List of Projects using Raspberry Pi with advance view:

1. Raspberry Pi Based Weather Station
   Nice looking weather forecast for Raspberry Pi Zero and Ili9341 based 2.8 inch TFT. I want to you in this project how to build a nice looking weather station based on Raspberry Pi Zero W for wall mount with weather forecast coloured 2.8...... Listed under: Other Projects

2. Getting Started with the RAK831 LoRa Gateway and RPi3
   This project takes you through all the steps required to get your RAK831 Gateway module up and running with WiFi as the backhaul. Introduction This step-by-step guide is aimed at developers who want develop their very own lora gateway using the awesome RAK831...... Listed under: Development Board - Kits Projects

3. Custom Wake Word for Google Assistant on Raspberry Pi
   ****UPDATE**** I have updated the custom wakeword project and heri latest version https://www.hackster.io/shiva-siddharth/multiple-custom-wakewords-activation-of-google-assistant-d0c986 this is : better improved of this project.**** Normally, you cannot voice activate Google Assistant SDK on Pi Zero W. By the method shown only can you voice activate Pi...... Listed under: Internet - Ethernet - LAN Projects

4. Computer Vision as Motion Sensor for SmartThings
   Using a Raspberry Pi 3 and a PiCam this computer vision powered sensor detects faces and sends presence data over LAN - UPNP to SmartThings. I will start by assuming that you have a Raspberry Pi 3 with a world camera and Open CV installed...... Listed under: Sensor - Transducer - Detector Projects

5. MATRIX Voice and MATRIX Creator Running Alexa (C++ Version)
   This guide shows you how to set up Amazon Alexa on a Raspberry Pi using the MATRIX or MATRIX Creator as a microphone. https://youtu.be/LqNAVxtbdSw Required Hardware Before getting started, let's review what you'll need. Raspberry 3 (Recommended) or Pi 2 Model B (Supported). MATRIX Voice or MATRIX Creator - Raspberry Pi...... Listed under: Sound - Audio Projects

6. Smart Disinfection and Sanitation Tunnel
   The smart tunnel prevents further outspread of COVID-19 / SARS-CoV-2. It can disinfect person fully in a time span of just 15 seconds. Introduction The Smart Disinfection and Sanitation Tunnel is a demonstration of how been designed to provide maximum protection to...... Listed under: Other Projects

7. Pushing Data to Google Docs
   Make your hardware push data to a Google spreadsheet. In this article I will explain how your hardware can push data into a Google spreadsheet. Push Versus Poll In the poll mechanism, as described in my previous article, the Google spreadsheet runs a script that sends a request to...... Listed under: Internet - Ethernet - LAN Projects

8. Motion sensor, alarm, video recording in HA on Raspberry Pi
   Connecting the motion sensor, alarm and video recording in Home Assistant on Raspberry pi. I like to tell you about my little experience of working with Home Assistant (hereinafter – HA) on Raspberry pi. Further I'll speak abt connecting the video registration functionality, the motion...... Listed under: Sensor - Transducer - Detector Projects

9. Pigeon Detection System
   Find pigeons and defend your birdhouse against these birds which never stop eating. Abstract The main was to develop a system, which detects pigeons and runs on a Raspberry Pi. It should be able to trigger an output to scare away th pigeons. Why...... Listed under: Home Automation Projects

10. YouTube Music Streaming for Google Assistant
    GassistPi – Google Assistant for all Raspberry Pi Boards Pi Zero - fi and modified from warchildmd’s repo (https://github.com/warchildmd/google-assistant-hotword-raspi) Features: Headless auto s boot with multiple custom wakeword activation triggers.Voice control of GPIOs without IFTTT, api.ai, Actions SDK.Voice control of connected to RPi...... Listed under: Sound - Audio Projects

11. Raspberry Pi Internet Radio and MP3 Player with Bluetooth Project
    Replaced by: https://www.hackster.io/Granpino/raspiplayer-internet-radio-and-mp3-folder-player-rev2-4-3ddf This internet radio and MP3 player uses a 3.5 HDMI LCD touchscreen for operation. The original project was published by Adafruit. https://learn.adafruit.com/raspberry-pi-radio-player-with-touchscreen/overview The pr uses MPC, MPD and Pygame. The project has been evolving over time. I am still trying to incorporate automatic album...... Listed under Radio Projects
12. **DAKboard – A WIFI Connected Wall Display**
   DAKboard is a WIFI connected wall display for your photos, calendar, news, todo and we have a spare monitor lying around or a new Raspberry Pi but don't know what to do with it? Perfect! Follow our instructions below to create a beautiful wall display. Listed under: WIFI / WLan Projects

13. **Indoor Air Quality Monitor**
   Use a USB air-quality sensor dongle to quickly mount an indoor air monitoring system and prevent health and further impact on health. VOCs Volatile organic compounds (VOCs) are emitted as gases from certain solids or liquids. VOCs is a variety of chemicals, some of which. Listed under: Metering - Instrument Projects

14. **Temp. And Humidity Sensor With A CR2032 For Over 1 Year!**
   Long-range wireless sensor based on Whisper Node capable of running over a year on a single CR2032, transmitting data every 60 seconds. Intro This article will discuss and demonstrate how to build a temperature and humidity sensor based on a Whisper Node and a DHT11. Listed under: Sensor - Transducer - Detector Project

15. **Run Raspberry Pi on Smart Phone**
   Run Raspberry Pi on your phone with full display. Step 1: Getting Raspberry Pi IP Address: To be with the project, one will need to know the IP address of Raspberry Pi. In order to do so connect your Raspberry Pi with the LCD at the project. Listed under: Phone Projects

16. **Radio-Astronomy with RTL-SDR, RPi and Amazon AWS IoT**
   Radio emissions from sky sources like Sun and Jupiter can be received and converted to digital domain for processing. UPDATE 3 - May 7, 2018 Please note that starting from version 9 the software makes usage of latest Skyeld version (1.3). You can install Skyeld using pip install. Listed under: Radio Projects

17. **Stereo Vision and LiDAR Powered Donkey Car**
   Donkey Car featuring the Ultra96 board, a Raspberry Pi, FPGA accelerated stereo vision MIPI CSI-2 image acquisition, a LiDAR sensor and AI. In this project, I will document the build of a Donkey Car enhanced with an advanced vision system using FPGA accelerated stereo vision and LiDAR. The project consists of the following. Listed under: Car Projects

18. **Counting Objects In Movement Using Raspberry Pi & OpenCV**
   What do you think in using Raspberry Pi & OpenCV to count moving objects that go in and out of a certain zone? Introduction Computer vision, doubtless, is a fantastic thing! Using this, a computer gets the capability to "see" and sensing better the environment. Listed under: Video - Camera - Imaging Projects

19. **World’s Smartest Home feat. Blockchain Chores & Kids Crypto Jarvis Farley**
   Farley is a home automation system I created to manage our chores and allowance using blockchain. It also does 99 other things. The World’s Smartest Home featuring Jarvis Farley People talk about "Smart Homes" -- but I have created what I believe is the. Listed under: Home Automation Projects

20. **Host your own free .onion website using Raspbian on RPi3**
   Set up a working webserver on your Raspberry Pi 3, and permanently connect it to Onion, hosting your very own free .onion website. A working version of the project can be found at: https://t0r.ch:100 (surfacing web) or https://darktorch5lgddvm.onion .onion domains There is more information about surface web and...... Listed under: Development Board - Kits Projects

21. **Power Outage Sensor**
   Track the 230 VAC power line with your favorite HW using a small, efficient, and inexpensive circuit. In my doorbell tutorial I gave the advice about how to get a digital signal from a 12 Vac source so it could be read with any desired HW...... Listed under: Sensor - Transducer - Detector Projects

22. **SUBZero – A Simple Network-Attached Storage Device**
   An easy to use Raspberry Pi Zero USB file-level computer data storage server (frequently called Network-Attached Storage or NAS). INTRODUCTION Quite often I find myself on the go, in need of storing/shared files locally with others without an accessible internet connection. Even with an internet...... Listed under: Wireless projects

23. **Recycle Sorting Robot With Google Coral**
   Did you know that the average contamination rate in communities and businesses range 25%? That means one out of every four pieces of recycling you throw away doesn't get recycled. This is caused due to human error at recycling centers. Traditionally, workers will...... Listed under: Robotics - Automation Projects

24. **Underwater Drone: The Story of the Madness**
   This article describes the design process, development and assembling operation of the underwater drone prototype powered by Raspberry Pi. I've watched a lot of programs about inventors on Discovery channel and once I decided to do something interesting myself, so that it could be...... Listed under: Development Board - Kits Projects
25. Wedding Photo Booth with Raspberry Pi
For a wedding or other event, you need a photo booth! You will find here how to do this awesome project which make all guests happy. Hi everybody, I got married last year. When we were looking for preparation of the we went to…… Listed under: Video - Camera - Imaging Projects

26. FPGA Remote Programmer
Introduction
One of the biggest advantages of FPGAs is that we can change it (reprogram it) many times. Most cases, we do it using either an onboard programmer (many development boards have them) or an external one. The most popular programmer is Platform Cable USB…… Listed under: Raspberry Programmer Projects

27. RaspiPlayer – Internet Radio and MP3 Folder Player Rev2.4
Internet radio with MP3 player over Bluetooth. This revision includes internet connection indicator and Folder Player. Story RaspiPlayer Rev 2.4 Raspberry Pi internet radio player with MP3 over Bluetooth. The revision includes internet connection indicator, and Folder Player feature. Installation Download the full raspbian Stretch or Buster image…… Listed under: Radio Projects

28. Mapping Household Temperature Flow with Cheap Sensors
Story
What I Want to Do
Select the most inexpensive, scalable and easy-to-use configured components availableProgram and deploy as many temperature sensors as possible and connect to a web gatewayUse data for more efficient automations via smart thermostat device, window controller, presence detection, smart…… Listed under: Temperature Measurement Projects

29. Using STONE TFT LCD Control WS2812B_RGB lamp
This project is to achieve RGB lamp control: Change the color of the lightChannel the four modes of the lamp STONE TFT-LCD The STONE STVC070WT-01 is a 7-inch display module with a resolution of 800*480. This display module can be purchased…… Listed under: LCD Projects

30. MATRIX Voice Running Alexa Demo [DEPRECATED]
Set up Amazon's Alexa on a Raspberry Pi with a MATRIX Voice. Use the MATRIX array together with a third-party wake word engine. This guide provides step-by-step instructions for setting up AVS on a Raspberry Pi with a MATRIX Voice. It demonstrates how to access and test…… Listed under: Sound - Audio Projects

31. Raspberry Pi Facial Recognition
So you want to control entry to your secret lair, huh? This project will allow you to use facial recognition using a Pi and AWS. Raspberry Pi Facial Recognition using AWS Rekognition and Pi-Timolo Description Pi-detector is used with Pi-Timolo to search motion generated images for face…… Listed under: Video - Camera - Imaging Projects

32. Farmaid: Plant Disease Detection Robot
Robot that drives around autonomously in greenhouse environment and identifies diseases. Inspired by the work of plantvillage.psu.edu and iita.org, we wanted to use the DonkeyCar platform to build a autonomous robot that can move in a farm environment without damaging existing plants or soil…… Listed under: Robotic Automation Projects

33. Pi OS for Zynqberry: Adafruit RFM69 Radio with CircuitPython
Adapting Adafruit's CircuitPython to use the RFM69HCW Radio for series FPGAs. One of my most commonly used Raspberry Pi shields I discovered a few years ago is the 433 MHz RadioFruit RFM69HCW Transceiver Radio Bonnet from Adafruit. The RFM69HCW is a transceiver…… Listed under: Radio Projects

34. Ultimate YouTube Live Streaming Camera!
Make a dedicated YouTube live streaming camera using a Raspberry Pi! Idea As a YouTuber always looking for ways to streamline different tasks. Live streaming is definitely something that has the opportunity to be a LOT simpler. It would be nice if you just had a…… Listed under: Video - Camera - Imaging Projects

35. The hydroMazing Smart Garden System
The hydroMazing system manages your growing environment by making localized data-driven decisions so that you don't have to worry. Listed under: Home Automation Projects

36. Face Recognition
This project is used on the IoT and places of security that are important for identifying people. This project was the final deliverable for our Embedded System course. Introduction In this project we are using OpenCV in Raspberry Pi. Get the in from the…… Listed under: Video - Camera - Imaging Projects

37. Smartphone Connected Home Door Lock
An internet-connected, servo-driven deadbolt actuator that can be operated remotely using a smartphone. About this project, we show you how to make a smartphone-controlled, internet-connected deadbolt actuator powered by a Raspberry Pi that can be added on
38. Distributed Emergency Communication System A rapidly deployable distributed Wi-Fi IEEE 802.11s mesh communication network cellular modem Internet access for emergency disasters. Features Internet access via a USB cellular modem Wi-Fi IEEE 802.11s mesh distributed communications 3D printed water-proof enclosure Open source software, open hardware Compact Long range open high directional antenna. Listed under: Phone Projects

39. TensorFlow Object Detection with Home-Assistant Get started with TensorFlow object detection in your home automation project Home-Assistant. Introduction WARNING: there are currently issues with the TensorFlow integration in Home Assistant, which arise from complexity of supporting TensorFlow on multiple platforms. I do not recommend attempting to follow this guide. Listed under: Automation Projects

40. DIY HomeKit-Enabled Devices This shows how to make smart home devices, which can be controlled/monitored via Siri or Home Assistant. Let’s make the smart home devices and control/monitor it via Apple Siri or Apple Home App. After reading this tutorial, you are able to make Siri and Home Assistant. Listed under: Home Automation Projects

41. Kindbot: Home Garden Automation Hub Kindbot packs an app, sensors, voice-control, and state-of-the-art computer vision to eliminate guesswork & maximize yields. Watch Kindbot Grow! kindbot.io and Twitter: @Kindbot_io Instagram: @kindbot Plant Diagnosis Service: buddy.kindbot.io Download Buddy for Android! (coming soon to iOS): Go to Google Play Store The Dawn of Kindbot At the end of 2018, we began developing a plant. Listed under: Home Automation Projects

42. IoT Security: Tips to Protect your Device from Bad Hackers Making stuffs is cool, making secured stuffs is better! We discuss how to secure your Raspberry Pis using Firewall, IDS, and SSL/TLS Motivation When I hacked my door to open it with OpenSesame, I suppose that nobody will try to hack my hacked door to take it. Listed under: Security - Safety Projects

43. Sharing WiFi with Raspberry Pi using a LAN Cable This hack will allow you to directly share WiFi from a PC to a Raspberry Pi connected through a LAN Cable without any modification on the Pi in order to login into the Shell of the Raspberry Pi connected directly to the PC via a… Listed under: WiFi / WLAN Projects

44. Solar Powered, Remote Controlled, Smart Garden Fresh, organic food is important! Grow your own in unused space and take care remotely. Plants and smarts are powered by the sun! However you feel about GMOs, organics, etc. it is a pretty universal desire for fresh food that doesn’t… Listed under: Solar energy Projects

45. Raspberry Pi Car Stereo Internet connected car stereo with obd 2 and remote start. Please mind the mess! I am still working on this when I went looking for information on building a Raspberry Pi based stereo for my truck I came across this blog by Christian Brauweiler. He has… Listed under: Car Projects

46. Get Started w/ESP32 on the MATRIX Voice Required Hardware Before you get started, let’s review what you’ll need. Raspberry Pi 3 (Recommended) or Pi 2 Model B (Supported) - Buy on Element14 - Pi 3 or Pi 2.MATRIX Voice ESP32 Version (Wi-Fi, Bluetooth, Microcontroller) - The Raspberry Pi does not have a built-in microphone, the MATRIX Voice has an… Listed under: Sound - Audio Projects

47. Wifi Controlled Robot Using Raspberry Pi This tutorial will show you to develop a Python based wireless robot which can be controlled from anywhere around the world using WiFi. https://youtu.be/F_nfnpSZS_c About the project This is demo of a wifi controlled Raspberry Pi robot which can be controlled over network using simple… Listed under: Robotics - Automation Projects

48. Multiple Custom Wakewords Activation of Google Assistant SDK on Pi using multiple custom wakewords Works on Pi 3 and Pi Zero W. https://youtu.be/WhMULwtyfhw https://youtu.be/O37lwG-mOis This has been implemented using Snowboy for the hotword service. For some "Mysterious" reason, the assistant.start_conversation of the SDK does not seem to work listed under: Sound - Audio Projects

