light, security, etc. UPDATE: Temperature/Pressure sensors added: Additional Sensors for Home Energy Monitoring Listed under: Home Automation Projects

410.  Connect a sensor to your Raspberry Pi to warn you when there are noxious gases about! To detect a fart with the Raspberry Pi, we use a sensor that is responsive to one or more of the volatile sulphuric compounds which make up 1% of flatulence (i.e. the compounds which make farts smell). Essentially, we need to give the..... Listed under: Sensor - Transducer - Detector Projects

411.  XMOStartKIT: Building an XMOS and Raspberry Pi Robot XMP-1 Introduction The XMOS startKIT from Farnell (or Newark) is a very cost (£12 including VAT) processor platform that works well with the Raspberry Pi. Together it is possible to construct robotics applications with almost no soldering required. The XMOS startKIT is a near-credit-card sized board..... Listed under: Robotics - Automation Projects
412.  Control an LED from your web browser or smartphone using Raspberry Pi A first project – Internet controlled LED In this simple, inexpensive project you can connect a light emitting diode to your Raspberry Pi, and turn it on and off using any web browser. There is even an app for Apple, Android and Windows smartphones. Prerequisites To run this..... Listed under: LED Projects
413.  Usb Hub Schematic Cy7c65632, cy7c65634 hx2vl™ very low power usb 2.0 hub controller cypress semiconductor corporation • 1980 champion court • san jose, ca 95134-1709 • 408-943-2600. Click here to receive the iogear newsletter and / or discounts: stay connected facebook; twitter - iogear news; twitter - iogear..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
414.  More Raspberry Pi Electronics Experiments – Gertboard and Potentiometer-Controlled LED Cluster More Raspberry Pi Electronics Experiments – Gertboard and Potentiometer-Controlled LED Cluster Posted on February 3, 2013 by rakanalysis One of the things which alerted me to the potential of the Raspberry Pi as an electronics control system was the announcement of the Gertboard before the Raspberry..... Listed under: LED Projects
415.  Interfacing HC-SR04 Ultrasonic Sensor with Raspberry Pi Ultrasonic distance sensors are designed to measure distance between transmitter and target using ultrasonic waves. We use ultrasonic waves because they are relatively accurate across short distances and do not cause disturbances as they are inaudible to human ear. HC-SR04 is a commonly used module..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
416.  My Raspberry Pi Powered Garage Monitor Update #1: Garage Monitor Memory Leak: Part 1. Update #2: I should point out that the switch I ended up using bent so it stopped working after about a month of use. I really need to figure out a way to mount it properly. Listed under: Home Automation Projects
417.  8 Interesting DIY Raspberry Pi Case Ideas The Raspberry Pi is a small, credit-card sized ARM computer that costs a measly \$25. For the money you'll get a full system-on-chip computer capable of running a variety of ARM-optimised operating systems, USB and Ethernet connectivity but no case. Future versions of the unit..... Listed under: How To - DIY - Projects
418.  Driving a bi-polar stepper motor with the SN754410NE double H-bridge and a Raspberry Pi Bi-polar stepping motors use only two wires and are easily recognized because they only have four wires. Most unipolar steppers can be used in bipolar mode by ignoring the two centre taps. Because bi-polar stepping motors produce the rotating magnetic field by reversing the current..... Listed under: Motor Projects
419.  WeatherPiArduino Weather Board WeatherPiArduino is a weather station controller board designed to interface to Arduino and Raspberry Pi computers. It is an interface board developed by SwitchDoc Labs to allow the user to easily build a fully functional Weather Station while allowing customization of functions. WeatherPiArduino is derived..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
420.  Raspberry Pi Face Recognition Treasure Box Overview Face recognition is an exciting field of computer vision with many possible applications to hardware and devices. Using embedded platforms like the Raspberry Pi and open source computer vision libraries like OpenCV, you can now add face recognition to your own maker projects! In..... Listed under: How To - DIY - Projects
421.  Mobile Raspberry Pi Computer: Build your own portable Pi-to-Go well, yes, the Raspberry Pi Computer, a credit card size mini PC that costs \$35. There are so many possibilities and uses for these small nano PCs. People have made them into PVRs (personal video recorders), retro gaming machines, weather stations, in-car PCs, jukeboxes,..... Listed under: How To - DIY - Projects
422.  Remote Controlling a Car over the Web. Ingredients: Smartphone, WebSocket, and Raspberry Pi. At Kaazing, we have been experimenting with using a smartphone as a remote control for quite some time now. Those familiar with our demos may have seen the Zing-Pong demo (which is a "Pong"-style game using smartphones to control the paddles over WebSocket) or our..... Listed under: Wireless projects
423.  Back in Black – a DIY raspberry pi Boombox: Wire it Up – Power Power The BinB boombox has a different power setup from the prototype - it can be battery powered or AC powered. If you want to run the boombox often on battery, the recommended choice is SLA (Sealed Lead Acid) battery of good quality. These..... Listed under: How To - DIY - Projects

424. ICStation 4X4X4 Light Cube Kit for Arduino UNO CSTATION 4x4x4 Light Cube kit uses 64 cuboid LED, and controlled by Arduino. Expansion board uses two 74HC595 shift register chips, using eight I/Os can light the 4x4x4 Light Cube, its hardware resources needed is less than other 4x4 cubic expansion board (needs 20 I/Os to control)..... Listed under: LED Projects

425. Interface LED with Raspberry Pi Solution Connect an LED (see "Opto-Electronics") to one of the GPIO pins using a 470Ω or 1kΩ series resistor (see "Resistors and Capacitors") to limit the current. To make this recipe, you will need: Breadboard and jumper wires (see "Prototyping Equipment") 1kΩ resistor (see "Resistors"..... Listed under: LED Projects

426. Raspberry Pi – RS232 Serial Interface Options (Revisit) In the previous article Raspberry Pi - Installing a RS232 Serial Port we discussed how to install a RS232 port on the Raspberry Pi. This is a follow up article to suggest a few alternative interface options as the XBee RS232 level-shifter board has been..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

427. Simulink Offers Easy, Graphical Programming for Raspberry Pi & Arduino Every hardware hobbyist has experienced that painful moment when you smell smoke and discover that it's coming from your hardware project. It's a rite of passage. Wouldn't it be nice if you could test your hardware before burning it? At the Open Hardware Summit, held..... Listed under: How To - DIY - Projects, Raspberry Programmer Projects

428. 1-wire temperature sensor DS18B20 at Raspberry Pi (GPIO directly) To measure the indoor or outdoor temperature with the Raspberry Pi there are several possibilities. This article describes the version with the minimal amount of external components. This is based on the DS18B20 temperature sensor and the software emulation of the 1-wire protocol. The DS18B20..... Listed under: Temperature Measurement Projects

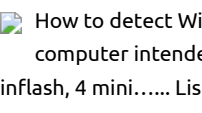

429. Raspberry Pi Serial Port Many of the GPIO pins on the Pi have other special uses. The most useful of these are the serial port pins #10, which are transmit and receive for an RS-232 serial port. By default this port will output diagnostic messages during boot..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

430. Hacking the Lego EV3: Build Your Own Object Sensor "Eyes" Although the Lego Mindstorms EV3 kit comes with a variety of cool sensors, wouldn't it be awesome to build your own custom sensing device? This project will show you how to create your own unique object sensors for your Lego EV3 controller using basic electronics..... Listed under: Sensor - Transducer - Detector Projects

431. How to detect WiFi access points using Raspberry Pi As you can see – this system is used as a mobile wireless network (WLAN) detection point. A small computer intended to be used for WLAN collection, including from UAVs. Hardware: IBM Power PC 405GPR processor, 64 MB SDRAM, 16 MB of built-in flash, 4 mini..... Listed under: Wireless projects

432. Multi-Cell LiPo Charging Overview Lithium Polymer Batteries pack a lot of power in a small package. But they can be tricky to charge safely. The Adafruit LiPo Chargers all provide a charging cycle designed to safely charge 3.7v Lithium Polymer cells. But what if your project needs more..... Listed under: Battery Projects

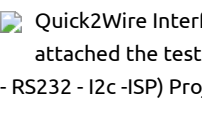

433. 28BYJ-48 Stepper Motor Control System Based On Arduino With ICStation Team introduces to you this stepper motor control system based on the ICStation UNO compatible with Arduino. It uses a ULN2003 chip to drive it. The working voltage is DC5V. It is widely used in ATM machine, inkjet printer, cutting plotter, fax machine, spraying equipment,..... Listed under: Motor Projects

434. Touch Pi: Portable Raspberry Pi Overview In this project we're building a portable Raspberry Pi using the model A+, PiTFT 3.5" display, Powerboost 500C and a 2500mAh lithium polymer battery. We designed this very simple case in CAD - It's a two part enclosure that fasten together with screws. All the..... Listed under: Development Board - Kits Projects

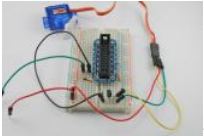

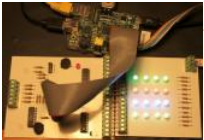

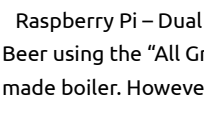

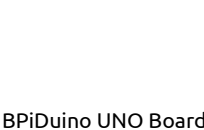

435. Quick2Wire Interface Board – Assembly and Troubleshooting TESTS (1) On the Quick2Wire boards there is a 3-pin male header with pins for 5V, 3.3V, and GND — it glowed as it should. Same for 3.3V and GND. So I decided that the board was..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

436. Know all about Raspberry Pi Board Technology The Raspberry pi is a single computer board with credit card size, that can be used for many tasks that your computer does, like games, word processing, spreadsheets and also to play HD video. It was established by the Raspberry pi foundation from the UK..... Listed under: Development Board - Kits Projects

437.  Control stepper motors with Raspberry Pi and node.js Continuing the journey on how to control things with node.js on the Raspber set up 2 stepper motors and controlled them in real time with Hydna. You can can read futher on how to install Hydna on Raspber here. The to pins..... Listed under: Motor Projects
438.  Interface I2C with the Raspberry Pi Note: Full source (still not finished) is available github.com/drcrane/raspberryyfid. The Raspber has a few different interfaces available to it, one is I2C (a protocol created by Philips and used in many places, it is the basis of VES DDC!). I had the opportunity recently..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
439.  Raspberry Pi GPIO driving Servo I have experimented with GPIO on the Raspberry Pi, just turning an LED on and off here. But since Ben Croston has improved the RPi GPIO Python library to do most of the work in C and I can confirm that it is a..... Listed under: H DIY - Projects
440.  Raspberry Pi B+ for Sound source Still I need good PC for ripping and have to buy source from internet(online). if do you have Goo probably reproduce good sound from Raspberry Pi B+ Music server.Raspberry Pi B+ is very small PCB actually small PC for kids in l for Audiophile..... Listed under: Sound - Audio Projects
1.  Some fun with 16 RGB LEDs and a Raspberry 3.14159 RGB LEDs consist of a red, a green and a blue LED conveniently encapsulated in one package. Theoretically one such should be able to produce any colour of the rainbow, but I have restricted my project - for reasons explained later - to just red,... Listed under: LED Projects
2.  Lunchbox Internet Radio Guide What I've made is a radio with 6 buttons and a 20x4 LCD screen. There is an "ON" button, and "OFF "BACK", "PLAY", "STOP" and "NEXT". It is connected to the internet via WiFi, and it powered by a USB hub connected through a Pi-Supply..... Listed under: Radio Projects
3.  Connecting SNES sockets to the Raspberry Pi: An assembly guide In a previous post, I described my idea of a universal console with Raspberry Pi. I presented, what I called, the SNESDev-RPi, which is an SNES-controller interface for the Raspberry Pi. A core eleme this interface is a SNES-adapter PCB that I recently..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
444.  Raspberry PI Serial Port and Breakout Board erial port to the Raspberry PI and breaks out some of the PI's pins for experimentatic interface board was designed to be simple and used for initial experimentation. It can be built on a single-sided PCB using home-n PCB fabrication methods. KiCad source files..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
445.  TNC-X for Raspberry Pi (Packet radio) AX25 TNC-Pi is a special version of TNC-X designed to interface directly with the Raspberry f computer. It can connect to the Pi either via the Pi's serial port, or via the I2C protocol. In the latter case, a single Pi can support m TNC-Pi's at..... Listed under: Radio Projects
446.  Using the Raspberry Pi GPIO with Python So you got your Raspberry Pi, installed an OS and using it just like your computer. Great! what? You didn't buy a Raspberry Pi just to replace your computer, did you? Well, Raspberry Pi can do a lot more... much more tha computer..... Listed under: Development Board - Kits Projects
447.  Raspberry Pi – Dual Element Homebrew Boiler/HLT and Fermentation Fridge Controller The purpose of this device is to allow someone who makes Hor Beer using the “All Grain” method, to control the temperature and timings of various parts of the beer making process when used in conjunction with a f made boiler. However, the physical device,,..... Listed under: Home Automation Projects
448.  NES Controller on the Raspberry Pi Part 1: The Hardware & Driver Some time back, I joked that the Raspberry Pi's GPIO port really for Game Port IO... So to make that joke come true, I present a way of interfacing the NES Joysticks to the Raspberry Pi. First you. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
449.  Banana Pi BPiDuino UNO Board Module, compatible with for Arduino UNO, available for Raspberry Pi Quick Details Package: plast sealed; carton box packed; Model Number: BPI UNO Type: Drive IC Brand Name: BPI Place of Origin: Guangdong, China (Mainland) Dissipation Power: 3W Operating Temperature: -10 ~ 65°C Supply Voltage: DC 5V Application: Computer SpecificationsBanana Pi BPiDuino UNO Board..... Listed under: Development Board - Kits Projects

450.

Expansion Shield for RaspberryPi compatible with Arduino Let's expand RaspberryPi functionalities with a shield that is compatible and with an onboard analog to digital converter with 16-bit resolution. Further expansions that we will present in the future will allow you to add a DAC, a number of additional..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

451.

ICStation 16 Music BOX DIY Kit Sound Module 1.Features 16-tone box under your control, arbitrarily issued 16 kinds of interesting sound, both an electronic toy can also be used as a doorbell or alarm. 2.A suite of profiles: Kit Model: BOX-16 Operating voltage :4V PCB size: 48mm (length) * 42mm (wide) Control..... Listed under: How To - DIY - Projects

452.

Switching mains electricity with a Raspberry Pi and a remote control Home electronics can open up a new dimension in home automation especially when used with an Arduino or Raspberry Pi. There is however a very real danger when using mains electricity, including electric shock and danger of electrical fires if the components are not..... Listed under: Home Automation Projects

3.

Make a torch and burglar alarm in Scratch with the CamJam EduKit and ScratchGPIO First steps Like many projects, this one began with Lego. To stop the breadboard sliding all over the place, I created a Lego housing for it and the Raspberry Pi that would keep them conveniently together. My Raspberry Pi is in a PiBow case, which..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

4.

What is a serial-to-parallel shift register? A serial-to-parallel shift register (or SIPO: Serial In Parallel Out) lets you take a sequence of signals on one output, and split them up into several separate outputs. For example, if you don't have enough GPIO pins on your Raspberry Pi, Arduino, or other computer/microcontroller,..... Listed under: How To - DIY - Projects

5.

Raspberry Pi Motor Controller Overview An AVR, typically an ATmega168P, is controlled from the Pi via the 3.3V UART, and provides PWM signals to the Motor Driver. Features Controlled via the UART on the Pi GPIO Header. Up to 2A bi-directional current per channel up to 46V..... Listed under: Motor Projects

456.

Lighting an LED using a Breadboard & a Raspberry Pi Lights, Jumpers & the Resistance – Jumper wires are typically 22 gauge solid core wires with insulation pre-stripped and readied for insertion in or out. Resistors resist the flow of electrical current, thereby controlling WHERE and HOW FAST it flows. [Thought experiment: If controlling water, using..... Listed under: LED Projects

457. Make an alarm clock with a Raspberry Pi Breadboard If you're new to electronics and the Raspberry Pi (RPI), you might not be familiar with the breadboard. The idea of the breadboard is to allow you to connect up electrical components without needing to solder wires or any other elaborate procedure. It's basic. Listed under: Clock - Timer Projects

458.

AngelBlocks – Maker Kit Introduction AngelBlocks is an open source smart home building block system that is suitable for a wide range of users. Homeowners with little or no technical skills will find AngelBlocks intuitive and easy to use. Makers, hackers, and developers will love AngelBlocks because they can..... Listed under: Home Automation Projects

459.

Super Mega Ultra Pi Boy 64 Thingy Build Getting Started! I had recently bought an original Gameboy DMG from Good Will for a while for \$5.00, condition unknown. Taking a gamble, I purchased it and took it home to find that it had severe damage caused by a battery that exploded and leaked all..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

460.

Raspberry Pi gains Wolfson HD audio card Newark Element14 and Wolfson have launched an HD-ready Wolfson Audio Card for the Raspberry Pi with 192kHz sampling, MEMS mics, and I/O including S/PDIF. The Wolfson Audio Card extends and enhances the Linux Raspberry Pi's audio features beyond its native HDMI output with onboard HD..... Listed under: Sound - Audio Projects

461.

ULN2803 8-channel RC Servo Port for Raspberry Pi Bring in some muscle to your output pins with 8 mighty Darlington's! This drive contains 8 drivers that can sink 500mA from a selectable 5V or DC input voltage supply and has kickback diodes included inside for driving coils. This will let your little..... Listed under: Motor Projects

462.

Monitoring Room Temperatures with Moteino's and Raspberry Pi Introduction Following on from using a Raspberry Pi to capture the electricity consumption of my home, I have over the last 2 years installed Solar Thermal Hot Water panels and very recently Solar PV. This meant that I had an opportunity to create something I..... Listed under: Temperature Measurement Projects

463.

Send Raspberry Pi Data to COSM The combination of connecting a Raspberry Pi to COSM makes creating an internet of things much more than it has been in the past. The Pi with its easy access to ethernet / WiFi and COSM's drop dead simple usability will graph all sensor data..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

464.

Fish Feed Time – Wireless Socket Control with the Raspberry Pi Overview Being a bit of an unnecessary geek, I've decided to pimp out my fishtank with a Feeding Time button! "What's one of those?" I hear you ask! Well... As it's a Marine Reef tank, it's a bit fiddly to feed some of the corals..... Listed under: Wireless projects

465.

Motor Protection against Single Phasing and Overheating The rise in temperature level of a motor during its operation beyond a permissible limit is known as overheating. The causes of motor overheating are motor overloading, distortion in the supply voltage, impaired cooling capability, unbalanced supply voltages etc. Because of overheating, we can face..... Listed under: Motor Projects

466.

Quick2Wire Analogue Board – Connecting to Raspberry Pi This is a short report on how to connect Quick2Wire's analogue board directly to a Raspberry Pi. The key is the pinout for the six-pin boxed headers on the Q2W board. I ignored the 5V and GND lines, running lines only for 3.3V, GND,..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

467.

Piezo Ring Tones with Raspberry Pi The ringtone text transfer language (RTTTL) is a way to represent music data for play on older mobile phones. It was created by Nokia for their phones, but it also works with GPIO pins and a piezo buzzer. This project shows how to use..... Listed under: Sound - Audio Projects

468.

Hooked on Arduino & Raspberry Pi Infrared Fan Speed Control This project demonstrates using an infrared light beam to measure the speed of a fan, and PWM to adjust the speed to a preset value. I used a small 12 Vdc fan from a PC CPU heat sink. It will run..... Listed under: Wireless projects

469.

Raspberry Pi Launches New Model B+ The Raspberry Pi Foundation today announced the final revision of the original Raspberry Pi development board. The Raspberry Pi development board since its introduction has actually sold over 3 million units globally, indicating the undoubted success of the hardware platform. One of the major reasons..... Listed under: Development Board - Kits Projects

470.

Raspberry Pi B+ Power Protection Circuit The circuit functionality is mostly obvious. There is polyswitch F1, a self-resetting fuse which protects the RPI from overcurrent condition. There is the Transient Voltage Suppressor (TVS) diode D5 which protects the RPI against static discharge and possibly overvoltage condition. However, the function of mosfet..... Listed under: Other Projects

471.

DIY диммер: guidebook to components In the recent past we shared the complete set of gerber-files with our expensive readers. That all interested people had a possibility to order to themselves printed-circuit boards. As it is inexpensive, as it was made by us. Today we taken the following step. We publish the guidebook..... Listed under: How To - DIY - Projects

472.

Solder Pen, PCB Circuit, Python Programming Solder Pen I had some color Sharpies, which never worked very well, even when I fired them. I just tried them, and all but one, would not even write. I threw them in the trash. Later, I got them out of the trash because..... Listed under: Development Board - Kits Projects

473.

IO Pi Introduction: The I2C address bits are selectable using the on-board jumpers. The MCP23017 supports up to 8 different I2C addresses so with two MCP23017 devices on each IO Pi you can stack up to 4 IO Pi boards on a single Raspberry Pi giving a..... Listed under: Development Board - Kits Projects

474.

Controlling a Servo Motor Assembly The servo motors have three pins, two for power: red(+) and black (-), and one for control. Because the servo motor draws too much energy, we need to use the batteries to power the servo (the Raspberry Pi doesn't have so much if..... Listed under: Motor Projects

475. Raspberry Pi CD Box Robot English: This project is a work that is taking on many weekends. My son, Gabriel, watched the movie "Wall-E" and proposed to build a similar robot. I see this model in Dx.com and get inspired by it. We use some scraps we find here..... Listed under: Robotics - Automation Projects

476.

Raspberry Pi Safe Breakout I have always wanted to access the Raspberry Pi Gpio pins in a safer manner. Those are not 5V tolerant and need a level shifter. I came across this really nice level translator chip from TXB0108 from Texas Instruments. It is a bidirectional 3.3V to 5V level shifter. Listed under: Security - Safety Projects

477.

Physical computing with Raspberry Pi Difficulty: beginner This tutorial will help you to receive input to your Pi from physical switch buttons and to debounce if necessary. It will show you how to automatically run a program when a button is pressed (a GO button on a robot, for..... Listed under: Calculator Projects

478.

Easy Temperature and Humidity on Raspberry Pi Step 1: Connection EzTemp uses the serial port on your Raspberry Pi to communicate. Identify the serial pins on your Raspberry Pi. Then connect: RPi GND to EzTemp GND. RPi Tx to EzTemp Rx. RPi Rx to EzTemp Tx. RPi Vcc to EzTemp 3.3V. Notice..... Listed under: Temperature Measurement Projects

479.

Arduino-Based Blue Box (Phone Phreaking) Step 1: Arduino IDE and Library Setup The advent of the Arduino put power into the hands of the same type of folks who originally designed the first blue boxes. We can write our own micro-controller code, use easily obtained Radio Shack parts to design..... Listed under: Phone Projects

480.

Tweeting coffee machine using Raspberry Pi Observing that LED will give us knowledge if it is being used or not. I am using a Light Dependent Resistor (LDR) as eyes for the Raspberry Pi. The LDRs change their resistance as per the intensity of light falling upon it. Our goal is..... Listed under: Home Automation Projects

481.

ramanPi – The 3D Printable Raspberry Pi Raman Spectrometer ramanPi is looking for developers!!! ****If you have Python, PyQt4, matplotlib, signal processing, optics, raman spectroscopy or FPGA experience contact dev @ ramapi .org! Or go to dev . ramanPi . org and sign up to the developer forums! What I want to do: Build..... Listed under: Metering - Instrument Projects

482.

Raspberry Pirate Radio This simple hack turns your Raspberry Pi into a powerful FM transmitter! It has enough range to cover your high school ball game, or even a bike parade (depending on the stragglers). PiFM software not only boldly enhances the capability of the Raspberry Pi but also makes it a powerful FM transmitter. Listed under: Radio Projects

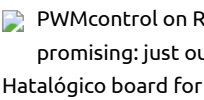

483.

[Project] Raspberry Pi Powered WiFi Streaming Camera Scope: To build a Raspberry Pi powered video camera, capable of streaming to a home wireless network. BOM: – Raspberry Pi (With Raspbian OS) – RPi compatible Wifi Dongle (List here) – Camera Module (Here) – Wifi enabled PC with VLC media player Instructions: Connect..... Listed under: Video - Camera - Imaging Projects

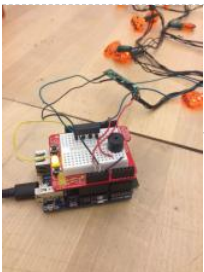

484.  Browse Anonymously with a DIY Raspberry Pi VPN/TOR Router Surf the Internet securely with your very own portable WiFi VPN/TOR router. You can configure a Raspberry Pi with Linux and some extra software to connect to a VPN server of your choice. The VPN connection encrypts your internet traffic so that hackers and spies..... Listed under: How To - DIY - Projects

485.  PWMcontrol on Raspberry Pi: installation and first test on Hatalógico board Vendor's Description: Finally I got my first test with Hatalógico and it looks promising: just out of the box PWM working. That means servos working right in the same platform as a powerful linux board! If you don't know the Hatalógico board for Raspberry Pi,..... Listed under: PWM Projects

486.  "beet box" raspberry pi style Step 1: Thing you need the things you will need, Any vegetable that is able to fit inside a hole raspberry power supply audio amplifier capacitive sensing board wooden enclosure (like on the image above) Step 2: Image if components that are all the..... Listed under: Home Automation Projects

487.  Getting Started with Phidgets on the Raspberry Pi This instructable is an adaptation of one of our blog posts. Before beginning, you want to have a few things in place. You'll need: A functioning Raspberry Pi (obviously). A separately powered USB hub, since the Raspberry Pi isn't capable of delivering enough power on..... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

488.  Controlling your Christmas lights with Text Messages Step 1: Components needed An Arduino Yun (Wifi Enabled!) - You could use another Arduino with a Wifi Shield though. A Protoshield with (or without) a tiny breadboard a regular breadboard will work as well will be less compact. If you want to solder..... Listed under: LED Projects, Wireless projects

489. How to drive Dynamixel AX-12A servos (with a RaspberryPi) I decided to use some Dynamixel AX-12A motors for a project, and ended up having to code a library for them, so I figured I would share what I learned. Despite being a bit more expensive, this motor has a couple of advantages over the..... Listed under: How To - DIY - Projects

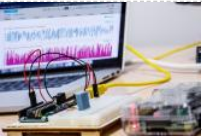

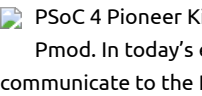

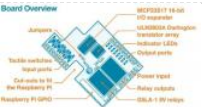

490.  WiFi Enabled Arduino – Interfacing with web APIs Are you familiar with Arduino, but are looking for a little more connectivity in your projects? This Instructable goes over a new (and cheap) wireless module that has hit the embedded world hard - the ESP8266. This module is a perfect way to hook..... Listed under: Wireless projects

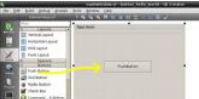

491.  Knit an LED Cuff This instructable uses circuit knitting and is written specifically for knitters. We'll cover how to create a circuit that uses blue and yellow LEDs, with instructions for hand and machine knitting. Electronic machine users can download the pattern file below or CNC print the knitting..... Listed under: LED Projects

492.  Raspberry Pi remote webcam This will allow you to create a remote webcam for your Raspberry Pi so that you can view it from any computer on the local network. For this instructable you will need: • Raspberry Pi with an Wheezy Raspbian installed and internet connection established •..... Listed under: Video - Camera - Imaging Projects

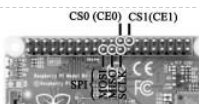

493.  Adding an external power supply to a cheap USB hub One day I found myself in the need for a USB hub with an external power supply when I went to a shop I verified they can be quite more expensive than the ones that don't have external power supply. No big deal. I'll..... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