49. Octopod: Smart IoT Home/Industry Automation Project Octopod, a uniquely shaped full automation system that allows you to monitor your industry and keep security with AI and smart RFID locks. There are many IoT automation projects out there, but trust me there is nothing like this! Octopod is made using NodeMCU (MAX32620FTHR or Arduino)… Listed under: Home Automation Projects
50. Real Harry Potter Wand with Computer Vision This project shows how you can bring the Wizarding of Harry Potter to reality with computer vision and machine learning! "Any Sufficiently Advanced Technology is Indistinguishable from Magic" - Arthur C. Clarke A few months back my brother visited Japan and had a wizarding experience in... Listed under: Video - Camera - Imaging Projects

51. 1986 PING Video Doorbell The PING Video Doorbell is powered by a Raspberry Pi and uses Google Duo to video call you on your phone when a visitor presses the button. 1986 Raspberry Pi Video Doorbell The PING Video Doorbell is powered by a Raspberry Pi and is stylishly... Listed under: Sound - Audio Projects

53. MATRIX Voice and MATRIX Creator Running Snips.ai Learn how to install the Snips.ai offline voice assistant, through the SAM CLI tool, the MATRIX Creator and MATRIX Voice. THIS GUIDE HAS BEEN DEPRECATED The Snips Console has been closed and cannot be used anymore. If you're looking for an alternative voice assistant, you can... Listed under: Sound - Audio Projects

54. DIY Environment and Air Quality Monitor Set up a Raspberry Pi to graph and monitor air quality with InfluxDB and Grafana. Have you been interested in monitoring the air quality in your home or outside where you live and work? This project, which we've dubbed balenaSense, will get you up and running... Listed under: Temperature Measurement Projects

55. Energy Meter Logger Log your Energy Meter data using a Raspberry Pi and plot graphs of your energy consumption. Background I want to save energy it helps to know your consumption. To do this you can use Energy Meters to track the consumption of all connected devices in your... Listed under: Metering - Instrument Projects

56. A Voice-Activated Weather Station with LEGO and Low-Code Use LEGO bricks and Hackeet Low-Code platform to build a voice-activated weather station that respects your privacy. The Project In this project, we are going to show you how to build a funny and personal weather station that reacts to voice and respects your privacy... Listed under: Sound - Audio Projects

57. Making a DashCam Using the Raspberry Pi Zero (pt.1) This is the start of a new series where we learn how to build a dashcam using Raspberry Pi Zero. This is the start of a new series where we learn how to build a dashcam using the Raspberry Pi Zero. This project... Listed under: Video - Camera - Imaging Projects

58. SensorTag to Blynk Using Node-RED How to merge different IoT devices and services? Node-RED provides an elegant solution. No code is required to merge different IoT devices and services. The SensorTag acquires weather data and sends them to Raspberry Pi through BLE (Bluetooth Low Energy). The Node-RED flow runs on the Raspberry Pi... Listed under: Sensor - Transducer Detector Projects

59. Build a Pwnagotchi WiFi penetration tester with Pi Zero and a PaPiRus display Pwnagotchi is an AI-based "AI" powered by bettercap that learns from its surrounding WiFi environment in order to maximize the crackable WPA key material it captures (either through passive sniffing or performing deauthentication and association attacks). This material is collected on disk as PCAP files containing any form of crackable... Listed under: WiFi / Wi-Fi Projects

60. Home Automation with Raspberry Pi 3 Home automation using Raspberry Pi 3B and OpenHAB. [Optional] We will be using Google Assistant to control the relays. I wanted to completely automate my room. I had an old RPi-3 lying around. So I made it use and created... Listed under: Home Automation Projects

61. QR Code on Raspberry Pi Scanning QR code on Raspberry pi using ZBar. We can use our Webcam to scan QR Codes with the help of such as zbar tools. To use zbar tools, all you need to do is install it by typing: sudo apt-get zbar-tools Now verify how... Listed under: Security - Safety Projects

62. Security System w/ Motion Sensor, Camera, Wia, Raspberry Pi Build your own security system, using the Wia Python SDK, a Motion module, a camera module, and a Raspberry Pi. Project Requirements Raspberry Pi 2 or 3 Model B Motion sensorPiCameraA Wia aci You can create one for free here: https://www.wia.io/signup3 female to female jumper cables... Listed under: Security - Safety Projects
63. GameMamePiBoy cramming a RPi A+ and a retro-pie installation into a classic gameboy case. With the acquisition of a PiZero today, the project will now focus around using that. It’s more or less the same spec as the A+ but half the size and with double the RAM. Under: Game - Entertainment Projects

64. Safe Shutdown, Control Pi GPIOs Using Google Assistant SDK. Safe shutdown Raspberry Pi and control Raspberry Pi GPIO by voice. Google Assistant SDK without API.AI, IFTTT and Google Actions. The GPIO control and safe shutdown by voice are the key distinguishing features between the AIY Projects and the Google Assistant SDK. Now, with... Listed under: Sound - Audio Projects

65. Raspberry Pi Autonomous RC Car. My first attempt at building an autonomous RC car with a Raspberry Pi 3. My wife and I were shopping at our local Big Lots store right after Christmas when I came across some marked down RC cars. I have always wanted to try and... Listed under: Car Projects

66. Line tracking with Raspberry Pi 3 Python2 and Open CV. The idea is to create a program in Python 2 using OpenCV 2 to find the center of a line for a Linefollower vehicle. I want use the line detection to guide a vehicle to maintain the vehicle always at the center of the line... Listed under: Wireless projects

67. Rhasspy Voice Assistant on MATRIX Voice and MATRIX Creator. Learn how to install the Rhasspy offline voice assistant, through a simple Docker image! https://youtu.be/o6Tt-5D_uC4. Required Hardware: Before getting started, let's review what you'll need. Raspberry 3 or 4. MATRIX Voice or MATRIX Creator - Raspberry Pi does not have a built-in microphone, the MATRIX Voice & MATRIX Creator each have an 8 mic array... Listed under: Sound - Audio Projects

68. Raspberry Pi Bartop Arcade Cabinet. A home-built bartop arcade cabinet powered by a Raspberry 2B running RetroPie. Story and... Listed under: Game - Entertainment Projects

69. From Data to Graph: A Web Journey With Flask and SQLite. Capturing real data (RPi/DHT22), saving them in a database (SQLite), creating graphs (Matplotlib) and presenting them on a web page (Flask). Introduction: From Data to Graph. On my previous tutorial, Python WebServer With Flask and Raspberry Pi, we learned... Listed under: Development Board - Kits Projects

70. Direction of Arrival for MATRIX Voice/Creator Using ODAS. This guide shows you how to use the MATRIX Creator or MATRIX Voice with ODAS, a library for direction of arrival, tracking, and much more. What is ODAS? ODAS stands for Open embedded Audition System. This is a library dedicated to perform source localization... Listed under: Sound - Audio Projects

71. Herb(ert): A Desk Plant with Automated Irrigation. I have a history of over/under watering plants. Herb(ert) combines sensor data with edge IoT logic to automate watering and stay healthy! Inspiration: In our connected world there is no excuse for letting houseplants go to waste... Listed under: Home Automation Projects

72. Open CV Robot. Robot that drives using computer vision and speech commands. You are about to embark on a journey, and we are excited to be part of it! Get ready to make and program your robot using Windows 10 IoT Core! And wait there is more! You... Listed under: Robotics - Automation Projects

73. 8x8 LED Matrix display on RPi 2 with Windows 10 IoT Core. Example how-to connect Adafruit Mini 8x8 LED Matrix to Raspberry Pi \ Windows 10 IoT Core. Adafruit Mini 8x8 LED Matrix is simple graphical display with I2C interface. To prepare image for display is not straightforward. Every row is represented by one byte but columns are... Listed under: LED Projects

74. How to Measure Air Quality on OpenSensors. How to measuring the air quality of the Open Data Institute using an Arduino and a SPS PPD-42. Introduction: So, whilst thinking of a good demonstration for the Opensensors platform, we thought why not see how pollutants behave in our workplace is by hooking up a sensor... Listed under: Sensor - Transducer - Detector Projects

75. Autonomous Drone / UAV Project. For Plane. Showing my progress in building the dashboard and flight control systems, follow-up channel and github repo to keep track: Building Ground Station for my Autonomous Rc plane. More than 20 modes and will feature experimental AI flight with RPi and carry loads of environmental... Listed under: Video - Camera - Imaging Projects

76. DRS Enabled Smart Pantry. A pantry which can automatically replenish kitchen items. Most of the times, when I want to cook something I find some cook ingredient (onion, garlic, chili etc.) is running low. In some cases I buy wrong item such as garlic instead of onion. When I... Listed under: Security - Safety Projects
77. Raspberry Pi Security Camera System with Notification
An easy way to know if someone is at the door and take picture of that person using Cayenne to send me notifications every time someone is at the door and to take a picture at the same time. It will save time.
Listed under: Security - Safety Projects

78. Secret Coke Bottle SPY CAM!
Take a Raspberry Pi Zero and a webcam cram it into a Coke bottle while making it continue to appear as a normal Coke bottle! https://youtu.be/4WJaSStEmr8
Inspiration For this project, the inspiration started when I came across a mini IP camera online. The obvious……
Listed under: Video - Camera - Imaging Projects

79. Monitoring Your Broadband Connection with Raspberry Pi
Constant outages of your broadband can drive you to frustration, but you can use the Raspberry Pi, and a little bit cloud to monitor it. If there’s one thing that’s the same about everyone’s broadband connection it’s that it’s slow. Usually slower than it was advertised……
Listed under: GPS Based Projects

80. Raspberry Pi/WeatherRack – NodeJS Weather Data Station
Raspberry Pi, and a WeatherRack, with a WeatherPiArduino, using Node.js, serve weather station current data. Introduction This project is a simple weather station that serves textual sensor data over http: a WeatherRack for data on windspeed, direction, gusting, and rain. An AM2315……
Listed under: Temperature Measurement Projects

81. Doorbell & Intercom with Snips Voice Assistant
Doorbell that integrate a Snips voice assistant to say welcome and record message for visitor when you are not at home. The Idea Building a Doorbell including a voice assistant to reply to visitor. The doorbell is able to talk with visitor (using TTS)……
Listed under: Sound - Audio Projects

82. Win10 IOT Irrigation Controller with Moisture Sensors
Using Win10 IOT, RPi2, and XBee, measure lawn soil moisture, and automatically run irrigation as necessary. Background Large portions of the US have suffered from low water or drought conditions within the last 10 years. There are a large number of things a homeowner can……
Listed under: Sensor - Transducer - Detector Projects

83. Weather Station with ePaper and Raspberry Pi
In this article, I explain how I created a tabletop weather station with ePaper display. Raspberry Pi, and an enclosure. In this article, I explain how to build a weather station with an ePaper display (like the kind you find on a Kindle, except……
Listed under: Home Automation Projects

84. DIY Raspberry Pi Indoor Outdoor Webcam
Ever want to monitor your home but don’t want to buy a $100 1080p webcam? Well I did you can too! Ever want to monitor your home but don’t want to buy a $100 1080p webcam, or just wanted to build your own? Well in a few steps you can……
Listed under: Video - Camera - Imaging Projects

85. Creating an IoT Server with Home Assistant and MQTT
This guide will help you set up Home Assistant. Access it from any web browser and automations.
Assistant Home Assistant is one of the most versatile and powerful home automation platforms and it is completely open source. Once set up, it can be accessed……
Listed under: Home Automation Projects

86. Use Powershell to adjust the Adafruit 7” Touchscreen
Learn how-to enable the adafruit 7” touchscreen to be displayed correctly using Powershell on a running Windows 10 IoT Raspberry PI device. Update: Public release of Windows 10 IoT Core This project has been tested with the public release and upon first use of a……
Listed under: LED Projects

87. Home Web Server
Tired of paying for hosting, or being limited by free hosting providers restrictions? I’ve decided to build my own server! Story So basically I got fed up with using a free hosting provider for my person website. I kept getting resource limitation and I thought it was impossible to have a site without being limited……
Listed under: Home Automation Projects

88. Trail Camera
This is a trail camera that will notify you using a cellular network that there has been activity nearby. My project is a Wireless Trail Camera, I could buy a trail camera cheaper then making it, but where’s the fun in that. The……
Listed under: Video - Camera - Imaging Projects
Low-cost Home Automation with Voice Control

An inexpensive open-source home automation solution for low income individuals

Background

Today’s home automation systems are expensive and often require the ability to install or modify existing hardware in your home. These two barriers to entry prohibit low-income individuals from joining the world of home automation.

Raspberry Pi 4 Headless Setting up Raspberry Pi without HDMI cable or Ethernet Cable

Hi coders, I was wandering around to find a way to program Raspberry Pi over USB only. As I am lacking an HDMI cable I searched everywhere and found something useful. And I have done this successfully.

ROS Robot

A simple ROS robot which can navigate with terminal commands.

Introduction

This project is aimed at creating a robot running ROS which allows us to turn any generic robot hardware platform into a smart robot.

Low-Cost ECG Pathology Detection with Deep Neural Networks

We aim to bring proper heart care to developing countries. An early detection of these pathologies is vital for an effective treatment. The problem

According to the World Health Organization, the leading cause of death in the lower-middle-income countries is related to heart disease, even mortality.

Stepper Motor from Windows 10 IoT Core

It shows how to use a stepper motor, an easy way to rotate a camera, sensor and many other things. If we are building a security system or a robot we might need to rotate a camera, a sensor or any other component.

Lithium Ion battery HAT for Raspberry Pi

Run your Pi remotely with a 18650 Lithium Ion battery. What is the Pi18650 HAT? The Pi18650 HAT is an add-on HAT which plugs into the 40-pin connector on the Raspberry Pi. This HAT allows you to operate your Raspberry Pi without a power cable and.

MQTT Communication Between NodeMCU and Raspberry Pi 3 B+ Using MQTT, NodeMCU, DHT22, RaspberryPi and IoT MQTT Panel

monitor temperature and humidity. Using a Raspberry Pi 3 B+ as a broker for several NodeMCU with DHT-22 sensors measuring temperature and humidity and monitor on IoT MQTT Panel App. I made the algorithm for.

HomeEnergy – Pi Turn a Raspberry Pi into a home energy monitor with inexpensive components.

Update 2018-04-21: Published code to the web application. This is functional but not as polished as I’d like it. Update 2018-04-13: The system is installed in my breaker box.

FLAON Smart Home project

Avalon project become FLAON project, much stable, much faster, more precise. The idea

I've always loved the idea of monitoring and controlling things. The smart home concept is already a well known concept, so I've tried to build some in this direction by my own.

Webcam with Pan/Tilt Servos and Battery Backup

Story Calin Crisan's excellent motionEyeOS is a complete Linux distribution that turns the Raspberry Pi Zero into a highly functional wireless webcam. He provides detailed instructions for installation and configuration which are referenced here. These instructions show how to use a gadget I designed called the Solar Pi.

Python/MicroPython Sensor Logger with Google Sheets

A system for recording sensor values to a Google Sheet. Making use of HTTP requests to communicate between the micro-controller and the server, and utilising gspread to write data to online spreadsheet. You need to follow the instructions on the following link to set up.

4,661 NeoPixel WS2812B Ceiling LED with RPi and 10 Fadecandy

Customized ceiling screen, capable of playing videos, color picker, and color temperature. Overview This project consists of a ceiling mount consisting of 4,661 NeoPixel LEDs powered by a multiple 5V power supply.
10. WalaBeer Tank The tank that will follow you and serve you beer. Coolness is over 9000! There are things that deep inside every man wants to have. Combine beer and tanks is one of these things! This project will be about this thing, a voice controlled tank...... Listed under: Motor Projects

12. I Let Everyone on the Internet Control My X-Mas Decoration Ooooops.. I think I made a mistake and accidentally posted the project on “Arduino Create” AND “Hackster.io”. Please visit: this site to read about our crazy idea. Sorry! Have you always wanted anyone in the world to be able to control your X-mas decoration in your..... Listed under: Internet - Ethernet - LAN Projects

13. Autonomous Response using Intelligence 4 Emergency Scenarios Project ARIES - A system of intelligent and connected autonomous vehicles to provide an immediate response and action to emergency scenarios in Uttarkhand, Nepal and most recently in Kerala, have caused a lot of devastation resulting in a tremendous damage to person and property. Due to the accumulated...... Listed under: GPS Based Projects

14. Black Box – OBD-Pi Using Raspberry Pi Our project is a black box - OPD-Pi using Raspberry Pi. In this tutorial, you will learn how to connect your Raspberry Pi to a Bluetooth OBD-II adapter and display real-time engine data to your car’s aftermarket head unit! https://youtu.be/SVHaaNgbu7Q Step 1: Hardware Required: Raspberry...... Listed under: Car Projects

15. Motion Controlled AWS IoT Button You can use it as remote switch, anti theft beacon, counter, movement detector and so on. First, would like to thank Amazon for announcing AWS IoT, a great environment for Internet of Things. After three weeks experiment...... Listed under: Sensor - Transducer - Detector Projects

16. 32x32 Chained LED Matrices with Win IOT Core on RPi3 128x32 pixel LED Matrix with Raspbberry Pi 3 and Windows IOT Core. Storage of our clients in food industry had a special need to display some information in real-time. We had different options to work on this project like using a 7-segments or use..... Listed under: LED Projects

17. The Fireman is never late again !!! Emergency services First On Scene Drone for collecting vital information prior to arrival of response team INTRODUCTION Please take note this is an ongoing build so it is updated daily, Please come back often to view the new information that I regularly add. I...... Listed under: LED Projects

18. Mobile Remote Surveillance Camera This interesting project will cover all things required for the ultimate goal of building a mobile remote surveillance camera. https://youtu.be/6FrEa4C9D-Y This interesting but complicated project will cover things from designing a robot, to advanced configurations in linux (raspberry pi) to building an Android application...... Listed under: Phone Projects

19. Android Controlled Toy Using Raspberry Motor Shield The terrain vehicle which is managed with raspberry pi, arduino and control Story At the end of the project we will manage a terrain vehicle which controlled by android device’s acceleometer sensor The proje contains Motor shield, raspberry pi, arduino and dc...... Listed under: Motor Projects

20. GrovePi Windows IoT: LED Blink This tutorial shows the simplest thing that you can do with the GrovePi: Blink a LED. Introduction I GrovePi with Windows IOT: LED Blink Tutorial This tutorial shows the simplest thing that you can do with the GrovePi: Blink a LED. a great...... Listed under: LED Projects

21. Azure IoT Hub nRF24L01 Windows 10 IoT Core Field Gateway Windows 10 IoT Core on RPI based nRF24L01 field gateway which enables sensor nodes to securely & reliably upload telemetry to AzureIoT Hubs. Overview For school Internet of Things (IoT) projects I needed a robust field gateway for uploadi

125. IR remote with Raspberry Pi Do you want to control your TV, DVR and more using Raspberry Pi? 

**Story**

In this chapter I will explain how we can control a TV or almost everything that uses an infrared remote control using Raspberry Pi. This is part of my Home Automation project. LIRC is... Listed under: RFID - NFC Projects

126. Smart Environmental Monitoring Small, and easy to use devices, to monitor temperature, humidity, noise levels, luminosity and atmospheric pressure accurately. 

**Story**

The goal is to build a small and easy to use device to monitor temperature, humidity, noise levels, luminosity and atmospheric pressure accurately. The idea... Listed under: Home Automation Projects

**Story**

For those who have watched the "Big Bang Theory", you would probably remember that those physicists build an Internet controlled lamp. The signal sent from their laptop traveled... Listed under: Other Projects

128. SmartyPill: The Smart Pill Dispenser for Everyone In short, it is an automatic pill dispenser to aid those who are forgetful when taking their medication. 

**Story**

Due to personal health issues, as well as medical circumstances of the elderly in our lives, we've found ourselves constantly looking for better solutions for... Listed under: Home Automation Projects

129. Automatic Vision Object Tracking A pan/tilt servo device helping a camera to automatically track color objects using vision. 

**Story**

Introduction On my last tutorial, we explored how to control a Pan/Tilt Servo device in order to position a PiCam. Now we will use the device to help the camera to automatically... Listed under: Sensor - Transducer - Detector Projects

130. Smart Waste Bin Device for intelligent waste bin. This device integrates several sensors to supervise the state of the trash. 

**Story**

Context Good waste management has become an essential issue for our planet. In public and natural spaces, many do not pay attention to the waste... Listed under: Other Projects, Sensor - Transducer - Detector Projects

131. Trading Card Scanner/Organizer Create a digital inventory of your trading/collectible cards using Lego and a Raspberry Pi. 

**Story**

I was really into trading cards as a kid. I recently came across a lot of Magic The Gathering cards in a box and thought to myself - I wonder... Listed under: Sensor - Transducer - Detector Projects

132. Decentralized Fleet Tracking with Blockchain Asset tracking is a trend, but this project intends to work in a decentralized way storing each action, event or alert in a blockchain. 

**Story**

Disclaimer: I'm assuming that you are familiar with the technologies involved, such as PCB/schematic design tasks, nodejs development, soldering, and so on... Listed under: Other Projects

133. Remote SSH Access To Raspberry Pi 2 Enable remote SSH access to your Raspberry Pi 2 from anywhere, via the Yaler.net relay server. 

**Story**

Want to deploy a Raspberry Pi "in the field" still be able to access it? Here is an easy way to enable remote SSH access to... Listed under: Other Projects

134. AI Digit Recognition with PiCamera Recognize digits with Raspberry Pi, Pi Camera, OpenCV, and TensorFlow. 

**Story**

In this project, we are going to train a convolutional neural network to transcribe digits. Then we are going to use the data from the learning stage to allow the Pi Camera to... Listed under: Sensor - Transducer - Detector Projects

135. Smart Traffic Light Smart light that turn on at noon when anyone pass in street and turn off at morning also check its state and report if need to be fixed. 

**Story**

When I was on my way on a desert road I found lot of... Listed under: LED Projects, Sensor - Transducer - Detector Projects
Alexa Hue
Get full voice control over your Hue lights: recall and save scenes, set timers and alarms, change colors, and trigger dynamic effects!

Story
Control Hue Lights with Alexa
Well, you already can turn them on and off and dim them with Alexa. But this Alexa...

Listed under: LED Projects

Plot My Face Using Windows 10 IoT Core's new Lightning API, I built a Face Plotter.

Story
This project demonstrates Direct Memory Mapping driver and "Hybrid applications" - those which leverage Arduino libraries and XAML+C# on Windows 10 IoT Core for Raspberry Pi.

This project requires that your...

148. Archimedes: The AI Robot Owl A wearable robotic owl familiar. Archimedes judges your emotions, via Google AIY. Story As feature in Make: Magazine! This is a robotic owl that looks around for cool people, and can tell whether you’re happy or upset. If you’re extra large, he will eventually let you….. Listed under: Robotics - Automation Projects

149. Automated Indoor Gardener Never worry about dead plants again. This automated gardener never forgets to water your plants or provide artificial sunlight. Story Introduction With how busy our lives are, it’s sometimes easy to forget to pay a little attention to thirsty indoor plants until it’s too late….. Listed under: Home Automation Projects

150. Pool Fill Control A system to monitor water level, temp, pH, ORP, filter pressure, electrical usage, and pump operation. Refills pool when necessary. Story Idea Over the summer of 2015 my sons and I rebuilt our entire pool system. It started with a problem with the water….. Listed under: Sensor - Transducer - Detector Projects

151. Holographic Audio Visualizer with Motion Control A 3D holographic audio visualizer with gesture control and real time animations SoundCloud playlists. Story A 3D holographic audio visualizer with gesture control can definitely spice up your party and impress your friends. This display projects an image from a monitor down onto an…. Listed under: Sound - Audio Projects

152. Ultimate Kegerator Use the power of a Windows 10 UWP app to control and monitor a kegerator to keep your beverages cold, fresh, and always on tap. Story Disclaimer: First of all, this project in no way promotes the use or misuse of alcohol, it is completely up to the… Listed under: Other Projects

153. IFTTT Buzzer with IFTTT Do Button and Raspberry Pi How do you build a really easy door buzzer with the Do Button App, on your phone and Raspberry Pi and python and the MQTT Broker Device Story This is one of three problems I had at home and I solved with an internet…… Listed under: Other Projects

154. Smart Wardrobe wardrobe which can suggest you which cloth to wear, notify you which cloth has been ignored. Story Overview People nowadays like to shopping and buy clothes. However most of the clothes will be storing inside wardrobe for long time even up to 5 years. Especially….. Listed under: Home Automation Projects

155. Boost USB Current in Raspberry Pi 2 and B+ Boost USB Current in Raspberry Pi 2 and B+ Story So you’ve got a Raspberry Pi, but the output current isn’t driving what you need it too? One of the newer features on the Raspberry Pi B+ and Raspberry Pi 2 Model B is Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

156. DIY 3-Axis CNC VMC This is 3-axis CNC plotter/engraver based on GRBL software and 2020 aluminum extrusions. Low-cost engraving PCB manufacturing dual side. Story Our prototype model is IoT-based thus providing it a scalable architecture to use it from practically anywhere with an internet connection. This is a 350mm….. Listed under: CNC Machines Projects

157. High Sensitivity Water Sensor on MCP3008 Use the Phantom YoYo High Sensitivity Water Sensor on the MCP3008 8-Channel 10-Bit with SPI interface. Story Background In an upcoming project I am using the MCP3008 to monitor several sensors. In this post I want to cover the details of using the Phantom YoYo High Sensitivity…… Listed under: Sensor - Transducer - Detector Projects

158. Emotion Sensor / EEG This is an emotion sensor. It can detect stress, anger, happiness and fear. Story IMPORTANT!!! IN FEW DAYS I WILL UPLOAD COMPLETELY PROJECT ON MY ANOTHER PROFILE xdeyyan hackster.io/xdeyyan DATE OF UPLOAD : 20.04.2018 CET(European Time, Balkans) Emotion Sensor / EEG THANK YOU FOR ALL THE COMMENTS FROM DOWN BELOW! PROJECT EDITED : 08.04.2018 / 15:56 CET TIME It’s designed to detect a person's emotions and for use as an EEG. This project isn’t finished. I will upload the finished…… Listed under: Sensor - Transducer Detector Projects
Particlatter: Air Quality Monitoring for Everyone
Easy to measure air quality, avoid polluted areas, and improve your health and the health of your community. Story Introduction: Air pollution is a topic that you hear about frequently, however there are a very limited number of consumer products for the measurement of pollutants. Air quality...... Listed under: Metering - Instrument Projects

Connect a 7 segment LED to a Raspberry Pi 2 with Windows 10 7 segment led using raspberry pi and Windows 10 IoT (Csharp code)
Finaly I received my Raspberry Pi 2, just in time to make some tests with Windows 10 IoT (Internet of Things). Microsoft released Windows 10 IoT that can be installed in Raspberry...... Listed under: LED Projects

Raspberry Pi Image Recognition with Alexa Voice
SeeTalker tells you what it sees with the help of a Raspberry Pi computer, Microchip image recognition and Alexa. Story Ask SeeTalker to tell you what it sees! The SeeTalker Alexa skill will snap a photo of what it sees and then call a Microsoft...... Listed under: Video - Camera - Imaging Projects

Hologram Nova Starter Kit
New to Nova? New to Raspberry Pi? New to Python? This tutorial goes along with our kit, walking you through each step. Story This tutorial is part of a kit Hologram offers: https://hologram.io/store/nova-starter-kit-for-raspberry-pi-3 Setup a Raspberry Pi - Headless Note: You can skip to the...... Listed under: Development Board - Kits Projects

Photo Booth Powered by a Raspberry Pi
A photo booth powered by a Raspberry Pi, great for letting people take pictures of them: at parties, weddings, etc. Story and build Inspired by an article in MagPi magazine I decided to build my own DIY Raspberry Pi Photo Booth. Instead of building a...... Listed under: Other Projects

A Raspberry Pi Thermometer you can Access Anywhere
The temperature of your room, visible on a gauge on the internet. For a few dollars. Uses Python, Dataplicity and Freeboard. So you've bought a Raspberry Pi, but now what? In this tutorial I'll show you how to turn an internet connected Raspberry Pi that...... Listed under: Metering - Instrument Projects

Windows 10 IoT Core and SHT15
Windows 10 IoT Core and SHT15 Sensor
Story Update 08-15-2015: Project converted to Visual Studio 2015 RTM Windows 10 IoT Core and SHT15 Sensor Here is another project using Windows 10 IoT. In this project I am using SHT15 Temperature and Humidity sensor. This sensor...... Listed under: Development Board - Kits Projects

Pi Car
Build a Semi-autonomous, 4WD Raspberry Pi Car with a camera stream!
Story This is a guide on how to build my Pi Car! When I discovered the Raspberry Pi I was eager to learn electronics and coding in order to create cool gadgets. However, with...... Listed under: Car Projects

Raspberry Pi and Arduino Laptop
Since the day I heard about and got to play with the Raspberry Pi a few years ago, I've wanted to make a Raspberry Pi-powered laptop. Story Introduction: Raspberry Pi and Arduino Laptop Since the day I heard about and got to play with the...... Listed under: Other Projects

Energy Monitoring through a Raspberry Pi
In this application we will setup a CE current monitor with a Raspberry Pi and display current readings for circuits through a web interface Story Introduction In this Article we are going to monitor the energy consumption (in watts) of some circuits in a home or...... Listed under: Other Projects

Alexa NodeMCU Smart Home Automation With Your Own HUB
In this project you can make your own personal Smart Home HUB that you can add, modify and control all the appliances you want. HUB on Raspberry Pi First we will setup the HUB on our Raspberry Pi Go through the steps on this...... Listed under: Home Automation Projects

Raspberry Pi Zero AirPlay Speaker
A combination of modern and classic touches in this Pi Zero AirPlay speaker. Story Looking for a project to build around the Raspberry Pi Zero, I came across the pHAT DAC from Pimoroni. This little add-on board adds audio play capabilities to the Pi...... Listed under: Sound - Audio Projects
171. RPi 3 BLE Cat Door IoT door using a Raspberry Pi 3, Node-Red and BLE tracking tags! Story The goal of this project is to build a style motorized pet door so we can control which animals can come into the house. For this we are using BLE...... Listed under: Ot! Projects

172. Personal Mirror Mirror with Face Recognition and Personal News Story The Personal Mirror Motivation The idea to create a mirror additional Information is not new and there are a lot of projects with instructions in the web to create such a mirror. (e.g. here: http://michaelteeuw.nl/post/80391333672/magic-mirror-part-i-the-idea-the-mirror) My idea is to...... Listed under: Other Pr

173. Control GPIO and Pi Camera using Raspberry Pi + Telegram App How to Control Raspberry Pi Camera and GPIO pins with Telegram via the Internet Story The Telegram app is taking the techie community by storm. Maybe not all your friends use it, but it has enou features to make it fascinating for people...... Listed under: Video - Camera - Imaging Projects

174. Temperature controlled fan Control a fan using a relay at a specific temperature threshold. Story I noticed that the media furnitur where I have most of my media related devices (bluray-player,gaming consoles, etc.) was getting very warm whenever I was using these.I felt the urge to...... Listed under: Temperature Measurement Projects

175. Solar-Powered Squirrel Kam (Pi Zero W) UPDATED Combines basic woodworking (house/feeder) with a Pi Zero W/cam powered by batteries/solar & turn on/off w/ an ATtiny85 and BH1750. Story Background I live half a mile above sea level and am SURROUNDED by animals... bears, fr turkeys, deer, squirrels, birds. Spring has arrived and...... Listed under: Solar energy projects

176. SIGHT: For the Blind A pair of smart glasses for the blind. Powered by Android Things and TensorFlow. Story Ever thought how is th of a blind person, their life is full of risk. They can't even walk alone through a busy street or through a park. They...... Listed under: Projects, Sensor - Transducer - Detector Projects

177. Smart Intercom Real-Time system that allow to pass only authorized/invited people, using Face-Recognition or NFC cards. Story wo demonstration Testing push-button The principle of operation: Person approaches to the intercom Looks at the camera The system compare his face with authorized people If it nds it, then...... Listed under: Phone Projects

178. Windows 10 IoT Core : Speech Controlled Robot Story In earlier days of computer, interaction with computer was held via punch-cards, trackball, light-gun, keyboards and even via touch screen. All of these devices requires some kind of physical contact to ope them. With decade-by-decade, new technology improves over the old one. Wireless input devices become popular...... Listed under: Robotics - Automation Projects

179. Blinds (Or Any AC Power Motor) Control How to control several roller shutters with inexpensive relay boards (not ruining them) wi physical buttons and remotely simultaneously. Story Intro Just bought a new house and wanted to automate everything, starting the blinds. What seemed to be an easy project turned out to...... Listed under: Other Projects

180. Cheap Alexa Printer From An Old Receipt Printer Upcycle an old receipt printer into a voice assistant/Internet of Things printer! I a fan of recycling old tech and making it useful again. A while ago, I had acquired an old, cheap thermal receipt printer, and I wanted useful way to re-purpose it...... Listed under: Other Projects

181. MQTT Alarm Control Panel for Home Assistant A control panel powered by Raspberry Pi 3 using a touchscreen and Android Things: communicate with Home Assistant over MQTT. Story Overview This project is an MQTT Alarm Control Panel for pairing with Home Assistant's Manual Alarm Control Panel component or with any home automation platform...... Listed under: Clock - Timer Project

182. Distributed Air Quality Monitoring (Using Taxis!) Monitor air quality on a street-by-street level using Android Things, Google Cloud and taxis! Story When my family moved to Lima, Peru a few months ago, I was excited at the prospect of being able to do my daily along the seaside. Unfortunately,...... Listed under: Car Projects