494.  Building robots with Raspberry Pi and Python The goal of this tutorial is to help you begin programming with Python to control your Arduino robots with a Raspberry Pi. We will go over the basics like installation and some simple examples to control your robot from Python GUI from Raspberry Pi. Step 1: Parts list..... Listed under: Robotics - Automation Projects
495.  Read and write from serial port with Raspberry Pi In this tutorial we will see how to use the serial port on Raspberry Pi. We will use serial port available on Raspberry with a RS232/TTL 3-5,5V adapter and a USB-serial adapter. By default the Raspberry Pi's serial port is configured to be used..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
496.  Weather station using SAMIIIO, Arduino, and Raspberry Pi This article demonstrates using SAMII with simple, off-the-shelf sensors and hardware. Specifically, we will be gathering climate data from a low-cost temperature sensor and relaying that data to the cloud via APIs. From there, we can analyze our collected data in real-time or historically..... Listed under: Wireless projects
497.  Adafruit PiTFT – 2.8" Touchscreen Display for Raspberry Pi Overview Is this not the cutest little display for the Raspberry Pi? It features a 2.8" display with 320x240 16-bit color pixels and a resistive touch overlay. The plate uses the high speed SPI interface on the Pi and can use the mini display as..... Listed under: LED Projects
498.  Raspberry Pi simple blog server. Step 1: Name change to protect the innocent. You will want to change the name of your Raspberry Pi you might get another server from the web. Also I am sure you have already set up your router to set the raspberry pi address..... Listed under: How To - DIY - Projects
499.  PSoC 4 Pioneer Kit Community Project#083 – Raspberry Pi Integration We have been targeting two communities in the 100 days projects, Arduino and Pmod. In today's example we will be adding support for the wildly popular Raspberry Pi hardware. In this example we will have the Pioneer board communicate to the Raspberry Pi. The Raspberry..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
500.  Raspberry Pi, PyFace Digital, the lost documentation, I found it finally The Raspberry Pi or R-pi from <http://www.raspberrypi.org/> is known these days. It is not an accident that I have one, I have been doing Linux stuff since 1991, and professionally since 1996 I can skip over these developments, have to keep up with the new..... Listed under: Development Board - Kits Projects
501.  Controlling Hardware using GUI in Raspberry Pi The Graphical User Interface (GUI) helps the user to communicate with the system effortlessly. The GUI is considered as the front end of an application. In a Linux operating system each hardware device is represented as a file. The device can be controlled by simply..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
502.  How to Translate SMS Text Messages into Morse Code Using GSM/GPRS Mobile Kit Contents Introduction Step 1: Connection Step 2: code Links and Documentation Introduction Go to index This tutorial allows the user to translate SMS text messages into morse code. When the module receives a SMS it will reproduce it in morse code through the buzzer..... Listed under: GPS Based Projects
503.  How to Get GUI on Raspberry Pi In this project the Raspberrypi board is booted with the Ubuntu OS and is connected to the Ethernet port of a Windows7 PC. The board is connected to the internet connection as explained in the project how to connect the Raspberry Pi to the internet. The..... Listed under: Internet - Ethernet - LAN Projects
504.  Audio distribution with Raspberry Pi At a glance use a Raspberry Pi to send and receive audio streams over the network streaming based on standard RTP streams uncompressed audio streaming over ethernet point-to-multipoint broadcasting uses PulseAudio. This guide has been written in 2011. Since this time, the software..... Listed under: Sound - Audio Projects
505. The Ultimate Raspberry Pi Bundle – SoftballCam – 2 This blog is the second installment of a review of the Ultimate Raspberry Pi Bundle provided by eleyer. I have been waiting for parts and struggling a bit with getting everything working, but finally all electronics are kluged together and functional. Also all software for..... Listed under: Raspberry Programmer Projects

506.  How to Create Buttons in Qt In this project the Raspberrypi board is loaded with Ubuntu and is remotely accessed using VNC. The Raspberrypi board is also connected to the internet. Downloading and installing the fourth version, QT4 using commands are already discussed in a previous article. There is another article..... Listed under: How To - DIY - Projects

507.  picoReflow Raspberry Pi Supported SPI driven Cold-Junction K-Type Thermocouple converter: MAX31855 MAX6675 GPIO driven State Relays (230V heating/fan) PWM driven MOSFET (12V cooling) Python control daemon (running on the Pi) HTML5/Websocket independent multi user web-client Live Monitoring & control Browser based Profile/Curve Management +..... Listed under: How To - Projects

508.  Raspberry Pi Sensors In this article, by Rushi Gajjar, author of the book Raspberry Pi Sensors, you will see the basic requirements for building the RasPi projects. You can't spend even a day without electronics, can you? Electronics is everywhere, from your tools to cars and in aircrafts..... Listed under: Sensor - Transducer - Detector Projects

509.  How to Install Qt in Raspberry Pi The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on Chip). This SoC has the powerful ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller having peripherals like timers,..... Listed under: How To - DIY - Projects

510.  LOGI Pi Quick Start Guide Overview This is an out of the box quick start guide that will give you the essentials of preparing and running the LOGI-Apps demos on your LOGI-Pi and Raspberry Pi. The guide will guide you through the following items to get you up and running..... Listed under: Raspberry Programmer Projects

511.  Controlling a RGB LED attached to a Raspberry Pi through Android Project Description I need to be able to control turning on and off a RGB LED utilizing the Raspberry Pi. I also should be able to turn it on and off using an Android device. Design The design is made to utilize three different..... Listed under: LED Projects

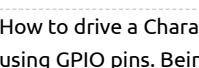

512.  Raspberry Pi 2 Kraft Case I received my long-expected Raspberry Pi a few days ago. I just couldn't wait to try out my crazy ideas on it, what if Pi can go portable. What if Pi can still rock on when a power source is unavailable. Problems to..... Listed under: LCD Projects

513.  MBusConnector Introduction IoTSystem is an integration middleware for the Internet of Things. It provides a communication stack for embedded devices based on IPv6, Web services and oBIX to provide interoperable interfaces for smart objects. The IoTSystem middleware aims providing a gateway concept for existing devices and..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

514.  Tripod Camera Mount for Raspberry Pi This may seem like it already exists, but I couldn't find it anywhere. So, I made it myself: a custom mount for the Raspberry Pi that you can easily mount onto any standard tripod. Step 1: Create the 3D Model I looked around for a..... Listed under: Video - Camera - Imaging Projects

515.  e-Health Sensor Platform V2.0 for Arduino and Raspberry Pi [Biometric / Medical Applications] IMPORTANT: The new generation of eHealth Sensor Platform is called MySignals. You can find below a brief description and a comparative between the old eHealth v2 Platform and MySignals. If you want to go to the eHealth Tutorial just click here. Discover MySignals, the..... Listed under: Medical Health based Projects

516.  How to Configure Raspberry Pi The Raspberry pi is a low cost single board minicomputer which can be used for learning the computer basics, programming and easy to interface with the embedded systems. The Raspberry pi is a mini computer which is designed in a single board with all the..... Listed under: How To - DIY - Projects

517.  How to drive a Character LCD display using the Raspberry Pi In this tutorial we'll take you through how to connect a 16x2 LCD display up to your Raspberry Pi using GPIO pins. Being able to display a message on the LCD is not only very cool but can be pretty useful too, for example in..... Listed under: LCD Projects

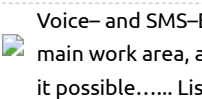

518.  Raspberry Pi and Arduino Serial Communication Setup and Connections Connect the output of the Arduino TX pin to a voltage divider. The output of the voltage divider is then connected to the RPi GPIO pin # 10 (GPIO 15). The voltage divider drops Arduino TX volt from 5V to 3.3V. In..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

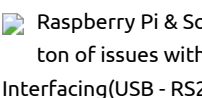

519.  Named Pipe Example Using Raspberry Pi The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on a Chip). This SoC has the ARM11 processor which runs on 700 MHz at its core. The operating systems like Archlinux ARM, OpenELEC, Pidora, Raspbmc, RISC OS and..... Listed under: Blog, Other Projects

520.  JTAGulating the Raspberry Pi 2 This instructable will cover how to get a root recovery console on a Raspberry Pi 2 with a NOOBS SD card using a Jtagulator, PuTTY, and three wires. It is thanks to the Instructables Raspberry Pi Build Night sponsored by Instructables and Rabbit Hole..... Listed under: Raspberry Programmer Projects

521.  Voice- and SMS-Enabled Light Sensor Using Raspberry Pi and Twilio Overview The Hacker School space for our batch had two restrooms: one attached to the main work area, and one downstairs. We thought it would be nice to know if the bathroom is occupied before taking the time to walk down. Our project made it possible..... Listed under: Sensor - Transducer - Detector Projects

522.  Using a keypad with Raspberry Pi I got two keypads from Jameco.com that I wanted to use with my Raspberry Pi. Turns out it's quite easy, as long as you know what the pinout structure is for the keypad. This instructable will take you through the steps I had to go through. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

523.  Using a shift register with Raspberry Pi This instructable will attempt to explain, in simple terms, what a shift register is, and how to use it with the Raspberry Pi to expand the GPIO port by running eight outputs with just four GPIO ports. To start with, what is a shift register? Listed under: LED Projects

524.  Raspberry Pi & Soundmodem – It works!! (Part 01) Many months ago I was working on getting a Raspberry Pi working for APRS work. I was experiencing a ton of issues with getting soundmodem to decode aprs signals that were known to be good (ie. ideal recording played back as an MP3..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

525.  Raspberry Pi Fridge Minder: receive an email when the door is opened The kit comes with project cards and a link to download the accompanying Python scripts. And projects already include a light meter and email notifier, so I decided to combine these two projects into one and make something that will send an email whenever the fridge door is opened..... Listed under: Home Automation Projects

526.  RasTherm – A Smart Thermostat built on the Raspberry Pi This page presents my implementation of a smart thermostat using the Raspberry Pi board as the controller, with an added Pi Plate expansion board. This thermostat is controlled using a web page interface so it can be controlled via any personal computer, smart phone or..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

527.  1. The Pi Plane Project summary for the curious Commercial aircraft in Australia (and a lot of the world) periodically transmit their location and the altitude. Aircraft with ADS-B determine their position using GPS; and broadcast that position along with identity and altitude (plus other useful information such as speed). Using some..... Listed under: Video - Camera - Imaging Projects

528.  Raspberry Pi 3x3 LED Cube About a month ago my dad bought a soldering iron and we both learnt to solder by making an LED cube controlled by an Arduino. It was a cool project to show my friends and really easy to build so I have decided to make..... Listed under: LED Projects

529.  Raspberry Pi & Arduino: a laser pointer communication and a LDR voltage sigmoid Plugging the laser module on Arduino Isn't easy to plug a module when you have no datasheet or some wiring schemes, the chances are that you'll probably burn it if you provide a current greater than the supported. The module I have was bought on..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

530.  Raspberry Pi Controls LEGO Power Functions Train Project Description LEGO Power Functions RC infrared control is specified in LEGO Power Functions RC v120.pdf But I wanted to know what my controller (8879 LEGO Power Functions IR Speed Remote Control) was actually sending. So I hooked it up to a scope. Right STOP..... Listed under: Wireless projects

531. **Tube Pi** Raspberry Pi AirPlay Tube Radio Vintage tube radios are nostalgic. The crackle of the game on the after dark high powered AM sta from 500 miles away. The smell of the tubes and the warmth of the tones. They remind us of simpler times. Times when families s together -..... Listed under: Radio Projects

532. Raspberry Pi Mobile Media Center with Smartphone Control Our main ideas of a perfect mobile media center are: - watch videos o to your music anywhere (only power supply and a monitor/projector for videos required) - easy control with your smartphone - sim setup for non-programmers - great sound and video quality..... Listed under: Phone Projects

533. Simple way to control 12V DC Motor using Raspberry Pi's GPIO port and NPN transistor I needed to control a DC motor from my Raspberry Pi's GPIO part of my time-lapse dolly project. I had to be able to turn the motor on for approximately 150ms which would in turn move the dolly along by 3mm 12VDC..... Listed under: Motor Projects

534. Best Raspberry Pi home automation tutorial: Web based The Internet Of Things is the most trending technology today that stand alongside wearables and robotics. It is a very simple concept where devices in our home or wherever they are , have the capability communicate with each other via the internet.Usually sensors are..... Listed under: Home Automation Projects

535. Digital Music Stand: Raspberry Pi + Touchscreen IMSLP is one of the greatest things to happen in the classical music world in recer memory. For those who don't know, IMSLP.org is an online library of any and all sheet music that is no longer under copyright prot You can find pretty much..... Listed under: Sound - Audio Projects

536. Hello World Program using Qt in Raspberry Pi Installing the QT in Raspberry pi is very easy using the command line, but it will take minutes to 4 hours to finish the installation depending upon the speed of the internet connection. Downloading and installing the version, QT4 using commands are already..... Listed under: Raspberry Programmer Projects

537. Debug GPIO with LED During the daily device driver development routine, we often need to understand the behavior of the GPIO understand if there is I2C traffic or if our driver is handling the coming interrupts and so on. Sometimes is not enough to mount th debugfs..... Listed under: LED Projects

538. Raspberry Pi RetroPie Gaming Station (Optimized for N64) Do you want to relive your N64 childhood days or like older games and want to play Zork? Ho we going to do this you say? Well, this tutorial is for you! We are going to build a RetroPie Gaming station using a Raspberry..... Listed under: Game - Entertainment Projects

539. How to Read Inputs Using Signal in Raspberry Pi The Raspberry pi is a mini computer which is designed in a single board with all th essential components required for running an operating system. The Raspberrypi board is powerful enough to run large operating systems like Linux, Mac and Windows. Linux operating systems especially..... Listed under: How To - DIY - Projects

540. Python Web Server for your Raspberry Pi You know some basic Python or you want to learn some and you want to make a website, a web server, a web c etc. - But where do you start? Services like Heliohost or Vlexofree are great for free Python website hosting, but they..... Listed under: Raspberry Progr

Projects

541.

How to Use Timer in Raspberry Pi The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on a Chip). This SoC has the powerful ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller having peripherals like timers,..... Listed under: Clock - Timer Projects

542.

Connect Raspberry Pi to Projector or TV When we have a meeting in a meeting room, we need to connect our laptop to a projector to show our desktop. But sometimes, several persons need to show their desktop, they need to change their laptop. This is complex and waste some time. Currently,..... Listed under: Wireless projects

543.

Raspberry Pi Sensor and Actuator Control Typically as a programmer you will work with data on disk, and if you are lucky you will capture pictures on the screen. This is in contrast to physical computing which allows you as a programmer to work with data sensed in from the real world..... Listed under: Sensor - Transducer - Detector Projects

544.

How to connect a Lego Mindstorms NXT Ultrasonic Sensor to the Raspberry Pi Abstract Directly connect a Lego Mindstorms NXT Ultrasonic Sensor to a Raspberry Pi. A TCA9517 I2C bus buffer and an additional GPIO pin for SCL is necessary. A short C++ program to read the measured distance is provided. Introduction Raspberry Pi (Pi), despite some shortcomings,..... Listed under: Sensor - Transducer - Detector Projects

545. Bartop Mini Retro Arcade – Raspberry Pi and Customised Icade "Approaching" middle age, wanting an excuse to play with a Raspberry Pi, and having great memories of 80s games (mainly spectrum, sega master system, neo geo, and Atari ST) i decided to build a mini arcade machine / retro emulator. Hopeful some of the things..... Listed under: Game - Entertainment Projects

546.

Servo Motor with Raspberry Pi and PWM After my dad and I got an LED to dim using Pulse Width Modulation on my Raspberry Pi, I decided to try to spin a servo motor. We had a bunch of old servo motors on my robotics team at school so I used one..... Listed under: Motor Projects

547.

Social Alarm Clock Authors: Alexandru Radovici, Ioana Culic, Maria Tudor - Wylodrin Bogdan Doinea - Cisco Networking Academy 1 document describes how to build a Social Alarm Clock by a team of five people: a manager, a product designer, two engineers and a programmer. Introduction We are going..... Listed under: Clock - Timer Projects

548.

Cubieboard/Raspberry Pi case from old external drive This is the case I made for my Cubieboard/Raspberry Pi which, back in the day, was an external cd writer drive. This case includes: Power supply Silent HDD mount Fan with speed control The first step (for which I, unfortunately, don't have any pictures) is..... Listed under: Other Projects

549. Running an Nginx, PHP, and MySQL Webserver on the Raspberry Pi For my project, I am going to be hosting a website on the Raspberry Pi. I want to be able to set the alarm on the alarm clock through the website and have the C++ program interact with the MySQL database to get alarm times..... Listed under: Timer Projects

550.

Raspberry Pi Scoreboard This is a simple project that tries to use the Raspberry Pi as a Scoreboard.. on a character LCD What we want in this project is write a python script that will use httplib and rplcd to connect to the internet and display the..... Listed under: LCD Projects

551.

Controlling Raspberry Pi with Pi Buddy This is a short tutorial to exhibit the abilities of the Pi Buddy app Step 1: Setting up the Pi Buddy for the Pi to receive command from the device you must have the necessary files and dependancies installed. Pi Buddy runs off of Python..... Listed under: Raspberry Programmer Projects

552. Simple GPIO Control using Pi4J The following example demonstrates the simple control of a GPIO pin on the Raspberry Pi. Source Code The source code for this example is included in the github repository: <https://github.com/Pi4J/pi4j/tree/master/pi4j-example/src/main/java/ControlGpioExample.java> /* * #%L * *****
ORGANIZATION : Pi4J * PROJECT : Pi4J :: Java..... Listed under: LED Projects

553. Connect Remotely to the Raspberry Pi Picture this: We are excited about hosting a Raspberry Pi build night at our maker space in ! Francisco. We have keyboards ready, mice, power adapters, SD cards loaded with operating systems, refreshments, and a room creative technical folk. But....uh-oh....we are 1 monitor..... Listed under: Raspberry Programmer Projects

4. PSoC 4 Pioneer Kit Community Project#051 – Music Player Today we are expanding on the SD card example that we posted last week. In that earlier example we showed you the new customer SD component used to interface with the SD card. In this example we want to expand on that example to play..... Listed under: Sound - Audio Projects

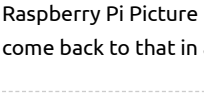

5. DIY Raspberry Pi Connection Board Featured The PCB I did the project in eagle cad placing one Raspberry Pi 2x13 femal connector (2.54mm - 0,01") and then placing 4 pin header strip 1x13 with enlarged pads. I need these pads only for soldering the wires to the After this..... Listed under: Development Board - Kits Projects

556. Adding a Joystick to the Raspberry Pi Joysticks are really fun to use. They are also much more intuitive than other input devices. A joystick to your Raspberry Pi opens a lot of new doors. You can now use the Raspberry Pi and the joystick to control a robot, a cam Listed under: Development Board - Kits Projects

557. Internet Radio with Raspberry Pi Since long past times, when Guglielmo Marconi has amazed the entire World broadcasting his rad signals from the Elettra ship, a subject held dear by electronic engineers has been radio transmission. After these years, the scena changed a lot, firstly with the appering of..... Listed under: Radio Projects

558. Raspberry Pi Picture Frame he picture frame has come a long way since the last post. I now have the wooden frame for it built and almost done but we v come back to that in a minute. Since the last update I have completely remade some of the..... Listed under: Video - Camera - Imaging Projects

559. Raspberry Pi Sous Vide WIP This project is to build a Raspberry Pi sous vide machine that can be controlled via the web or via a walk up GUI interface. Th goal is to get something fully functional for cheaper than most commercially available solutions, which start at about..... Listed under: Internet - Ethernet

LAN Projects

560.

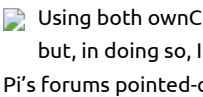

I2C + Raspberry Pi + Arduino Uno + RPi Camera Board UPDATE: I've revised the circuit design. I no longer recommend connecting the Arduino Uno to the Raspberry Pi's I2C pins together without the use of a logic level shifter. The revised design uses one from www.adafruit.com. As part of a larger project I'm doing right..... Listed under: Video - Camera - Imaging Projects

561.

Raspberry Pi Arcade Game High Score Display for Multiple Locations This Instructable will show you how to use a Raspberry Pi board and an existing computer monitor to create an arcade game high score display for your home or office. You and your family or your co-workers can keep an eye on the latest high..... Listed under: Game - Entertainment Projects

562.

Using both ownCloud and Adafruit's WebIDE on the Raspberry Pi Long story short, I installed both of the aforementioned programs on my Raspberry Pi, but, in doing so, I was able to navigate to only ownCloud. After doing some digging around the internet, I found the solution. As [smithg400](#) on Raspberry Pi's forums pointed-out, both WebIDE..... Listed under: Internet - Ethernet - LAN Projects

563.

HC-SR04 Ultrasonic Range Sensor on the Raspberry Pi In previous tutorials we've outlined temperature sensing, PIR motion control, and buttons and switches, all of which can plug directly into the Raspberry Pi's GPIO ports. The HC-SR04 ultrasonic range finder is simple to use, however the signal it outputs needs to be converted..... Listed under: Sensor - Transducer - Detector Projects

564.

Build Your First IOT with a Raspberry Pi, DHT11 sensor, and Thingspeak. IOT or Internet of Things is a hot topic! According to the experts, everything will be connected to the internet and all our devices and their data will soon be just an IP address away from us. So where do you start if you want..... Listed under: Sensor - Transducer - Detector Projects

565.

Internet controlled SCALEXTRIC Race the Raspberry Pi! We wanted to see if we could control the speed of a car via the internet. When we looked for tips on where to start we found that quite a few people had had a crack at it, but the documentation was all..... Listed under: Internet - Ethernet - LAN Projects

566.

Raspberry Pi Bluetooth+Airplay Audio Receiver combo Let's make a bluetooth audio receiver allowing you hook up your R-Pi to your TV as the sound source. To be honest, this is not a unique project. Plenty of people have attempted to get a bluetooth receiver working with some (less)..... Listed under: Wireless projects

567.

Cloud-based Electronic-Design Tools Gain Traction Suppose you want to create an electronic circuit and a corresponding printed-circuit board for it. What software will you use? Unless you already have a favorite, it might be hard to decide: There's a dizzying array of options, ranging from free software typically targeted at hobbyists..... Listed under: Other Projects

568.

Raspberry Pi I2C Interfacing and Programming I2C is a multi-device bus used to connect low-speed peripherals to computers and embedded systems. The Raspberry Pi supports this interface on its GPIO header and it is a great way to connect sensors and devices. Once configured you can connect more than one device without..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

569.

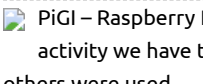

Raspberry Pi Prototyping Kit This is a basic prototyping kit for the Raspberry Pi. It will allow you to quickly and easily prototype your hardware ideas without the need to buy a new kit each time. It is also compact, portable, and a lot more durable than most prototyping kits..... Listed under: Development Board - Kits Projects

570.

Single 3.7V Li-ion cell power back-up for Raspberry Pi I have a small application continuously running on my Raspberry Pi board. Some days in my country, we have (short time) mains power failures. In such a situation, my Raspberry board, powered by the wall adapter, turns off immediately, without any attention for open files, transmissions in act,..... Listed under: Other Projects

571.

PiGI – Raspberry Pi Geiger-Müller Interface Geiger counters are basically just devices which enable us to measure ionizing radiation. In the context of a science activity we have to deal with natural radiation sources and artificial ones. Some of the materials emitting ionizing radiation are used to create electronic devices..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

572.

An Illustrated Introduction to the Raspberry Pi The Raspberry Pi was originally designed to be a tool for hands-on learning about how computers work. It is also a tool that can be used to make all sorts of creative programming projects. The point of the Pi is to be accessible, and I..... Listed under: Raspberry Programmer Projects

573.  Raspberry Pi / Lego Ball Machine In previous posts I detailed how to: Build a Lego marble pump Use C# and Pulse Width Modulation control motors with the Raspberry Pi Use C# and OpenCV with the Raspberry Pi Camera Module Each one of those projects are pr interesting in their..... Listed under: Game - Entertainment Projects

574.  LapPi – A Raspberry Pi Netbook The Raspberry Pi is a remarkable machine. Lightweight, powerful, and until now it was completely tethered to a wall socket. The LapPi is built to free the Pi! It's made from a mixture of spare parts, unallocated electronics, and scr components & cables I have..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

575.  Monitor your home temperature using your Raspberry Pi At the end of the project you will have a WWW dashboard that looks sim this: Multiple Sensors Display a temperature history graph per sensor What you need: Raspberry Pi Model A or B The following pa available through the PrivateEyePi Store:..... Listed under: Sensor - Transducer - Detector Projects

6.  Build a Raspberry Pi-Based Cable Shutter Release for Sony Cameras Replacing a simple and inexpensive remote cable release for y camera with Raspberry Pi may seem like a classic case of over-engineering, but using the tiny machine to control the camera opens whole new world of photographic opportunities. Using a simple Python script, you..... Listed under: Video - Camera - Imaging Proj

7.  Controlling DC Motors Using Python With a Raspberry Pi Objective What we plan to do is safely connect one or two motors to the Raspberry Pi with as few components as possible. Once we have the electronics put together on the breadboard, I will show you h control them easily using Python to..... Listed under: Motor Projects

578.  The "Raspberry Pi" Pie For the "Pi/E Day Contest" on instructables, I wanted to make a pie which I have not made before. I kept thi what to do and as I saw a few Raspberry Pi Science projects on Instructable, I got an idea of making a Raspberry..... Listed under: Projects

579.  MBeat USB-M7HUB 7 port hub The Raspberry Pi is often not able to supply enough power to USB peripherals through it's own po supply and a USB hub is recommended to ensure power drops don't cause problems in the processor. This means you will need tw packs. One to..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

580.  Raspicase: Caja para Raspberry Pi (English version here) Bueno, despues de investigar para que podía usar mi Raspberry Pi compra raspic.es , me di cuenta que gracias al sistema operativo Xbian podía conseguir un media center con acceso a los ficheros de mi N los de un disco..... Listed under: Other Projects

581. Use Itead SDK to Drive a 1602 LED Itead Studio made an SDK for linux system of Allwinner A10/20 chip before, which provided users with the underlying hardware driver interface for quick development of upper software, thus those who are not familiar with hardware can easily make a variety of creative applications combined..... Listed under: LED Projects

582.  Department of Redundancy Department: Raspberry Pi Raspberry Pie Pi, is, of course, a useful tool in math - but a Rasperry Pi is a tool in all kinds of ways. We are delighted to own a Raspberry Pi - which is sort of like the Naked Mole Rat of computers: it's a crec card..... Listed under: Other Projects

583.  Using 20x4 RGB LCD over i2c with a Raspberry Pi Recently, I've been dabbling with electronics to fill the void of spare time I've found myself with between jobs. I'm currently working on a half-baked idea to create some sort of digital assistant who will take instructions in some form, and then re Listed under: LCD Projects

584. Adding Webmin to manage a Raspberry Pi My preferred method to work with a Raspberry Pi is via SSH. When one installs Raspian the Raspberry Pi website, SSH is active and available on port 22 (default SSH port number). All one needs is an ethernet connectio DHCP server and a..... Listed under: Internet - Ethernet - LAN Projects

585. The Minnow Board – A New Small Form Factor We attended an "Internet of Things" meeting here this week, and Scott Garman introduced us to a new small form factor, the MinnowBoard. The MinnowBoard is very high performance single board computer (S using a 1Ghz Intel Atom processor, but unlike most SBC's it has..... Listed under: Development Board - Kits Projects

6. Arduino watches for a kitchen catastrophe I guess I should start by admitting that this article was inspired by my own stupidity. Wl was a kid, I left a frying pan on a lit stove. I was probably confused by the tactile controls on the vitroceramic hob. Unfortunately, I unwittingly..... Listed under: Home Automation Projects

7. Aeroponics with Raspberry Pi and humidity sensor This instructable will teach you how to install an Aeroponics system that is cont by Raspberry Pi. Aeroponics is plant-cultivation technique that has the roots hanging and is suspended in the air. Nutrient solution to them in form of a fine mist. Aeroponics..... Listed under: Sensor - Transducer - Detector Projects

8. Raspberry Pi Meet Arduino Shield SKU:DFR0311 Introduction What happens when a Pi meets an Arduino? A simple example would when building a mobile robot, we use the Raspberry Pi to extend its vision and get a nice tiny monitor. Meanwhile, Arduino handle with the motor driving part and delivers..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

589. Remaking MSR206 RS232 magnetic card reader to USB As you might have noticed, sometimes I work as freelancer in electronics = applies not only to fixing PC electronics and mobile phones, but also to repairing, modifying and designing my own solutions in co electronics. One of the projects I worked on yesterday..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

590. Simple Raspberry Pi Shutdown Button Since the Raspberry Pi foundation decided to leave out an off button to safely shutdown th Raspberry pi, I'll show you a simple method I came up with to build one, so there are no more excuses for yanking the power cable your..... Listed under: Development Board - Kits Projects

591. Intermission Sound Control with Raspberry Pi A few times a year I volunteer to an arts organization and serve as their "house sour light guy." I usually run sound and do the lights for the traveling acts if they don't have a tech with them. The auditorium is in a..... under: Sound - Audio Projects

592. Analog Sensors Reading with Raspberry Pi and Zabbix Supervisor Analog Sensors Reading with Raspberry Pi as Interface The Rasp Pi has no built in analogue inputs which means it is a bit of a pain to use many of the available sensors. We need a A/D interface ea configure in the RPi and..... Listed under: Sensor - Transducer - Detector Projects

593. Raspberry Pi Android App communication Hello everyone Because app's are being used almost everywhere, I decided to make my tutorial on how to make an app and connect to a MySQL database hosted on a raspberry pi. For exchanging the data between the and the client, I'm going..... Listed under: Feature, Raspberry Android

594. Talking to the Formula AllCode robot using the Raspberry Pi The Formula AllCode robotics course is great for makers to test their and capabilities or for introducing learners to programming and robotics in a fun and motivating way. The robot is compatible with hardware from Raspberry Pi to Android to iPhone, Windows PC's, MAC..... Listed under: Car Projects

595.

RasPI-Surv: a Raspberry-based scalable SMS remote controlled video surveillance system RasPI-Surv, based on: A system controlled on Raspberry Pi A practical (and modifications-friendly) command/telemetry interface via SMS messages, using the very well known 900 module from ITEAD. A set of wireless video cameras with good motion detection feature A internet router/modem with wireless access..... Listed under: Wireless projects

596.

Arm/Disarm Using a Switch Project Description In this project I will show you how to arm/disarm an alarm zone using a tactile switch connected to your Raspberry Pi. Software Edit the globals.py file by typing the following command at the command prompt: Conf the arm/disarm variables as per figure..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

597. Boot the Raspberry Pi from USB Hello world, time for me to gift some raspberry pi to the people. So here's my story, I recently graduated high school and been working with the school's IT guy for my senior year. When I graduated, he decided to get me the latest..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

598.

Raspberry Pi – Network Spy Energy Saver The subwoofer we had in our home cinema setup died a few weeks ago, so I did my research and found a nice replacement. The only thing I didn't spot was the fact it never goes into standby if there's no signal (unlike the old one). Listed under: Internet - Ethernet - LAN Projects

599.

Raspberry Pi Audio Player A minimalistic music player based on Raspberry Pi model B with HifiBerry DAC and ATXRaspi power controller. I made this with the help (also economical) of my father. Inspired by: <http://www.hifiberry.com/forums/topic/small-media-...> and <http://www.crazy-audio.com/2014/03/a-standalone-st...> Here's my first instructable! Step 1: What I used 1. A Raspberry..... Listed under: Sound - Audio Projects

600.

A 50 year-old Teletype Powered by a Raspberry Pi I've been a nerd for a very long time; As a teenager in the 1970's I drove up to the Western Union office in my hometown of Buffalo, New York and asked if they had any old teletypes they'd like to get rid of; They said yes. Listed under: Development Board - Kits Projects

601.

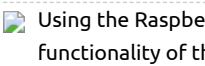

Flood/Water Presence Sensor How it works This sensor has strips of metal plated probes that when in the presence of liquids change the resistance that will activate the internal switch. It can be mounted for example on a skirting board, with the the wireless sensor connected to a Raspberry..... Listed under: Sensor - Transducer - Detector Projects

602.

Stream games to your Raspberry Pi 2 Moonlight is an open source implementation of NVIDIA's GameStream protocol. Moonlight allows you to stream your full collection of Steam games (and other applications) from your GeForce Experience compatible PC to any supported device and play them. These instructions will help you build your own..... Listed under: Game - Entertainment Projects

603.

Using the Raspberry Pi's GPIO Pins to Drive an LED Scope: To use the Raspberry Pi's GPIO Pins to turn an LED on and off, and to introduce the basic GPIO functionality of the pi. BOM: – 1 raspberry pi (I'm using rev B) with Raspbian OS installed – 1 LED – 1 1kohm current limiting resistor..... Listed under: LED Projects

604.

Raspberry Pi Wall Display Without X-Windows This Instructable will walk through using a Raspberry Pi and a monitor or television to create a digital sign or display. A digital display like this can be used at home, at a company, or at any organization to display upcoming events, notices, calendars, photos,..... Listed under: LCD Projects

605.

Raspberry Pi Time Clock This build combines a Raspberry Pi with a rotary-encoder, an RGB LED and an OLED character display to create a time clock that logs my time on tasks directly to a Google Docs spreadsheet. Motivation Whenever I have to record time against projects I find..... Listed under: Clock - Timer Projects

606.

Build a network-attached storage (NAS) with your Raspberry Pi and an external USB hard drive. As with all DIY projects, one of the hassles is the enclosure to put all of the hardware in. I wanted a quick solution - didn't have the time to make something fancy. After while I remembered that I've saved my Amazon Kindle..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

607.  Kids Build – Raspberry Pi Arcade Cabinet We wanted to create an arcade cabinet as a fun project for the kids at our (Coventry) Makerspace, as a group project that could encompass many different skills and techniques, give them a 'big build' to be proud of a talking point in our..... Listed under: Game - Entertainment Projects

608.  Raspberry Pi and Arduino: Building Reliable Systems with WatchDog Timers Summary: In this Instructable we look at how to build reliable computer systems using WatchDog timers. We show how to set up and use the Raspberry Pi and Arduino internal watchdog timers. We also explain why an external WatchDog Timer is a better choice..... Listed under: Clock - Timer Projects

609.  Raspberry Pi I2C Analog-to-Digital Converter The original plan for the Analog-to-Digital Converter was to use the Dallas 1-Wire sys and use the DS2450 1-Wire Quad A/D Converter which was advertised as being a 16 bit device but after buying two of the chips w around £5 each I found..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

610.  Raspberry Pi Home Arcade Play all your favorite 8-bit video games with MAME and an Arduino Esplora controller. The Raspberry P great for all sorts of small computing applications — 3D printing servers, in-car computing, and more. But the Pi can also be the heart of a..... Listed under: Home Automation Projects

1.  Home media center using raspberry pi Using Raspberry pi and a hdmi/vga display from a old desktop monitor, you can create you home media center. This is a very simple project and requires minimum prerequisite knowledge of programming/embedded syste design. All components used are off the shelf ! Here are..... Listed under: Home Automation Projects

2.  Raspberry Pi – TESLA BT-100 printer program using GPIO Raspberry Pi BT-100 printer program v0.1 (May 2013) Usage: bt100-tlc [options] SIGNAL GPIO -h print help -D turn debug on OUT_LEFT: 17 -B bidirectional print OUT_RIGHT: 27 -t file input text file Listed under: Other Projects

3.  Serial hookup JeeNode to Raspberry Pi One way to connect an RFM12B to a Raspberry Pi is to simply plug in a JeeLink, using the USB capabilities of the RPi. But that's a bit of a detour – why go through USB? Since the JeeNode's FTDI connector can use 5V..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

614. Raspberry Pi Christmas Tree Light Show This project involves using a Raspberry Pi to drive 8 AC outlets which are connected to Christmas Tree light sets. AC lights are simple one color strands of lights, but to give a more dynamic range to the light show there is also a..... Listed under Projects

615.  Control raspberry from twitter OBJECTIVE: Use the Raspberry PI to monitor a Twitter feed and control a mechanical device.If you not interested in the details of the build and just want to see the result you can watch the vid below. RESULT: Success!!! You can c the "The..... Listed under: Internet - Ethernet - LAN Projects

616.  STLs and Raspberry Pis It's a weird one. When it first came out, people were struggling to figure out what to do with it. A surprisin feature for something that sold out very quickly – the Raspberry Pi. Well, we've now come up with another use for them –..... Listed under: Radio Projects

617.  How to turn an USB camera with Raspberry Pi into an Onvif IP Camera? Introduction At this instructable, we will make a new inter Camera solution, which have never seen before! I would like to show you how can you make connection your USB camera and Rasp Pi with Camera SDK. The goal is to turn your webcam to..... Listed under: Video - Camera - Imaging Projects

618.  Raspberry Pi 2 Weather Station Our hackerspace (Bloominglabs) recently received an ADS-WS1 weather station from a generous benefactor. Additionally, we were selected by Instructables for the Raspberry Pi 2 hackathon so we got some RPi2's to hack on. For this project, I decided to use an RPi2 to put our..... Listed under: Temperature Measurement Projects

619. Raspberry Pi as IR Remote (LIRC) If you are like me and hate to look for TV/projector/speakers remote, you will be happy to know that you can use your Raspberry Pi and your computer or phone to act as IR remote. What you need? Raspberry Pi 940nm IR diode (preferable super..... Listed under: Wireless projects

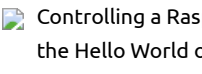

620.  Raspberry Pi Weather Station Build a personal weather station with Raspberry Pi that emails you the temperature, humidity, and pressure. *In a couple of weeks I will be adding a barometric pressure sensor to calculate chance of rain. Step 1: Supplies You will need: Raspberry Pi and power..... Listed under: Temperature Measurement Projects

621.  Vertical Hydroponic Farm We call our project RUFs, for Robotic Urban Farm System A vertical hydroponic garden Allowing for high density yields and shorter growth cycles Reducing resource consumption - water, fertilizer and space Labor saving - no weeds or soil till Higher consistency of crops with..... Listed under: Other Projects

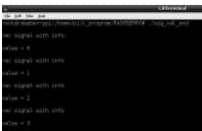

622.  Raspberry Pi enclosure (The inlay for this is...really beautiful, and a bit tough to see at the resolution of this instructable. Check here: <http://www.flickr.com/photos/hslphotosync/7438625092/sizes/o/in/photostream/> For a full resolution picture) I've been really excited about the raspberry pi for quite a while now, and have been eagerly waiting for the..... Listed under: Other Projects

623.  Controlling a Raspberry Pi's GPIO over the network The first step in playing with a Raspberry Pi's GPIO interface is to turn an LED on and off on command. This is the Hello World of digital electronics. As fun as that is, it would be more fun to do from my mobile phone using my..... Listed under: Wireless project

624.  How to Send Value Between Processes Using Signal Developed By: Ajish Alfred Linux operating systems especially Ubuntu is preferred for all kind of programming and development. In a multi-tasking environment of the Operating System several processes execute at the same time and the Signals provide an Inter-Process Communication (IPC) method. The Operating System..... Listed under: How To Projects

625.  Raspberry Pi Tor relay Tor (short for The Onion Router) is a system intended to enable online anonymity. The Tor client software directs internet traffic through a worldwide volunteer network of servers to conceal a user's location or usage from anyone conducting network surveillance or traffic analysis. Using Tor..... Listed under: Internet - Ethernet - LAN Projects

626.  GardenPi: Garden Care with Raspberry Pi Like any good "lazy programmer," I'm always looking for ways to automate. This spring's project: monitoring and watering my garden. I had a wifi-enabled Raspberry Pi laying around and decided to put it to good use. For this project I wanted to do better than..... Listed under: Home Automation Projects

627. Raspberry Pi as webserver. This instructable will only briefly show a way to enable webtraffic to your Raspberry Pi. In the last step you'll find a guide to a full webserver. You'll need: 1 Raspberry Pi 1 Router 1 Micro USB cable 1 Ethernet cable (and of course an..... Listed under: Internet - Ethernet - LAN Projects

628. Getting to know Raspberry Pi This is a very simple instructable for those of you who got a new Raspberry Pi and a Pi Face and is wondering what can the Pi do. This instructable is also documented on Makeystreet.com - Makey : Getting to know Raspberry PI Parts used :..... Listed under: Raspberry Programmer F

629. Raspberry Pi – Model B+ Setup The Raspberry Pi Model B+ is a credit card sized computer with a Micro SD Card as a hard drive and 512MB of RAM. You install a Linux based software onto the SD Card and insert it to the bottom of the Pi. There are..... Listed under: Projects

630.  My Raspberry Pi Pool Timer — Electronic Assembly I used to do many projects like this as a teenager, an eternity ago as it seems. One thing I learned hard way is to always, always, assemble projects gradually, starting with the power. If the power is wrong, in the best case, you..... Listed under: Clock Timer Projects

631. Raspberry Pi and Custard for Schools Raspberry Pi is a low cost credit card sized ARM/GNU based single board computer that runs Linux Platform and plugs into your TV, just add a mouse and keyboard and a little imagination. It will be available to buy soon at a £22..... Listed under: How To - DIY - Projects

632. How to Read Multiple Inputs Using Raspberry Pi The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on Chip). This SoC has the ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller peripherals like timers, interrupt..... Listed under: How To - DIY - Projects

633. Setup Weaved and the Raspberry Pi If you've ever tried to setup your Raspberry Pi as an Internet of Things device, you'll know that unless you jump through some massive hoops, you're stuck serving web pages and data on your local network. Getting information your Pi on your phone, or..... Listed under: Internet - Ethernet - LAN Projects

634. Attendance system using Raspberry Pi and NFC Tag reader With my new toy Raspberry pi I've done several testing projects from instructables, adafruit etc. But after a while it became boring and I've started looking for something actually useful for me. My playground was my new phone several weeks ago which came with..... Listed under: LED Projects

635.  16x2 LCD Module Control Using Python LCD Module Hardware The pinout of the module is : Ground VCC (Usually +5V) Contrast adjustment (VO) Register Select (RS). RS=0: Command, RS=1: Data Read/Write (R/W). R/W=0: Write, R/W=1: Read Enable Bit 0 (Not required in 4-bit operation) Bit 1 (Not required in 4-bit operation)..... Listed under: LCD Projects

636. Raspberry Pi GPIO game You will need... -Raspberry pi model b+ with raspbian and Python 2(which should come with raspbian) -HDMI monitor and cable -3 tactile push switches -Breadboard(you can get by without it by connecting straight to the buttons, but this also works as a stand for the..... Listed under: Game - Entertainment Projects

637. Raspberry Pi controlled power bar. A latching relay is used in this power bar. With this special relay you can switch on and off a laptop PC, your Hard-disk or any other device with a little python program on your Raspberry Pi Advantage and disadvantage of the Latching Relay..... 638. "Interface Keyboard Or RS 232 With Or Without Lcd Display". Sabrent sbt-usc1k usb serial (9-pin) db-9 rs-232, General brand sabrent model sbt-usc1k type usb to db9 (rs-232) spec length 1 ft. connector number 2 features features converts a standard 9-pin serial port usb. Line interactive sine wave ups system 3kva snmp 2u rack, Smartpro..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

639. NFC with Raspberry Pi and Arduberry The Arduberry is a simple and inexpensive way to bring Arduino shields to the Raspberry Pi. The device is a shield that slides over the Raspberry Pi and allows you to stack and use Arduino shields. The Arduberry requires no physical configuration to work with..... Listed under: Development Board - Kits Projects

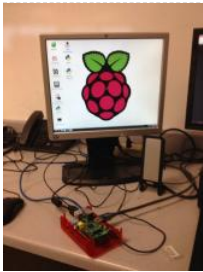

640. Raspberry Pi and 1-Wire In this article by Jack Creasey, author of Raspberry Pi Essentials, we will learn about the remote input/output technology and devices that can be used with the Raspberry Pi. We will also specifically learn about 1-wire, and how it can be interfaced with the Raspberry Pi..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

641. LED Blinky in Lua on Raspberry Pi running Mithini on ArchLinux After setting up Eclipse M2M toolchain for Raspberry Pi, I wanted to write out a simple lua script to blink LEDs using GPIOs. Here is the schematic and lua script for the same. I used the 3.3V available on the RP pins to power the LEDs. 1..... Listed under: LED Projects

642.  Raspberry Pi Timelapse This project will show the reader how to setup and customize a timelapse application using a Raspberry Pi B and a RasPi Camera. The timelapse can be customized to take pictures as fast as 1 per second or any time slower to once per..... Listed under: Video - Camera - Imaging Projects

643.  Setup Raspberry Pi Here is everything that you need to set up your raspberryPi. The Pi itself. The included power cable. An Ethernet cable. I also used an hdmi to dvi cable since my monitor did not support hdmi but any hdmi to hdmi cable would work too..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

644.  Preparing Raspberry PI for JTAG Debugging This tutorial shows how to prepare your Raspberry PI board for debugging with JTAG. JTAG will allow debugging the Linux kernel using hardware like Segger J-Link. As Raspberry PI board does not have a connector with normal JTAG layout, preparing the board for..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

645.  Compact High-Performance 12V 20W Stereo Amplifier Amplifiers which run from 12V DC generally don't put out much power and are usually not hifi as well. But this little stereo amplifier ticks the power and low distortion boxes. With a 14.4V supply, it will deliver 20 watts per channel into 4-ohm..... Listed under: Sound - Audio Projects

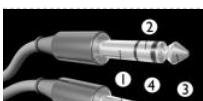

646.  Smart patient monitoring system using Arduino or raspberry pi INTRODUCTION :- Monitoring vital signs and locations of certain class of ambulatory patients can be useful in overcrowded emergency departments and at disaster scenes, both on-site and during transportation. To be useful, such monitoring needs to be portable and low cost, and have minimal adverse..... Listed under: Medical Health based Projects

647.  Raspberry Pi at Work: Serial Console Server It is some time passed the last (modern) Millennium. We are now in the age of "Cloud Computing" yet there are still those who staff 24/7 Data Centers..... Where Inevitably "Legacy Systems" Lurk , running some forgotten but critical applications on hardware systems passed their..... Listed under: Internet - Ethernet - LAN Projects

648.  Camera control via shutter release cable Many cameras have a 2.5mm audio jack in the side for a remote shutter release cable, and can be used to wake up the camera if it has gone into power-save mode and also take pictures. For now, I have only tested this against Canon..... Listed under: Video - Camera - Imaging Projects

649.  Raspberry Pi review – the price is right, but the software is not... Unless you've been living under a rock, you'll have at least heard of the Raspberry Pi. Since the creation of the Raspberry Pi Foundation, a not-for-profit charity created by Eben Upton and David Braben, the credit-card sized computer has rarely spent a day out of..... Listed under: How To - DIY - Projects

650.  Raspberry Pi accessories tin After waiting several months, my Raspberry Pi finally arrived. As it comes quite naked, you need some accessories to use it. First you need a SDCard to store your operating system, then you need some connection to a display, if you want to use it for penetration..... Listed under: Development Board - Kits Projects

651. A Raspberry Pi 2 laptop! This is a step by step guide on how to make a Raspberry Pi laptop by yourself! Step 1: Intro. Okay, I got my Pi2 yesterday. And straight away I got an idea in my mind, 'Why can't I do this?' And I started building..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

652.

Getting Started with Raspberry Pi: "Hello World" Programming on Raspberry Pi The Raspberry pi is a microcontroller board which a SoC chip from the Broadcom with ARM11 processor at the core. The Board is a mini computer itself without any input or output but ports provided to connect them. The board is designed..... Listed under: Raspberry Programmer Projects

653.

Integrating a traffic light with OP5 through a Raspberry Pi The last couple of months, I have been amazed about the Raspberry Pi. go into great detail on this wonderful device, other than the obvious. It is cheap It comes with Ethernet, HDMI It runs Debian Linux GPIO, general purpose input..... Listed under: Internet - Ethernet - LAN Projects

4.

Raspberry Pi: Airplay Reciever Today I am going to show you how to setup your Raspberry P (Model B or A (With Ethernet adapter) Airplay receiver. It is very simple to do and will not take much time at all. Step 1: Materials (Sorry for the bad..... Listed under: Inte Ethernet - LAN Projects

5.

AM03127 LED marquee + Arduino + Bluetooth = RaspberryPi remote control After some days of soldering, testing and coding I am able to control my LED marquee remotely via bluetooth from my Raspberry Pi. Using an Arduino Pro Mini (5V model) and the HC-0 module mentioned in my last blog post, I was able to..... Listed under: Bluetooth Projects, LED Projects

656. Adding More Temp Sensor Since my previous post I have added a couple additional temperature sensors to my piHouse project. One is an outdoor temperature sensor that I previously programmed but never installed outside, and the other is a new sensor in my bedroom. This involved some hardware planning..... Listed under: Sensor - Transducer - Detector Projects

657.

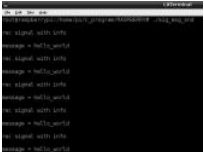

Raspberry Pi Media Panel I wanted a simple yet elegant panel that would display the current weather, my photostream from Flickr time and my iCal feeds Step 1: Configuring the Raspberry pi First we'll setup the Raspberry Pi, to do this you'll need to have Raspb installed. You..... Listed under: Other Projects

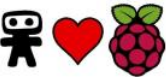

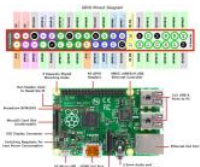

658. Raspberry Pi Pandora Streamer I recently finished a project to turn the Raspberry Pi into a music streamer. I had seen a couple of other projects here an that were the same basic concept, so I knew it was possible (this is nothing new...just new for me), and..... Listed under: Interfacing(USB - RS232 - I2c -ISI

Projects

659.  Clap Switch Suite/Electronic Production/DIY Kits Description Package name: clap switch kit Kit Model: PSK-1 Operating voltage: 5V size: 28 * 49mm How it works: Q1 and Q2 composed of two audio amplifier circuit, the audio signal is accepted by the MK1 C1 is connected to the base of Q1..... 660.  Raspberry pi "Power" case I am big fan of Raspberry pi and i am using it as NAS and torrent box among other things. I hate wire clutter and i only use my raspberry pi with putty, so i decided to make a little mod, so you can plug..... Listed under: Development Board - Projects
661.  Webcam over 3G with Raspberry PI Description This project was about a personal challenge that my Dad asked me to do it. Everytime I started more than one year ago when I was trying to do it with Arduino but I lost a lot of time because I couldn't make everything work..... Listed under: Video - Camera - Imaging Projects, Wireless projects
2.  RaspberryPi Universal Expansion Board Introduction Raspberry Pi is a widely used Arm development board and the Digilent Pmod interface is used to connect low frequency, low I/O pin count peripheral modules to host controller boards. This expansion board bridge to connect all kinds of Pmods to the..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects
3.  Sugru Raspberry Pi corners This instructable will show you how to quickly add Sugru Pi corners. Sugru molds like play-doh, then hardens into rubber. It sticks to most surfaces as it dries. We want to identify our placements to avoid closing off ports and add enough clearance so that..... Listed under: Other Projects
664.  How to Send Message between Processes using Signal in Raspberry Pi The Raspberry Pi is a board actually designed for helping computer education for remote schools but it is a good platform for programmers especially beginners to explore various coding techniques: operating systems especially Ubuntu is preferred for all kind of programming and development. The Raspberry Pi..... Listed under: How To - DIY - Projects
665.  Raspberry pi gone vintage The project is a vintage radio shell with a raspberry pi and external speakers inside of it. This project came from my need to have a tasteful raspberry pi enclosure without it looking like a raspberry pi case. I also had the need for some..... Listed under: Radio Projects
666.  ANDY: A Multi-Purpose "Humanoid" Robot How the Software Works Here is a quick overview of how the current software works from startup to shutdown. All the code is open source, so you can browse through it here. Below is a basic flowchart. Step One: Startup To start Andy, flip the..... Listed under: Robotics - Automation Projects
667.  Raspberry Pi Emulation Station Have you got a Raspberry Pi but not sure what to do with it? Well, I'm going to show how to turn it into a 'console' doing this will allow you to play any game you like from the older platforms. I would recommend..... Listed under: Game Entertainment Projects
668.  Motivational Bathroom Scale Introducing the latest and greatest in health technology: the Motivational Bathroom Scale. Getting unwanted family comments about your recent weight gain? Now you can get criticized by both your family and your bathroom scale. Simply enter your goal weight with the keypad and step onto..... Listed under: Medical - Health based Projects
669.  Article: Meet OAP — an open robot reference design project Have you ever dreamed of building your own Linux-based droid [that could] roam around your home autonomously, intelligently obeying your commands?" asks Dafydd Walters. "You may now be able to finally fulfill your dream." Walters founded the Open Automaton Project (OAP), which aims..... Listed under: Robotics - Automation Projects

670.  Willy the Self-Driving Toy Car For our final project, we built a self-driving car that takes in inputs for a final destination and drives it to the final destination. The idea for this final project requires an LCD to display the location that the car is..... Listed under: Game Entertainment Projects
671.  Raspberry Pi Hard Case The other day I finally received my Raspberry Pi Model B in the mail!!! It only took 6 months.... but at least arrived. Regardless, I now have it in hand and am happily projecting away. Of course I could spend 30-50\$ odd dollars online..... Listed under: LCD Projects
672.  Raspberry Pi Thief Detector What is a Raspberry Pi ? The Raspberry Pi is a low cost, credit-card sized computer that plugs into a computer monitor or TV, and uses a standard keyboard and mouse. It is a capable little device that enables people of all ages to explore..... Listed under: Sensor - Transducer - Detector Projects
673.  Monitoring Temperature With Raspberry Pi The Problem: I recently remodeled my home office and I now have a dedicated closet for electronics (Server, NAS, AV Receiver, etc.) During the build I planned for heat remediation by installing an exhaust fan that dumps heat from the closet into my adjoining..... Listed under: Temperature Measurement Projects
674.  Raspberry Pi B+ Shark Fin Lego Case Looking for a Lego Raspberry Pi B+ case ? Then you have come to the right place. I made this Instructable as I could not find a Lego case tutorial for the RPi B+. *This case was designed before I received my RPi (So if..... Listed under: Other Projects
675.  Raspberry Pi Radio Transmitter The Raspberry Pi is a very useful computer that can be used for many different things. The people at Imperial College Robotics Society have a new way to use your favorite treat. They designed a program that turns the Pi into an FM radio..... Listed under: Radio Projects
676.  Raspberry Pi Ipad This is a completely awesome project. It is a home made Ipad That costs less than \$100! You need very little programming skills. If you want a cheap Ipad and you love making things this is the project for you! Please vote for me in..... Listed under: Home Automation Projects
677.  Circuit Note: Raspberry Pi Pinout Diagram If you build it, they will program. The genesis of the Raspberry Pi came from a few college students concerned about the dwindling number and skills of students applying to study Computer Science. Newer computers and consoles have replaced the old machines where most..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects
678.  Using the Raspberry Pi Wobblulator to test the G6LBQ Multiband Bandpass Filter Finally, I decided to use the Raspberry Pi Wobblulator to test the response characteristics of the G6LBQ multiband bandpass filter which I had built as part of a homebrew transceiver project. The assembled filter board is shown below (it is part of a..... Listed under: Metering - Instrument Projects
679.  Simple Raspberry Pi Portable This is a very simple instructable that will show you how to put together a little portable Raspberry Pi. Watch the video for visual instructions: Video Step 1: Parts and Tools A Raspberry Pi This could be any Raspberry Pi, but I chose the Raspberry Pi..... Listed under: LCD Projects
680.  Raspberry Pi Portable Today I will show you how to make a portable and compact Raspberry Pi portable computer. All pictures were taken with my new OnePlus One phone so all of the pictures should be clearer than in my older photos that were taken with an iPhone.. Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects
681. Test DS18B20 sensor `sudo modprobe w1-gpio` `sudo modprobe w1-therm` `cd /sys/bus/w1/devices` `ls` `cd 28-xxxx` (change this to match what serial number pops up) `cat w1_slave` The interface is a little unreliable, but fortunately it tells us if there is a valid temperature read. It's like a file,..... Listed under: Sensor - Transducer - Detector Projects

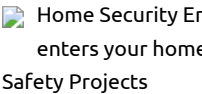

682.

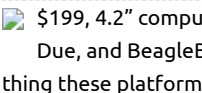

Hardware button and LED to control association in wireless networks Almost all wireless technologies use some kind of association process to enable devices to join the network. Such a process is typically initiated by pressing a button on the network controller and subsequently pressing another button on the device to associate. Software gateways, like..... 683.

Home Security Email Alert System using Raspberry Pi In this tutorial we will look at how to setup up your raspberry pi to take picture of the intruder enters your home and send an email to you whenever you are not at your home. Step 1: What You'll Need Raspberry Pi running..... Listed under: Security Projects

684.

\$199, 4.2" computer is Intel's first Raspberry Pi competitor The Minnowboard: More expensive, more powerful, more open. With the Raspberry Pi, Arduino Due, and BeagleBone, the world is full of cheap, tiny computers that can be used by creative developers in everything from robots to space flight. Or thing these platforms have in common is an..... Listed under: Development Board - Kits Projects

685.

Pi on / off PSU relay switch As everyone is aware the Pi has no on / off power supply switch the only way to turn it off is to physically remove the micro USB cable or to turn off the main adapter / pull plug from the wall. Turning off from..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

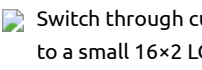

686.

PiPlay a raspberry pi airplay server Hello, In this instructable, I will be showing you how to make a raspberry pi airplay server. To start you will need to get a raspberry pi. The model A, B or B+ will work. To allow the raspberry pi to run, you will need..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

687.

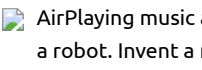

Switch through custom data with 16x2 LCD screen and Raspberry Pi Introduction After starting my circuit testing with some LEDs and switches I moved to a small 16x2 LCD screen (HD44780 controller) with the Raspberry Pi. The configuration of the LCD pins and base code for output to the 16x2 LCD is taken from..... Listed under: LCD Projects

688.

Wooden Raspberry Pi Handheld Hello, this is a step-by-step instruction on how to make a wooden raspberry pi handheld. Step 1: To start you need First you need a raspberry pi, no matter if you are using a model A or B. I used a raspberry pi model B because..... Listed under: LCD Projects

689.

AirPlaying music and video from iPad to Raspberry Pi—it's as easy as... There are so many incredible things you can do with a Raspberry Pi. You could build a robot. Invent a new kind of musical instrument. Or send the tiny computer nearly into outer space on a picture-taking balloon adventure. Sadly, I have no idea how..... Listed under: Sound - Audio Projects

690.

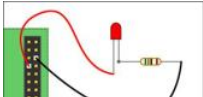

Raspberry Pi Garage Door Opener with streaming video of door status. This Instructable modifies two other guides. Just got a Max Sensor hooked up with door status on page. Step 1: Do these Instructables First You need to do this Instructable @<http://www.instructables.com/id/Raspberry-Pi-Garage-Door-Opener> Then do this one @ <http://pimylifeup.com/raspberry-pi-web-server/> Next I will show what I changed to make..... Listed under: Sensor - Transducer - Detector Projects

691.