183. Smart Garden Smart Garden is a plant environmental monitoring system. Story Inspiration I want to start gardening, but I knew I w keep up the regular schedule of watering the plants and making sure that they remain healthy. So, I recruited a micro-controller ar of sensors...... Listed under: Metering - Instrument Projects
184. Network Monitoring using Raspberry Pi 3 and Node Red Using the R-Pi 3 and Node Red I created a simple network monitoring app. Story I used a plain Raspberry Pi 3 connected to my home network to monitor some network devices and servers I am running in my environment. Monitoring Statistics I used Node-Red...... Listed under: Internet - Ethernet - LAN Projects

185. Home Smart Home Smart home system using MediaTek Linkit, Xbee, Arduino, Orange Pi and Azure Story Introduction Let’s see what needs to be set up to build your own home system using MediaTek Linkit. Since there are lot of experts here to guide you on the hardware hook up, I will provide you with a simple guide to get you started. Listed under: Home Automation Projects

186. Windows IOT – Automate your power outlets Control your home power outlet from anywhere in the world using raspberry pi, zigbee (Azure enabled) Story Introduction In this project we will see how to control the power outlets of your home natively and cloud using raspberry pi running on windows...... Listed under: Wireless projects

187. Web-Controlled LED Animations with Raspberry Pi and Arduino Set up your Arduino and Raspberry Pi to control lighting and animations on an RGB LED strip from your smartphone or PC. Story Project Overview Arduino Light Animation (ALA) is an Arduino library for controlling LEDs and running colorful animations with the minimum amount of code...... Listed under: LED Projects

188. Weather Monitor Collects data and uploads it to Dropbox! Controllable through the Sense HAT joystick. Story Note: Feel free to use my code, but remember to credit me. (brendan-lewis@hackster) I have read a lot about weather stations, so I decided to make my own version...... Listed under: Sensor - Transducer - Detector Projects

189. Raspberry Pi / Hologram SMS Controlled AC Power Switch Using the Nova Hologram, IoT Relay and a Raspberry Pi, easily make a smart switch so you can turn devices on/off remotely. Story SMS Controlled Remote Power Switch Occasionally, our ISP modem loses internet connectivity and requires a power cycle to get going again. I...... Listed under: Development Board - Kits Projects

190. Safe Deposit Box with two-factor authentication A safe-deposit box that requires 2FA to open. Built with resin.io and Authy. Story The Internet of Things is mostly about bringing Things to The Internet, but it’s also about bringing The Internet to Things. Two-Factor Authentication (2FA) has been offered by mission critical services...... Listed under: Security - Safety Projects

191. Automated Garden Gardening is a very long term project taking a little time every day. Why not automate it? This is the second project I have using my automated garden, but this time everything will be controlled by Cayenne so it will be a lot easier. Also I added...... Listed under: Home Automation Projects

192. Curved Lane Detection Story Introduction In any driving scenario, lane lines are an essential component of indicating traffic flow a drive. It’s also a good starting point when developing a self-driving car. Building on my previous lane detection project, I’ve implemented a curved lane detection...... Listed under: Sensor - Transducer - Detector Projects

193. RFID Register Clock in and out of locations with Mifare RFID cards for an accurate register of movements on and off site locations that require a connected device that had the ability to identify and record the movements of people on and off locations...... Listed under: RFID - NFC Projects

194. MiniZ: Tiny Streaming Radio Based on Classic Zenith “Cube” Like the look and feel of vintage radio, but want Pandora, internet radio of your own music? This project is for you! Story Inspiration I used to love playing around with my Dad’s big 1940’s Zenith radio, tuning in stations across America and...... Listed under: Radio Projects

195. Build Your Own Amazon Echo Using a RPI and ReSpeaker HAT How to build your own Amazon Echo using a Raspberry Pi and ReSpeaker 2-Mics HAT. Story Introduction ReSpeaker 2-Mics Pi HAT is a dual-microphone expansion board for Raspberry Pi designed for AI and applications. This means that you can build a more powerful and...... Listed under: Sound - Audio Projects

196. Digital Light Sensor A Windows 10 IoT core application that switches on an LED based on digital light sensor reading. Story It took some time to figure out the status of the Digital Light Sensor is straightforward and it simply depends on reading the GPI value...... Listed under: Sensor - Transducer - Detector Projects
Raspberry Pi Smart Car

Use a Raspberry Pi to make your "dumb" car smarter! Story INSPIRATION I love the idea of smart cars, but for me to justify purchasing a whole new car just to get a couple of bells and whistles. For the time being, I'm...... Listed under: Car Projects

Intelligent Door Lock

An Alexa enabled door lock with face recognition and remote control. Story Overview Security and accessibility are the main concern in today's world. We always try to keep our house secure and at the same time we want to make our home devic accessible...... Listed under: WiFi / Wlan Projects

DIY Virtual Alike NEST Thermostat with Node-RED

Create your own DIY virtual alike NEST thermostat to set and control the temperature of your home wherever you are from your desired device. Story Hi all! What's up Makers?! This is my first project I would like to share with Hackster community! 😊 I...... Listed under: How To - DIY - Projects, Temperature Measurement Projects

Alexa Voice Controlled Tello Drone

Fly a Tello drone using only your voice with Node-RED and Raspberry Pi. Story In this tutorial, I will show you how to control a DJI Tello drone using only your voice. The drone works with Amazon's Alexa voice assistant to respond to voice-prompted commands. First Step...... Listed under: Wireless projects

Portable media server and access point

Stream videos (and other media) to mobile devices/tables while on the go. Great for streaming video to iPads in a car on a long road trip! Story Background The reason for creating this project in the first place was because I have Apple. Both my...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Creating A Raspberry Pi Universal Remote With LIRC

This project allows anyone to turn a Raspberry Pi into a universal remote using (LINUX Infrared Remote Control). Story Recently I have been working on a project that would allow anyone to turn a Raspberry Pi universal remote. To do this I...... Listed under: Wireless projects

Raspberry Pi 2, 480*320 TFT LCD Displays Windows 10, SPI PI 2, TFT LCD 480*320, SPI & Touch Screen on Windows 10 IoT, working more can be found at https://www.youtube.com/c/thebreadboardca Story OK, so I think I am outdoing myself with this one ILI948 320 LCD 65K colour display TSC2046 touch screen controller...... Listed under: LCD Projects

LoRa – Raspberry Pi – Single Channel Gateway – Cheap!

LoRa Single Channel Gateway on a Raspberry Pi. Low part count, only require HopeRF LoRa module (~$10) and a Raspberry Pi. Story Description Do you want to get started with LoRaWAN, but don't have a gateway near you? These instructions help you turn a...... Listed under: Development Board - Kits Projects

Autonomous Driving AI for Donkey Car Garbage Collector

Use a TensorFlow SSD MobileNetV2 DNN on the Raspberry Pi plus Pi Camera to build an autonomous car capable of object detection. Story This project will show how to transform a (Raspberry Pi + Pi Camera powered RC car into one capable of object...... Listed under: Car Projects, Sensor - Transducer - Detector Projects

Arduino I2C communication with Raspi 2 WIOT

Using Arduino to do a communication between sensors and Windows for IOT. Person believes that the use of Arduino is more practical when wanting to implement an interaction with sensors, since it is already available at a time, and has a much larger number of...... Listed under: Sensor - Transducer - Detector Projects

Security Camera

Security camera project using Windows 10 IoT Core. This project is part of Microsoft's Hack the Home initiative, which provides makers with free, open-source components for effortless interfacing with devices and services that makes use most to their homes. Home security systems are a growing field of...... Listed under: Security - Safety Projects

Windows 10 IoT Core for Raspberry Pi 3 Model B+

The hardware and software that we need to run Windows 10 IoT Core on Raspberry Pi 3 Model B+. Story Introduction Raspberry Pi 3 Model B+ is the latest new hardware released by Raspberry Pi.org, which is equipped with 1.4GHz 64-bit quad-core processor and Wi-Fi band wireless...... Listed under: Development Board - Kits Projects
209. Make Your Own Google Voice HAT

Make your own AIY projects kit for Google Voice HAT. Google made their AIY projects kit available to Pi users for free through the MagPi Magazine Issue 57. However, since then, there has been no word yet on the retail availability of the kit. So to...... Listed under: Sensor - Transducer - Detector Projects

210. Helium Air Quality Sensor

A Helium-based air quality sensor and solar setup. As environmental concerns and awareness increase, I decided to build and deploy an array of wireless, self-contained, weather-resistant, solar-powered air quality sensors, also known as WSPAQs. The sensor array measures CO2 levels and VOCs. (What's a VOC, you..... Listed under: Sensor - Transducer - Detector Projects

211. Sensor Telemetry 2.0.1

Sensor Telemetry 2.0.1 Drive temperature data to Microsoft Azure IoT Hub and monitor the data remotely using a Windows Universal application. Digitally Remastered! Story UPDATED: The Sensor Telemetry project has been digitally remastered! Updated as of May 17th, 2017 and renamed to Sensor Telemetry 2.0.1...... Listed under: Sensor - Transducer - Detector Projects

212. Getting started with the RAK 831 Lora Gateway and RPi3

This project takes you through all the steps required to get you RAK 831 Gateway module up and running with wifi as the backhaul. Story Introduction This step-by-step guide is aimed at developers who develop their very own lora gateway using the...... Listed under: Development Board - Kits Projects

213. Telegram Bot with Raspberry Pi

Host a Telegram Bot on your Raspberry Pi and chat with your brand new IoT device! Story Learn how to use the Telegram Bot, host a Telegram Bot on your Raspberry Pi, and use the messaging app to interact with your device. Step 1: Open...... Listed under: Phone Projects

214. Windows 10 IoT Core for Adafruit SPI Touchscreen

Run Windows 10 applications on an Adafruit SPI touchscreen for Raspberry Pi. Follow the tutorial to install the display driver and touch. Story How it Works This project explains how to use the Adafruit PiTFT capacitive touchscreen for Raspberry Pi. To support this screen, a...... Listed under: LCD Projects

215. Home Automation system using Raspberry Pi

A Home Automation system using a Raspberry Pi 2 and Windows 10 IoT Core including a Telegram-Bots integration. App. Story Update 2: The project is still growing and a lot of new features are already implemented (like a Twitter-Client and the integration of Telegram-Bots). Please check the GitHub...... Listed under: Home Automation Projects

216. Raspberry Pi Automated Plant Watering with Website

Set up your Pi to automatically take care of a house plant by reading a moisture sensor and watering when needed. Story This post starts with two facts: I have a penchant for killing plants. People in Holland grow things really well indoors. After reading about...... Listed under: Sensor - Transducer - Detector Projects

217. Possessed Portrait – Updated DIY jump scare portrait from scratch using Raspberry Pi 3 B, Python and AtmosFX Videos

Unlving portraits. It's October again and I wanted to come up with a Halloween project using a Raspberry Pi. I saw a few haunted portraits scattered here and there but none...... Listed under: Sensor - Transducer - Detector Projects

218. Real-Time Face Recognition: An End-to-End Project

We will learn step by step, how to use a PiCam to recognize face in real-time. Our last tutorial exploring OpenCV, we learned AUTOMATIC VISION OBJECT TRACKING. Now we will use our PiCam to recognize faces in real-time, as you can see below: [video width="480" height="380"...... Listed under: Sensor - Transducer - Detector Projects

219. Smart Security Camera IoT

Raspberry Pi security camera running OpenCV for object detection. The camera will send an email with image of any objects it detects. Story Check out this video to see a summary of the build steps and the completed camera: Buildi Housing...... Listed under: Security - Safety Projects

220. Rover Rover

Simple to get started yet infinitely expandable. There is something about robots that have captured my imagination as long as I can remember. They are my comfort zone whenever I embark on new Maker adventures; as soon as I get past the "blinking LED" project...... Listed under: Robotics -

267. ANAVI Play pHAT
Put your Raspberry Pi to work: with ANAVI Play pHAT you can make it an IoT hub during the day and a retro gaming machine during the night! Story: ANAVI Play pHAT is a super simple, low cost, open source hardware add-on board for Raspberry.. Listed under: Game - Entertainment Projects

268. IoT Car
This project was done to create an understanding of IoT and how one can step into it. Story: Introduction This project is geared to help the newbies understand Internet of Things (IoT) and how they can start working on this. For anyone, this term...... Listed under: Projects
269. Led Blinking using Raspberry Pi – Python

Blinking LED is one of the beginner circuits which helps one to get acquainted with GPIO on the Raspberry Pi. Here we use Python language to write the code for blinking LED at one second intervals. Components required: One ohm resistor, Jumper cables. Listed under: LED Projects

270. Accessing Raspberry Pi through SSH

SSH stands for Secure Shell. It is a secure channel created over an insecure network. The channel consists of a server and a client. This channel uses public key cryptography and can be used for secure transmission of passwords, log in, command execution etc. Listed under: Internet - Ethernet - LAN Projects

271. Using Raspberry Pi through VNC

Contents

1. Setup VNC server on Raspberry Pi
2. Accessing through VNC
3. To Automate the above Process

Virtual Network Computing (VNC) is a graphical desktop sharing system used to remotely control a computer's desktop from another computer. It uses Remote Frame Buffer Protocol (RFB). It transmits... Listed under: Internet - Ethernet - LAN Projects

272. Using Switch with Raspberry Pi – Python

Contents

1. Raspberry Pi GPIO Pin Out
2. Pull Up and Pull Down
   2.0.1 Pull Down
   2.0.2 Pull Up
3. Circuit Diagram
4. Python Programming

I hope that you already go through our tutorial, LED Blinking using Raspberry Pi. Detecting switch status is one of the basic steps in learning Raspberry Pi GPIO operations. Listed under: LED Projects

273. Interfacing HC-SR501 PIR Motion Sensor with Raspberry Pi

Contents

1. Working of PIR sensor HC-SR501
   1.1 Adjustment
2. Circuit diagram
3. Python Programming
4. Output

All living beings radiate energy to the surroundings in the form of infrared radiations which are invisible to human eyes. A PIR (Passive infrared sensor) can be used to detect these passive radiations. When... Listed under: Sensor - Transducer - Detector Projects

274. Using UART on Raspberry Pi – Python

Contents

1. Freeing up UART pins on Raspberry Pi GPIO
2. Using Python
   2.1 Installing pySerial
   2.2 Example Program

UART stands for Universal Asynchronous Transmitter / Receiver, a popular serial communication interface which provides full duplex communication between two devices. The term universal means that transmission speed and data format are... Listed under: Other Projects

275. Interfacing DS18B20 Temperature sensor with Raspberry Pi

Contents

1. Circuit Diagram
2. Sensor not detecting after OS update
3. Reading temperature using Terminal
4. Terminal Output
5. Python code
6. Output

DS18B20 is a commonly used temperature sensor providing 9 bit to 12 bit digital Celsius temperature measurements. The sensor communicates over one wire to each sensor. Listed under: Sensor - Transducer - Detector Projects

276. Gesture Controlled Robot Using Raspberry Pi

Have you ever tired of controlling everything with buttons? Thought of controlling something with simple hand movements by sitting on your lazy couch? If yes, then you are at the right site. In this tutorial we are going to control a robot driven by two... Listed under: Robotics - Automation Projects

277. LIVE CAMERA STREAMING RASPBERRY PI – MOTION SETUP

Raspberry Pi is a handy little computer that is used by hobbyists and professionals alike. Due to its compact size, powerful processor and less power consumption it can be used for anything and anywhere. In this tutorial, I will show you how you can... Listed under: Robotics - Automation Projects, Video - Camera - Imaging Projects

278. RASPBERRY PI WIFI ROBOT CONTROLLED FROM ANDROID SMART PHONE

Let us build a robot that can be controlled using your smartphone wirelessly over WiFi. Yes; a WiFi Robot using Raspberry Pi. Here, I will be using an App – RootSaid – WiFi Command Center to control the robot. The listener accepts the... Listed under: Robotics - Automation Projects, WiFi / WLan Projects

279. MANAGE MULTIPLE RASPBERRY PI USING MOBILE PHONE

Raspberry Pi is small credit card sized, light weight and compact computer available which is used by both professions, hobbyist and of course hackers alike. Raspberry Pi 3 B is the newest version of the Raspberry Pi family. This mini computer can do (almost)... Listed under: WiFi / WLan Projects, Wireless Projects

280. RASPBERRY PI HOME AUTOMATION

Let us build a home automation system that can control electrical appliances such as lights, fans, gates etc using our mobile phone from anywhere around the world. All you need is a Raspberry Pi, some relays and an android phone. Let's get started. Components Required... Listed under: Sensor - Transducer - Detector Projects

281. NEW RASPBERRY PI 3 MODEL B + FEATURES AND PURCHASE

Raspberry Pi is small credit card sized, light weight and compact computer available which is used by both professions, hobbyist and of course hackers alike. Two years ago, Raspberry Pi 3 Model B was released which was the first 64-bit member of the...
282. MATRIX VOICE ALEXA RASPBERRY PI EASY SETUP In this tutorial, I show you how to set up MATRIX Voice Alexa in your MATRIX Voice/Creator Device. Be going into this, it would be good if you know what a MATRIX Voice is and what it can do. Click Here to know more about...... Listed under: Development Board - Kits Projects

283. MATRIX VOICE ALEXA ROBOT USING RASPBERRY PI In the previous post we showed you how to create a home automation system MATRIX Alexa. Now we have decided to take it to the next level. He tinkered around with the code and made a Robot that can be controlled via MATRIX Alexa;...... Listed under: Robotics - Automation Projects

284. MATRIX VOICE GOOGLE ASSISTANT – MATRIX VOICE PROJECT In the last post, we build a Robot that can be controlled via Amazon using MATRIX Voice installed in a Raspberry Pi. In this tutorial, we will install and setup MATRIX Voice Google Assistant. Yes Google Assistant using your own MATRIX Device and Raspberry Pi. MATRIX Voice...... Listed under: Raspberry Android, Sensor - Transducer Detector Projects

285. MATRIX ALEXA HOME AUTOMATION – MATRIX VOICE/CREATOR & RASPBERRY PI So what all things we have now? A Raspberry MATRIX Voice, Alexa configured to work with MATRIX Voice and IFTTT. What to do next? How about some home automation? In th I will show you how to set up a Matrix...... Listed under: Home Automation Projects

286. HAND GESTURE CONTROLLED ROBOT WITH WIRELESS SURVEILLANCE Welcome to our new DIY series – Spinel Crux – A DIY Adva Hand Gesture Control Robot using Raspberry Pi for Wireless Surveillance Project. Yes, of course, building and tinkering with a DIY is fun. In this series, we will build a Raspberry Pi Rover Robot which can...... Listed under: Wireless projects

287. How to Check and Calibrate a Humidity Sensor How accurate is your humidity sensor? Find out with this project. Humidity sensors commonplace, relatively inexpensive, and come in many different varieties. Too often, we check the datasheet, use them with an interface, and (as long as the values “look reasonable”) we accept the...... Listed under: Sensor - Transducer - Detector Projects

288. How to Generate a High-Precision Waveform Using a DAC and a Custom PCB In this article, we’ll develop firmware that will serve a basis for high-precision, high-speed signal generation. I recently designed an arbitrary waveform generator (AWG) PCB that is built around a C8051F360 microcontroller and a TxDAC from Analog Devices. These two ICs communicate via a parallel interface...... Listed under: Sensor - Transducer - Detector Projects

289. Capture Moving Timelapse Video with this Motion Control Camera Slider I’ve enjoyed capturing timelapse videos ever since I found myself in possession of a camera that could do them. I love the way they transform the mundane into the surreal, whether it’s the to see a transformation taking place that’s too slow to observe...... Listed under: Video - Camera - Imaging Projects

290. Build a DIY Thermocam The basic idea of my low-cost thermal imager started with my physics class in 2010. Our teacher bought a point infrared thermometer, also called a pyrometer, and asked if anyone wanted to use it for a science competition later that year. My friend and I...... Listed under: Temperature Measurement Projects

291. Program a Light-Up Felt Menorah Everyone has their own holiday traditions. Mine is trying to make an LED menorah for Hanukkah Lights. This year, Hanukkah starts on the night of Tuesday, December 12, and, as always, I didn’t leave myself a lot of time to play...... Listed under: LED Projects

292. Livestream-Interactive Confetti Cannon Ok, I’ll admit, this one is a little silly – but ever since I’ve been doing live broadcasts on the regular, I’ve wanted to increase the number of ways that live stream audiences can interact with the broadcast. I was inspired by p like Twitch Plays...... Listed under: Game - Entertainment Projects

293. Build a Ballistic Parachute Recovery System for Your Drone Starting on December 21, 2015, the Federal Aviation Administration (FAA) began requiring hobbyists to register their Unmanned Aerial Systems – often referred to as drones. After two days of registration database contained 45,000 aircraft dedicated and designed for personal use. This mandate was set...... Listed under: Robotics - Automation Projects

294. Transform a 25-Watt Semi-Flexible Panel into a Practical Battery Charger Sunlight may be free, but transforming it into usable electricity is not. I learned this back in 1965 when I bought some surplus silicon solar cells from dealer Herbach and Rademan (now H&R Com Inc.). Those 0.75″×0.75″ cells cost around $2.49 each or $19.30 today...... 306. **Speathe Speaking Through Breathing:** An intelligent communication system for the paralyzed. Things used in this project: Hardware components [gallery columns="4" id="15794,15795,15796,15797"] Software apps and online services. Python react-native. Story: Speathe: An innovative and evolving communication method for the paralyzed who are gone speechless after paralysis. . . . Listed under: Medical - Health based Projects, Sensor - Transducer - Detector Projects, Sound - Audio Projects.

308. **Using pcDuino’s WiFi Dongle With the Pi Introduction** This quick tutorial aims to show you the steps required to set up the pcDuino Dongle with everyone’s favorite fiberglass-flavored development board: the Raspberry Pi (model B or model A). This WiFi dongle cheap solution to adding network connectivity to your Pi, if you . . . Listed under: Wifi / Wlan Projects.

309. **Hackers in Residence: The Sound Visualizer Introduction** This tutorial shows how to put together a sound visualizer that I created, during my time in the SparkFun HIR program. The end goal for the project was to have a sound reactive LED belt buckle. To accom the task of sound visualization, a Raspberry . . . Listed under: LED Projects, Sound - Audio Projects.

310. **Using pcDuino’s WiFi Dongle With the Pi Introduction** This quick tutorial aims to show you the steps required to set up the pcDuino Dongle with everyone’s favorite fiberglass-flavored development board: the Raspberry Pi (model B or model A). This WiFi dongle cheap solution to adding network connectivity to your Pi, if you . . . Listed under: Wifi / Wlan Projects.

311. **Hackers in Residence: The Sound Visualizer Pt. 2 Introduction** This guide is a follow up to the first write up I did for my participatio SparkFun HIR program. This guide shows how to setup a music visualizer for PCs/laptops. It uses an RGB LED panel to display the n visualization. It plays MP3s and . . . Listed under: LED Projects, Sound - Audio Projects.

312. **Using pcDuino’s WiFi Dongle With the Pi Introduction** This quick tutorial aims to show you the steps required to set up the pcDuino Dongle with everyone’s favorite fiberglass-flavored development board: the Raspberry Pi (model B or model A). This WiFi dongle cheap solution to adding network connectivity to your Pi, if you . . . Listed under: Wifi / Wlan Projects.

313. **Building Large LED Installations Introduction** While designing the layout for the new SparkFun Emporium, I was given the opportu design a large LED art installation. I've helped build LED installations before, but had never had the opportunity to design one fror ground up. Thus was born the CandyBar, a 46-foot . . . Listed under: LED Projects.

314. **Preassembled 40-pin Pi Wedge Hookup Guide Introduction** The preassembled 40-pin Pi Wedge is the newest member in our Pi We family. It’s an excellent way to get those pesky Pi pins broken out to a breadboard so that they can easily be used. The Pi Wedge i breadboard This Pi Wedge . . . Listed under: Development Board - Kits Projects.

315. **Raspberry Pi 3 Starter Kit Hookup Guide Introduction** Heads up! The Raspberry Pi 3 Model B+ has the same mechanical footprint a the Raspberry Pi 3 Model B and the Raspberry Pi 2 Model B. This guide will show images of the Pi 3 Model B but you can still follow along . . . Listed under: Development Board - Kits Projects.

316. **PiRetrocade Assembly Guide** PiRetrocade Pew-Pew. Got you. The Raspberry Pi 3 has been the latest and greatest in the line of Raspberry Pi Single Board Computers. Need some inspiration for your next Raspberry Pi project? How about a retro arcade gaming kit? Kit Includes: 5x Arcade Buttons 1x Joystick SD . . . Listed under: Game - Entertainment Projects.

317. **Bark Back Interactive Pet Monitor** Shed some light (er, sound) on the elusive mysteries of your pets’ antics while away from home! Internet of Things (IoT) Bark Back project monitors and uploads the level of noise in your home to the Cloud so you can check on y beloved . . . Listed under: Sensor - Transducer - Detector Projects, Sound - Audio Projects.

318. **Scratch Boy UW – Makeathon** Introduce kids to programming and gamedev by providing them with a personal, handheld system to execute games of their own creation. Story Our story starts with Scratch, the coding language developed in an MIT lab to introduc young people to coding. Building Scratch games allows . . . Listed under: CNC Machines Projects, Game - Entertainment Projects.
319. Getting Started with the Raspberry Pi Zero Wireless Introduction The Raspberry Pi is a popular Single Board Computer (SBC) in that full computer packed into a single board. Many may already familiar with the Raspberry Pi 3 and its predecessors, which comes in a factor that has become as highly recognizable. Listed under: Wireless projects

320. Setting Up the Pi Zero Wireless Pan-Tilt Camera Introduction This tutorial will show you how to assemble, program, and access the Raspberry Pi Zero Wireless Pan-Tilt Camera. [caption id="attachment_15562" align="aligncenter" width="500"] SparkFun Raspberry Pi Zero W Camera Kit[/caption] Required Materials You'll need a microSD card, a sufficient power supply, and a micro-B USB Cable. Listed under: Wireless projects

321. Pi Servo Hat Hookup Guide Introduction The SparkFun Pi Servo Hat allows your Raspberry Pi to control up to 16 servo motors via I2C connection. This saves GPIO and lets you use the onboard GPIO for other purposes. Furthermore, the Pi Servo Shield adds a serial terminal connection which will allow you. Listed under: Development Board - Kits Projects, Motor Projects

322. Lumenati Hookup Guide Introduction The Lumenati line of LED boards is designed to give your projects an edge in their lighting capabilities. Based on the APA102C addressable LED, these LEDs employ a 2-wire communication protocol consisting of a clock line and a data line. While this requires one more wire than... Listed under: LED Projects

323. Qwiic HAT for Raspberry Pi Hookup Guide Introduction This Qwiic HAT for Raspberry Pi is the quickest and easiest way to utilize SparkFun's Qwiic ecosystem while still using that Raspberry Pi that you've come to know and love. This Qwiic HAT connects the I2C bus (GND, 3.3V, SDA, and SCL) on your Raspberry Pi. Listed under: Development Board - Kits Projects

324. Getting Started with TJBot Introduction TJBot is a kit developed at IBM to help people get started with their Watson AI service. It comes with a friendly little robot that you build yourself, a Raspberry Pi 3, and all the parts you need to make your robot wave, blink, talk, and talk back. Listed under: Development Board - Kits Projects, Robotics - Automation Projects

325. Using the PSoC 6 Pioneer Board with the Pioneer IoT Add-on Shield Introduction The PSoC 6 is the latest addition to Cypress's PSoC series of processors. The PSoC 6 Pioneer IoT Add-On Shield is the development tool associated with this processor line, providing onboard debugger, Arduino compatible headers, CapSense widgets, and more, all tied to a PSoC... Listed under: Development Board - Kits Projects

326. Raspberry Pi Stand-Alone Programmer Introduction With the power of Raspberry Pi, Python, avrdude, a custom HAT with cable ad we developed our own spin on AVR programming that turned out pretty darn robust. In addition to creating a stand alone solution was a great experiment to learn more... Listed under: Raspberry Programmer Projects

327. Remote Monitoring of Weather Using Raspberry Pi In this Project I am going to show you how to make a Remote Weather monitoring system using Raspberry Pi3 I am using PubNub Cloud service for this,Free...which is PubNub is a global Data Stream Network (DSN) realtime infrastructure-as-a-service (IaaS) company based in San... Listed under: Metering - Instrument Projects, Phone Projects, - Transducer - Detector Projects, Temperature Measurement Projects

328. Telemonitoring System With Raspberry Pi Telemonitoring is defined as the use of information technology to monitor patients at a distance. Telemonitoring allows reduction of chronic disease complications thanks to a better follow-up; provides he care services without using hospital beds; and reduces patient travel, time off from work, and overall costs. Telemonitoring can he... Listed under: Home Automation Projects
329. Raspberry Pi Wireless Display Receiver

In industrial automation & other areas most of the time, we want data to be viewed at control room or head office with far distance. That’s why I made Raspberry Pi Wireless Display Receiver. As RPi made its 10th Million sale this year on its Birthday. Listed under: LCD Projects, Video - Camera - Imaging Projects, WiFi / WLan Projects, Wireless projects.

How much impact can the human body handle? Whether it’s football, rock climbing, or bicycle accidents, knowing when to seek immediate medical attention after a collision is incredibly important, especially if there are obvious signs of trauma. This tutorial will teach you how. Listed under: Security - Safety Projects.

331. Setting up a Raspberry Pi 3 as an Access Point

Introduction

Note: This tutorial was based on instructions found on this blog. The Raspberry Pi 3 comes with a built-in wireless adapter, which makes it easy to configure it as a WiFi hotspot to share Internet or your own internal website. The first part of this guide. Listed under: Wireless projects.

332. Headless Raspberry Pi Setup

Introduction

A “headless” computer is one that operates without a monitor, keyboard, or mouse. The Raspberry Pi works great as an inexpensive computer that can help people learn to program and create fun, interesting projects (without many repercussions if you break something—just reflash the SD card!). The… Listed under: Other Projects.

333. How to Use Remote Desktop on the Raspberry Pi with VNC

Introduction

If you like the idea of a headless computer setup for your Raspberry Pi (i.e., without a keyboard, mouse, or monitor) but want access to the full graphical desktop, then you’re in luck! By using a Virtual Network Computing (VNC) program, you can access a… Listed under: Wireless projects.

334. Python GUI Guide: Introduction to Tkinter

Introduction

Python is generally more popular as a sequential programming language called from the command line interface (CLI). However, several frameworks exist that offer the ability to create slick graphical user interfaces (GUI) with Python. Combined with a single board computer, like the Raspberry Pi… Listed under: Other Projects.

335. Using the A111 Pulsed Radar Sensor with a Raspberry Pi

Introduction

Experimental Products: SparkX products are rapidly produced to bring you the most cutting edge technology as it becomes available. These products are tested but come with no guarantees. Live technical support is not available for SparkX products. Does your project require high-precision, cutting-edge distance, speed,… Listed under: Sensor - Transducer - Detector Projects.

336. Using Wemos D1 mini to control a brushless motor with ESC and servo signals

I’ve recently become interested in making “machine projects” without many repercussions if you break something. I was sorting through some of my RC (radio control) plane “stash” the other day and came across various brushless motors and electronic speed controllers (ESC) like these. In RC, Brushless ESCs are usually connected… Listed under: Motor Projects.

337. Run a K40 Laser Cutter from Your Raspberry Pi with K40 Whisperer

I bought a Chinese K40-style laser cutter about three weeks ago. I’ve been spending quite a bit of time playing with it learning how best to use it. It’s an eminently hackable design, and while mine cut 3mm acrylic OK ‘straight out of the box’… Listed under: CNC Machines Projects.

338. How to tap a thread in acrylic Perspex, Lucite, Plexiglass using your cordless drill driver

I recently bought a laser cutter (running on a Raspberry Pi) and started working with it. I’ve been seeing a trend in using Perspex as it becomes more popular. I saw a lot of people using Perspex before. It machines beautifully as long as you’re not too greedy with your cuts (and if you’re too greedy, it cracks). In exploring the material… Listed under: CNC Machines Projects.

339. New Raspberry Pi model 3B+ 1.4 GHz, 330Mbit Ethernet, 802.11ac, PoE

It’s Pi day (if you do dates in the illogical MM/DD/YY format). Raspberry Pi is releasing a new version of the Pi 3B. It’s called the 3B+, which is logical because it has more to offer than the 3B and also in keeping with previous… Listed under: Internet - Ethernet - LAN Projects.

340. How Much Power Does Raspberry Pi 3B+ Use?

Power Measurements

Since the original Pi came out I’ve been interested in how much power a Raspberry Pi uses. I became something of a launch week tradition to publish a new chart and some data. So much so that several people ask for it on Pi day. This time… Listed under: Battery Projects.

341. Octopod: Smart IoT Home/Industry Automation Project

Octopod, a uniquely shaped full automation system that allows you to monitor your industry and security with AI and smart RFID locks. Things used in this project: Hardware components: Arduino UNO & Genuino UNO & Arduino Arduino MKR WiFi 1010.