Interfacing Digital Compass (HMC5883L) with Raspberry Pi 2 using Python3 Initially, I was working on a maze solving robot. Instead of using ultrasonic and infrared on Arduino Mega for wall following like my friends did, I try to do something different using the digital compass and Raspberry Pi 2. This experience is totally new for..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

692.  Third Eye Visions Lighting Up An Led Using Your Raspberry Pi and Python Once you've setup your Raspberry Pi according to my ge started tutorial, you are ready for your first real project. Let's light up an led using the Python programming language and the GPI on..... Listed under: LED Projects

693. Wooden Raspberry Pi picture frame The Raspberry Pi is an interesting, versatile and powerful low cost computer that can be used various applications. I have one dedicated as an entertainment center running OpenELEC. It was quite easy to set the system up, integrate it into my network and hook..... Listed under: Other Projects

694. Raspberry Pi PCF8563 Real Time Clock (RTC) Having recently received my Raspberry Pi, one of the first things I wanted to do was l a real-time clock chip I had lying around (a NXP PCF8563) and learn how to drive I2C from the BCM2835 hardware registers. Turns quite easy..... Listed under: Clock - Timer Projects

5. ICStation DIY Kit 5V to 12V Step-up Power Converter Module DIY K Description 5V to 12V booster module is based on MC34063 cl booster module, can realize the input 5V voltage, stable output of 12 v voltage. A, Principle that This circuit mainly include filter capacitance, booster chip MC34063 and resistance, lose Into the voltage through the..... Listed under: How To - DIY - Projects

6. Portable Raspberry Pi (V4) The Raspberry Pi. Its a \$35 computer the size of a credit card. Being very small, its great for its portabil However, this is usually the problem as it is hard to make it portable. Over the past year and a half, I have worked..... Listed under: Projects

697. Raspberry Pi driven 128x32 LED sign This is a 128x32 pixel LED display built from 8 "P10" LED Panels and a Raspberry Pi board. Th its running is takes UDP data from another computer and displays the pixels in either one or two bits per pixel. The sign is picturec Listed under: LED Projects

698.  11 Arduino projects that require major hacking skills—or a bit of insanity Raspberry Pi has received the lion's share of attention devoted to cheap, sir board computers in the past year. But long before the Pi was a gleam in its creators' eyes, there was the Arduino. Unveiled in 2005, Arduino boards d have the CPU horsepower of..... Listed under: Development Board - Kits Projects

699. DIY: Temperature Monitoring and Regulation for HomeBrew Beer brewing is a fun hobby, whether you wanna just brew somethin from a kit, or take the time to fine-tune your preferred style. With every batch, there are always two things that weigh heavy on a brewer's mind: risk of contamination or, depending..... Listed under: How To - DIY - Projects, Temperature Measurement Projects

700. Turn the Raspberry Pi into a Bluetooth Device Introduction I have a Bluetooth Radio USB device that was gathering dust when I st upon it. So I thought I should put it to use with Raspberry Pi. This instructable is about my learning journey of adding a bluetooth interface to Raspberry Pi. Target..... Listed under: Bluetooth Projects

701. A Raspberry Pi controlled mini CNC Laser engraver [last update Jan 18,2014] About the capability of the engraver Due to the size limit of DVD drives, th machine can only engrave within an area of 36 mm by 36 mm.. So it can do little pieces of wood, plastic board or part of iPhone cases, but not..... Listed How To - DIY - Projects

702.  DIY Social Integration Kit- Raspberry Pi A number of sensor applications in recent years collect data which can be directly associat human interactions. one can use the sensor data in order to model the underlying relationships and interactions. It also leads to a number of challenges, since such data may..... Listed under: How To - DIY - Projects

703.  The Raspberry Pi – Lapdock Connection Now that you have your nifty new Raspberry Pi, you'll need a display for it. Teensy analog monitors are pretty cheap, but what you really want is a decent HDMI display. Unfortunately, they're expensive, running from \$15 into the thousands for the huge..... Listed under: LCD Projects
704.  Rhea PeaterPiPyr – a simplex repeater using the Raspberry Pi This page describes how to use at \$25-\$35 Raspberry Pi single board computer, a USB scard, some Python code, and a two-way radio to create a simplex repeater. A simplex repeater is also known as a store-and-forward voice repeater. I traditional duplex repeater..... Listed under: Radio Projects
705.  Creating a \$99 parallel computing machine is just as hard as it sounds Ten months ago, the chipmaker Adapteva unveiled a bold qu to create a Raspberry Pi-sized computer that can perform the same types of tasks typically reserved for supercomputers. And... th wanted to sell it for only \$99. A successful Kickstarter project raised nearly \$900,000 for the..... Listed under: Development Board Projects
706.  Setting up phpMyAdmin and MySQL on Raspberry Pi As part of my ongoing efforts to create a really awesome alarm clock with my Raspberry Pi, I had to set up some MySQL databases. I have very little experience with MySQL, and the idea of setting up tables, u and all that jazz via..... Listed under: Raspberry Programmer Projects
707.  Raspberry Pi Heat Sink Project Difficulty: Easy Project Time: Less than 5 minutes Materials Needed: Thermal compound Small heat got mine form an on-board graphics processor on an old computer) Tools Needed: Hack saw (With metal cutting blade) Vice File (Optional) Screw Driver (Optional) Knife (Optional) Step..... 730.  Read analog data, in Java Raspberry Pi Important: This document goes along with the code at <https://github.com/OlivierLD/raspberry-pi4j-samples/>. In the sources, refer to ADC The goal here is to read analog data from a Java program running on a Raspberry Pi. For this example, we will be using a potentiometer like this one..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
731.  How to Use Signal Values and Messages to Read Multiple Inputs Those who have worked on simple microcontrollers know how difficult it is to continuously check for an input pin status without affecting the other task of the microcontroller like displaying and SSD, playing music etc. In a Multitasking environment of an Operating system like..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
732.  A simple analog proximity sensor with digital interface (for Raspberry Pi) [last update: Feb 7, 2014] Raspberry Pi has a Broadcom BCM2835 chip, which controls 26 GPIO (general purpose input/output) pins. There are C library or RPi.GPIO python packages available online that can be used to control the pins. The RPi.GPIO package is by default included in most Raspberry Pi systems, such as Raspbian. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Sensor - Transducer - Detector Projects
733.  LEGO MINDSTORMS Motors with Raspberry Pi (BrickPi 0.1) Since we first got the Raspberry Pi, we have wanted to make a robot out of it. There aren't many kits out there yet that let you do that (yet). This HowTo Raspberry Pi Project shows you how we hacked together a motor controller from..... Listed under: Motor Projects
734.  Raspberry Pi Home CCTV System Hello, In this instructable, I will be showing you how to make a small CCTV system using the Raspberry Pi. I have wanted to do this for a while and have now got round to doing it! For this build, you will need the following:..... Listed under: Security - Safety Projects

735.  Raspberry Pi reading BMP085 Temperature & Pressure Another fun little i2c device acquired cheaply via eBay. It reads barometric pressure and temperature. There's some relatively simple maths to convert the outputs to something readable. Once again, ADAI provide a fantastic guide and library for using the device in their Using the BMP085 with Raspberry..... Listed under: Temperature Measurement Projects

736. Raspberry Pi Gate Opener This is a raspberry pi project that enables you to open your garage/gate with any kind of web browser! Step 1: Gather those s Raspberry Pi - 35\$ Relay Board - 5\$ Your Gate Opener - (You will be sacrificing the gate opener) Great. Now..... Listed under: Internet - Ethernet - LAN Pr

737.  Raspberry Pi I/O Expander Board To simplify using the the MCP23017 I/O Expander on the Raspberry Pi I've made a little plug in b using a Slice of Pi from Ciseco. The Slice of Pi is a handy little PCB that plugs directly onto the Raspberry Pi's GPIO pins and gives a Listed under: Development Board - Kits Projects

738.  PiPhone – A Raspberry Pi based Cellphone Overview Ever wanted to build you own cellphone? Well now you can with this guide th a Raspberry Pi, PiTFT, and a FONA to make a functional cellphone that you can call your friends with! Things You'll Need: Raspber computer, the Model B or Model B+ is..... Listed under: Phone Projects
739.  BeaconAir On Raspberry Pi / iBeacons BeaconAir is a Raspberry Pi based project that reads the advertising packets coming from iE and roughly calculates the physical position of BeaconAir by Trilateration. This is an application that uses my new iBeacon Python that READS iBeacons on your Raspberry Pi. It does not turn..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Wireless projects

740.  Raspberry Pi B+ boot from SD Card The new Raspberry Pi model B+ uses Micro SD cards(WOOHOO!!!), wait what if I have SD cards my old Pi's I want to use? That is what this instructables was created to help you do. Thanks to the Raspberry Pi foundation and th community..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

741.  Linux-powered quadcopter has three cameras A startup called Pleiades is over a third the way to its Kickstarter goal for funding hackable Linux quadcopter that starts at \$520. Spiri, which runs Ubuntu Linux with Robot Operating System (ROS) extensions or dual-core Freescale ARM SoC, is an airborne craft..... Listed under: Video - Camera - Imaging Projects

742.  Raspberry PI based Motor Speed Control The main objective of this project is to develop a speed-control system, for a DC motor, t alters voltages applied to the armature by using a Raspberry Pi board.The speed of the DC motor is directly proportional to the vo applied across its terminals. Hence,..... Listed under: Development Board - Kits Projects

743.  Raspberry Pi Firewall and Intrusion Detection System Maybe you think "Why should I protect my pivate network? I've got no critica information on my computer, no sensitive data". Are your emails really public? Don't you have some photos you don't want to uplo Facebook, because they're private. Do you really don't..... Listed under: Security - Safety Projects

744.  3D camera (with Raspberry Pi) Although 3D camera's are usually said to be really intricate, hence their price, it turned out the basi difficult to replicate. Granted it is troublesome to get the quality of professional products, compared to their cost, this is a neat homebuilt..... Listed under: Video - Camera - Imaging Projects

745.

Raspberry Pi: 3x3x3 LED Cube If you do a web search for LED cubes, you will notice that they have been built so many times and are less than 8x8x8 is a bit of a waste of time. Knowing all of this, and basically because I am bored out of..... Listed under: LED Projects

746.

PiLarm: Portable Raspberry Pi Room Alarm I'm always on the lookout for those teachable moments. Inspiration struck me when my 7-year-old asked for help in keeping his little brother from sneaking into his room. I spotted the perfect time to teach him about inputs, outputs, and programming. Learning is easier when..... Listed under: Home Automation Projects

747.

Raspberry Pi supercapacitor micro-UPS seeks funding Nelectra is crowdfunding a supercapacitor based micro-UPS for Raspberry Pi B and B+, enabling brownout protection and "last gasp" shutdown sequences. Bratislava, Slovakia based Nelectra's first product was a generic "Juice4Halt" supercapacitor based micro-UPS (uninterrupted power supply) module aimed at single board computers used in IoT. Listed under: Solar energy projects

748.

Simple Raspberry Pi Input Output. Tricopter This is a simple input output switch/LED for a Raspberry Pi, What this allows is for the user to tell the raspberry Pi to do a selection of tasks without the Raspberry Pi being connected to a TV/Monitor or Keyboard/Mouse. Very simple. Well I wanted to..... Listed under: Development Board - Kits Projects

749.

How to build your own Quadcopter Autopilot / Flight Controller Contents Introduction Reading the Radio Inputs Controlling the motor speed Determining Orientation Acrobatic / Rate mode control Stabilised Control Final Product - video and full code Other ideas: Safety features Optional: Raspberry Pi Optional: Autonomous Flight Introduction This article will walk you through building your own controller... 792. Geiger Counter – Radiation Sensor Board for Raspberry Pi tutorial Contents Manifesto The Board The Geiger Tube Types of radiation Supported Geiger Tubes Testing Sources Actuators From CPM to Sieverts Source Code Schematic Participate Buy Links and Documentation NOTE: All the code examples in this tutorial use the arduPi library. You can see the documentation..... Listed under: Sensor - Transducer - Detector Projects

793. Use Raspberry Pi to Create Obstacle Avoiding Robot Chassis Raspberry Pi is quite suitable for robot creation. Its GPIO pins could be used to control the motors and sensors, and itself could work as a server, and get controlled via Internet. The Plan I am going to create is a chassis, which could automatically..... Listed under: Motor Projects

794. Raspberry Pi – Jack of all trades. Raspberry Pi is a sort of jack of all trades when it comes to being a single board computer based on an ARM processor. It can be a desktop, media player/streamer, web server, forensics machine, and do most of what all linux based machines can..... Listed under: LCD Projects

795. Jig To Load a Bootloader and Upload Sketches To ATmega328P Note: I only write about what I know. Although there are many Arduino and Arduino type products, I only have experience with the Arduino Uno Rev3. Likewise, the only Atmel microcontroller I know is the ATmega328P. A Little Background (well not so little) I have..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

796. Bluetooth Speakers using Raspberry Pi hi guys long time since i wrote a tutorial, this tutorial tells you how you can use any old speaker lying around your house into a wireless bluetooth speaker, this can also be an cheap bluetooth audio device receiver for your car. I will not..... Listed under: Bluetooth Projects

797. Raspberry Pi Powered Lego Car Two things have happened recently that have contributed to my tinkering hobby. Firstly - My Raspberry Pi arrived after a long (but worth it) wait. Secondly - My two girls (8 and 5) have got in to Lego and so slowly but surely I've been... Listed under: Game - Entertainment Projects

798. Raspberry Pi PC remote power switch control board The default I/O port of SD card is 8081, you can change it. Use putty, ID pi, password 5585, key "sudo nano /etc/apache2/ports.conf", find out 8081 to change your desired port. Features: Plugs directly onto the Raspberry Pi GPIO socket Fits Directly over the Raspberry..... Listed under: Development Board - Kits Projects

799. Raspberry pi print server A print server that tastes of pi. This project assumes that you have the latest version of raspbian (which can be downloaded at) <https://www.raspberrypi.org/downloads/raspbian/>. And an active internet connection. (When imaging the SD card be careful to select the right device otherwise BOOM! There goes..... Listed under: Other Projects

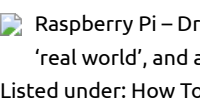

800. rpp – Raspberry Pi PIC Programmer using GPIO Introduction Microchip PIC® 8-bit microcontrollers are quite popular amongst hobbyists, and I've used them a long time in several of my projects. They are very cheap, use only 35 assembly instructions that are easy to learn, and most importantly they use flash memory, which..... Listed under: Raspberry Programmer Projects

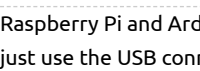

801. Control Android from Raspberry Pi Have you ever wanted to control your android smartphone or tablet directly from your Raspberry Pi? No? Me neither. I just thought it would be interesting to see if you actually could. You could use this feature to display your android screen during a presentation..... Listed under: Raspberry Android

802. Raspberry Pi – Driving a Relay using GPIO There's something exciting about crossing the boundary between the abstract world of software and the physical 'real world', and a relay driven from a GPIO pin seemed like a good example of this. Although a simple project, I still learned some new things about it. Listed under: How To - DIY - Projects

803. Raspberry Pi and Arduino via GPIO UART In an attempt to get my Raspberry Pi talking to my Arduino I'm exploring various different options. The first was to just use the USB connection, but that was too simple. So, here is how to connect the two using the UART on the GPIO..... Listed under: Development Board - Kits Projects

Kits Projects

804.

Medicine Reminder using Arduino Sometimes patients forget to take the medicine at the required time of medicines. And sometimes patient also forgets which medicine He/She have to take at required time. And it is difficult for Doctor/Compounder to monitor patients around the clock. To avoid this problem, we have..... Listed under: Medical - Health based Projects

805.

Web Based, Raspberry pi controlled, 2 channel relay mains control box. Using some off the shelf relays and some basic electronics components coupled with a Raspberry pi with basic HTML, PHP and javascript programming, this Web Based relay control box can be used to turn on or off devices that are connected to the box's plugs..... Listed under: Internet - Ethernet - LAN Projects

806.

Tank Day 23: Range and Bearing Step 1: Choose Sensors Two sensors were chosen for the Raspberry Tank's first foray into detecting environment: An ultrasound rangefinder (SRF02) and a 3-axis compass (CMPS10), both ordered from robot-electronics.co.uk. Beyond their I2C interface, these devices were chosen largely for cost reasons, though they..... Listed under: Game - Entertainment Projects Robotics - Automation Projects

807.

Simple Raspberry Pi B+ case In this instructable I will show you how to build a simple case for the Raspberry Pi B+. I used a template found on the internet, which should be used for a paper case, but I decided that for me a paper case is..... Listed under: Other Projects

808.

ircam raspberry pi shield — first steps Here are some first passes at a Raspberry Pi shield design. I don't quite yet know what I'm doing but here's the rough idea I'm aiming at. I'm not sure how sensible it is, so I'd love to get any feedback! It'd be nice to..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

809. Temperature based device Control system using LM35 A temperature based device control system which uses AT89s52 and LM35 temperature sensor is an embedded system which controls external devices (mainly household appliances heater, fan, coolers and many more) by monitoring temperature obtained from temperature sensor. This project called temperature based device control system can..... Listed under: Temperature Measurement Projects

810.

Safe and simple AC PWM Dimmer for arduino / Raspberry pi Dimmer With MOSFET This circuit shows that dimmers intended for mains voltage do not always have to contain a triac. Here, a MOSFET (BUZ41A, 500 V/4.5A) in a diode bridge is used to control the voltage across an incandescent bulb with pulse-width modulation..... Listed under: PWM Projects

811. ESP8266 + Raspberry Pi Electricity Monitor I have always been monitoring my utility meters in the old fashioned way. First I wrote down in a little ledger (yep, I'm that old), later I wrote a spreadsheet for it and the last few years I'm using the ECAS smartphone app to..... 821. Raspberry Pi Binary LED Clock Binary clocks show the time in an unconventional format. They display the hours, minutes and some even seconds as numbers represented in the binary numeral system. Binary clocks and binary watches have grown quite popular in recent years. More and more people work in IT and become..... Listed under: LED Projects

822. PiPoE – powering a Raspberry Pi over Ethernet This project enables a Raspberry Pi, Beaglebone, or other small computer to be powered over an Ethernet cable. This is very handy if you have a Pi somewhere where getting mains power to it is difficult, or if you want to run several devices from one..... Listed under: Internet - Ethernet - LAN Projects

823. AVR/Arduino ISP programmer using the Raspberry Pi GPIOs Introduction As a fully-featured Linux computer there are many external programmers that can be used with your Raspberry Pi to program the Atmel AVR range of microprocessors. It's also possible to use the general purpose input/output lines (GPIOs) found on the Raspberry Pi to implement..... Listed under: GPS Based Projects

824. Introducing the Raspberry Pi Model B+ Power Supply LADY ADA One of the most exciting updates/upgrades of the new Model B+ is the fancy new power supply. The power supply of a computer is terribly boring sounding, but it's really important. A good power supply makes everything hum along cleanly. A..... Listed under: Phone Projects

825. DIY SPY BOT PI Kit- Raspberry Pi Spy robots are remotely controlled robots, equipped with a camera, transmitting video data to the remote area. A movable spy robot with a remote controller by using Raspberry Pi. The spy robot is made up of a USB camera, Wi-Fi adaptor, batteries and movable wheels..... Listed under: How To - DIY - Projects

826.

Setting up and running NOOBS on a Raspberry Pi In this instruction I will go over how to set up the Raspberry Pi and boot it into NOOBS for the first time. It is important to understand how to set up all of the hardware and how to set up the actual operating system... Listed under: Development Board - Kits Projects

827.

Introducing Ponte: Arduino – Raspberry Pi Bridge (This is a collaboration between myself and my friend and purveyor of fine electronic bits, S.K. Pan) would you connect an Arduino to a Raspberry Pi? Just plug it in via USB as you would normally do with an ordinary computer, right? That takes..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

828.

Raspberry Pi Website Hit Tracker You just made a funky neon sign flash in my living room. How? I have just completed my latest project which is a neon lamp which lights up every time someone visits my website. It's controlled by a little relay board I built out on..... Listed under: Development Board - Kits Projects

829.

Raspberry Pi Spectrum Analyzer with RGB LED Strip and Python Looking for a first project to try out on a Raspberry Pi, I thought what would be better than a Spectrum Analyzer? (Sometimes this display is erroneously referred to as a graphic equalizer--that lets you change the sound, not display it) I was able to get it..... Listed under: LED Projects

830.

Raspberry Pi: Connecting a HD44780 Display over I2C Bus some application, i.e. XBMC can show informations on a display by using LCDproc as driver. This post describes a way to connect a HD44780 display to a Raspberry Pi by I2C bus. Let's start with the physical connections. This is the overview schematic on how..... Listed under: Video - Camera - Imaging Projects

831. An MSF Atomic Clock for the Raspberry Pi

The project is connected to GPIO 15 input pin 1 of my Raspberry Pi interface board. There is nothing special about this pin, its location is simply convenient with my layout.. Please be aware that this project will only work in the British Isles, because of the transmitter..... Listed under: Clock - Timer Projects

832.

Use a bare Arduino as an RF signal processor for Raspberry Pi 433mhz RF transmitters and receivers are really cheap, so you might be tempted to add a RF receiver to your Raspberry Pi. But there is one problem: the Raspberry Pi may not be fast enough, or may be blocked totally while it tries to keep..... Listed under: Development Board - Kits Projects

833.

Raspberry Pi Power Controller This article is a work in progress to create a power-controller for the Raspberry Pi based on a PIC microcontroller and MOSFET. The PIC implements an I2C slave to allow power control, and also to approximate the registers of a PCF8563 Real Time Clock (RTC)..... Listed under: Other Projects

834.

Open brain wave interface hardware you can go directly to Section 9 also. make high quality brain wave interface as low cost and small size is my over 20 years of dream. To do so need mass production, need work with investor to realize that way. not just only my..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

835.

Headless Raspberry Pi WiFi setup (for mobiles) So you successfully configured your Raspberry Pi in a fully headless fashion, maybe even without WiFi too, and you are very happy using it at home in your robotic projects... But when you go outside, at work or on any foreign network once powered and connected to..... Listed under: Wifi / WLAN Projects

836.

Creating a "Blinking LED" project for Raspberry Pi This tutorial demonstrates how to attach a LED to the expansion connector on your Raspberry Pi and to make it blink with a simple C++ program. First of all, in order to programmatically switch a LED on and off we need to connect it between..... Listed under: LED Projects

837.

Airplay Multiroom radio with the Raspberry Pi, no additional hardware needed. Most ways to stream music to multiple sets of speakers cost more than it is worth. I don't think I have to say much about it, you probably wanted to do this in the past but it just seemed silly to spend that much money..... Listed under: Wifi / WLAN Projects

838.  AVC: Serial to I2C Bridge I finished designing, etching and silkscreening a new board last night and started populating it. It's a slight redesign of a board I did before last year's AVC. What's it for? Not telling yet. 😊 I can say this. It's an Arduino clone that will..... Listed under: Development Board - Kits Projects
839.  Raspberry Pi XBee SMT backpack One of the earliest motivations for my work on the Raspberry Pi SPI driver was so that I could use Digi XBee ZB SMT modules. These are basically the same as the normal XBee ZB modules for doing ZigBee with but are on little... Listed under: Development Board - Kits Projects
840.  Turn an old CRT Television into a Raspberry Pi Powered MAME Cocktail Cabinet Here I will show you how I went about building my arcade machine that uses a Raspberry Pi running MAME to emulate games. As everyone's setup will be different this will be general in nature but will hopefully supply enough information so you can get started yourself..... Listed under: Game - Entertainment Projects
841.  TiddlyWiki 5 on Raspberry Pi Server in 15 minutes Introduction Raspberry Pi's are inexpensive credit card sized computers conceived by Eben Upton and designed by the Raspberry Pi Foundation Team in the UK. They are now built in the UK as well. TiddlyWiki 5 is the latest version of TiddlyWiki which was created by..... Listed under: Other Projects
2.  Get Started With Raspberry Pi Hello everyone. Welcome to my First Instructable. You may be asking yourself "I want a Raspberry Pi but I don't know how to start." If you have ever asked yourself this thought, then this is the right Instructable for you. In this guide you will learn how to get started with a Raspberry Pi. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
3.  Powering a Raspberry Pi with a 5W solar panel My plan was to make a solar powered raspberry pi. To run a Facebook AIML chat bot written in c#. (In the daytime) What you will need: 1 x Raspberry pi (we used model B) 1 x 5 Watt solar panel with USB connector 2 x USB cable Listed under: Other Projects
4.  Mapillary en Raspberry Pi Desde hace poco tiempo me he hecho fan de la comunidad Mapillary y su proyecto, he visto personas usando smartphones, GoPro y algunos otros tipos de cámaras para mapear su ciudad, es por eso que he realizado este proyecto para mapear mi ciudad con..... Listed under: Phone Projects
845.  LED Blinking with Raspberry Pi One of the classic electronic analogy to "Hello World" is to make an LED blink. Raspberry Pi has 8 Purpose Input/Output pins(4,17,18,21,22,23,24,25) which can be configured as input/output and turned on/off via software.In this Instructable I will be using python to control the..... Listed under: LED Projects
846.  Turn Raspberry Pi ON w/ Remote Control I'm loving using my Pi with Openelec for my media center, but the need to pull the cord I hate. power was just keeping it below the WAF(Wife Acceptance Factor). So I sat down and came up with this. In the future, the arduino can be used to control the Pi. Listed under: Wireless projects
847.  Raspberry Portable Pi Laptop Portability would generally be the main challenge with projects such as this; it can be difficult to get a Raspberry Pi off grid. However, in my case this is one hurdle which I am able to easily overcome; as with all of my other projects I have..... Listed under: Development Board - Kits Projects
848.  Home Automation using Raspberry Pi, Arduino, Domoticz, MySensors. Hi Fellow makers, This is my first Instructable on Home Automation. The idea is to use a Raspberry Pi as a central controller and wireless nodes to control and monitor. After a lot of hit and trial with many different controllers like OpenHab, Domoticz, Ago Control, finally I decided to..... Listed under: Home Automation Projects
849.  Make a Portable Computer Using a Raspberry Pi Have you ever wanted a portable computer you can take with you? This is the easiest way to build your own. For those of you who do not know what a Raspberry Pi is, it is a complete computer about the size of a deck of cards. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
850.  Easiest Raspberry Pi Camera Mount Ever I bought the camera for the Raspberry Pi, and the after market mount just didn't suit my needs. At the same time I also bought a clam-shell case (~\$6) I was padding the bill for free delivery, looking at the case it seemed that it was perfect. Listed under: Video - Camera - Imaging Projects

851.

A DIY Power Supply For Hi-Fi USB Audio With Your Raspberry Pi Overview This is a guide for building a DIY power supply/regulator powering a Raspberry Pi and a USB audio output interface. The objective is to create a pure, regulated 5.0v power supply that allow Raspberry Pi to run stably but also, more importantly,..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

852.

Raspberry Pi Bluetooth Hello, I'll teach you how to successfully install and use Bluetooth on your Raspberry pi. Just a heads up I'm assuming you have a version B and you've setup your raspberry pi already (for system preferences and ect.) Step 1: Hardware 1. You need a..... Listed under: Bluetooth Projects

853.

Raspberry Pi Robot controlled over Bluetooth This tutorial is based on a previous Instructable - Building robots with Raspberry Pi . Python The aim is to present an example of how to setup a Bluetooth serial connection with Arduino to control a Raspberry Pi robot lets take it one step further..... 854.

Raspberry Pi Water Cooler Hello, this is a step-by-step guide to building a water cooling system for the Raspberry Pi's ARM processor all started when I saw this project. I was instantly captivated, the thought of water cooling a pi had never occurred to me but once I saw it..... Listed under: Other Projects

855.

Raspberry Pi Case I made this case before my school offered 3d printing but I still decided to post it anyway. Step 1: Materials The materials you'll need : • A block of wood • Acrylic • Raspberry pi • Screws • Nuts • Spacers Tools • Caliper •..... Listed under: Home Automation Projects

856.

Water Tank Overflow Alarm Wastage of water is quite prominent in urban as well as rural areas and overflowing of water tanks is a common reason for that. This water tank overflow circuit described here starts ringing as soon as the water tank becomes full. Thus, by warning you..... Listed under: Home Automation Projects

857.

How to use a kindle fire as a monitor for raspberry pi In this instructable I will show you how to use a kindle fire as a monitor for a raspberry pi. I got a kindle fire that I got a few years back that I no longer use and I thought, why not use it..... Listed under: LCD Projects

858.

Raspberry Pi + Motorola Lapdock A few months ago I found through a MOOC at Universidad Galileo, that was possible to convert a Raspberry Pi in "almost" a laptop. This idea caught my attention, by turning this "micro" into an independent computer. I investigated how to do it and I..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

859.

Raspberry media player casing Look at this Raspberry board. It's a good choice if you want to make your own internet and multimedia station to play HD movies, browse on the web watch Youtube trailers listen your MP3 collections for literally peanuts. All you need is a casing..... Listed under: Video - Camera - Imaging Projects

860.

Simple, scalable Raspberry pi garden irrigation This is one of the projects I'm currently working on. The idea behind the project is to build a simple yet scalable and efficient garden irrigation, using as little resources as possible. The end product will be a IOT garden project, but I'll update you..... Listed under: Other Projects

861.

Open Source Home Automation Project using Arduino UNO + Ethernet Shield How Does it Work The main brain for this project is the Arduino UNO Board along with Arduino Ethernet Shield to give it a wireless connectivity. Arduino runs a code to control a Relay board according to the input and also serves a web page through which..... Listed under: Home Automation Projects

862.

Raspberry Pi + Arduino Serial with LCD Screen Intro This is my Raspberry Pi info LCD, I wanted to try and get the Arduino and Raspberry Pi talking to each other through USB serial and I made this little project. The Raspberry Pi uses a python script to get the data and then..... Listed under: LCD Projects

863.