Goodnight Pi: Reducing Raspberry Pi Power Consumption

Introduction

The Raspberry Pi is a powerful platform to build a variety of projects on. Its full Linux operating system and large variety of peripherals make it extremely useful for a large range of applications that a traditional microcontroller could not handle. However, the Raspberry Pi requires power, and as such, if it is not properly managed, it could consume more power than necessary. This project aims to reduce the power consumption of the Raspberry Pi to extend its battery life and reduce energy consumption. Listed under: Clock - Timer Projects

Smart Pen: Final Project for ECE5725

Introduction

Nowadays, in order to gain the handwriting results, people often rely on the capacitive touch screen, stylus pen, or other similar devices. They are functional and precise, but not always flexible. Our project combines Raspberry Pi with IMU to build a product that can track handwriting during operation. Listed under: Robotics - Automation Projects

Raspberry Pi Car HUD

Objective

The goal of our project is to use the Raspberry Pi and create a touchscreen enabled Heads Up Display (HUD) for an automobile. The HUD would display useful, real-time information through an easy-to-read GUI onto a PiTFT screen. An example information includes the current speed, fuel level, and navigation information. Listed under: Car Projects

NSDUX Raspberry Pi Ku-Band Outernet Receiver

Project Description

Outernet is a service intended for providing web-based information to individuals without access to the web. It is a startup computer and still going through much revision. The service will surely more over time as interest and finances grow, but for now it's an interesting project. Listed under: Wireless projects

Raspberry Pi Controlled Health Monitor System

Introduction

Health is always an important concern. However, the health of modern people is always interfered by various potential but dangerous factors, such as high blood pressure, and abnormal heart rate. High pressure, also called hypertension, increases the burden of the heart to pump blood. Listed under: Medical - Health based Projects

NSDUX Raspberry Pi ISS iGate

Project Description

This project is an APRS iGate for ARISS program’s digipeater aboard the International Space Station. I have a 2m FM radio tuned to 145.825 MHz. As the ISS passes over my location, the radio passes the received signal to a Terminal. Listed under: Radio Projects

Voice Controlled Car

Objective

The main objective of this project is to exploit the “IoT” potential of Raspberry Pi computer to control Remote Car using the Voice Commands. The Raspberry Pi with a Microphone connected to it will receive the Voice Commands and control the Remote Car. Listed under: Car Projects

NSDUX Raspberry Pi WebSDR Receiver

Project Description

I created my first Raspberry Pi WebSDR receiver in the Fall 2014. I had intended to setup a WebSDR station, but grad school and work can really keep you busy. The first receiver on the air worked well until a surprise electrical storm. Listed under: Radio Projects

Raspberry Pi gets its own app store with latest OS update

The latest release of the official Raspbian OS will make it easier to find the best software for the credit card-sized board. A large factor in the runaway success of the $35 Raspberry Pi is how easy it is to get with the tiny. Listed under: Raspberry Android

NSDUX Raspberry Pi Generic Setup

Description

This is a howto document created as a basis for all my other Raspberry Pi Projects. I list the basic hardware needed as well as the steps necessary to create your own basic Raspberry Pi setup. This is just the beginning of several. Listed under: Memory - Storage Projects

Physical Computing – Scratch 2.0 for Raspberry Pi

Story

This is my 3rd tutorial with a focus on Scratch and Physical Computing. Regarding this topic, I have already published: Physical Computing - Scratch for Arduino, where as the name says, I explored how to use Scratch and Arduino to interact with the physical. Listed under: LED Projects
Flexible Smartwatch Description
This project aims to build a thin, flexible smartwatch. It’s wrap-around display and touchscreen will allow it to display more data at a glance than current devices. Besides telling time and displaying notifications, the watch will feature pulse, blood oxygen, and step sensors. Listed under: Clock - Timer Projects

SIMULATION RASPBERRY PI EMULATOR FOR WINDOWS 10 USING QEMU
In this article, you are going to learn how to run Raspberry Pi on your Windows 10 PC. If you really enjoy this article, consider checking out my TechWizTime YouTube Channel. And for an awesome source of Raspberry Pi Accessories, check out my Raspberry Pi Amazon. Listed under: Raspberry Programmer Projects

$35 NanoPi K1 Plus is a Raspberry Pi-like computer with twice the RAM (and a different CPU) FriendlyElec’s latest single-board computer looks like a Raspberry Pi 3 and has a lot of the same features, including a 40-pin header, WiFi, and a quad-core ARM Cortex-A53 processor. But while the Raspberry Pi 3 Model B+ uses a 1.4 GHz Broadcom BCM2837 system-on-a-chip, FriendlyElec’s NanoPi. Listed under: Development Board - Kits Projects

Inspection Drone with Walabot Capability
Over the past year I have been working on various projects for making commercial inspection drones practical and safe. Here are a few links from my other projects. I refer you to them for the discussions regarding the requirements for commercial inspection work. NXP Flexio. Listed under: Robotics - Automation Projects

Building an API for Your Raspberry Pi Zero W
Wouldn’t it be interesting to have an API to control our hardware, like Arduino or Raspberry Pi? We now have the tooling to make this possible and easy. Having an API for our hardware allows us to remotely control and/or monitor our hardware with code. Listed under: Other Projects

Controlling Widgets using Raspberry Pi
tics feature the uLCD-220RD-Pi, a display module pack for the Raspberry Pi. The uLCD-220RD-Pi is made up of a uLCD-220RD 1.38” round TFT LCD display module, a 4D Serial Pi Adaptor, and a 5 way interface cable for quick and easy connection to a... Listed under: LED Projects

Using Serial Communication (RS232 protocol) – Example 4
Introduction
Communication plays an important role in distributed applications. It allows devices in a system to communicate with each other in order to exchange information or coordinate to perform some tasks. Depending on the communication requirements of the application such as wired / wireless, short... Listed under: Sensor - Transducer - Detector Projects

8 superb — and cheap — Raspberry Pi alternatives
As great as the Raspberry Pi is — and let’s be honest, all of the devices in that family are excellent, especially for the money — it’s not the only such device available to buy, and some of the rival systems are arguably better as... Listed under: Wireless Projects

Smart Parking System
Hardware components: Raspberry Pi 3 Model B x 1 Arduino Mega 2560 & Genuino Mega 2560 x 1 HC-SR04
Software apps and online services: Samsung IoT ARTIK Cloud for IoT Google Maps Arduino IDE
STORY Finding a free parking lot is a common problem, and using smart parking systems can help solve this issue. Listed under: Car Projects

TalkingPi: voice control module for Raspberry Pi
A new Raspberry Pi extension module called Talking Pi, manufactured by Joy-it and marketed by Conrad Business Supplies, serves as an extension to allow the control of lights, individual power sockets or devices by voice command. Talking Pi is equipped with a bracket holding 433-MHz wireless modules. Listed under: Sound - Audio Projects

Google Voice Assistant Using Asterisk PBX on Raspberry Pi
Hardware components: Raspberry Pi Zero Wireless x 1 VOIP (SIP) Phone as Grandstream GXp1620 Alternately, use a VOIP Softphone for PC (see below) x 1 Software apps and online services: VOIP Softphone
Need either a VOIP physical phone or Softphone Alternate VOIP Softphone Only. Listed under: Sound - Audio Projects
Raspberry Pi rival: Android friendly, 4K-capable Asus Tinker Board gets upgrade
Asus has souped up its Raspberry Pi rival, the Asus Tinker Board, adding on-board storage it says will make the board even faster. The new Asus Tinker Board S is broadly similar in spec to the original, but adds 16GB of eMMC storage, which Asus promises will boost.

The best accessories for your Raspberry Pi
Vivek Nanda has been a technical editor and content manager for over 20 years at B2B magazines in the electronics industry. He enjoys creating contextual content, crafting content strategy and working with online pr development teams. In 2017, The MagPi Magazine – the official Raspberry.

Dewalt Raspberry Pi Development Laptop

PROJECT 2 – Driving a Liquid Crystal Display Introduction You can use the Pi to drive a Liquid Crystal Display (LCD) to display all so information: it could be date, time, system status, disk utilisation, MAC and IP address, etc. The most common LCD is one based on Hitachi HD44780 chip...... Listed under: LCD Projects
482. Raspberry Pi on a Portable B&W CRT

Last week at hacklab.to, my friend Igor brought in a Panasonic TR-1030P. This is a black and white CRT, with an astonishingly small 35mm (1.37") screen diagonal, circa 1984. A great find for $5 at Value Village. A good set of tear away pictures can be...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

483. Raspberry Pi Temperature Sensor

A few weeks ago, I purchased a Raspberry Pi. After reading Eben Upton’s Raspberry Pi User Guide, I decided to focus attention on the GPIO pin. The post covers the first iteration of a...... Listed under: Sensor - Transducer - Detector Projects

484. Raspberry Pi Flashing Led Simple Circuit Diagram

Raspberry pi blog - news, announcements, ideas, Looking for raspberry pi news, product announcements, fun project ideas, and stories from the global pi community? read the official raspberry pi blog... Rasper pi adafruit industries, unique & fun diy, Adafruit’s goal to help the world...... Listed under: LED Projects

485. Talking to a Bluetooth Serial Module with a Raspberry Pi

Bluetooth is a very low cost and flexible way to add wireless communication to your projects. However, it can also be a bit tricky to set up. In this post we show you how to set up a Raspberry Pi with a USB Bluet...... Listed under: Bluetooth Projects

486. Raspberry Pi powered heating controller (Part 1)

TL;DR: It should be fairly straight forward to add a Raspberry Pi controlled heating system to a standard UK domestic set up and, more importantly, remove it again without messing with the existing set up. A minimum you’ll need a Raspberry...... Listed under: Home Automation Projects

487. LED candle with Raspberry Pi

The General Purpose Input/Output pins (GPIO) give you power to interact with the real world using your Raspberry Pi. This project will get you comfortable with using the GPIO pins, which will form the backbone of the final project. Traditionally the ‘Hello World’ program for...... Listed under: LED Projects

488. Raspberry Pi Webcam Robot – Best Video Streaming Tutorial

It is always cool to add a camera to your remote controlled car or robot so that you can see where its heading exactly and probably use a wifi enabled smartphone or tablet to view the video as well. It’s very now to do this using a...... Listed under: Robotics - Automation Projects

489. Control Your Pi with Webiopi

Webiopi is a fantastic framework for controlling your RPi over the web. I found it a steep learning curve once you’ve got head around a few ideas it provides a very powerful way of bringing your RPi to life. I am primarily using it...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

490. RaspiRobot Board V2 ** Works with the Raspberry Pi2 **

The RasPiRobot Board V2 is an expansion board designed to turn your Raspberry Pi into a robot controller! This board comes fully assembled and includes a switched-mode power supply so you can supply power to your Raspberry Pi from a...... Listed under: Robotics - Automation Projects

491. Raspberry Pi – BI-COLOR RIGHT ANGLE LED – 2xGPIO

Moving on from "My first GPIO LED", I decided to take a look at a different LED in my possession, an L-59BL/1. This LED has 3 pins and I had no idea what they were for, so I Googled it and found this...... Listed under: LED Projects

492. Autoadvent: Raspberry Pi controlled LED Advent candles

A couple weeks ago my Dad mentioned to me it would be cool if advent candles automatically lit themselves according to the date. (One candle is lit starting the 4th Sunday before Christmas with an additional candle being lit for each of following Sundays). I...... Listed under: LED Projects

493. Emulate a Bluetooth keyboard with the Raspberry Pi

Today, we’ll be learning how to use a Raspberry Pi to act as a Bluetooth keyboard and writing our own program to relay input to the client device. This will provide a useful insight into how a protocol like Bluetooth works, how sockets work, and...... Listed under: Bluetooth Projects
494. The best Raspberry Pi power supply

Ok, since we already documented a little about the importance of a good PSU (Power Supply Unit) when audio quality is your main concern. As stated earlier, the raspberry pi power supply is also responsible for proper functioning of our tiny device, as a poor

495. How to Build a Handheld, Raspberry Pi-Powered Game Console

The Raspberry Pi is a great little mini-computer for playing classic games from your childhood. But, thanks to its small size, it's also possible to turn it into a portable handheld game console that plays your favorite titles, from NES to N64. I call...... Listed under: Game - Entertainment Projects

496. Raspberry Pi chats to Arduino

Well I got the Pi working, so what next? After a tiny amount of pondering I decided to get it chatting Arduino using the serial interface. I'll try and note down everything relevant so this'll be as much a guide to doing it as...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

497. Raspberry Pi Web-Enabled Irrigation Bypass Project

A Better Solution

The problem with rain sensors lies within how they are engineered. My particular rain sensor works by using absorbent cork discs to detect moisture. When it rains, the discs swell-up with water, depress a switch which disables the watering. The watering is...... Listed under: Internet - Ethernet - LAN Projects

498. Best Voice Recognition Software for Raspberry Pi

The best voice recognition software out of three we tested, and how to set it up on a Raspberry Pi. On a mission to find the best voice-recognition software for Raspberry Pi, I installed and tested three different systems. Two were internet-dependent and one was offline...... Listed under: Feature, Video - Camera - Imaging Projects

499. Raspberry pi touchscreen LCD: The Best LCD Tutorial

Touchscreen displays are always one of the coolest things that you can add to your raspberry pi. Having a neat display always boosts the overall funk of your project. You can build upon a prolific number of applications using portable TFT LCD displays. Maybe create...... Listed under: LCD Projects

500. Raspberry Pi – Head Mounted Display Tutorial

Head mounted displays are definitely the latest fad that's going around town now. You might have seen several wearable displays such as the google glass, and many others including virtual reality systems like the oculus rift. Head mounted displays are primarily used for video sharing...... Listed under: How To - DIY - Projects

501. Raspberry Pi GPIO with PIR motion sensor: Best tutorial

This tutorial, based on the latest Raspberry Pi B+/model 2, will show you how to interface a PIR motion sensor with the Raspberry Pi. And also guides you to use the GPIO pins on it. The GPIO pins on the raspberr critical when it...... Listed under: Sensor - Transducer - Detector Projects

502. The Best way to Connect Raspberry Pi to Laptop display

What are the stuff required to do this? Raspberry Pi. Ethernet Cable. Laptop Card with Raspbian. Micro USB Cable. (Optional) Components required for setting it up the first time: HDMI/ AV Display. Keyboard Mouse. How does it work? To connect raspberry pi to...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Solar Power, Weather and the Raspberry Pi SwitchDoc Labs is in the process of building a Solar Powered Ras Pi Weather Station. The design will be released as a SwitchDoc Appnote, an Instructable and a series of posts on SwitchDoc.com. are right in...... Listed under: Solar energy projects

504. USB MIDI interface

The RPC is a MIDI controller and implements the age-old 1980s serial MIDI bus, and the Protosynth must be capable of interfacing with it. But in general use a USB device port is much more practical than the three ubiquitous MIDI ports; it allows connecting...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
505. Raspberry Pi – MSP 430 – LCD DEM16101 LCD unusable No matter how hard I tried, I couldn't figure out how to use it. I think I managed to talk to the KS066 controller correctly (I reliably reset the controller using the initialization sequence) but I could not figure out the voltage...... Listed under: LCD Projects

506. Nokia 5110 graphics tutorial Okay, here's the deal. There are some tutorials on youtube showing how to get graphics to show on the Nokia 5110 and that's great. If you just want a simple way to do that, go and watch them instead but there are a few problems...... Listed under: Phone Projects

507. Use RPi, Azure, and Cortana to Automate your Home! Introduction There is new technology all around us and only more coming everyday. Our micro controllers are getting faster, are phones getting smarter, and the cloud is becoming stronger. With all this new technology everyone is asking themselves: How can I utilize it all?...... Listed under: Home Automation Projects

508. IOT: iPhone Controlled Mini Fan Step 1: Materials iPhone Mac with xcode RFduino RFduino Battery Shield RFduino USB Shield Battery Wires TIP120 2.2kOhm resistor Diode DC Motor Fan blade for DC Motor Step 2: Circuitry Setup the circuitry as shown in the diagram. Make sure the servo is small enough, we...... Listed under: Phone Projects

509. WS4E – Ham Radio And Other Stuff The Arduino Fox Hunt Transmitter will be documented in another post, in this post I want to document the Raspberry Pi SSTV Field Day Beacon. The one thing that I don't like about the Raspberry Pi is that it only has digital input/output logic lines...... Listed under: Radio Projects

510. Reading analogue data on a Raspberry Pi using MCP3002 I got a bit disappointed with my little bus pirate yesterday. I'll investigate to update it to fix the odd SPI behaviour another time, but for now, its on to trying to read the MCP3002 SPI ADC chip directly using Raspberry Pi. However,...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

511. Interfacing an I2C GPIO expander (MCP23017) to the Raspberry Pi using C++ (i2cdev) The I2C Bus The I2C bus is a two wire bus developed by Phillips/NX wire if you want to include power and ground), that is used to connect a single master device to up to 120+ slave peripheral device master device is typically a...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

512. Raspberry pi as an nrf24l01 base station with python for smart home or internet of anything projects Internet connectivity in an in part of various micro-controller projects, specifically those using the atmega328p with arduino ide/avr-gcc. NRF24l01 modules provide an inexpensive and reliable wireless link. In many projects, an additional avr/arduino is hooked up to a computer with internet conn for linking the...... Listed under: Internet - Ethernet - LAN Projects

513. Conguration Utilities for XBee Radios Xbee Radios I purchased two XBee Series 1 Module (Freescale 802.15.4 firmware) from Ada. These are manufactured by Digi and are low-power module with wire antenna (XB24-AWI-001). They have a 250 kbps RF data rate operate at 2.4 GHz. These radios use the IEEE 802.15.4 networking protocol and can perform point-to-multi-point or peer-to-peer networking,...... Listed under: Radio Projects

514. NetWorker – an advanced web server with a microcontroller An Internet connection would be a valuable addition to many projects. Often designers are put off by the complexities involved. The 'NetWorker', which consists of a small printed circuit board, a free so library and a ready-to-use microcontroller-based web server, solves these problems and...... Listed under: Internet - Ethernet - LAN Projects
PCB designing and isolation milling using only free software. In this Instructable, I will show you how to design and fabricate your own PCBs, exclusively using free software that runs on Windows as well as on a Mac. Things you need: computer with internet connect/mill/router, the more accurate the better 45°/20° V-Bit. Listed under: Development Board - Kits Projects

Solar Phone Charging Back Pack: Step 1: Materials and Tools. Materials (1) backpack. There are 2 requirements when choosing a good backpack for this project: room to install your solar panels, and a pocket to store your cell phone. The Drifter square back pack is perfect for this project. (1) portable. Listed under: Phone Projects, Solar energy projects

Build an Intruder detector with Raspberry Pi and robomq.io: Device, sensors, and systems connecting together are driving the next generation of applications creating the Internet of Things (IoT). robomq.io provides an open standard based platform to connect your devices and sensors to the back end applications, processes, and people, enabling you to build... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Analogue Sensors On The Raspberry Pi Using An MCP3008: inputs which means it is a bit of a pain to use many of the available sensors. I wanted to update my garage security system with the ability to use more sensors so I decided to investigate an easy and cheap way to do it. Listed under: Sensor - Transducer - Detector Projects

LED Rubik's Cube With Arduino: In this instructable I'll show you how you can build your own LED Rubik's cube. This project was done as an introductory electronics course at Pomona College. Groups were given approximately two months to complete a project of the choosing, the only requirement being that... Listed under: LED Projects

Access Control of Door and Home Security by Raspberry Pi Through Internet 1: INTRODUCTION: In this modern world crime has become ultra modern too! In this current time a lot of incident occurs like robbery, stealing unwanted entrance happens abruptly. So the security does matter in this daily life. People always remain busy in their day-to-day life... Listed under: Home Automation Projects, Security - Safety Projects

Model Railway Automation: This note introduces my experiences of using the Raspberry Pi to automate a model railway. Two aspects covered: • Sending commands to a DCC controller • Detecting a train’s position. Sending commands to a DCC controller: The RPi is connected to a Hornby Elite DCC controller... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Raspberry Pi GPIO and LED Flash an LED: Works Remotely: In this exercise you update your RPi, install the GPIO tools, and write a program to flash an LED ten times. If you use PuTTY to log in remotely, you could flash LEDs on another continent. I have tried... Listed under: LED Projects

Solar Powering My Home: My home has been solar powered since June 2013 and the power system has proven its reliability. I'm an owner of an OFF GRID solar power system. I decided to publish this instructable to let fellow DIYers know the basics to design and install... Listed under: Home Automation Projects, Solar energy projects

On/Off Project – Switch a light on/off using your smart phone: If you found this article after doing a search on Google, welcome! On this website you will find plenty of content around DIY home automation using open-source hardware. Enjoy the article! I have been a lot about writing tutorials using the Raspberry Pi for home automation, as well... Listed under: Phone Projects

Solar powering a Raspberry Pi for Bitcoin mining: Introduction: As a simple one-GPU bitcoin miner, the recent growth in ASIC (Application specific integrated circuit) bitcoin mining hardware has been a real gamechanger. In my case, there are some disadvantages to the change, namely how to spend the few bitcoins I have mined on... Listed under: Solar energy projects
<table>
<thead>
<tr>
<th>Project</th>
<th>Description</th>

</thead>
<tbody>
<tr>
<td>526. Air Pollution Detector</td>
<td>This device is intended to provide the user with a cost-efficient means of determining air quality. Our sensor focuses on the five components of the Environmental Protection Agency’s Air Quality Index: ozone, particulate matter, carbon monoxide, sulfur dioxide, and nitrous oxide. This device detects all. Listed under: Sensor - Transducer - Detector Projects</td>
</tr>
<tr>
<td>527. Home automation with Raspberry Pi 2 and Node-RED</td>
<td>Node-RED is a visual tool for wiring the Internet of Things that can be run on Raspberry Pi and allows for rapid prototyping of projects. In this tutorial we will first set up Node-RED on a Raspberry Pi 2, before creating a flow that. Listed under: Home Automation Projects</td>
</tr>
<tr>
<td>528. Raspberry Pi in a NES Case – Part 1 – Wiring up the front panel and external connectors</td>
<td>Raspberry Pi is a great project computer, it is cheap ($35), runs Linux (or Risc OS) and has lots of resources available around it. When mine arrived, I didn't really know what to use for, but then it hit me: I can build an emulator. Listed under: Game - Entertainment Projects</td>
</tr>
<tr>
<td>529. Resources – Computing Club Sessions – Raspberry Pi 2 – Python Overview</td>
<td>This is an opportunity to look at another language (Python) and another IDE (IDLE) and have another go at Scissors, Paper, Stone. Hardware This is going to use the GPIO pins (the two rows of 13 headers in total) on the Pi. We'll. Listed under: Interfacing(USB - RS232 - I2c -ISD) Projects</td>
</tr>
<tr>
<td>530. Talking to a ZWave Switch using open-zwave</td>
<td>Z-Wave is a wireless communications protocol designed for home automation, specifically remotely control applications in residential and light commercial environments. The technology uses a low-power RF radio embedded in electronics devices and systems, such as lighting, home access control, entertainment systems and. Listed under: Home Automation Projects</td>
</tr>
<tr>
<td>531. Raspberry Pi Garage Door Opener with GaragePi Introduction</td>
<td>When I was little, I used to push the garage door button from inside the garage and then run out the garage while it’s closing... carefully jumping over the sensor so I don’t trip the safety mechanism. It wasn’t back then and. Listed under: Home Automation Projects</td>
</tr>
<tr>
<td>532. How To Use GPIO Pins On Raspberry Pi – Buttons And LED Tutorial</td>
<td>What Are The GPIO Pins on Raspberry Pi? A great feature on the Raspberry Pi is the pins (stands for General Purpose Input Output). These GPIO pins on Raspberry Pi can be found in 2×13 header pins which can perform tasks include serial UART, 3V3. Listed under: LED Projects</td>
</tr>
<tr>
<td>533. Design Your Home with Autodesk Homestyler</td>
<td>Autodesk Homestyler is a free online home design software, where you can create and share your dream home designs in 2D and 3D. The online tool allows you to either upload your existing floor plan or create a new. Listed under: Home Automation Projects</td>
</tr>
<tr>
<td>534. Announcing OpenSprinkler Beagle (OSBo) v1.0</td>
<td>Following the sneak-peak preview, I am excited to announce that OpenSprinkler Beagle is officially released! OpenSprinkler Beagle is an open-source sprinkler / irrigation extension board for the BeagleBone Black. It uses GPIO pins to control an unlimited number of sprinkler valves. Listed under: Wireless projects</td>
</tr>
<tr>
<td>535. beakn v0.3 : DIY Lync Status Light with a RaspberryPi, .NET, Mono and MQTT</td>
<td>I'm continuing to build out “beakn” my DIY Lync Status Light. This is what I'm calling a “maker experience” project. I want to know what a maker goes through to build things so I'm building it with many different platforms as possible. I've built. Listed under: How To - DIY - Projects</td>
</tr>
<tr>
<td>536. Raspberry Pi OpenCV Pan &amp; Tilt Face Tracker</td>
<td>Create your own face tracking, pan and tilt camera on the Raspberry Pi! This tutorial demonstrates use of the OpenCV (computer vision) library to identify and track faces on the raspberry pi using two servos and a USB webcam. For the interested, I previously. Listed under: Video - Camera - Imaging Projects</td>
</tr>
<tr>
<td>537. 1: A single LED</td>
<td>Before we even get started with the GPIO, lets make an LED light up by simply wiring it to the +3.3v supply and 0v. We have a yellow wire from the Pi’s +3.3v supply to the breadboard and this connects to an LED then. Listed under: LED Projects</td>
</tr>
<tr>
<td>538. Morse Code on an LED</td>
<td>Difficulty: beginner This tutorial will guide you through safely connecting up an LED to your Raspberry Pi and being able to turn it on and off from Python. Then you will write a program to take input from the keyboard and send it out in. Listed under: LED Projects</td>
</tr>
</tbody>
</table>
Connecting a 16×32 RGB LED Matrix Panel to a Raspberry Pi Overview Everyone loves a colorful LED screen! Our 16x32 RGB LED display makes a fantastic addition to your Raspberry Pi. It is pretty easy...... Listed under: LED Projects

How to make a Raspberry Pi surveillance and alarm It’s the 1st of July, and hopefully you are lucky enough to go on holiday soon, great way to make a useful project right before leaving home alone! This is a cheap but powerful system of surveillance and alarm know it’s...... Listed under: How To - DIY - Projects

Using A Joystick On The Raspberry Pi Using An MCP3008 While browsing eBay looking at electronics stuff I found a few interesting things to connect to the Pi. The first item was a small 2-axis analogue joystick. They are similar to the thumb-sticks you would find on a games console controller. These modules are cheap and...... Listed under: Game - Entertainment Projects

A cheap Bluetooth serial port for your Raspberry Pi While working on my Arduino based robot vehicle project the idea came to me that the Bluetooth module that I’m using as a remote control receiver for my robot would make a great addition to my Raspberry Pi. In this article I describe how to...... Listed under: Bluetooth Projects

Gertboard-Pi Potentiometer Controlled Motor In the potmot (for potentiometer-motor) test we use a potentiometer ("pot") connected to the analogue to digital converter (A/D) to get an input value, and this value is used to control the speed and direction of the motor is set up so that at one extreme, the...... Listed under: Motor Projects

Expanding the Raspberry Pi with PiFace and Pi Rack The marvellous Raspberry Pi, essentially a cheap, small PC, is a great device for education or home projects like media streaming. Out of the box though, it is not ideal for controlling other devices other than by direct connection. What if you wanted to...... Listed under: Home Automation Projects

Build Raspberry Pi robots: Best Tutorial for beginners If you are a beginner to Raspberry Pi and were looking for a simple hardware project, then look no further. This tutorial will show you how to develop a python based robot which avoids obstacles and navigates in your environment. Obstacle avoiding robots are fairly common and easy...... Listed under: Robotics - Automation Projects

Raspberry Pi Control Motor Speed Controlling a motor is one of the most exciting things you can do with your Raspberry Pi. Motors are power-hungry components. They often require more power than the 3V3 your Raspberry can provide. That’s the reason we will connect the motor to a external power supply...... Listed under: Motor Projects

Research: Raspberry Pi – Pins, Buttons and Circuits In a previous post I wrote about how you can control the function of the Raspberry Pi’s software through writing scripts, but one of the remarkable things about the Pi is that it is also capable of interacting with the physical world through its GPIO pins. GPIO stands...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry Pi STL in a Box I promised more details in the future about the Raspberry Pi STL build. Well, against all odds, I’m going to deliver! The project exists purely to solve a problem with getting audio between two sites for a hospital radio station. They currently use a costly...... Listed under: Radio Projects

A Raspberry Pi Interface Board The Raspberry Pi computer is eminently suitable for interfacing. It has 17 GPIO lines which can be programmed to be either inputs or outputs as well as various other functions. They are very low power lines however, and on their own can only drive tiny LEDs...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Building a segway with Raspberry Pi Step 1: Materials Raspberry Pi, AC-to-DC 5V power adapter, plastic enclosure I am using Raspbian 2, with Raspbian installed. Cost $45.0 USB WiFi adaptor, I’m using Edimax Wi-Fi adapter. Cost $10.0 DC motors x2, wheels x2, car frame x2, acrylic sheet x2, motor bracket x2,...... Listed under: Robotics - Automation Projects

Raspberry Pi:- USB, Ethernet, crashing and other problems Do you have frustrating issues with your Raspberry Pi Are you experiencing problems with your Raspberry Pi that you can’t explain or figure out why? You bought what you thought were good accessories (Keyboard, Mouse, WiFi adapter and cable) and well read on, you may discover your problem...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Internet - Ethernet - LAN Projects

Cedarville University builds RoboBoat vehicle with 4 Raspberry Pi’s, MATLAB and Simulink In Part 1, Sergio described the RoboBoat Competition and introduced our entry, the Cedarville University RoboBoat team. In this article, we will go into depth with regards to how we programmed our autonomous navigation system...... Listed under: Robotics - Automation Projects
553. Tutorial – sPiRobot: Control & See what your Robot is seeing from Anywhere Why sPiRobot? If you are following my blog I always use Arduino Board to make my projects, but for this I use Raspberry Pi as a brain of my Robot. That's the reason I called this "sPiRobot". sPiRobot's 1x Raspberry Pi 1x Webcam Listed under: How To - DIY - Projects

554. Remote Logic The Raspberry Pi is often hailed for its incredibly cheap price. Other low-cost development and educational boards are available (e.g., the Beaglebone), but for some of these systems, the additional peripherals that are required can quickly amplify the cost. The Raspberry Pi, however, is designed...... Listed under: Wireless projects

555. Aaron's piHouse Monitor Introduction I have been using microcontrollers for a long time now. I started in college as part of the project and have never stopped. Professionally, educationally, hobby, I've done projects of all types. Recently I decided to try something different – using a Raspberry Pi. It is...... Listed under: Home Automation Projects

556. Home Automation with Raspberry Pi The Surveillance System this year I planned to travel with my family to China for a few weeks and had to leave alone our house. While being on vacation, I wanted to check sometimes if everything was alright at home. So I decided to...... Listed under: Home Automation Projects

557. Part 2: How to build a High-Definition FPV UAV using a Raspberry PI with HD camera, using a high speed WiFi link This is the second part of a 2-part series on 'How to build a High-Definition FPV UAV using a Raspberry PI with HD camera, using a high speed WiFi link. In my previous post, I discussed the parts I used, and...... Listed under: Video - Camera - Imaging Projects, Wireless projects

558. 3D Printing MouseAir V2 – Part 1 / Raspberry Pi Project The Mouse Air project has been around in various stages since April of 2014. The goal of the project (conceived in a bar, the Fedora in Coeur d'Alene Idaho and named by Sarah, the most excellent bartender there. And some BlueMoon Beer,) was to be able...... Listed under: How To - DIY - Projects

559. Gertboard Open Collector Drivers: ULN2803APG If you were wondering how to use the open collector drivers on the Gertboard ve then you have come to the right place. As shown in the diagram, the red area marked out is the open collector driver section. The ULN2803APG is a Darlington...... Listed under: Development Board - Kits Projects

560. Raspberry Pi – homemade level converter for serial communication rs232 3.3 volts to 5 volts TTL for AVR microcontroller I found that the Raspberry interface rs232, described in a older post by myself, was too bulky. Pi and AVR should be connected through a less amount of wires. So I've searched for best hints to solder a cheap and uncomplicated level converter...... Listed under: Home Automation Projects

561. PIE1 – Raspberry Pi Sends Live Images from Near Space HAB (High Altitude Ballooning) is a growing hobby where enthusiasts use standard weather balloons to put small payloads typically 100g-1kg into “near space” at altitudes of around 30km or so, carrying a tracking device (so the balloon position is known throughout the flight) and usually...... Listed under: Video - Camera - Imaging Projects

562. Raspberry Pi – RGB LED conversion I was looking at the cost of an Arduino and Ethernet shield and thinking that they are quite expensive compared to a Raspberry Pi. So time to update my Arduino RGB LEDs project to run on a RPi. As noted all over the web the...... Listed under: LED Projects

563. Section 3: Building the Turing Machine Introduction In this project, we shall build a 3-symbol Turing machine using 11 bicoloured LEDs to represent the cells on the tape. Green represents a 1, red represents a 0 and a blank is represented when the LED is off. We shall contr... Listed under: LED Projects
564. Pi Ball – A Spherical and Interactive Raspberry Pi 2 Case Here were my requirements - Use a Pi (Raspberry Pi 2 in the case) - Spherical case, that can be bounced, kicked, thrown - Accelerometer onboard to monitor the motion of the ball - Wireless everything! Wireless keyboard/mouse, networking, so and video (Pi Ball in...... Listed under: Game - Entertainment Projects