Raspberry Pi Internet Monitor In my house, you can often hear someone shouting "Is the Internet down?" Sometimes it is but most of the time it's a "user problem". I decided to build a gizmo that would make it easy to tell whether the internet connection was working or not..... Listed under: Internet - Ethernet - LAN Projects

864.

Use ssh to talk with your Raspberry Pi. This brief guide explains how to use ssh to talk with your Raspberry Pi. You will need: 1 Raspberry Pi connected to your router (Monitor and keyboard.) If you are looking for a guide to access your Raspberry Pi from the internet look here: <http://www.instructables.com/id/Raspberry-Pi-as-webserver/>..... Listed under: Other Projects

865. Floppy Drive music /w Raspberry Pi Use your Raspberry Pi to control a floppy drive to make music! Step 1: Materials Raspberry Pi ATX power supply (can be found in old computers) Floppy drive Breadboard Wires (9 female to male and 1 male to male) Step 2: Connect the floppy drive..... Listed under: Sound Projects

866.

RDM6300 RFID with PIC18 Dev Board After getting a simple LED-blink program working, I moved on to the RFID portion of my project. It seemed to be the simplest of the three major parts (RFID, SD card, and MP3) because it's basically just configuring the UART to receive and check the..... Listed under: RFID - NFC Projects

867.

Telegram on Raspberry Pi In one of our last tutorials we have installed WhatsApp on Raspberry. WhatsApp at the moment is definitely the most famous app for messaging services, but there are also many alternatives although little known. One of these is Telegram. Telegram is a cloud-based mobile and..... Listed under: Other Projects

868.

Raspberry Pi Arcade A few months ago, I decided that I wanted an all-in-one arcade machine. I started looking for some info on how to build one, and immediately, the name "Raspberry Pi" came up. This Christmas, I got a couple of them. I started experimenting with..... Listed under: Home Automation Projects

869.

Raspberry Pi powered by batteries In this instructable I will show you how to properly supply power to a Raspberry Pi or Pi 2 with a battery pack or any voltage between 2.9 -32 volts DC. I will be using a efficient Pololu Step-Up/Step-Down Voltage Regulator and a toggle switch..... Listed under: Solar energy projects

870.

Raspberry Pi B & B+ boot SD card for PROTA OS (HTML5 UI) Follow this instructable to get your PROTA OS up and running on your Raspberry Pi without pulling too much hair. NOTE for your understanding PROTA OS is an alternative, headless-oriented OS for Raspberry Pi for people like me who seek I-just-want-to-plug-and-use. Burning the image, I'd..... Listed under: Other Projects

871.

H Bridge Control using Raspberry Pi / Micro controller I am looking for input on this circuit that I have designed. I am currently working on a project called the Net-EEL RC Car. It is an RC car that will be controllable using Network Socket Servers / Clients. Therefore, you will be able to..... Listed under: Other Projects

872.

Raspberry Pi & the Neo 6M GPS Previously I built a project where I connected a Neo-6M to an Arduino, but this time around, I want to show how to use a GPS with the Raspberry Pi. Now there are several USB solutions, and apps that work with them, but I wanted... Listed under: GPS Based Projects

873.

Automated Aeroponics System Using Raspberry Pi In this Instructable, we'll learn how to make an Aeroponics system that's controlled by the Raspberry Pi, and uses the Raspberry Pi Camera module to take photos of your plants. Aeroponics is a pretty unconventional method of gardening, but that's what makes it fun! Aeroponics makes..... Listed under: Home Automation Projects

874.

Old PC Accessories + Raspberry Pi = DoorCam & surveillance Kit Step 1: You will need Raspberry Pi B (this project is based on B+ model), 5V Raspberry Pi power supply, A couple of PC speakers, TV/Monitor with composite input and its power supply, 3.5mm jack to RCA adapter, cable, Compatible webcam (see at: http://elinux.org/RPi_USB_Webcams) Three..... Listed under: Video - Camera - Imaging Projects

875.

Using Phidgets on a Raspberry Pi 2 Hello Makers, In this instructable I will be showing you how to prepare a Raspberry Pi2 for use with Phidgets Interface Kit 8/8/8 The Products from Phidgets allow you to connect sensors and actuators to your pc/pi/mac through the USB port. Most of the sensors..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

Home Raspberry Pi Project I just received a shiny, brand-new Raspberry Pi in the mail today! I've only been playing around with it for an hour or so but I already love this little device! It only took me about 30 minutes to go from unwrapping to running, which..... Listed under: Home Automation Projects

7.

Motion Detection Alarm System A basic USB camera can be used to detect motion in a room. In the following steps we will show you how you can use Reactive Blocks to program a ready-to-run Java application that sends SMS when motion is detected. With Reactive Blocks Listed under: Sensor - Transducer - Detector Projects

8.

Remote desktop from Windows to Raspberry Pi Instead of connecting your Raspberry Pi to a large TV monitor, why not use Windows Remote Desktop Protocol to access your Raspberry Pi computer? In this Instructable I'll show you how to use the Windows Remote Desktop Protocol to access your Raspberry Pi computer. Step..... Listed under: Raspberry Programmer Projects

879.

Roberts 747 – DIY Raspberry Pi internet radio/streamer Roberts 747, great radio from 1990. Fully working in very good condition. I found it on antique sale after a long hunt for something like this. I have a spare Raspberry Pi model B V1 at home as a spare and it was just catching dust for..... Listed under: Radio Projects, Wireless projects

880.

Blinking LED using 8051 This is the first project regarding 8051 and of course one of the simplest, blinking LED using 8051. The microcontroller used here is AT89S51. In the circuit, push button switch S1, capacitor C3 and resistor R3 form the reset circuitry. When S1 is pressed, voltage..... Listed under: LED Projects

881.

Piulator Portable Game System via Raspberry Pi This project was a lot of fun to put together. I was looking for a good Christmas present for my nephew, and decided that a Raspberry Pi influenced project would be cool. He likes gaming and computers, so this made sense. I made an identical..... Listed under: Game - Entertainment Projects

882.

Shrink Your Raspberry Pi With MicroSD Card Slot The Raspberry Pi itself is about the size of a credit card, but it only has a standard-sized SD card slot. When you plug in a standard full-sized SD card into it, the card sticks out of the outline of the Raspberry..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

883.

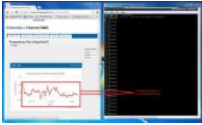

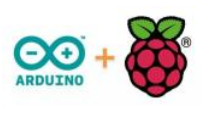

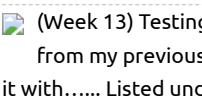

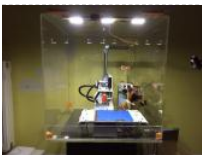

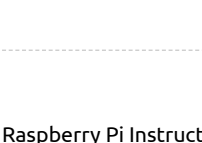

Low Power Raspberry Pi Fileserver This is a low power home file server I built from a Raspberry Pi and two USB drive cases. I've made it as a network drive on all of my home computers, so we have one common repository for files, documents, and pictures. It's set..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

884.

How to use an Arduino shield with the Raspberry Pi Adding Arduino shields to the Raspberry Pi can be a very big pain. You end up with a mess of wires running around and setting up the software is a challenge in its own right. Here is a simple solution to start your own..... Listed under: Other Projects

885.  MCP3008 Raspberry Pi Breakout hat Howdy Y'all Back when I was working on the Raspberry Pi portable emulator that became the backseat system. I thought that I would want to use an analog joystick like several of the other builds. However I was trying to get work via..... Listed under: Development Board - Kits Projects
886.  ThingSpeak Temperature Monitor with Raspberry Pi Step 1: What You'll Need A RaspberryPi BrickPi 9 V battery – for powering the BrickPi board and sensor Dexter Industries Thermometer Step 2: Signup for Thingspeak First signup for the new account in things <https://www.thingspeak.com> Step 3: Login to Thingspeak Login to your..... 906. How to get aMule on Raspberry Pi In this instructable I'll show all the steps to get a nice, web managed, aMule node on a Raspberry Pi. The idea born from the need to have a low-cost and low-consuming aMule node always running and connected to internet. I don't use..... Listed under: Internet - Ethernet - LAN Projects

907. The best Raspberry Pi 2 starter kits compared and reviewed The Raspberry Pi is an amazing low-cost computer. Unlike the ever-popular Arduino microcontroller, the Raspberry Pi was designed to be a full-blown computer from the start. It can run various flavors of Linux/Unix, act as a Media Center, and even moonlight as a Microcontroller. First..... Listed under: Other Projects

908. Bitcoin Mining using Raspberry Pi Want to mine some bitcoins? Want to earn for free? Have a pi not being used? Then let's mine some bitcoins! Step 1: What is BitCoin? If you don't know already, Bitcoin is a virtual currency set up in 2009. Bitcoin has grown in reputation..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

909.

Automated vegetable cultivation system Welcome! rSense "Makashitakun" is the automated vegetable cultivation system which is up with Arduino and Raspberry Pi. Arduino is used for collecting sensors data and handling actuators. Raspberry Pi is used for controlling which manage all Arduino units to work properly and hooked up..... Listed under: Other Projects

910.

Raspberry Pi L298N Dual H Bridge DC Motor There are not any examples that I could find that properly show how to get a simple L298N motor working with RaspberryPi. This is a simple tutorial for "How to make a motor turn." Robots, wheels, conveyors, and all sorts of stuff can be made..... Listed under: Motor Projects

911.

Raspberry Pi Soil Moisture Sensor Agriculture consumes between 80 - 90% of all freshwater in the United States. An easy way to conserve water in the agricultural sector is to install a soil moisture sensor. Soil moisture sensors measure the amount of water in the soil to maintain consistent and..... Listed under: Sensor - Transducer - Detector Projects

912.

Interfacing hex keypad to 8051 Hex keypad. In an 8051 microcontroller, it requires 12 cycles of the processor clock for executing a single instruction cycle. For an 8051 microcontroller clocked by a 12MHz crystal, the time taken for executing one instruction cycle is 1μs. According to the..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

913.

Raspberry Pi "Google Glass" – simple and sleek I have had this completed for a while now, but haven't spent the time to make this Instructable which is actually the crux of my project. At the release of the Raspberry Pi, I immediately thought how amazing this would be as a wearable computer..... Listed under: Internet - Ethernet - LAN Projects

914.

Raspberry Pi Portable Games Console Building this Portable Games Console is possibly the most fun I've had using a Raspberry Pi. It's not just the build that's fun; I've now got a fully functioning games console, so I can play all my favourite old arcade games, online. There's a..... Listed under: Game - Entertainment Projects, How To - DIY - Projects

915.

Touch Display for Raspberry Pi We add to Raspberry Pi a TFT touch screen to display the system console, movies and favorite photos. You can control a relay board ... at your fingertips, literally! To avoid using an HDMI monitor the cost will be above that of Raspberry Pi, in previous articles we..... Listed under: LED Projects

916.

Turn your Raspberry Pi into a desktop PC How to turn a credit card sized, \$35 computer into a fully functional Desktop PC with superb performance. Step 1: Installation 1. download NOOBS LITE from www.raspberrypi.org/downloads. 2. copy contents of zip folder onto root of SD card. 3. Connect Pi to monitor, keyboard,..... Listed under: LCD Projects

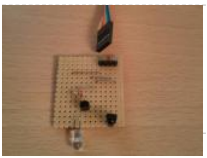

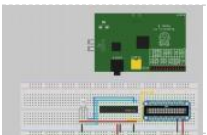

917.

Ultimate Raspberry Pi Configuration Guide The Raspberry Pi is a great thing: it is a real computer, it is cheap (\$40), it can interface with various electronics, talk to the web and has full HDMI support. However it runs on Linux, which I have a love-hate relationship with. I love to use it..... Listed under: Wireless projects

918. Connect-Program Raspberry Pi and a MM5451 LED Display Driver The subject here is connecting the Raspberry Pi to a MM5451 LED display driver. This is written in Python to demonstrate bitwise programming and shift register operation. Using only two input pins (clock and data) for serial data input produces 35 open drain outputs. The..... Listed under: LED Projects

919.  Raspberry Pi Temperature Logger via Radio This project makes use of a raspberry pi, to read the temperature of several radio sensors and store them on a SQLite database. The same raspberry pi is used to serve webpages with the graph of the acquired temperature. live demo here. Step 1:..... Listed under: Radio Projects

945. Port a Raspberry Pi Project: The eventual result of this instructable is, a portable (self powered) raspberry pi system to run field experiments. Part 1 Small inexpensive portable system that includes, Computer (RPI), Monitor with Audio speakers (Seconda screen from refurbished Auto DVD player \$29 including the DVD player to be..... Listed under: Interfacing(USB - RS232 - I2c -ISP) F

946. Raspberry Pi moving timelapse Step 1: Connect the Camera So to connect the camera is quite simple and there is a lot of help onli official help video is here: <https://www.raspberrypi.org/help/camera-module-set...> but I found this to be more helpful <http://thepihut.com/blogs/raspberry-pi-tutorials/1...> once installed and you have enabled the camera..... Listed under: Video - Car Imaging Projects

947. Read temperature with DS18B20 | Raspberry Pi 2 Hello! This is my first instructable project, so it won't be as professional as other are using DS18B20 temperature sensor to get the temperature of your room. Enjoy! Step 1: Supply You will need: The sensor itself DS18B20 <http://www.ebay.com/itm/Waterproof-Digital-Thermal...> Resistor (I'm using 4,7k Ohm)..... Listed under: Temperature Measurement Projects

948. Solar Powered Raspberry Pi Step 1: What You need A raspberry pi A solar panel (with built in charger controller or a Solar Charging socket A usb car power adapter A battery and some wire Step 2: Connecting the Battery First off we need to connect the..... Listed under: Solar energy projects

949. Model Railway Automation with Raspberry Pi. The popular and inexpensive Raspberry Pi1) tiny PC offers some interesting I/O like and GPIO. Because the I2C bus is a common and standard one, the idea to use it for Model Railway automation was born in 2013. Together with Peter Giling, who lives..... Listed under: Other Projects

950. DIY Home Security and Automation with Raspberry Pi 2 In this instructable I will detail my methods for creating a fully custom Hor Security and Automation System. This is a work in progress, and as I will be adding to it as I go. For now I will provide a breakdown goals..... Listed under: Security - Safety Projects

951. Raspberry Pi, Internet Radio We have been aiming to do a mini hack for a while to bring some new life to an old radio and let us ra favourite internet radio stations. Step 1: You Will Need... Depending on the radio you are going to install your..... Listed under: Ra Projects, Wireless projects

952.

Raspberry Pi Controlled Aquaponics Aquaponics /'ækwə'pɒnɪks/, is a food production system that combines conventional aquaculture (raising aquatic animals such as snails, fish, crayfish or prawns in tanks) with hydroponics (cultivating plants in water) in a symbiotic environment. In normal aquaculture, excretions from the animals being raised can accumulate..... Listed under: Temperature Measurement Projects

953.

Introduction to controlling GPIO pins with Python Setting up your Pi for GPIO programming You need to install a few things to get Python to talk to the GPIO pins and control them. If you're using the standard Raspian OS, it's an easy affair. Fire up your terminal you're in the..... Listed under: LED Projects

954.

WiFi – Access Point out of a Raspberry Pi (Repeater) What do you need? A Raspberry Pi, model B. A boot SD card for the Raspberry USB WiFi device that supports "Access Point" mode. An Ethernet cable to connect to the local network. How does it work? The Raspberry Pi is configured as..... Listed under: Wifi / WLAN Projects

955. Radio Caroline on the RaspberryPi The Swinging 60's This is an appropriate label for the 1960's for 2 reasons: (1) it was a decade of great change, especially regarding popular music & fashion, (2) You have to now be in your 60's to have experienced it as a 1960's teenager..... Listed under: Radio Projects

956.

Play Music on Raspberry Pi Using XMMS2 Introduction I installed and trialled the following music/media players in my Raspberry Pi rhythymbox - Crashed every time I clicked on a song audacious - Did not respond every time I clicked on a song mplayer - Worked as expected clementine - Did not respond..... Listed under: Sound - Audio Projects

957.

Raspberry Pi Irrigation Controller Gardening improves health and quality of life, connecting us to our local environment. Plus, you can grow organic fruits and veggies at very little cost. Yet for all these fantastic benefits, remembering to water can still take a backseat to busy lives. Fortunately, home..... Listed under: Home Automation Projects

958.

Build your own Raspberry Pi Mini 3D printing monitor While Adafruit's builders have built up a reputation for constructing very cool original 3D printed toys, perhaps the most impressive of all their designs was the 3D printed Raspberry Pi Mini Computer, an actual working and customizable pc housed in a 3D printed structure..... Listed under: LED Projects

959.

Laser Harp with Tah and Raspberry-Pi This valentines we made this wooden Harp and used Laser and Light Dependent Resistors (LDRs) to play music. I will not be showing you how to make the wooden structure, but you can find the images with exact dimensions if you want to use them..... Listed under: How To - DIY - Projects, Sound - Audio Projects

960.

Installing and Using Pidora OS on Raspberry Pi WHAT IS RASPBERRY? Raspberry is a new (one year old), ultra small (credit card size) and cheap (35USD), Linux computer. The CPU is an ARM processor at 700MHz with 256 Mb (type A) or 500Mb (typeB) of RAM. The OS is Linux for Raspberry..... Listed under: Development Board - Kits Projects

961.

Turn a keyboard into a Raspberry Pi case for around \$20 or less. My first published instructable. I wanted to have a cover for my Raspberry Pi but didn't want to spend a lot to get one. I remember seeing one online and thought I could do something like this: <http://www.howtogeek.com/121814/turning-a-keyboard-into-a-computer-with-raspberry-pi/> on the cheap. Sure, mine didn't work out as..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

962. Raspberry Pi: Minecraft Server These instructions will provide you with a list of requirements and steps for configuring your own Minecraft server using Raspberry Pi. Once complete, you will be able to access and play with your friends from across the world on your Raspberry Pi. Ste..... Listed under: Internet - Ethernet - LAN Projects

963. Raspberry PI and GPIO pin: Controlling an LED with Bash and Python To this effect a LED, resistor 330 ohm, wire, and protoboard and a soldering. Also need our Raspberry Pi with Raspbian preinstalled, if not your case, you can see how to do it in the following link directory. Mounting the circuit You can..... Listed under: LED Projects

964. OBD-Pi Step 1: Hardware Required: Raspberry Pi Model B or B+ Aftermarket head unit (Note: Must support Auxiliary input) Bluetooth 4.0 Low Energy Micro Adapter 2A Car Supply / Switch or Micro USB Car Charger ELM327 Bluetooth Adapter or ELM327 Cable RCA cable..... Listed under: Bluetooth Projects

965. Robot Using Raspberry Pi & Bridge Shield The Bridge Shield is a board for students, hackers & researchers. You can use it along with an Arduino Uno to create cool DIY projects with ease. This will be an open source board and we are presently designing the second generation. We..... Listed under: Robotics - Automation Projects

966. Arduino & Raspberry Pi Camera Interface Yes, we learned that we can take mobile phone camera modules from almost all mobile phones to interface them with our advanced hobby electronics projects just as with any other standard add-on modules. Since this calls for an appropriate microcontroller, it is better to use Arduino..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

967. Mechanical Pi As part of the semester topic „Techno Legacy“ David and I decided to focus on pocket calculators. These devices become more and more irrelevant due to the universal integration of their functionality into major digital devices, primarily smartphones. I am doing some research on calculators and..... Listed under: Calculator Projects

968. Raspberry Pi Wi-Fi Media Server These instructions will provide you with a list of requirements and steps for configuring your own Wi-Fi media server using the Raspberry Pi. Once complete, you will be able to plug a USB drive into your Raspberry Pi and provide the drive's content across..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

969. Raspberry Pi to Go: How to Wire 18v Portable Pi Power The versatile system-on-a-chip Raspberry Pi board seems to have something for everyone: plenty of ports for display, sound, and USB peripherals; a pin header for relaying inputs and outputs from the physical world and space for a dedicated camera module, which makes it a great platform..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

970. IBeacon Entry System with the Raspberry Pi and Azure In late March I went to a hackathon at Universal Studios. We created a system where guests could bypass the queue line by completing a series of tasks that would lead them around the land the ride is in where the average completion time was..... Listed under: Other Projects

971. DTRONIXS Mini PiIO Protoboard Hot on the heels of the PiFace, to add to my collection of Raspberry Pi interface boards comes the PiIO Protoboard from DTRONIXS. Top photo is the base board sitting on a Raspberry Pi, the 2nd one is the board made up with a..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

972. Make animation from Openclipart's SVG with Raspberry Pi This is an Instructable which describes the process of making an animation from Openclipart's SVG. Openclipart library is a collection of 100% license-free art that you can use for any purpose. I will explain the Instructable for the Raspberry Pi user. If you are a..... Listed under: Other Projects

973. Seven-Segment Display A 7-segment display is a great way to display numbers using your Propeller. You can find these in many projects that need to display numbers in a simple way, like clocks, kitchen appliances, or digital scales. This display uses seven LEDs arranged in a special..... Listed under: LED Projects

974.  Installing RetroPie/EmulationStation onto Raspberry Pi 2 Model B+ (Playstation 1 Emulator Included!) Goal Installing RetroPie through Raspberry Pi's OS (Raspbian) and also enabling Playstation 1 Emulator in RetroPie. I'll also teach you how to write images on your SD card from a Windows PC as well (no worries :D). This tutorial is for Raspberry Pi 2 B+ Models. Any..... Listed under: Other Projects

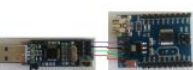

975.  Control your old film camera with a Raspberry Pi Vintage Pi Recipe Using the techniques provided here, you can control a film SLR camera and a USB GPS receiver with a Raspberry Pi. Using Raspberry Pi to control motors, LEDs, digital cameras, and other sorts of modern peripherals is nothing new. However, you can..... Listed under: Video - Camera - Imaging Projects

976.  Make a secret IR-camera security raspberry pi unit Did you ever wanted to know what's going on in your room, when you're not at home? Did you ever wanted to know who's entering your room and grubbing around in your things? Did you want to have a robot friend who can send messages..... Listed under: Video - Camera - Imaging Projects

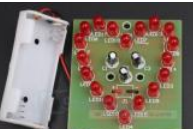

977.  ICStation STM8 Minimum System Board 1.Features 1.Control chip is STM8S003F3P6 2.All pins can be available,and mark pins,but not all pins should be welded by customers in person(Customers should provide your own male pins) 3.Support SWIM debug mode 4.Support two power supply mode,USB MINI wire and 2.54 male pin 5.You can..... Listed under: Development Board - Kits Projects

978.  All Weather Solar Powered Raspberry Pi Here I am going to show you how to set up a solar panel, buck converters and batteries to create a solar power solution that will keep your pi powered 24/7. A great idea for your personal server or timelapse projects. The solar panel is..... Listed under: Solar energy projects

979.  Red Heart-Shaped Flash LED DIY Kit 18pcs LEDs Description Red Heart-Shaped Flash LED DIY Kit 18pcs LEDs Circuit board with 1.5mm high-quality all-glass plate processing technology, the pad large, thick wire, fly line rarely (only 3), component layout and beautiful copper surface using environmentally friendly antioxidant treatment. Using 9 SMD components, easy welding..... Listed under: Hardware - DIY - Projects

980.  Raspberry Pi Sega Mega Drive/Genesis II Case I received my Raspberry Pi and decided I needed a case. I didn't have much available in terms of laser cutters, 3D printers or woodwork skills etc. so I thought laterally. I'd previously had the idea of using the Pi as an emulator so I thought,..... Listed under: Other Projects

981.  How to Send a Temperature Emergency SMS Using Tracking Kit (GPRS + GPS) Contents Introduction Step 1: Connection Step 2: The Links and Documentation 1. Introduction Go to index This tutorial allows the user to measure the temperature of an object. When the temperature is 0°C or less, a text message is sent to a mobile phone..... Listed under: GPS Based Projects

982.  Reduce overhead due to network drive on Raspberry Pi Problem We add a line entry to /etc/fstab when Raspberry Pi needs to automatically mount a network drive. The problem with this approach is that: Raspberry Pi needs to mount the network drive from the point of when booting up to shutting down. In other..... Listed under: Raspberry Programmer Projects

983.  Make An Auto-Locking Office Door with Smartphone Proximity Sensor Pssst – want some high tech protection for your home office? secret lock for your “workshop” (ok, you got me, it’s actually a dungeon/gaming room) that the kids won’t be able to figure out? We got you covered. Let’s build a DIY smart lock that..... Listed under: Sensor - Transducer - Detector Projects

984.  Weather station based on Raspberry Pi This is a simple project for a weather station. Initially it reads temperature, pressure and humidity. Next step is to measure wind direction and after that wind speed. The base of the project is a Raspberry Pi A+ which was chosen by its small consumption,..... Listed under: Temperature Measurement Projects

985.  Raspberry Pi digital Hall sensor in JAVA All right this is the review on the next two lessons on linear hall sensors. Lesson 02 uses an analog linear hall sensor and an analog to digital converter IC ADC0832. The lesson 03 uses a linear hall sensor with added a comparator which allows some..... Listed under: Sensor - Transducer - Detector Projects

986. How to Repair a Broken Raspberry Pi SD Card Slot It's pretty easy to break the SD card slot on a Raspberry Pi (I broke mine by dropping it on the SD card break yours, there's no need to cry over spilled Pi. Replace the disappointing SD card slot with a new one..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

987. Easy DIY baby crying detector with Raspberry Pi In this instructable we will learn how to make a simple yet effective baby monitor detects and alerts you whenever the baby is crying. We used Philips Hue as an alert system but you can choose a different item or channel to get notified..... Listed under: Sensor - Transducer - Detector Projects

988. Raspberry Pi world web cam Concept: The broadband Internet that you use in your house for 24*7 might be costing you around \$5 per month , add another \$150 (one time) to it and you have your own home surveillance system which will monitor your home 24*7 Listed under: Video - Camera - Imaging Projects

989. How to make a Raspberry Pi Arcade with no programming Setting up a Raspberry Pi arcade is actually really easy, thanks to a Linux distribution called RetroPie. You don't need to do any programming or setup, just install the image on an SD card. This will allow you use the arcade with a keyboard..... Listed under: Game - Entertainment Projects

990. Home (Room) Temperature and Humidity Monitor with Web Based Chart – Raspberry Pi Simple way to monitor your, Home ,room, or small factory or any other places Temperature and Humidity from anywhere in the world via internet. It very fun and very simple. The Concept The Raspberry Pi will get the Home(Room) Temperature and the Humidity..... Listed under: Temperature Measurement Projects

991. GPS Module for Arduino and Raspberry Pi Introduction Ingredients: 1 x GPS module 1 x Antenna 1 x Arduino Uno or 1 x Starter Kit Raspberry Pi + Raspberry Pi 1 x Two small wires (Red and Black) 1 x PC Preparation Time: The GPS module for Arduino and Raspberry Pi Listed under: GPS Based Projects

992. Raspberry Pi GPIO Expansion Cable from a Used IDE Cable Rev B of the raspberry Pi ships with a 26 pin GPIO port and my first dile after bringing up my Pi was, how was I going to break out the Pi's GPIO pins so that I could easily access them for design work? I... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

993. Breadboard One | A typical Mixed Signal Circuit. We designed Breadboard One as the first BitScope Ed project because it's a simple mixed signal circuit which explains the key elements of modern mixed signal systems. A Mixed Signal Circuit is one which has both analog and digital components. In analog circuits the currents..... Listed under: Development Board - Kits Projects

994. Setup a Raspberry Pi PHP web server Lighttpd is a lightweight web server, with all the essential functions of a web server, PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language. This is a tutorial on how to install Lighttpd and PHP on..... Listed under: Internet - Ethernet - LAN Projects

995. Raspberry Pi and Arduino Connected Over Serial GPIO Raspberry Pi Serial GPIO Configuration 0. if you have not seen my article on remote access your Raspberry Pi, take a look here: <http://blog.oscarliang.net/setup-raspberry-pi-for-remote-access/> 1. In order to Raspberry Pi's serial port, we need to disable getty (the program that displays..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

996. Raspberry Pi based wall avoiding robot – FabLab NerveCentre Please note: This instructable is not complete - but may be helpful Published to allow the excellent people at Derry's NerveCentre to take the code out to schools I hope to get back to this but my current job is keeping me from it for..... Listed under: Robotics - Automation Projects

997.

Power over Ethernet for Raspberry Pi I recently purchased a Cisco Catalyst 3560 48 port PoE Switch and soon realized that I didn't have 48 ports. I soon started thinking of ways of using that power for other needs like charging phones or running devices. It then hit me. I..... Listed under: Internet - Ethernet - LAN Projects

998.

Raspberry pi Kodi network media player for less than \$60! Kodi (also known as XBMC) is a great network media player that can access just the files on your USB and network, but great internet content such as Youtube, Syfy, HGTV and more. Kodi is a piece of software you can download and..... Listed under: Sound - Audio Projects

999.

Multichannel Professional Data Logger on Raspberry Pi – Part 1 See the Part 2 for the hardware and Part 3 for the software implementation. In this series of articles I'll explain how to build a multichannel Data Logger, capable of collecting voltage, current and temperature measurements over the specified intervals of time. Our alternate goal..... Listed under: Temperature Measurement Projects

1000.

USB relay module for Windows, Linux, Raspberry Pi USB is a very well documented and reliable interface. Nearly every computer system today is equipped with one or more USB host connectors. Sometimes you need some inputs and outputs for tasks surrounding your PC or you have a cool idea for an automation with..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1040.  GSM Remote Control – GSM Module Raspberry Pi, This GSM Mobile is used for our Remote Control (for example Gate Control, Temperature Control. use the word 'module' because, unlike what we did in our remote control projects, this time around the mobile phone is not mounted on a printed bc but rather on..... Listed under: GPS Based Projects

1041.  Raspberry Pi – Stepper Motor Control & Breakout Board Overview Many of the previous Raspberry Pi projects I had been working were based on fairly simple GPIO logic to turn things on and off. Today I wanted a little more of a challenge so I started working to control a stepper motor from..... Listed under: Motor Projects
1042.  LCD Library (HD44780U) The wiringPi LCD devLib allows you to drive most of the popular 1, 2 and 4-line LCD displays that are base the Hitachi HD44780U or compatible controllers. It allows you to connect multiple displays to a single Raspberry Pi. The displays c connected..... Listed under: LCD Projects
1043.  Motion Sensor using Raspberry Pi This example shows how to use Raspberry Pi hardware to interface to a motion sensor and cor external LED. Introduction Raspberry Pi target enables you to create and run Simulink models on Raspberry Pi hardware. The tar includes a library of Simulink blocks for..... Listed under: Sensor - Transducer - Detector Projects
4.  How to Connect an LED to your Raspberry Pi The easiest way to turn on an LED using the Raspberry Pi is to wire it up to the +3.3v pins of the General Purpose Input Output (GPIO) header and ground (0v), making sure to place a resistor in series with the LED..... under: LED Projects
5.  Analog Gauges Using I2C on the Raspberry Pi I've been intending to try driving Switec X25.168 motors using the MCP23008 I2C I/O port expander chip an Arduino, but it occurs to me that it might be more interesting to try this on a Rasberry Pi. If it works, it will demonstrate a..... Listed under: Clock Projects
6.  A Slice of Raspberry Pi Adding an Envelope Detector to convert an RF input to a DC output I connected the ADC Pi module to the C header and stacked the DDS module on top. PCB support spacers were used to hold the modules together and to take the strain.. Listed under: Sensor - Transducer - Detector Projects
1047.  A project log for FirePick Delta, the Open Source MicroFactory Software Topology and Theory of Operation OpenPnP is the high-l brains of the machine, that does the seemingly-simple stuff like "pick up that part" and "put it over there". Lots of libraries and su systems feed information to it, and it passes information to the various..... Listed under: Sensor - Transducer - Detector Projects
1048.  An introduction to GPIO and physical computing on the Raspberry Pi One powerful feature of the Raspberry Pi is the row of GPIO (general purpose input/output) pins along the edge of the board, next to the yellow video out socket. These pins are a physical int between the Pi and the outside world. At the simplest..... Listed under: LED Projects
1049.  Raspberry Pi Shutdown Circuit with Sleep mode Raspberry Pi is a great platform to be used in a robot project, but it has a severe limitation: by default it does not have a built-in power button. As a Linux-based system Raspberry Pi requires to be shut down grac before switchin off power..... Listed under: Robotics - Automation Projects
1050.  Portable Raspberry pi with battery pack 2.0 This was my second project I have worked on for Instructables. I think I did a great job hope you do too. For this project you will need: Where I got them: -Raspberry pie (with a case if possible) Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1051.  Raspberry Pi with the IO Expander A month ago my Raspberry Pi arrived and since then I have been wanting to control external de with it. Like any other newbie, I was eager to do something with it as soon as possible and spent hours and hours reading and tryir out..... Listed under: LED Projects

1052.  Internet of Things Toilet Uploads Events to the Cloud (Raspberry Pi) Internet of Things Toilet uploads flush events and toilet paper change out events to Google Drive spreadsheet. How does it work? – An aquarium liquid level sensor float switch detects toilet to level; flushing lowers the level closing the switch. A photo cell located..... Listed under: Internet - Ethernet - LAN Projects

1053. Raspberry Pi Twitter Monitor The Twittersverse Like it or not, Twitter is a force to be reckoned with. Millions of people use Twitter I happenings in the world and their lives. Large events like conventions, elections, and uprisings have a habit of crashing the Twitter servers..... Listed under: Internet - Ethernet - LAN Projects

1054. Raspberry Pi – John Jay's 8 LED & Button Breakout Board Overview In a previous article I demonstrated how to build your own Ra: Pi GPIO testing board that included buttons, slide switches, and LEDs. Since that time, I learned about a retired engineer in Georg named John Jay who is producing awesome little companion electronic boards..... Listed under: LED Projects

5. RPi 5V PSU construction using Raspberry pi A 5V power supply for the Raspberry Pi - Construction How To Due to various problem the power supply for the RaspberryPi, a home made PSU might be a solution for some of you. You will need some experience with construction of electronic circuits,..... Listed under: Battery Projects

6. Measuring temperature with RASPBERRY PI One of the main characteristics of the environment in which we live is the temperatur therefore its measurement is quite important. The easiest way to measure it is by using Maxim integrated 1-Wire sensors. This way can connect up to 10 sensor to..... Listed under: Temperature Measurement Projects

1057. TFT LCD display with 320×240 resolution for RASPBERRY PI RASPBERRY PI is credit card size computer, which price is only about 3 This makes it accessible to a wide range of people. Despite its low price it is equipped with Broadcom's SoC BCM2835, it contains \ powerful ARM1176JZFS CPU running at 700MHz, with floating..... Listed under: LCD Projects

1058. List of required material using raspberry pi Raspberry Pi 8GB SDHC Class 10 Card Nano Wifi-Stick Flytron Navigatron I2C GPS 4cha I2Csafe Bidirectional Logic Level Converter ADS1015 ADC Suppo A2212/13 1000KV Brushless Motor 10"x4.5 GF Propeller Set Ora Stück 2 CW 2 CCW Flyduino HEXFET 20A Motor Controller Drotek IMU 10DOF:..... Listed under: Game - Entertainment Projects

1059. Control home devices with Bluemix Internet of Things (Part 2) Part 2: Configuring the Raspberry Pi This is a continuation of Part 1 Controlling home devices with Bluemix Internet Of Things If you haven't read Part 1, please do that first... In Part 1 we got the el work out of the way. We..... Listed under: Home Automation Projects

1060. Build your own internet radio This Instructables shows you how to build an internet radio (listen to jazz, house music, rock, salsa...) in less than 30 minute without any technical knowledge nor soldering. The radio uses a raspberry Pi as hardware, a ready to flash file to write a SDCard... Listed under: Internet - Ethernet - LAN Projects

1061. A Great I/O expansion Shield for RaspberryPi based on I2C Today we introduce a I/O expansion shield for Raspberry Pi which allow to extend the number of digital inputs and outputs available for our applications. [See also our previous I/O expander for Arduino] having published the LCD display and GSM expansion shield we..... Listed under: LCD Projects

1062. Trigger a Webcam with a button and Raspberry Pi This instructable will show how to trigger a webcam using Raspberry and a push button. A bash script run at startup and it launch a Python script that survey the GPIO port. When the button is pressed, a "fswebc command runs. Step 1: Materials -..... Listed under: Video - Camera - Imaging Projects

1063.  Adafruit Ultimate GPS on the Raspberry Pi How easy is it to get your Raspberry Pi eavesdropping on satellites 20,000 km up in the Wonderfully easy thanks to Linux, and affordable thanks to Adafruit's Ultimate GPS Breakout! This quick learning guide will show everything you need to do to add..... Listed under: GPS Based Projects

1064.  Adafruit FONA using raspberry pi, Ring, Ring! Who's that callin'? It's your breadboard! Introducing Adafruit FONA MiniGSM, an adorable all-in-one cellular phone module that lets you add voice, text, SMS and data to your project in an adorable little package. This module measures only 1.75"x1.25" but packs a surprising amount..... Listed under: Phone Projects

1065.  Network Interface Failover using FONA Do you hate it when the internet goes down in your area? Do you want to be notified when the internet goes down when you are away from home? Do you have a project that needs 100% internet availability where you would want to be notified..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

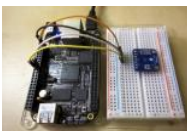

1066.  Raspberry Pi orchestration In this Instructable I would like to share my personal work-flow for working with headless Raspberry Pi. If you are interested in automating the setup and deployment process for one Pi or many this is the post for you. All the code is available in the comments..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1067.  Web Enabled PIXEL on Raspberry Pi The PIXEL kit from LED:ART consists of an RGB LED matrix, a IOIO Mint Bluetooth microcontroller to drive the matrix, and some software to give instructions to the IOIO for what to display. Originally, only an Android and PC based software was available. Now, web..... Listed under: Internet - Ethernet - LAN Projects

1068.  TMP006 Temperature Sensor Python Library using Raspberry pi, Are you looking for an easy way to measure the temperature of something without attaching a sensor directly to it? Consider using a non-contact temperature sensor like the TMP006! This sensor reads the infra-red radiation, or heat, emitted from an object and can..... Listed under: Sensor - Transducer - Detector Projects, Temperature Measurement Projects

1069.  Running OpenGL-based Games & Emulators on Adafruit PiTFT Displays using Raspberry pi The Ideal: Adafruit's PiTFT displays are rock sharp. Whereas small composite screens on the Raspberry Pi usually require some video scaling (resulting in blurriness), PiTFT uses a dedicated GPIO header, digitally controlled pixel-by-pixel for a rock steady image. Though not a lot of pixels, it works..... Listed under: Game Entertainment Projects, LCD Projects

1070.  Debugging with the Raspberry Pi WebIDE The Raspberry Pi WebIDE includes an advanced, yet easy to use tool, to help you work through code that you've downloaded or written in Python. If you haven't used a debugger, either on the command line or in an Integrated Development Environment (IDE), hopefully this guide..... Listed under: LED Projects

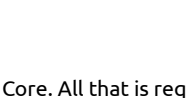

1071.  Adafruit PowerBoost 500 + Charger PowerBoost 500C is the perfect power supply for your portable project! With a built-in battery charger circuit, you'll be able to keep your project running even while recharging the battery! This little DC/DC boost converter module can be powered by any 3.7V Lipo/LiPoly battery, and..... Listed under: Battery Projects

1072.  SSD1306 OLED Displays with Raspberry Pi and BeagleBone Black Are you looking for a bright graphical display to use with your Raspberry Pi or BeagleBone Black project? Consider using one of the SSD1306-based OLED displays, with the SSD1306 Python library! Although they're small (only an inch or so in size), these displays produce a..... Listed under: LCD Projects

1073.  How To Setup A Web Server On Your Raspberry Pi This page aims to summarise the steps required to install a webserver with PHP support onto your Raspberry Pi. This will allow the Pi to serve HTML and PHP pages to users on the same network. This is a useful mechanism to view images and/or..... Listed under: Internet - Ethernet - LAN Projects, News & Updates

1074.  Control Pi-Plate with Spark Core The ppDAQC board from Pi-Plates.com is an inexpensive yet powerful solution for expanding the input/output capabilities of the Spark Core. And since Pi-Plates are stackable, it is a simple task to scale up the I/O capabilities of a Spark Core. All that is required for..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1075. Invisible dog trainer With a pressure sensor, led and speaker you can turn your Pi into an invisible dog trainer that trains your dog to get off the couch. When the dog sits on the couch, the led blinks and the dog receives the command "Get off the..... Listed under: Sensor - Transducer - Detector Projects

1076. 3: More LEDs and a Button So we now have a traffic light/pelican (Tux!) crossing simulator. The 2nd Red LED is connected to wiringPi pin 3, (GPIO-22), and the 2nd Green LED is connected to wiringPi pin 4, (GPIO-23). Test them as before with the gpio command, e.g. for i in..... Listed under: LED Projects

1077. Knight Rider & Cylon Lights for the Raspberry Pi The most obvious application for a Raspberry Pi is re-creating the sliding red light found on "KITT" from Knight Rider or the Cylons in Battlestar Galactica. This can all be done with pure electronics but that doesn't require any programming and therefore isn't as cool..... Listed under: LED Projects

1078. Raspberry Pi 1- Wire Digital Thermometer Sensor (DS18B20) While searching for a simple way to measure temperature using my Raspberry Pi I came across the DS18B20 1-wire digital temperature sensor. This promised an accurate way of measuring temperature with a few wires and almost no external components. The device only cost a few pounds..... Listed under: Sensor - Transducer - Detector Projects

1079. My GPS disciplined Rubidium OCXO Frequency Standard and NTP server project Part 1 The Doctor: People assume that time is a straight progression of cause to effect, but actually from a non-linear, non-subjective viewpoint—it's more like a big ball of wibbly wobbly... timey-wimey... stuff. Amy Pond: It's spacey-wacey, isn't it? —Dr. Who? Though delightfully silly, there is..... Listed under: GPS Base Projects

1080. Drive a 16x2 LCD with the Raspberry Pi Overview Adding a LCD to any project immediately kicks it up a notch. This tutorial explains how to connect an inexpensive HD44780 compatible LCD to the Raspberry Pi using 6 GPIOs. While there are other ways to connect using the UART this is..... Listed under: LCD Projects

1081. Java ME 8 + Raspberry Pi + Sensors = IoT World (Part 1) Learn how to connect sensors to the Raspberry Pi and control them with Java ME 8. Published September 2014 The latest release of Java ME 8 includes a powerful API for controlling devices such as LEDs, relays, LCDs, sensors, motors, and switches. This article is the first..... Listed under: Sensor - Transducer - Detector Projects

1082. Controlling an LED For this part of the tutorial you will need: Usb to Micro USB cable. Ethernet Cable. A computer. An SD card (4GB or bigger). A breadboard Female to male jumper cables or the Adafruit Assembled Pi Cobbler Breakout. 330 Ohm resistor. A bit of Electronics A..... Listed under: LED Projects

1083. BeagleBone and Raspberry Pi gain FPGA add-ons At the Maker Faire in New York City, ValentFX showed off two open source FPGA boards that stack with BeagleBone and Raspberry Pi SBCs, and also unveiled BBot, a BeagleBone-based drink serving robot built with an earlier FPGA board version. The FPGA add-on boards use..... Listed under: Robotics - Automation Projects

1084. Totally Wireless Bird House Making of DIY bird house project with Raspberry Pi and Arduino Here is a detailed explanation how to make a totally wireless surveillance style bird house. About the design The main advantage of this device is that it is completely wireless, and can hang..... Listed under: Wireless projects

1085. Tank Day 9: Power to the Pi Last time around, we proved that the Raspberry Pi could indeed be integrated into a Heng Long Tiger tank, and so control its functions. That's a significant achievement, but there's plenty more to do. Firstly and most importantly, we need to drive the..... Listed under: Other Projects

1086.

Connecting an Arduino and Raspberry Pi The use case of the GPIO pins on the Raspberry Pi are rather limited and since I have an Arduino Mega 2560 lying around I can easily connect the two. In the next couple of weeks I'll explain my process of connecting the Arduino with..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1087.

Operating a Simple Switch and LED on the Raspberry Pi GPIO, as may have been explained in other tutorials, stands for General Purpose Input/Output and a GPIO pin can be set high (taking the value 1) by connecting it to a voltage supply, or set low (taking the value 0) by connecting it to ground..... Listed under: LED Projects

1088.

Adding a Real Clock Time to your Raspberry Pi The Raspberry Pi doesn't have a little coin-battery-powered 'Real Time Clock' (RTC) module, which keeps time even when the power is off, or the battery removed. To keep costs low and the size small, an RTC is not included with the Raspberry Pi. If you want to add one..... Listed under: Clock - Timer Projects

1089.

Control your Pi's Desktop from any Mobile Device One of the great things about a Raspberry Pi is that it can fit in your shirt pocket. If you want to use it you need to hook it to a keyboard, mouse, bulky monitor, etc... nearly defeating the Pi's..... Listed under: Phone Projects

1090.

How to Access Raspberry Pi Directly through the Ethernet Port of PC The Raspberry pi is a single board minicomputer which has all the essential hardware included so as to meet the goal of low cost. The board is Raspberry pi board runs on ARM11 processor but is available at extremely cheap price. The board is designed..... Listed under: Development Board - Kits Projects

1091.

PiHub Hello! Welcome to another Instructable from NextFab. In this Instructable we will be showing you how to construct your very own PiHub. What is a PiHub you ask? The PiHub is a free standing, desktop information center that uses a simple LCD screen and 5..... Listed under: LCD Projects

1092.

Adding shutdown/restart pushbutton for Raspberry Pi This article deals with adding a push button on the Raspberry Pi's GPIO pins and writing a daemon that handles push button events. If we press the push button for less than 2 seconds, we want the daemon to shutdown the system and if the push button is pressed for more than 2 seconds, we want the daemon to restart the system..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1093.

Raspberry pi 2 water alarm with t-cobbler plus This is our first try with the raspberry pi 2 We wanted to create an headless water alarm. Parts used: Raspberry Pi 2 Funduino water sensor 1k resistor Red Led Adafruit T-cobbler Plus Large breadboard (too large ;-p) Step by Step Setup of the PI 2..... Listed under: Sensor - Transducer - Detector Projects

1094.

Self Signalled Process System Using Raspberry Pi The Raspberry pi is a mini computer which is designed in a single board with all the essential components required for running an operating system. The Raspberry pi board runs on the Broadcom controller chip with SoC (System on Chip). This SoC has..... Listed under: Development Board - Kits Projects

1095.

MrRobot – Ubuntu Mobile app enabled Robotics(Raspberry Pi and arduino involved) Project MrRobot is an Ubuntu Mobile app enabled Robotics which has the feature of voice, touch and shake control to interact with the Rapiro robot. This project is done within 28 hours at Ubuntu Shenzhen Hackathon by our team E-minors. All the code is open sourced..... Listed under: Robotics - Automation Projects

1096.

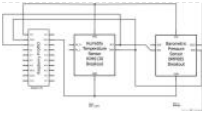

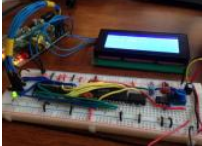

Raspberry Pi and I2C devices of different voltage After my recent posts on using the MCP23017 I/O expander with the Raspberry Pi, several people have queried the connection of an I2C device running at 5v to the Raspberry Pi's 3v3 I/O. The reason why this is safe in most cases is that on..... Listed under: Other Projects

1097.

AUTOMATIC DOOR OPENER CONTROLLED THROUGH SLACK The post was originally posted on <http://www.visuality.pl/posts/Nod-Red-Based-Office-Door-Opener-with-using-Raspberry-Pi-and-Slack>. Sesame At one of the hackathons we decided to automate our door opening process. It was a pain to do this manually because lots of clients and..... Listed under: Other Projects

1098.  Build up a vehicle Week 01 January 9, 2013 (1 hour): Meet as a team after class to discuss preliminary project proposal. it is decided we are going to build up a vehicle like a Google street car. January 10, 2013 (2 hours): Met as a team after class..... Listed under: C Projects
1099.  Cycle Chaser Project animations from the rear of your bicycle. The framerate depends on the speed you are moving at. A couple of years ago, I created a dynamic bike headlight with a Raspberry Pi and a small, battery-operated projector. I've been eager to explore what I..... Listed under: Sensor - Transducer - Detector Projects
1100.  Long-Range Wireless Broadcasts: Raspberry Pi Slow Scan Television (SSTV) Camera In this project the Raspberry Pi with the PiCam as a wireless camera which can transmit images over long distances, usually hundreds of meters! Images are transmitted by amateur radio (ham radio) using slow scan television (SSTV) on the 2 meter band (144.5MHz)..... Listed under: Wireless projects
1101.  Laboratory 'Weather Station' This article describes how to make a network enabled weather station that may be used to monitor ambient air temperature, humidity, and barometric pressure in the laboratory. Usage Example When conducting experiments on a rotating turntable in the GFD laboratory it is often desirable to..... Listed under: Sensor - Transducer - Detector Projects
1102.  How to build a RaspberryPi Cluster RaspberryPi was invented as an educational device to inspire children to study computer science. Nevertheless, in a couple of years it has become the toy of computer scientists, engineers and curious of every age. This project is a successful attempt to build an educational RaspberryPi Cluster composed by..... Listed under: How To - DIY - Projects
1103.  Raspberry Pi SID Player Project overview: The Raspberry Pi SID player is a device which allows you to play music from the Commodore computer using original audio hardware (the "SID" chip) through the Raspberry Pi. In addition to supporting the vast library of classic game music from the..... Listed under: LCD Projects
1104.  Controlling an Effect with Real Sensors For this lab you need your Satellite CCRMA kit, a laptop computer with Ethernet adaptor to program it, and some headphones with a mini 1/8" (2.54mm) stereo jack. You are also invited to bring the following optional items they are by no means required:..... Listed under: Sensor - Transducer - Detector Projects
1105.  How to send SMS from a PHP website through HTTP by using Raspberry Pi Background of sending SMS from website with Raspberry Are you curious about the most easiest way to send SMS from your website? Nowadays, I have become really interested in the field of Internet of Things (IoT), therefore I thought it would be cool to..... Listed under: Internet - Ethernet - LAN Projects
1106.  Pi-Rex – Bark Activated Door Opening System with Raspberry Pi (DISCLAIMER: Not meant as a security solution or a lesson in good behavior. It's an experimental proof of concept to play with the application of embedded computing to solve particular use cases) deprivation has been driving me mad recently. And it's all down..... Listed under: Home Automation Projects
1107.  Macro Pi – Focus Stacking using Raspberry Pi Here's another in the series of articles of photographic uses for the Raspberry Pi SBC (Single Board Computer). This time, it's re-purposing an old flatbed scanner as a macro rail for focus stacking images in macro photography. The Plan There's a common issue with shooting..... Listed under: Video - Camera - Imaging Projects
1108.  Atlas Scientific and Raspberry Pi This Instructable will show you how to interface with Atlas Scientific sensors using a Raspberry Pi. There are 3 main ways to do this: By hooking a keyboard, monitor, and mouse up to the Pi and using it as a stand alone computer. Or by connecting..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects
1109.  RPi Garage Door Opener for Rentals The problem with renting a unit, is that we are unable to modify much of the furniture in the unit without upsetting our landlords. But we would still like to do it, and it is possible to do a few things. Our particular rental unit..... Listed under: Home Automation Projects
1110.  Raspberry Pi Cloud IP Camera with POE I was inspired by scavix's work with the instructable Raspberry Pi as low-cost HD surveillance camera so I decided to make my own Raspberry Pi based IP camera that also features POE and supports integration with the Google Drive. The video stream can be simply..... Listed under: Video - Camera - Imaging Projects
1111.  Reading Analogue Sensors With One GPIO Pin Unlike some other devices the Raspberry Pi does not have any analogue inputs. All 17 of its GPIO pins are digital. They can output high and low levels or read high and low levels. This is great for sensors that provide a digital input to..... Listed under: Sensor - Transducer - Detector Projects

Detector Projects

1112.

Audio Solution with Control and Visualization on a Raspberry Pi with Touchscreen (Squeezebox Touch functionality) We present you the possibility to select and control your Raspberry Pi audio player directly through a touch display. Our setup is based on the Squeezebox technology and therefore also enables multi-room audio solutions. Our idea was to find a simple and affordable way to..... Listed under: Sound - Audio Projects

1113.

London Underground line status with Neopixels In this quick tutorial, we'll put together a snazzy London Underground tube line status checker using a Raspberry Pi and Adafruit's awesome Neopixel LED rings, to recreate the classic Underground roundel! We'll light up Neopixel LEDs using the official colours of the Tube lines,..... Listed under: LED Projects

1114.

Raspberry Pi Music Fingers Creating music is always fun, but making it with your own DIY musical instrument is much better !! Whether you are a professional musician looking for that next new instrument to try or an amateur enthusiast who has basic knowledge of electronics, use the Raspberry..... Listed under: Development Board - Kits Projects, Sound - Audio Projects

1115.

Making a datalogger for a Kamstrup electricity / gas meter with Raspberry Pi! About Raspberry Pi So finally I received my new Raspberry Pi. This is a small, low power ARM linux board featuring a ethernet adapter, 2 USB ports and even a full-HD HDMI port for a mere \$35. Check out www.raspberrypi.org for more information. After running..... Listed under: Other Projects

1116.

Honda Accord Raspberry Pi based onboard computer Intro So I had this crazy idea about fitting an onboard computer to my 04' Honda Accord Tourer (Exec trim with premium speaker system – non-navi version). Been googling this and digesting available information, I finally stumbled upon this excellent Engineering(DIY) project, blog and associated forum –..... Listed under: Car Projects

1117.

Raspberry Pi Robotics #1: GPIO Control This video explains how to connect LEDs to a Raspberry Pi's general purpose input-output pins, and how to write Python code to turn them on and off. This video shows how to construct a Pololu Zumo robot chassis, how to interface it to a Raspberry..... Listed under: LED Projects

1118.

Plant Micro Climate Some plants require pretty specific environments to thrive. Many beautiful plants grow best in a climate that is nothing like the climate where you live. Orchids are a perfect example of this. They require cool temperatures and very high humidity, nothing like the environment where..... Listed under: Development Board - Kits Projects

1119.

Front door bolt unlocker Opens your front door! see video of the end result (<http://www.youtube.com/watch?v=9qZrc6LLg1o>) Part 1: 4xAA Rechargeable Switchable Battery Pack + case - Continuous Rotation Servo. (You can also use a regular servo, with some modifications to the software) I used - Futaba S148 - Bread board -..... Listed under: Home Automation Projects

1120.

DIY Infrared Motion Sensor System for Raspberry Pi During the month of July 2015, I completed a high school internship at Colorado State University, and one of the projects that I worked on was that of an infrared proximity sensor for Raspberry Pi. This short range infrared sensor can be attributed to a..... Listed under: Sensor - Transducer - Detector Projects

1121.

Lunch Box Computer with Raspberry Pi This is a quick and easy project to build a portable Raspberry Pi computer that fits right in your lunch box. It's a good first Pi project since it requires no coding, soldering or tooling of any kind. All you have to do is acquire..... Listed under: Development Board - Kits Projects

1122.

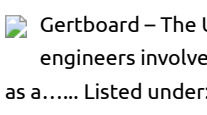

Breakout RaspberryPi This instructable is a video game of breakout on RaspberryPi. It is easy to make this video game. Let's make a game! Step 1: Materials 1. RaspberryPi (I used RaspberryPi rev2) ※include keyboard, mouse, monitor, SD card 2. Tact switch × 4 3. Electrical tape × 4 4. Some jumper..... Listed under: Game - Entertainment Projects

1123.

Building the MonkMakes Raspberry Pi Robot Kit The latest product from MonkMakes is a robot kit that I have designed using the RaspiRobot Board v2 (RRB2). The kit is available from MonkMakes. Overview The kit comprises: * a robot chassis, including two gearmotors and a 6 x AA battery holder. * a..... Listed under: Robotics - Automation Projects

1124.

Gertboard – The Ultimate Raspberry Pi Add-on Board The Gertboard is an add-on board designed by Gert van Loo who is also one of the hardware engineers involved in the original design of the Raspberry Pi. The board was originally sold by Farnell/Element14 in kit form but has just been re-launched as a..... Listed under: Development Board - Kits Projects

1126.

Picture – The 3D Printed Raspberry Pi Camera. Way back at the beginning of 2014 I published an Instructable camera called the SnapPiCam. The camera was designed in response to the newly released Adafruit PiTFT. It's been well over a year now and with my recent foray into 3D printing I thought now..... Listed under: Video - Camera - Imaging Projects

1126.

Analog Sensors without Analog Inputs on the Raspberry Pi The Raspberry Pi does not have any analog inputs, but that does not mean that you can't use some types of analog sensors. Using a couple of resistors and a capacitor, you can use a "step response" method to measure resistance. Which is just great..... Listed under: Sensor - Transducer - Detector Projects

1127.

Internet controlled SCALEXTRIC with Raspberry Pi! With this project I can use dataplicity (dataplicity.com) and a Raspberry Pi to control the speed of a car on a SCALEXTRIC system from the internet. I had a look around for tips on where to start and found a few people who had a..... Listed under: Internet - Ethernet - LAN Projects

1128.

Configuring the Raspberry Pi ethernet port for remote control This instructable will show how to quickly configure the Raspberry Pi remotely. This eliminates the need to connect a monitor, keyboard and mouse to use the device. This is a very basic Instructable for PC/Windows users or other not familiar..... Listed under: Internet - Ethernet - LAN Projects

1129.

Beaglebone Black Web Control Using WebPy Ever wanted to create a way to control your garage door using your phone maybe collect data and view it from your laptop. There is a single board computer called the Beaglebone Black which is an extremely powerful device that allows you to control it..... Listed under: LED Projects

1130.

Pulse Width Motor Control My last project had me digging through old robotics parts to find an H-Bridge Motor Controller. I found one that had several TTL chips on the circuit as well and it reminded me of a trick some of you may find useful. First, let's define..... Listed under: Motor Projects

1131.

Raspberry Pi Bluetooth In/Out Board or "Who's Home" I wanted to create an electronic In/Out Board. The type you may have to read who is present or not in a company or home. It is usually placed by the front entrance so anyone can see who is in or out. I also wanted..... Listed under: Bluetooth Projects

1132.

All-in-One Raspberry Pi Getting Started Guide Raspberry Pi, one of the most ingenious inventions for makers and hackers. Before we started into the nitty gritty details of getting it setup, we first must ponder over the question that what the Raspberry Pi actually is. Raspberry Pi is a Linux-based..... Listed under: Development Board - Kits Projects

1133.

How to make a DIY home alarm system with a Raspberry Pi and a webcam Traditional wireless CCTV cameras are cheap but anyone with a wireless receiver can view your signal. On the other hand, IP cameras are secure but they can be quite expensive and usually the video quality is poor—unless you go for a really expensive model. Lately..... Sump pump water level: The hardware The second part of this tutorial about the software can be found here: <http://www.instructables.com/id/Sump-pump-water-level-The-software/> What you need: * 2 X pieces of wood 4X6. 1/4" and the 1/2" thick * 1 X 3 inches pipe. length varies depending of the deep of your pit..... Listed under: Home Automation Projects

1140.

Real World Minecraft We all Know Minecraft is an awesome game, and raspberry pi has made it more awesome. With the Minecraft we can now write simple python scripts to interface read world sensors and button to the Minecraft world. I have listed out some cool ideas on..... Listed under: Game - Entertainment Projects

1141.

Prototype and configure your own Real Time Clock module for the Raspberry Pi (Open Source Hardware and Software Configuration) keep the price of the raspberry pi down the developers left out some of the essentials one of those is the real time clock. At the moment the raspberry pi gets its time over the Ethernet from updating the time automatically from the global ntp (network time protocol)..... Listed under: - Timer Projects

1142. *Preliminary* SPI on the Pi: Communicating with a SPI 3-axis accelerometer using a Raspberry Pi Step by step guide on how to setup Raspbian, and communicate with a SPI device using bcm2835 SPI library (NOT bit banded!) This is still very preliminary... I need to add better pictures of physical hookups and work through some of the awkward code. Listed under: How To - DIY - Projects, Interfacing(USB - RS232 - I2C -ISP) Projects

1143.

Garage door controller using Raspberry-Pi: Monitor status and Control your garage from anywhere in the world! Have you ever driven out of your garage and after few minutes into your drive, feared you did not close the door? ** What if you did really leave the door open? The garage door might close itself after few minutes, but that means your..... Listed under: Home Automation Projects, Internet - LAN Projects

1144.

Turn your Raspberry Pi into a Wireless Portable Bluetooth Audio System A2DP Howdy folks! I had the idea of turning my Raspberri into something like the Beats By Dre portable audio system found here: <http://www.beatsbydre.com/speakers/beatbox-portable-usb/beatbox-portable-usb,default,pd.html> It's a cool product, don't get me wrong, but I'm not really down to pay \$400+ tax for so fancy looking..... Listed under: Radio Projects, Sound - Audio Projects

1145.

Easy Project – Control an LED Light with Python Using a Raspberry Pi This will be the easiest Raspberry Pi GPIO LED project ever. I follow this guide it should take less than 20 minutes to setup and have running. The goal of this project is to get a single LED light blinking based on a Python..... Listed under: LED Projects

1146.

The Tweeting Intercom: (Door Strike) Relay Monitoring w/ Raspberry Pi This instructable is all about monitoring the state of relays a Raspberry Pi. In the particular case we will have a look at a sophisticated Telegärtner DoorLine Pro intercom which holds two vol free relays. Normally, those are used to trigger an electric door strike..... Listed under: Home Automation Projects, Interfacing(US RS232 - I2c -ISP) Projects

1147.

Reuse Unwanted Infrared Remote Control to Use With XBMC/KODI on Raspberry Pi Introduction Remote controlling the media ce a major application of Linux Infrared Remote Control (LIRC). There are quite a number of tutorial on how to implement infrared re control with XBMC/KODI. After following the excellent tutorial published by adafruit.com, my DVD remote control unit..... Listed Home Automation Projects, Interfacing(USB - RS232 - I2c -ISP) Projects

1148.

Fireside Internet Radio Player for Elderly Users – built with Raspberry Pi Introduction: Today we have amazing access to great stre content: music, news, weather, stories, etc. Yet, this access is limited to those who can navigate today's electronic devices. This prc based on a belief that the elderly want and need this access - they..... Listed under: Internet - Ethernet - LAN Projects

1149.

Log and Graph 24V Thermostat Events (Optocoupler + Raspberry Pi) using raspberry There are a lot of Instructables that show how make a thermostat. But what if you already have a thermostat, and you want to log or monitor when it turns off and on? This Instr shows how to use an optocoupler to obtain logic-level..... Listed under: Temperature Measurement Projects

1150.

Bluetooth Low Energy: Read-Write to Sensor Network from Raspberry Pi using Raspberry Pi Originally published in this blog. The ı this tutorial is to demonstrate how you can read and write from a Bluetooth Low Energy (BLE) device. For example, if you want to the 'number of steps' data from your fitbit and make interesting apps..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1151.

Blink a series of LEDs using Python Programming Language and Raspberry Pi using Raspberry Overview of Steps In the first phase install only one LED. Next, I download the LED class python module that represent one hardware LED. I will run the LED class pyth module to blink that LED. The first phase serves as a "Proof..... 1152.

IoT based Raspberry Pi home automation using IBM Bluemix We all have at some point of life desired to control everything at the a button. May it be turning off unnecessary lights when you are not at home to detecting intruders when you are not around. This tutorial will guide you to..... Listed under: Home Automation Projects

1153.

A novel design for raspberry pi wireless shield extension board using raspberry Recently, we design a type of raspberry pi wireless (or extension board) for raspberry pi. By using this rpi shield, you can conveniently control your objective, like LED, TANK, CAR, etc example, by using this wireless shield, we control the LED lamp..... Listed under: Radio Projects

1154.  A Really Inexpensive Raspberry Pi GPIO cable This instructable can be accessed at the author's website - <http://www.neatinformation.com/howto/Pi%20GPIO.html>. If you link to this instructable from another website, please include a link to the Neat Information website. The project described in this article requires basic mechanical and electronics skills and is provided Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1155.  Pure Pi: Control custom stompbox effects on a Raspberry Pi with a smartphone This is my first instructable, although I have been working with Pure Data, Raspberry Pi, and other digital audio for quite some time. If you'd like to see more instructables like this, vote for it. Ever wonder how digital effects are created? Want to customize..... Listed under: Phone Projects
1156.  A combined MSF/DCF atomic clock receiver For this to work you must obviously live in an area that can receive both signals. My circuit is based on two modules taken from two radio clocks bought at Lidl's supermarket. Originally both were for the DCF clock but by substituting the original 77.5kHz..... Listed under: Clock - Timer Projects
1157.  LED circles using multiplexing This project uses two groups of eight LEDs sharing eight GPIO pins via one of my Pi interfaces. The two groups of LEDs are commoned and driven by a BFY51 transistor. The two transistors are controlled by a further two GPIO pins to..... Listed under: LED Projects
1158.  GitPi: A Private Git Server on Raspberry Pi Git is usually used in synchronization with GitHub — the former is a source code management system and the latter is a website where you can share/contribute Git repositories with the larger internet community. For those who want to get started with GitHub, I've written this..... Listed under: Internet - Ethernet - LAN Projects
1159.  Raspberry Pi Turing Machines Prototype Step 1: Set up the supply rails Components: – 1 × Breadboard and jumpers. – 1 × M/F jumper cables. Link the rails together as before using the jumpers and connect the M/F jumper cables to the rails (red to 3.3V, black to GND). Listed under: LED Projects
1160.  Remote Raspberry Pi Robot (PS3 Controller) – Fablab NerveCentre These instructions try to assume very little. Hopefully, if you can find a Raspberry Pi and have an internet connection you should be able to complete this great little project. Basically, this is a project which will result in some specific areas which can be..... Listed under: Game - Entertainment Projects
1161.  Transfer file from Computer to Raspberry Pi Using USB-Serial Cable Introduction This short tutorial extends on Adafruit's excellent tutorial on using Serial Cable(also known as Serial Console) to remote control the Raspberry Pi (RPI). Adafruit's tutorial demonstrates how to connect the correct USB-Serial cable to the correct GPIO pins. However, the tutorial ended with no..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1162.  BrickPi Bookreader: Digitize Books With Mindstorms and Raspberry Pi A few months ago, we made a Book reader powered by the Raspberry Pi which had the ability to read pages from your Kindle. There was a huge response to the project. But what everyone really wanted was a bookreader that could read a real paper..... Listed under: Other Projects
1163.  Automatic USB HDD power control for a Raspberry Pi based NAS The Raspberry Pi board is widely used to build home-servers by the Do It Yourself (DIY) community, so it seemed a good choice to be the base for my home Network Attached Server (NAS). This NAS should have two main types of storage: Solid State..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1164.  FerretPi: Using Raspberry Pi as a Secure FTP Server I know what you're thinking: "How cool would it be if I had my own Google Drive/SkyDrive/Dropbox that I can use whenever I like?" Or maybe you are just getting into the Maker movement and you think it's the greatest thing since canned bread. You've probably..... Listed under: Internet - Ethernet - LAN Projects
1165.  RaspiBoy, Raspberry Pi Gameboy, SuperPiBoy: A RaspberryPi inside a Gameboy Do you have a Gameboy case? Do you have a Raspberry Pi? Now let's build a RaspiBoy. It's a RaspberryPi inside Gameboy running multiple emulators. It makes you feel back the old days and the best gadgets for Retrogaming. My RaspiBoy features: 3.5" TFT display..... Listed under: Game - Entertainment Projects
1166.  TweeToy by Raspberry pi using Python I created a Toy which Talks somebody's tweets using Raspberry Pi. This Toy catches object by distance sensor and makes sound (Tweet). The architecture is very simple. For getting Tweets, just using twitter api for python. And playing sound with "AquesTalk Pi" (free)

which..... Listed under: Game - Entertainment Projects

1167.

How to build a People Counter with Raspberry Pi and Ubidots In this simple project we'll use a motion sensor to detect if an object passing in front of our Raspberry Pi. Then we'll count how many times that happens, and send this value to Ubidots. People counts typically expensive devices used in the..... Listed under: Calculator Projects

1168.

Raspberry Pi controlled Red Car Trolley Now the train around your Christmas tree or your favorite remote controlled toy can be controllable from the web or any mobile device. Why would you do that if you already have a remote? You do this just because you used a Red..... Listed under: Car Projects

1169.

Programming the ATtiny85 from Raspberry Pi These instructions tell you how to setup and program the ATtiny85 microcontroller Raspberry Pi via the SPI interface. Lots of people use the Arduino to do this (then you can use the Arduino IDE and simplified C commands), or you can use a..... Listed under: Raspberry Programmer Projects

1170.

DIY iPhone controller for Raspberry-Pi (OSC) To start off this project I would like to explain how all this will work. We will be using of communication called OSC (Open Sound Control) and an app called "TouchOSC" which is available on the Google Play and Apple store, along..... 1171.

1. PiFace LED Chasing Lights Raspberry Pi This instructable will allow you to use your PiFace to control 8 LEDs in a chasing flashing pattern. This will help you to grips with basic use of python to control the PiFace as well a basic electronics, I'm writing this up in full..... Listed under: LED Projects

1172.

Raspberry Pi Photocell log and alert system This is a simple instructable for making a RasPi-based photosensor-triggered alert and logging system which can easily be extended to show possible entries into a room like a closet or equipment locker that's usually closed to monitor light levels for any other reason. In..... Listed under: Sensor - Transducer - Detector Projects

1173.

Power to your Living room via Raspberry Pi The Idea is to create a controlled living room/entertainment station using the raspberry pi as a media center, torrent down-loader,file storage and to operate electrical switches. Please use caution and diligence as components live AC and hence is dangerous. Step 1: Items you will need..... Listed under: Home Automation Projects

1174.

Environmental Monitoring with BeagleBone or RaspberryPi and Arduino This is a project I've been working on for a while, and still has a ways to go, but I have enough success right now that I can share what I've got. This covers connecting a Beaglebone and an Arduino to a TTL serial and I2C..... Listed under: Metering - Instrument Projects

1175.

Web Enabled Garage Door (Raspberry Pi) Goal to create a web based garage door opener that should retrofit to most standard openers. Tested with circa 1990s Chamberlain 1/2 hp opener. Once completed your garage door could be opened from your cellphone or computer. Raspberry Pi - Raspbian (Rev B used for..... Listed under: Internet - Ethernet - LAN Projects

1176.

Raspberry Pi and Wiimote controlled Robot Arm I received a robot arm as a birthday present, but after about the first day the controller that came with it became a bit dull to use. Later I bought the usb controller that was made for the robot, but once again the canned software..... Listed under: Robotics - Automation Projects

1177.

Raspberry Pi Arcade Game Emulator in an Atari Lynx This project is the summation of various similar tasks to use a Raspberry Pi as a portable games emulator. It's heavily indebted to the excellent and fun Adafruit PiGrrl project and DDG's great work to add sound to the project here. Whilst I was happy with..... Listed under: Game - Entertainment Projects

1178.  Raspberry Pi – Revision 2 DIY Add-On Board On the Raspberry Pi, there are several connections which can be used for expansion: Rpi GPIO (General Purpose Input/Output) pins are exposed, that means that expansion boards are able to talk directly to the CPU. DSI connector will allow low-level interfacing..... Listed under: Development Board - Kits Projects, How To - DIY - Projects

1179. How to make your own portable Raspberry pi This tutorial show you how to make your own portable raspberry pi, with a screen, a to USB, Ethernet and HDMI ports open to access on the side of the case. This is by no means a good tutorial, it is simply a way of... Listed under: How To - DIY - Projects

1180. Raspberry Pi Media Server – MiniDLNA Hey. In this instructable I will be showing you how to make a raspberry pi media server using MiniDLNA. This will allow you to stream your photos, videos and music around your network. This is my first instructable so sorry it is very good..... Listed under: Raspberry Programmer Projects

1. Raspberry Pi (security) Slow Scan Television Camera For project updates, visit: AgriVision - Raspberry Pi SSTV Camera. The goal of the project is to use the Raspberry Pi with the PiCam as a wireless camera which can transmit images over long distances, usually tent kilometers. Images will be transmitted by amateur..... Listed under: Video - Camera - Imaging Projects

2. Controlling a Raspberry Pi RC Car With a Keyboard In this intermediate tutorial you will learn how to operate a hacked RC car with keyboard using a model B Raspberry Pi device using Python. The key points in this tutorial include: • Configuring the virtual Pulse Width Modulation (PWM) for the GPIO pins..... Listed under: Car Projects

3. Raspberry Pi Smartphone Controlled Rc Car Use your raspberry pi to control a 1/10 scale RC car via a web page hosted wirelessly on the Pi. All you need to do is set up your PI to use your mobile as a hotspot then log onto the appropriate web page (hosted on the Pi)..... Listed under: Car Projects

1184. Raspberry Pi water alarm system Instructions for employing a Raspberry PI as a water alarm system Version 1.0, published in Jan 2014. The Raspberry Pi reads the status of one or two water sensor device(s) on one or two of its GPIO pins. When water is detected the Raspberry Pi..... Listed under: Clock - Timer Projects

1185. Python and Raspberry Pi Temperature Sensor It's been quite a long time, when I'd first posted this RPi sample. Time passed, I'd got some feedback from the community, took into account the comments, and this sample is ready to be published at Instructables for public interested in microcontrollers and the..... Listed under: Sensor - Transducer - Detector Projects, Temperature Measurement Projects

1186. Vintage DAC for RaspberryPi audio Idea... I was curious about some old school R2R DACs namely the BurrBrown PCM56P. They were used in the late 80's in some of the better CD players like SonyES222/DenonDCD1500/MarantzXY whatsoever. There is some discussion on certain forums about their more or less superior sound..... Listed under: Sound - Audio Projects

1187. LOG Raspberry Pi with car monitor So this Lazy Old Geek (LOG) decided to buy a Raspberry Pi. Now the Pi itself is really small (see picture) but the first problem I found was that with all the cables connected, it's not very stable. The cables, especially my HDMI cable..... Listed under: Car Projects

1188. Arc Software Consultancy using the Raspberry Pi I know it has been ages since I posted here so I thought I would put something up for Halloween. I have a brilliant and simple project here. It's easy to understand and, more importantly, it actually does work. I accidentally scared myself with it..... Listed under: Development Board - Kits Projects

1189.

Making Your Apartment Buzzer Party Friendly With Raspberry Pi and Twilio Amy Ciavolino's friends were stuck outside of her apartment waiting to be let in to the party. They repeatedly pressed Amy's apartment buzzer with no luck. The buzzer was too quiet, and Amy's party was too loud. Throughout the night, the cycle repeated: Amy's friends..... "ArdiPi" Wireless Arduino and R-Pi Rover "ArdiPi" The Wireless Arduino and Raspberry Pi Rover By: Greg So basically let me tell you this project works. You simply have an Arduino (Uno or Leonardo) which you use to connect to two motors and control them. Then have a RaspberryPi which..... Listed under: Radio Projects

1215.

Raspberry Pi Alamode CNC Controller This is my first attempt at an instructable. I hope it helps someone else. Switches and Lights fans, oh my... I bought a CNC machine some time ago and I was never happy with it. It used a traditional parallel port controller and..... Listed under: CNC Machines Projects

1216.

Uber Home Automation w/ Arduino & Pi [EDIT] I created a forum to collaborate on gateway code. <http://homeautomation.proboards.com/board/2/openha...> A few years ago, I became a dog owner for the first time. I didn't like leaving Cody in the kennel alone all day. I had a webcam on him, but I couldn't watch..... Listed under: Home Automation Projects

1217.

My Portable Pi-Cam Well, when I say "portable" I wouldn't want to lug it around London on a site-seeing trip. Maybe transportable better description. At least I can move it around the garden and film the wildlife. This post provides more technical detail on this system..... Listed under: Video - Camera - Imaging Projects

1218.

Raspberry Pi Shutdown Button As everyone at some point will recognise the Raspberry Pi doesn't include any kind of shutdown button. So the only way to power it off is by unplugging it from the power supply. To make sure you get no corruption of your data files..... Listed under: Other Projects

1219.

Raspberry Pi Universal Remote In this tutorial I hope to convince you that this is the ultimate universal remote built using a Raspberry Pi. It simplifies many of the more difficult tasks that we need to accomplish. Step 1: Parts 1 x..... Listed under: Sensor - Transducer Projects

1220.

Interface to Wireless Driveway Sensor I have a driveway that is over 300 feet long and it is nice to have some advance notice that someone is driving or walking in. Previously, I have used a very expensive IR beam-break detector. It gave a lot of false alarms and eventually..... Listed under: Sensor - Transducer - Detector Projects, Wireless projects

1221.

Making an autonomous boat using a Raspberry Pi (WiP) The wave of enthusiasm for the Raspberry Pi has driven many people to wonder at the possibilities, and marvel at its simplicity. The credit card sized SBC is perfect for just about anything. Maybe even for crossing the Atlantic Ocean. FishPi is a project with the goal of..... Listed under: Game - Entertainment Projects

1222.

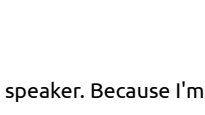

Pulse Oximeter Data Capture with Raspberry Pi My daughter has some health issues that requires her to be hooked up to a pulse oximeter at night that monitors her oxygen level and heart rate. We have night nurses so we can sleep, but sometimes we wake up at night and want to..... Listed under: Video - Camera - Imaging Projects

1223.

RaspberryPi Pulse Width Modulation Demonstration This instructable is a demonstration of the settings used to control the hardware Pulse Width Modulation (PWM) on a RaspberryPi. If you are just fading an LED the default settings are good enough, but if you are trying to control a servo, a stepping motor,..... Listed under: PWM Projects

1224.

RaspBAIRy - the RaspberryPi-based Airplay speaker With the delivery of my second RaspberryPi I finally got the chance to start the planned project: I wanted to replace my old bathroom radio with a more contemporary device by building a network-enabled speaker. Because I'm a user of several iDevices, the idea of making..... Listed under: Sound - Audio Projects

1225. Robot for the Office Tele-Presence (sort of) robot for the office. Work from home and yet attend the boring meetings. Scare vendors into telling the truth about their products. Chase tiny children when they come to the office for the Halloween or Christmas party. 1: Gather Tools and..... Listed under: Robotics - Automation Projects

1226. iPhone remote controlled lamp This project uses the iPhone and a raspberry pi to remote control the lamp. Both the iPhone and the raspberry pi are connected to the wifi router. The lamp on/off commands are sent from iPhone and received by the raspberry pi embedded system. Then the..... Listed under: Phone Projects

1227. Raspberry pi – simple 2x2x2 led cube I built this pretty simple 2x2x2 led cube for my raspberry pi, and wanted to share what I learned. It is my first time using transistors so the circuit is probably not perfect, but it works as I intended it to. Here is what you..... Listed under: LED Projects

1228. Raspberry Pi Web Server — Nginx – PHP – MySQL This tutorial will describe how to install and set up a light web server on Raspberry Pi that supports PHP and MySQL. Apache is the most widely used server, but Raspberry has limited resources so it is better to opt for a system that uses..... Listed under: Raspberry Programmer Projects

1229. LiPo to MicroUSB adapter In anticipation of my Raspberry Pi arriving I have created a LiPo (Lithium Polymer) to Micro USB adapter. The adapter converts the power from a 2s – 4s LiPo to a regular 5v. This is then outputted through a Micro USB to be plugged into a.... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1230. The RR.O.P. – RaspRobot OpenCV Project FIRST: I used a translator to help me, because I'm not fluent in English, I apologize for the English. My intention really is to collaborate. SECOND: My thanks to you I got an award in the "MICROCONTROLLER CONTEST SPONSORED BY..... Listed under: Robotics - Automation Projects

1231. PICAXE Raspberry Pi ADC In this instructable I will show you how to use a cheap PICAXE micro-controller as a multiple channel analog to digital converter. We will be using I2C to access the PICAXE, which will be writing the ADC values into the memory registers. The Raspberry Pi..... Listed under: Development Board - Kits Projects

1232. RaspiRover Hello! I have done a little wifi robot with a Raspberry Pi and other components. Let me present it! Ps: be indulgent, it's my first instructable! Step 1: Things You'll Need You will need: - a Raspberry Pi (35 Eur) - raspberry cam (17,50 Eur)..... Listed under: Game - Entertainment Projects

1233. Portable raspberry pi (the easy way) Today I will be showing you another project you can do with a raspberry pi. I've seen some people doing this project in a really complex way and I was basically just wasting money on screens and additional components, I decided to come up with..... Listed under: LCD Projects

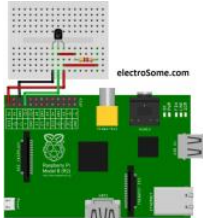

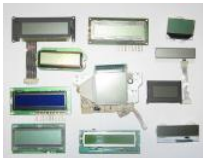

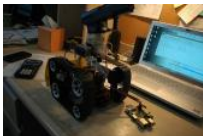

1234. External device control (i.e. coffee machine) Note: Try any or all of these at your own risk. I will not be responsible for any issues. Consult a professional to help if you are unsure. The concept is that we take a controlling voltage from the computer or a micro-controller, and drive..... Listed under: Home Automation Projects

1235. NASBOX314 : make a NAS with xbox360's case and raspberry pi ***update 04.dec.2014*** by syrus77 ****The howto file for system's configuration is not downloadable at below of this page*** *****please comment here if you think I have made a mistake*** Hello from France, I want to share with you my project pi based. I use..... Listed under: Game - Entertainment Projects

1236.  Raspberry Pi powered time lapse dolly (RasPiLapse) Here's my instructable for a home build timelapse dolly. The pro rigs for this are pretty pricey, so I made my own 😊 Please vote if you like this project! Step 1: Software The heart of this machine is a Raspberry Pi cost..... Listed under: Video - Camera - Imaging Projects
1237.  MAMEFrame – The battery-powered MAME system I love MAME . What I don't love is moving MAME cabinets. This project outlines the steps involved with building a MAME cabinet in a controller box, allowing it to be moved or stored. In this project we will build a MAME controller that is..... Listed under: Game - Entertainment Projects
1238.  GPRS/GSM Quadband Module for Arduino and Raspberry Pi Tutorial (SIM900) Introduction Step 1: The shield (hardware) Step 2: Using the GSM/GPRS module with AT commands Step 3: Powering the board Step 4: Using the shield in standalone mode - Calls Originating and receiving voice calls Command summary Step 5: Using the shield in standalone mode -..... Listed under: GPS Based Projects
1239.  Record Infrared Codes of Any Remote Control Unit for Usage with Linux Infrared Remote Control (LIRC) on Raspberry Pi Introducing remote controls that are orphaned when the device they control stopped working are reusable on your Raspberry Pi. After completing this instructable, you may be interested in trying out the following instructables: Reuse Unwanted Remote Control to Shutdown a Reboot Raspberry Pi Reuse..... 1253.

WiFi based home automation by Intel Edison and Banana Pi M1 #IntelIoT#2015HackNTU Hi! People, This is the project I done alone during the period of National Taiwan Univ. Hackthon, since August 21, 2015 to August 23, 2015 in Taipei. I tried to make something that is helpful to those Taiwanese whose age is old. So, I..... Listed under: Home Automation Projects

1254.

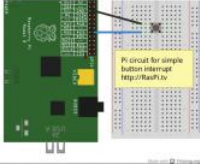

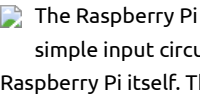

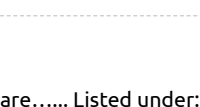

[ARDUINO + RASPBERRY PI] Switching light with NRF24L01+ Hardware: To test the wiring we suggest you to use the ping/pong test you can find in the RF24 libraries (both, of the raspberry and the arduino). Raspberry Pi The connection between the Raspberry Pi and NRF24L01+ module was a little bit tricky, so..... Listed under: Wireless projects

1255.

Bluetit Monitor The box is made from scraps of wood I had in the garage. The hole is 25mm and 10cm from the bottom of the box. Internal dimensions are about 12cm by 10cm. The roof is covered with some old bits of lead flashing and the..... Listed under: LED Projects

1256.  Raspberry Web server sending GET data to Arduino Nano driving 6 servos This is a small project I did for a colleague who is building Fletcher class Destroyer (yup...that makes the "model" about 8 feet long!) He asked if I could animate the 5 x MKIII 5"/38 gun turret complete..... Listed under: Internet - Ethernet - LAN Projects
1257.  Raspberry Pi with Relay I/O Board Relay I/O Board is widely used in applications of smart home project. In this article, I will detail how to control the Relay I/O board using Raspberry Pi with Raspberry Pi Universal Expansion Board via internet. The codes and schematic diagrams used in this article..... Listed under: Home Automation Projects
1258.  How To: Control LED using Raspberry Pi GPIO In this post I will take you through the fairly simple task of getting your Raspberry Pi to control an LED via the GPIO interface, the task is simple however it lays a great foundation of knowledge for any further projects you want to interface with..... Listed under: LED Projects
1259.  Recessed Wall Mount for Raspberry Pi Google Calendar This article takes Piney's "Raspberry Pi Wall Mounted Google Calendar" and shows the steps to mount the screen recessed in the wall. I found that any mount - even a low-profile mount - put the monitor too far out into walking space. Since I wanted..... Listed under: LCD Projects
1260.  How to use interrupts with Python on the Raspberry Pi and RPi.GPIO The latest big news in the world of Raspberry Pi Python GPIO programming is that Ben Croston has released an update for RPi.GPIO. Why is that a big deal? Because this version has interrupts. "What's an interrupt?" I hear you say. It's a way of..... Listed under: How To - DIY - Projects
1261.  Energy Saving in a Convenient Store The basic idea of this project was to turn off a number of lights in a convenient store when the ambient sunlight is sufficient to keep the brightness level above the store's minimum brightness standard. Here's a diagram of the system The main components of this..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1262.  Connect an ESP8266 to your RaspberryPi ESP8266 boards are pretty neat, but if you just bought one (And why wouldn't you for or and have realized that you don't have any obvious means (3.3V TTL USB serial device) to communicate with it, you can talk to it directly with a..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1263.  The Raspberry Pi Powered Speaking Doorbell – Part 1: The Input Circuit The first step of building the Raspberry Pi-powered speaking doorbell is building a simple input circuit. The purpose of the input circuit is to protect the Pi from damage by electrically isolating the doorbell and its power supply from Raspberry Pi itself. The circuit..... Listed under: Home Automation Projects
1264.  Raspberry Pi Spy Tank I got a first prize from PI/E day contest. (yaayyy. Thanks for all the awesome voters!!!) I would like to reward the first 10 people to contact me. I have 10 pieces of 3 month PRO membership codes to giveaway. Write a comment to this..... Listed under: Development Board - Kits Projects
1265.  Electronic circuits for your Raspberry Pi : useful tools If you want to make some simple electronic circuits for your Raspberry Pi, you need some useful (software and hardware) tools. Hardware tools Breadboard The breadboard (aka prototyping board, or plugboard) allows you to prototype your electronic circuits without the need to solder components..... Listed under: Development Board - Kits Projects
1266.  Automatic Reset Switch For Pi In this instructable I describe a method for automatically resetting a Banana Pi when it freezes, or loses power and does not restart. This method will also work for the Raspberry Pi as long as the correct GPIO pins are used (which I believe are..... Listed under: Development Board - Kits Projects

PiMiDi: A Raspberry Pi Midi Box, or How I Learned to Stop Worrying and Love MIDI This is my second instructable on using the Raspberry Pi for digital audio, check out my first instructable for how to set up and control custom audio effects on a Raspberry Pi. If you like please vote for me!! If you like messing with..... Listed under: Sound - Audio Projects

1316.

Durio BASIC + Raspberry Pi B+ (Assembled) This is a Durio Sound BASIC and Raspberry Pi B+ (Assembled). Includes: • Durio Sound board x1 • Raspberry Pi B+ x1 • M3 Nylon Screws 5mm x8 • M3 Nylon Standoffs 18mm x4 • 0.1" Jumper x2 • Fully assembled, to use!..... Listed under: Sound - Audio Projects

1317.

Raspberry Pi Network Time Server ~ GpsNtp-Pi GpsNtp-Pi is a network time server that uses the Network Time Protocol, a GNSS receiver and the Raspberry Pi (RPI) computer platform. It will operate in standalone mode without any other time servers or in pooled mode with other time servers. GpsNtp-Pi can operate with..... Listed under: GPS Based Projects

1318.

Raspberry Pi Java Tutorial In this tutorial I will show you how to flash a LED light with Raspberry Pi and Java. This will be a complete by step tutorial starting with connecting the cables, through GPIO explanation and finally writing the java code. At the end of this tutorial..... Listed under: LED Projects

1319.

Raspberry Pi Cheap DIY ATX-Power Switch. Ok, so it doesn't look like much.... But why would you need one? Well you don't, it is because your pi is powered by a supply that also powers other things. A 3D Printer in my case. Also included is a separate shutdown button. Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1320.

Warming to the Pi and Python I've had a Raspberry Pi since Christmas, but haven't done much with it up till now. That's all changed since I moved house. Getting to grips with a new central heating system, I find that (for reasons too dull to list here) I need to..... Listed under: Other Projects

1321.

Pololu Dual MC33926 Motor Driver for Raspberry Pi (Partial Kit) This add-on board enables a Raspberry Pi B+, A+, or Pi 2 to drive a brushed DC motors. Its dual MC33926 motor drivers operate from 5 V to 28 V and can deliver a continuous 3 A (5 A peak) per motor. The default pin mappings make..... Listed under: Development Board - Kits Projects

1322.

How To Design a Printed Circuit Board with DesignSpark PCB A couple of months ago I got curious about PCB manufacturing, and ended up using Joe Walnes' open-source PiCrust PCB design to test the process. I sent the 'Gerber' files off to a little cheap board house in China, and a few weeks later my boards..... Listed under: How To - DIY - Projects

1323.

Remote Control Autonomous Lawn Mower using RaspberryPi Have you heard of #twitchPlaysPokemon? Well that was some of the inspiration behind this project #googleMowsMyLawn. This project was an idea that my brothers and I had and wanted to do for a long while. When StartFest had a hackathon, we were provided with the..... Listed under: Robotics - Automation Projects

1324.

BMP180 I2C Digital Barometric Pressure Sensor The BMP180 device is a digital barometric pressure sensor. This is available on a small module which provides access to the sensor via the I2C interface. This allows us to easily connect it to the Raspberry Pi with a minimum of wiring. My module is..... Listed under: Sensor - Transducer - Detector Projects

1325.

Driving a 7-segment display with a Raspberry Pi (I) This post will be the first of a series of posts that will describe how to drive a 7-segment display from a Raspberry Pi, without any OS running in it. Today, I will talk about some important characteristics about 7-segment displays, how to wire things..... Listed under: LED Projects

1326.

Make Your Own Nokia 5110 Raspberry Pi Add-on Board Who remembers the Nokia 5110? If you're too young to have had one, it was a great phone - a big game changer some might say. The battery lasted a decade, it was tough as nails and one of the first mobiles to..... Listed under: Phone Projects

Raspberry Pi Breadboard Shield Arduino has multiple shields and multiple expansion boards, the shields make prototyping with the Arduino a lot easier. A lot of people design custom shields to match their requirements. But in a Raspberry Pi has a very few number of shields, and a Raspberry Pi..... Listed under: Development Board - Kits Projects

1327.

Wireless Multi-Channel Voice-Controlled Electrical Outlets with Raspberry Pi This project is a combination of several different resources: My single-outlet control project with Raspberry Pi and Python, originally inspired by user wilq44's Raspberry Pi GPIO home automation WiringPi, software written by Gordon Henderson that allows "Arduino style" control of the GPIO pins from the..... Listed under: Radio Projects

1329.

RaspberryPi Multiple Buttons On One Digital Pin If you ever find yourself running out of GPIO pins on a RaspberryPi you can put many pushbutton switches on a single pin using this method. It sets a variable by timing the charging of a capacitor through a series of resistors with the switches..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1330.

Python based spy robot controlled over Ethernet using Raspberry pi Aim of the project: In this project we have developed a platform to remotely control surveillance robot controlled over Ethernet. It will enable us to monitor the activities in the remote and sensitive areas such as naxalite areas and etc. In traditional security systems, monitoring..... Listed under: Robotics - Automation Projects

1331.

Push Button Sample In this sample, we connect a push button to your Raspberry Pi 2/MinnowBoard Max and use it to control an LED. We use GPIO interrupts to detect when the button is pressed and toggle the LED in response. This is a headed sample, so please..... Listed under: LED Projects

1332.

Turn a Raspberry Pi into a CCTV Security System A few weeks ago I received the new version of the Nwazet Camera Box Bundle, redesigned to fit the B+ Raspberry Pi. It reminded me that I had promised my dad that I would fit a Pi camera system into his porch so he could..... Listed under: Security - Safety Projects

1333.

Streaming Sensor Data from a ppDAQ Pi Plate Using InitialState The Pi-PlatesppDAQ Data Acquisition and Control board is an interface between sensors and a Raspberry Pi. With eight analog and eight digital inputs, up to sixteen channels of real world data can be captured by a single ppDAQ Pi-Plate. But, what can you do..... Listed under: Sensor - Transducer - Detector Projects

1334.

Building a Raspberry Pi Gameboy Why Do This? Quite a while ago I was impressed by the Adafruit guys and their "PiGrrl", a cool looking Raspberry Pi based Gameboy clone and more: <https://learn.adafruit.com/pigrrl-raspberry-pi-gameboy> I've always wanted a cool little emulation machine (like Gamepark's GP2X Wiz or the OpenPandora). But they..... Listed under: Game - Entertainment Projects

1335.

Control outdoor lights that come on automatically when it gets darks What you'll need 1.2 k resistor 2.2 k resistor Light dependent resistor 1 μ F capacitor Breadboard and wires You've probably all seen those cheap, solar-powered lamps that you can stick into your garden to try and give it a classy bit of illumination during the night. If..... Listed under: LED Projects

1336.

Build a Speed Camera and Traffic Logger with a Raspberry Pi I've always been interested in connecting things up to computers that were never designed for. I could reminisce about my first drawing capture arm that used captured the two joint angles with potentiometers and used them to control the pulse width oscillators that fed..... 1337.

433MHz Smart Home Controller with Sensorflair and a RaspberryPi In this instructable we show how to use a 433 Mhz transmitter control your home's RF devices through Sensorflair using a RaspberryPi. Components Required : 433Mhz transmitter module Rasp (any model) Jumper Wires any RF controlled device active account on sensorflair.com Step 1: Setup..... Listed under: Sensor - Transducer - Detector Projects

1338.

Interfacing a 16x2 LCD with Raspberry Pi Hitachi HD44780 based 16x2 character LCD are very cheap and widely available, and is a essential part for any projects that displays information. Using the I2C bus on Raspberry Pi ,PCF8574 IC, and Python characters/status can be displayed on the LCD. The PCF8574 is a general..... Listed under: LCD Projects

1339.

Turn your Raspberry Pi into a portable Wi-Fi streaming radio There are thousands of free radio stations on the internet, and with this project you can listen to all of them from one tiny little box. So let's build our streaming radio using a Raspberry Pi, a speaker and a few odds and ends... What..... Listed under: Radio Projects, Wireless projects

1340.

Raspberry Pi DIY Pan Tilt Plans This aims to show the reader how to build a simple Pan tilt mount using readily available stepper motors and other parts. The device automatically moves the camera to pre set angles and at pre set intervals. Raspberry Pi is a trademark of the Raspberry..... Listed under: Video - Camera - Imaging Projects

1341.

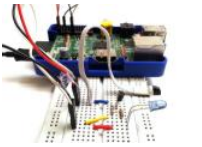

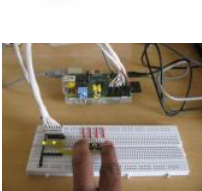

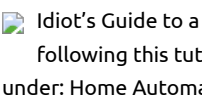

Raspberry Pi Dumb Terminal Back in my day the internet was a dumb terminal connected at 300 baud through an acoustic coupler timeshare system, and we liked it! Ok I'm not actually that old, but how amazing it must have been to be using telephones to connect. Listed under: Internet - Ethernet - LAN Projects

1342.

SmartFaire on Raspberry Pi 2 The SmartFaire is a project that uses the I2C bus on a Raspberry Pi 2, and two I/O port expanders to create an interactive game for the user. The game is called "Speed", where the user has to push all the lit buttons, simultaneously, as..... Listed under: LCD Projects

1343.  Retransmitting Alarm System State Changes with Raspberry Pi and Arduino I spotted a post by Lior Hass on Hackaday a little while where he described his Alarmino project where his alarm system now connects with an Arduino and a custom board to simulate the phone line and interpret Contact-ID protocol. He could then get the system..... Listed under: Clock - Timer Projects
1344.  The Raspberry Pi and Raspbian In this article by William Harrington, author of the book Learning Raspbian, we will learn about the Raspberry Pi, the Raspberry Pi Foundation and Raspbian, the official Linux-based operating system of Raspberry Pi. In this article, cover: (For more resources related to this topic, see..... Listed under: Raspberry Programmer Projects
1345.  Read emulate remotes with Arduino and Raspberry Pi Remotes are everywhere. They are the interface to your TVs, music systems what-not. You probably have a few spare ones lying around, devastated at the demise of their better halves. Cheer them up and put them back into use! (Skynet approves...) Here are some..... Listed under: Wireless projects
1346.  Raspberry Pi Infrared Game Camera I've just started exploring the Raspberry Pi and was intrigued with the Pi infrared camera module live in a somewhat remote area and have seen signs of various wild critters exploring around the house at night. I had an idea of creating a night..... Listed under: Game - Entertainment Projects
1347.  How to Enable SPI on your Raspberry Pi What is SPI? SPI stands for Serial Peripheral Interface (SPI). It is made up of 4 wires normally it was a standard designed by Motorola for use with their microcontrollers. SPI is easy to use and fast. The bus is fully duplex, meaning devices can transmit and receive..... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects
8.  Single User Multi Tasking on Raspberry Pi The Raspberry pi is a mini computer which is designed in a single board with all the essential components required for running an operating system. The Raspberry pi board runs on ARM11 processor but is available at an extremely cheap price. The board is provided with..... Listed under: Internet - Ethernet - LAN Projects, LED Projects
9.  SainSmart 7 inch 800*480 TFT LCD Touchscreen Display for Raspberry Pi B+/ Pi 2 For Sale SainSmart 7 inch 800*480 TFT LCD Touchscreen Display for Raspberry Pi B+/ Pi 2: \$39 Trade_Spotting is a well-known online brand specialized on development board and professional test equipments. As a professional and reliable seller, we source from SainSmart's manufactory directly before testing and packing. Listed under: LCD Projects
1350.  Driving a Unipolar Stepper Motor with a ppDAQC Pi Plate Stepper motors are versatile devices that allow precise and repeatable motion control. They are used in disk drives, translation tables, and 3D printers to name just a few applications. They typically come with two different wiring arrangements. The most common arrangement is four wires that..... Listed under: Motor Projects
1351.  Instant Photo Printer Instant Photo Printer is an instant camera. But it's not a normal instant camera. It takes a picture when you see or laugh loudly. Materials: Raspberry pi Power adapter Pi Camera Color printer Sound sensor Step 1: Step 1: Setting up the Raspberry Pi The very first..... Listed under: Video - Camera - Imaging Projects
1352.  Development Process: Technical Deliverables and Progress Report For the third and final part in this series, I'll focus on discussing the progress the LASS project made up until December 2013, which was the mark of the 75% point of our project. In particular, some of the milestones we achieved were defining the..... Listed under: Other Projects
1353.  How to Add Sound to Raspberry Pi Game Pad The Raspberry pi is a single board computer that is designed with an aim of providing a platform in the computer education to students at school. This is a nice platform to try different programming techniques and learn software tools also. The board is provided with..... Listed under: Game - Entertainment Projects
1354.  Idiot's Guide to a Raspberry Pi Garage Door Opener It has become apparent that WebIOPi is not yet compatible with the Raspberry Pi v2. If you are following this tutorial, you must be using the first-generation Pi. The link below for the B+ model is still valid, and this model will still work for..... Listed under: Home Automation Projects
1355.  Another (larger) Raspberry Pi Interface Board Here is another somewhat larger interface shown connected to a switch unit and a 1 output board. As the Pi connector does not have 20 GPIO pins, three of the pins are shared and can be connected to be either input or output via..... Listed under: Development Board - Kits Projects

1356.

Playing Snake Game using Raspberry Pi Game Pad This article discusses about how to develop simple game pad hardware and interface with the Raspberry Pi board and also about the technique of interfacing a game code written in HTML5 with the game pad. Here a game written in HTML5 and JavaScript is..... Listed under: Game - Entertainment Projects
1357.

USB PowerControl for Raspberry Pi and Arduino Within United States: SwitchDoc Labs Store – Powered by Amazon (Now with Amazon Prime!) Outside of United States: Tindie.com The USB PowerControl board is a USB to USB solid state relay. It is a digitally controlled power switch for your Arduino or Raspberry Pi. It is..... 1413. Introducing LightingPi Features: Control strings of LED pixels with a raspberry Pi Control strings of analog RGB LED strings (up to channels per PWM board) Control Incandessent lighting via SSR boards (work in progress) Control servo position Control of all fixt provided over all major lighting..... Listed under: LED Projects

1414. Fast Development of ISP Algorithms with MIPI IP and FPGA Platform From smart TVs with gesture control to the high-resolution c integrated into today's smartphones to applications boasting multiple cameras, image processing has become a key component in consumer electronics products. To support the need for more pixels and fast-changing requirements, designers are finding that... Listed under: Video - Camera - Imaging Projects

1415.  Internet Of Things with Raspberry Pi – 1 When I was new to IOT (Internet Of Things), I saw that there were hardly any tutorials which were simple enough for a beginner to understand and try out. There was either too much technical jargon, or the hardware was too complex. So now that..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1416.  Orange Pi Development Boards Are Raspberry Pi Clones Raspberry Pi - Wikipedia, the free encyclopedia - Orange pi debian sd image by Igor pečovnik, Orange pi is a raspberry pi / banana pi clone. it identifies as banana pi so almost everything what works for banana pi also works for orange. i made one special..... 1417.  Getting Audio Out Working on the Raspberry Pi I want to deliver sound from my Raspberry Pi's (RPi) Audio Output 3.5mm jack. I'll need to get audio drivers working on Audio Out, and to test it, I'll need some sound files and players. I'm choosing the Advanced Linux Sound Architecture (ALSA) drivers because it's widely supported..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1418.  Raspberry Pi Camera Module Mechanical Dimensions Having played around with the Pi camera I quickly realised I needed to make some sort of stand for it. The module weighs almost nothing and is tiny so it can be quite hard to keep in one place when you are experimenting. The Raspberry..... Listed under: Video - Camera - Imaging Projects
1419.  Arduino / Raspberry Pi Internet Radio This is a project for Arduino and Raspberry Pi to make an Internet Radio, aimed at an intermediate skill level. Some familiarity with Linux usage will be beneficial (or access to someone who can help out if required). Raspberry Pi runs a music player daemon to..... Listed under: Blog, Interfacing(USB - RS232 - I2c -ISP) Projects
1420.  ADC Circuit: Raspberry Pi Analog Input Circuit on Breadboard This project shows how to construct a simple MCP3002 Analog-to-Digital Converter (ADC) circuit with a test potentiometer input. It shows how to wire the SPI pins for successful data communication between the ADC and the Raspberry Pi. Breadboard Build A breadboard, or "solderless breadboard", is..... Listed under: Development Board - Kits Projects
1421.  Ultrasonic Distance Measurement Using Python – Part 1 LEDs, buzzers and switches are the most common items people attempt to interface to their Raspberry Pi's. Something I found in eBay that is a little bit different is an ultrasonic measurement module. This allows you to measure the distance to the nearest wall or..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1422.  Camera Platform Electronics As I said in the previous part, I'm not an electrical engineer. I haven't touched any real electronics since school. However, the internet is a wonderful place, and thanks to a number of other sources I was able to figure out how to get the Raspberry Pi camera module working. Listed under: Video - Camera - Imaging Projects
1423.  How to connect Raspberry Pi over Serial Port? Helloooo^^ ! Today I'm gonna show how to connect your rpi with Serial, so you can access its terminal You need: - Breadboard - Cables - Connectors, so you can attach them to pins - five 0.1 uF capacitors (I used the ceramic ones)..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1424.  MouseAir Block Diagram – Raspberry Pi Here is the hardware block diagram for MouseAir. MouseAir is a cat toy (fake mice) launching system. It has the ability to read the cat's RFID tag, motion detection as well as ultrasonic detection all controlled remotely from your iPad/iPhone running RasPiConnect. MouseAir system is..... Listed under: Wireless projects
1425.  Recording Sound on the Raspberry Pi The Raspberry Pi does not have a microphone socket, which is inconvenient when you wish to record sound. To fix this you will need a USB Sound Card, for which I bought a Creative Sound Blaster Play! for about £20 and a short USB extension..... Listed under: Sound - Audio Projects
1426.  Lazarus on Raspberry Pi The Raspberry Pi is a credit-card-sized single-board computer. It has been developed in the UK by the Raspberry Pi Foundation with the intention of stimulating the teaching of basic computer science in schools. Raspberry Pis are also used for multiple other purposes that are as diverse as..... Listed under: Development Board - Kits Projects
1427.  Making Fun | PiLarm: How to Build a Raspberry Pi Room Alarm I'm always on the lookout for those teachable moments. Inspiration came when my 5-year-old asked for help in keeping his little brother from sneaking into his room. I spotted the perfect time to teach about inputs, outputs, and programming. Learning is easier when..... Listed under: Home Automation Projects

1428. Raspberry Pi Video Streaming This instructable will show how to stream a Raspicam to a web using a Raspberry Pi and the UV4L driver. Step 1: Material - Raspberry Pi or Odroid-W Running Raspbian - Raspicam - Router - Ethernet Cable Step 2: Enable Raspicam Before starting to configure..... 2.  Powering a Raspberry Pi from 12 V DC I'm new to electronic engineering and am trying to learn electronic engineering by creating little projects. I have a few questions about powering my Raspberry Pi (5 V DC @1000 mA) from a 12 V DC 1000 mA power supply. The 12 V power supply will provide power to the..... Listed under: Other Projects

3.  Host your Smartphone App on your Raspberry Pi! Background: I'm currently working on a Sencha Touch project making an Entrepreneur application, which will be released in a couple of months... Stay tuned! I only want to say that it is a bit more complex than the example... but you have to start with something, right?!..... Listed under: Phone Projects

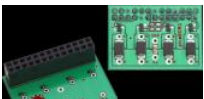

4.  Twitter to Teletype The Museum of Computing in Swindon has a working Teletype and a desire to get it to print out tweets as part of a display in the museum. Since the Swindon Hackspace is based in the museum it was a perfect project for hackspace members..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

1435.  Laser Cut Raspberry Pi LCD Case I wanted a decent size portable display for my Raspberry Pi's that I could easily pack up and take to work, friend's houses, gatherings, and TechShop. I bought an inexpensive 10.1" LCD display from eBay and using a laser cutter, 1/8" plywood, 1/16" clear..... Listed under: Other Projects

1436.  PicoBorg – Control small motors from your Raspberry Pi With PicoBorg, you can turn on and off fans, motors, solenoids, relays etc. from your Raspberry Pi. There are 4 low side drivers so you can turn on and off 4 devices One is connected to the RPi PWM pin, so you can control duty..... Listed under: Motor Projects

1437. Host your website on Raspberry pi Raspberry pi is a low cost development board by the raspberry foundation, for this tutorial I am using the distro provided by adafruit that can be found at <http://learn.adafruit.com/adafruit-raspberry-pi-educational-linux-distro/occidentalis-v0-dot-2> all you have to do is download the image and use WIN32 disk to burn the image on to the..... Listed under: Internet - Ethernet - LAN Projects

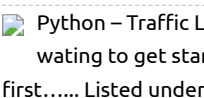

1438.  Raspberry Pi WiFi Internet Radio Player For my first project after getting the Raspberry Pi (\$35 Linux computer) I wanted to extend on a very good blog post I read from MightyOhm about turning a cheap WiFi router into an internet radio: <http://mightyohm.com/blog/2008/10/building-a-wifi-radio-part-1-introduction/> In that article he also had a cheap..... Listed under: Internet Projects

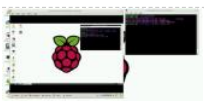

1439.  3D Printed Raspberry Pi Security Camera Update: If you like my instructable please vote for me in the Raspberry Pi and Epilog challenge. I will also update the 5th step to include how I set up Motion on the first boot. Thank you for your clicks and thank you Instructable. the..... Listed under: Security - Safety Projects

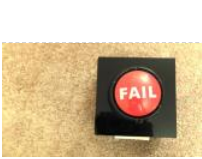

1440.  Python – Traffic Light Introduction Hopefully now you have received your LED electronics kit and have followed our basic LED tutorials. Now you are waiting to get started and create some more complex programming using both inputs and outputs. The following tutorial will get you programming with Python first..... Listed under: LED Projects

1441.  Raspberry Pi Screenshots Learn how to capture and view screenshots on your Raspberry Pi for project documentation. Use Scrot or ShotWell to do this solely through the command line. Scrot is a command line screen capturing application that's easy to download and use, and Shotwell is a light-weight..... Listed under: Interfacing(USB - RS232 - I2C - ISP) Projects

1442.  A Better Mobile Display for the Raspberry Pi As I described in an earlier post, I run my Raspberry Pi (RPi) as a headless system, using Cygwin/X's xterm for command line interaction with the RPi, with my PC being my X server to support any X Window applications. move files between the PC and the RPi..... Listed under: Phone Projects
1443.  How to use the ADXL345 on Raspberry pi I have found that there is not much out there to actually find out how to use the ADXL345 on the web, but first, what is an ADXL345, well it is a 3-axis accelerometer with high resolution (13-bit) measurement at up to ± 16 g. Digital..... Listed under: Development Board - Kits Projects
1444.  Simple Raspberry Pi Game Pad for Ball Catching Game There are eight general purpose IO pins on the 13*2 pin connectors of the Raspberrypi board and among them four pins has been selected as input and then remaining four pins as output. The input pins are connected to push button and are pulled down..... Listed under: Game - Entertainment Projects
1445.  Raspberry Pi Ball tracking (Note: This is an advanced tutorial, it is not intended for a linux beginner.) In this tutorial, I will demonstrate how to track table tennis balls using OpenCV on Raspberry Pi. It can be used to track any circular object as long as it can..... Listed under: Sensor - Transducer - Detector Projects
1446.  6. The Ladder Game- Hardware emulated in Python and C Prerequisites: Basic Raspberry setup step by step Refreshing the Software of the Raspberry Pi Hardware: Breadboard and Jumper cables or soldering equipment 12 LEDs of any color and fitting resistors 1 Pushbutton The ladder game is a good project for getting warm with the Raspberry..... Listed under: Game - Entertainment Projects
1447.  7. RPi: Use GPIO pins and a program to determine TTL gates Lab Outline Download WiringPi libraries Understand the pin layout for the board Understand why you must use a voltage converter in this lab, and how to use it Create a program to determine the type of TTL gate being tested DUE BY NEXT LAB Wiring..... 1456.

Playstation 2 controller with Raspberry Pi This tutorial will show how to use the Playstation 2 Controller (PS2) with the Raspberry use the Arduberry to adapt the shield to the Raspberry Pi. Step 1: Hardware Required Raspberry Pi Arduberry Dexter Industries Playstation 2 Controller Shield for Arduino A Playstation..... Listed under: Game - Entertainment Projects

1457.

Raspberry Pi – SMS Garage Door Butler Most Raspberry Pi garage door remotes had open ports, or other features I wasn't too fon I created my own that contains much more security, logging of who opens the garage, video capture, garage status and more. Fea 100% secure garage door operation,..... Listed under: Phone Projects

1458.

Pumpkin PACS/Pumpkin Pi The Pumpkin PACS was constructed for the MGH Radiology Pumpkin Decorating Contest. It is a standa DICOM workstation capable of displaying many standard types of radiology images. The pumpkin contains a Raspberry Pi which pi images onto a screen using a Microvision SHOWWX+ HDMI pico projector..... Listed under: Game - Entertainment Projects

1459.

Overclocking a Raspberry Pi In this instructables I will show you how to overclock a Raspberry Pi. You don't need a heat sink or a fa because the temperautre won't go over the 50-60 C (120-140 F). Please vote for me in the Raspberry Pi contest. Good luck with.... Listed under: Clock - Timer Projects

1460.

Piano Stairs with Arduino and Raspberry Pi Who doesn't love music? These Piano Stairs are an interactive, relatively portable, musi installation that can be applied to basically any stairwell. I built them for HackPrinceton along with my friends Erica Portnoy and V Castaneda, and we won 2nd place in the hardware track..... Listed under: Game - Entertainment Projects, Sound - Audio Projects

1461.

Simple timelapse camera using Raspberry Pi and a coffee tin Whilst developing BerryCam I thought it would be pretty cool to crea timelapse camera that could be left outdoors over a period of time, to capture a sequence of images that could be later joined to into a video clip. From the outset thoughts..... Listed under: Video - Camera - Imaging Projects

1462. Raspberry Pi Multi-Room Audio (Mobile/Tablet/PC Controlled) I have been lurking on Instructables for a few years but have never posted one myself. No have bought a home of my own it's time to undergo some projects and share them with the community. In my first project I'm goir show..... Listed under: Sound - Audio Projects

1463.

Raspberry Pi as low-cost HD surveillance camera This instructable describes how to build a surveillance cam based on a Raspberry micro-computer which records HD video when something moves in the monitored area. Live picture can be viewed from any web browser, even from your mobile while you're on the road. What..... Listed under: Video - Camera - Imaging Projects

1464.

Wireless Christmas Light Timer with Raspberry Pi and Python Update 1/14/2014: Thanks to everyone who voted for this project in Hardware Hacking Contest! Looking forward to my new maker pen. Update 12/31/2013: looking for a more advanced version of th project? Check out my new multi-channel voice-controlled version. We all know you could..... Listed under: LED Projects

1465.

Raspberry Pi Temperature & Humidity Network Monitor OK, Instructables is really having some strange issues, Once again the Intr disappeared, now the history is gone, and I've had to recreate the Intro from a PDF download. I had some issues with Kingston SD but the SanDisk cards I'm using now have..... Listed under: Temperature Measurement Projects

1466. Raspberry Pi Rain Box I find the sound of rain really soothing, and wanted a device to just play rain sounds for me. I figured the Raspberry Pi would be perfect for this. So I wrote a Python script that selects a random number, and, based on the number,..... Listed under: Entertainment Projects, Robotics - Automation Projects

1467. The Airhorn Celebration Project This project combines the Raspberry Pi, Arduberry and a huge set of Air Horns to alert us whenever we have a new backer on Kickstarter. We recently launched the Arduberry on Kickstarter which brings a seamless experience to Raspberry Pi by providing a very simple..... Listed under: Game - Entertainment Projects

1468. Raspberry Pi Autobot Transformer (Non-Transformable) Wish that the Autobot Blaster Transformer could play music when you were a kid? Well now you can with this Instructable!ABSOLUTELY NO PROGRAMMING SKILLS NECESSARY :)This Instructable shows you how to create a Classic Boombox with a Raspberry Pi. The model that is being used..... Listed under: Robotics - Automation Projects

1469. Lego + Sugru Panel Mount Connectors (with RetroPie case as example) The motivation for this project came when I combined my Raspberry Pi voice-controlled electrical outlets with a RetroPie. Due to the number of peripherals and cables involved (a powered USB hub, microphone, two USB controllers, breadboard, wireless remote, plus the normal HDMI and power cables..... Listed under: Game - Entertainment Project Interfacing(USB - RS232 - I2c -ISP) Projects

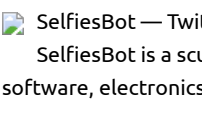

1470. Mounting a USB Thumb Drive with the Raspberry Pi This is another one of my "meat-and-potatoes" Raspberry Pi Instructables. This Instructable will show you how to do it is to configure your Raspberry Pi to recognize and automatically mount a USB thumb drive. This is especially useful for exchanging files, running backups and using..... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1471. Noodle: a crowdsourced robot Noodle is a small device with the I/O of a machine but the thoughts and feelings of a human. You can program it to monitor your physical space and react to changes in the environment with words, images, sounds and decisions. For example, you could.....