565. Temperature Measurement for Lab and Science Projects Introduction Every lab (home, office, school) needs temperature measurement capabilities. Measuring temperature for science experiments is hard – all sorts of materials, liquids, and chemicals may be involved in the experiment. Large temperature range may need to be covered. The sensor used for this task (a thermocouple)...... Listed under: Temperature Measurement Projects

566. A GSM/GPRS & GPS Expansion Shield for Raspberry Pi Today we present an expansion shield for Raspberry Pi to control the very effective GSM/GPRS SIM900 and SIM908 (with GPS) modules: in this way it is possible to extend the functionality of Raspberry Pi for mobile applications (eg: remote control) and, by employing the SIM908...... Listed under: Wireless projects

567. Solar Power on the Raspberry Pi – SunAir designed to charge LiPo batteries from Solar Panels and power your Pi. First SunAir Kickstarter Update (December 2014) Published here. An earlier generation of this project was used in Project Curacao. You also can track the sun, detect low power conditions and Works perfectly with...... Listed under: Solar energy projects

568. Project Coffee: Espresso Machine One time ago, I embarked on a project to control my Gaggia Classic Espresso machine with a Raspberry Pi. Obviously, you can buy a fully automatic “bean to cup” machine...... but where’s the fun in that! This project started out the simple idea of...... Listed under: Home Automation Projects

569. GOMRF 29.45 MHz Receiver Project In 2007/8 AMSAT-UK put considerable work into a proposal to the European Space Agency (ESA) to place an Amateur Radio payload on the mass dummy on the maiden flight of the Vega launcher. Known as iSTAR (Integrated Suite for Teaching and Amateur Radio) it was...... Listed under: Wireless projects

570. Interfacing EM-18 RFID Reader with Raspberry Pi RFID (Radio Frequency Identification) uses electromagnetic fields to read, monitor and transfer data from tags attached to different objects. It is not necessary that the cards are to be in visibility of the reader, it can be embedded in the tracked object. The tags can...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

571. Controlling Domestic Hot Water Supply with Raspberry Pi Contents Background Hardware Pi Wiring Heating System Wiring Software Remote Access Gas Consumption Impact Background I want to implement a Raspberry Pi controlled heating and hot water system for the hot water side, the objectives are Primary Always ensure there is sufficient hot water available...... Listed under: Home Automation Projects

572. Dual DC motor control using PWM with the Raspberry Pi This project uses two IRF 630 MOS-FET transistors for pulse width modulation and two relays to change the direction of the two motors. The circuit diagram is below. The two IRF 630 MOS-FETs are connected to the GPIO 15 and 18 pins of the...... Listed under: Motor Projects

573. Home Weather Display In this project, we use a Grove DHT (Digital Humidity and Temperature) sensor as a Raspberry Pi temperature sensor. This project uses a Grove OLED display, connected to the Raspberry Pi, to show the temperature and humidity. You can use the project as designed: a simple weather station for...... Listed under: Home Automation Projects

574. Home Energy Monitoring System The Purpose (Mission) Monitor, archive and analyze energy consumption in the house Visualize historical consumption data Access data remotely from Web Eventually include data from other sensors, like temperature, pressure, humidity, motion, light, security, etc. UPDATE: Temperature/Pressure sensors added: Additional Sensors for Home Energy Monitor Listed under: Home Automation Projects

575. Connect a sensor to your Raspberry Pi to warn you when there are noxious gases about! To detect a fart with the Raspberry Pi, we use a sensor that is responsive to one or more of the volatile sulphuric compounds which make up 1% of flatulence (i.e. the compounds which make farts smell). Essentially, we need to give the...... Listed under: Sensor - Transducer - Detector Projects
**XMOS startKIT: Building an XMOS and Raspberry Pi Robot XMP-1**

The XMOS startKIT from Farnell (or Newark) is a very cost-effective (£12 including VAT) processor platform that works well with the Raspberry Pi. Together is possible to construct robotics appliances with almost no soldering required. The XMOS startKIT is a near-credit-card sized board. Listed under: Robotics - Automation Projects

---

**Control an LED from your web browser or smartphone using Raspberry Pi**

A first project – Internet controlled LED

In this simple, inexpensive project you can connect a light emitting diode to your Raspberry Pi, and turn it on and off using any web browser. The even an app for Apple, Android and Windows smartphones. Prerequisites To run this...... Listed under: LED Projects

593. 1-wire temperature sensor DS1820 at Raspberry Pi (GPIO directly) To measure the indoor or outdoor temperature with the Raspberry Pi there are several possibilities. This article describes the version with the minimal amount of external components. This is based on the DS18S20 temperature sensor and the software emulation of the 1-wire protocol. The DS18S20...... Listed under: Temperature Measurement Projects

594. Raspberry Pi Serial Port Many of the GPIO pins on the Pi have other special uses. The most useful of these are the serial port pins #10, which are transmit and receive for an RS-232 serial port. By default this port will output diagnostic messages during boot...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

595. Hacking the Lego EV3: Build Your Own Object Sensor "Eyes" Although the Lego Mindstorms EV3 kit comes with a variety of cool sensors wouldn’t it be awesome to build your own custom sensing device? This project will show you how to create your own unique object sensors for your Lego EV3 controller using basic electronics...... Listed under: Sensor - Transducer - Detector Projects

596. How to detect WiFi access points using Raspberry Pi As you can see – this system is used as a mobile wireless network (WLAN) detection point. A small computer intended to be used for WLAN collection, including from UAVs. Hardware: IBM Power PC 405GPR processor, 64 MB SDRAM, 16 MB of built-in flash, 4 mini...... Listed under: Wireless projects

597. Multi-Cell LiPo Charging Overview Lithium Polymer Batteries pack a lot of power in a small package. But they can be tricky to charge safely. The Adafruit LiPo Chargers all provide a charging cycle designed to safely charge 3.7v Lithium Polymer cells. But what if your project needs more...... Listed under: Battery Projects

598. 28BYJ-48 Stepper Motor Control System Based On Arduino With ICStation Team introduces to you this stepper motor control system based on the ICStation UNO compatible with Arduino. It uses a ULN2003 chip to drive it. The working voltage is DC5V. It is widely used in ATM machine, inkjet printer, cutting plotter, fax machine, spraying equipment,...... Listed under: Motor Projects

599. Touch Pi: Portable Raspberry Pi Overview In this project we're building a portable Raspberry Pi using the model A+, PITFT 3.5" display, 2500mAh lithium polymer battery. We designed this very simple case in CAD - it’s a two part enclosure that's fasten together with screws. All the...... Listed under: Development Board - Kits Projects
Quick2Wire Interface Board – Assembly and Troubleshooting TESTS (1) On the Quick2Wire boards there is a 3-pin male header with pins for 5V, 3.3V, attached the test circuit to 5V and GND — it glowed as it should. Same for 3.3V and GND. So I decided that the board was…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Know all about Raspberry Pi Board Technology The Raspberry pi is a single computer board with credit card size, that can be used many tasks that your computer does, like games, word processing, spreadsheets and also to play HD video. It was established by Raspberry pi foundation from the UK…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Control stepper motors with Raspberry Pi and node.js Continuing the journey on how to control things with node.js on the Raspberry Pi, set up 2 stepper motors and controlled them in real time with Hydra. You can read further on how to install Hydra on Raspberry Pi here. The to pins…… Listed under: Motor Projects

Interface I2C with the Raspberry Pi Note: Full source (still not finished) is available github.com/drcrane/raspberryrfid. The Raspberry pi has a few different interfaces available to it, one is I2C (a protocol created by Philips and used in many places, it is the basis of VESA DDC). I had the opportunity recently…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry Pi GPIO driving Servo I have experimented with GPIO on the Raspberry Pi, just turning an LED on and off here. But since Ben Croston has improved the RPi GPIO Python library to do most of the work in C and I can confirm that it is a…… Listed under: Hacks DIY - Projects

Raspberry Pi B+ for Sound source Still I need good PC for ripping and have to buy source from internet(online), if do you have Good probably reproduce good sound from Raspberry Pi B+ Music server.Raspberry Pi B+ is very small PCB actually small PC for kids in I for Audiophile…… Listed under: Sound - Audio Projects

Some fun with 16 RGB LEDs and a Raspberry 3.14159 RGB LEDs consist of a red, a green and a blue LED conveniently encapsulated package. Theoretically one such should be able to produce any colour of the rainbow, but I have restricted my project - for reason explained later - to just red,…… Listed under: LED Projects

Lunchbox Internet Radio Guide What I've made is a radio with 6 buttons and a 20x4 LCD screen. There is an "ON" button, and "OFF "BACK", "PLAY", "STOP" and "NEXT". It is connected to the internet via WiFi, and it powered by a USB hub connected through a Pi-Supply…… Listed under: Radio Projects

Connecting SNES sockets to the Raspberry Pi: An assembly guide In a previous post, I described my idea of a universal console with the Raspberry Pi. I presented, what I called, the SNESDev-RPi, which is an SNES-controller interface for the Raspberry Pi. A core element of this interf SNES-adapter PCB that I recently…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry Pi Serial Port and Breakout Board Serial port to the Raspberry Pi and breaks out some of the PI's pins for experimental interface board was designed to be simple and used for initial experimentation. It can be built on a single-sided PCB using home-n PCB fabrication methods. KiCad source files…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

TNC-X for Raspberry Pi (Packet radio) AX2S TNC-Pi is a special version of TNC-X designed to interface directly with the Raspberry Pi computer. It can connect to the Pi either via the Pi's serial port, or via the I2C protocol. In the latter case, a single Pi can support m TNC-Pi's at…… Listed under: Radio Projects

Using the Raspberry Pi GPIO with Python So you got your Raspberry Pi, installed an OS and using it just like your computer. Great! what? You didn’t buy a Raspberry Pi just to replace your computer, did you? Well, Raspberry Pi can do a lot more… much more tha computer…… Listed under: Development Board - Kits Projects

Raspberry Pi – Dual Element Homebrew Boiler/HLT and Fermentation Fridge Controller The purpose of this device is to allow someone who makes Hor Beer using the "All Grain" method, to control the temperature and timings of various parts of the beer making process when used in conjunction with a H made Boiler. However, the physical device,…… Listed under: Home Automation Projects

NES Controller on the Raspberry Pi Part 1: The Hardware & Driver Some time back, I joked that the Raspberry Pi’s GPIO port really for Game Port IO… So to make that joke come true, I present a way of interfacing the NES Joysticks to the Raspberry Pi. First you. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
614. **Banana Pi BPIDuino UNO Board Module**, compatible with Arduino UNO, available for Raspberry Pi Quick Details Package: plastic sealed; carton box packed; Model Number: BPI UNO Type: Drive IC Brand Name: BPI Place of Origin: Guangdong, China (Mainland) Dissipation Power: 3W Operating Temperature: -10 ~ 65°C Supply Voltage: DC 5V Application: Computer Specifications Banana Pi BPIDuino UNO Board...... Listed under: Development Board - Kits Projects

615. **Expansion Shield for RaspberryPi** compatible with Arduino Let’s expand RaspberryPi functionalities with a shield that is compatible with Arduino pinout and with an onboard analog to digital converter with 16-bit resolution. Further expansions that we will present in the future will allow you to add a DAC, a number of additional...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

616. **ICStation 16 Music BOX DIY Kit Sound Module** 1. Features 16-tone box under your control, arbitrarily issued 16 kinds of interesting sound, both an electronic toy can also be used as a doorbell or alarm. 2. A suite of profiles: Kit Model: BOX-16 Operating voltage: DC 3V PCB size: 48mm (length) * 42mm (wide) Control...... Listed under: How To - DIY - Projects

617. **Switching mains electricity with a Raspberry Pi and a remote control** Home electronics can open up a new dimension in home automation, especially when used with an Arduino or Raspberry Pi. There is however a very real danger when using mains electricity, including electric shock and danger of electrical fires if the components are not...... Listed under: Home Automation Projects

618. **Make a torch and burglar alarm in Scratch with the CamJam EduKit and ScratchGPIO** First steps Like many projects, this one began with LEGO. To stop the breadboard sliding all over the place, I created a LEGO housing for it and the Raspberry Pi that would keep them conveniently together. My Raspberry Pi is in a PiBow case, which...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

619. **What is a serial-to-parallel shift register?** A serial-to-parallel shift register (or SIPO: Serial In Parallel Out) lets you take a sequence of signals on one output, and split them up into several separate outputs. For example, if you don’t have enough GPIO pins on your Raspberry Pi, Arduino, or other computer/microcontroller,...... Listed under: How To - DIY - Projects

620. **Raspberry Pi Motor Controller Overview** An AVR, typically an ATMega168P, is controlled from the Pi via the 3.3V UART, and provides PWM signals to the Motor Driver. Features Controlled via the UART on the Pi GPIO Header. Up to 2A bi-directional current per cha...... Listed under: Motor Projects

621. **Lighting an LED using a Breadboard & a Raspberry Pi Lights**, Jumper wires & the Resistance – Jumper wires are typically 22 gauge solid-wires with insulation pre-stripped and readied for insertion in or out. Resistors resist the flow of electrical current, thereby control WHERE and HOW FAST it flows. [Thought experiment: If controlling water, using...... Listed under: LED Projects

622. **Make an alarm clock with a Raspberry Pi Breadboard** If you’re new to electronics and the Raspberry Pi (RPI), you might not be familiari with the breadboard. The idea of the breadboard is to allow you to connect up electrical components without needing to solder...... any other elaborate procedure. It’s basically...... Listed under: Clock - Timer Projects

623. **AngelBlocks – Maker Kit Introduction** AngelBlocks is an open source smart home building block system that is suitable for a wide range of users. Homeowners with little or no technical skills will find AngelBlocks intuitive and easy to use. Makers, hackers, and developers will love AngelBlocks because they can...... Listed under: Home Automation Projects

624. **Super Mega Ultra Pi Boy 64 Thingy Build Getting Started!** I had recently bought an original Gameboy DMG from Good Will for a whopping $5.00, condition unknown. Taking a gamble, I purchased it and took it home to find that it had severe damage caused by a battery that exploded a leaked all...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
625. Raspberry Pi gains Wolfson HD audio card Newark Element14 and Wolfson have launched an HD-ready Wolfson Audio Card for the Raspberry Pi with 192kHz sampling, MEMS mics, and I/O including S/PDIF. The Wolfson Audio Card extends and enhances the Linu... Listed under: Sound - Audio Projects

626. ULN2803 8-channel RC Servo Port for Raspberry Pi Bring in some muscle to your output pins with 8 mighty Darlingtontrans! This drive contains 8 drivers that can sink 500mA from a selectable 5V or DC input voltage supply and has kickback diodes included inside for driving coils. This will let your little... Listed under: Motor Projects

627. Monitoring Room Temperatures with Moteino’s and Raspberry Pi Introduction Following on from using a Raspberry Pi to capture the electricity consumption of my home, I have over the last 2 years installed Solar Thermal Hot Water panels and very recently Solar PV. This meant that I had an opportunity to create something... Listed under: Temperature Measurement Projects

628. Send Raspberry Pi Data to COSM The combination of connecting a Raspberry Pi to COSM makes creating an internet of things much than it has been in the past. The Pi with it’s easy access to ethernet / WiFi and COSM’s drop dead simple usability will graph all sen data... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

629. Fish Feed Time – Wireless Socket Control with the Raspberry Pi Overview Being a bit of an unnecessary geek, I’ve decided to pimp out my fishtank with Feeding Time button! “What’s one of those?” I hear you ask! Well... As it’s a Marine Reef tank, it’s a bit fiddly to feed some of the corals... Listed under: Wireless projects

630. Motor Protection against Single Phasing and Overheating The rise in temperature level of a motor during its operation beyond a permissible limit is known as overheating. The causes of motor overheating are motor overloading, distortion in the supply voltage, impaired cooling capability, unbalanced supply voltages etc. Because of overheating, we can face... Listed under: Motor Projects

631. Quick2Wire Analogue Board – Connecting to Raspberry Pi This is a short report on how to connect Quick2Wire’s analogue board directly to a Raspbe... The key is the pinout for the six-pin boxed headers on the Q2W board. I ignored the 5V and Int lines, running lines only for 3.3V, GND,.... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

632. Piezo Ring Tones with Raspberry Pi The ringtone text transfer language (RTTTL) is a way to represent music data for play on older phones. The format was created by Nokia for their phones, but it also works with GPIO pins and a piezo buzzer. This project shows... Listed under: Sound - Audio Projects

633. Hooked on Arduino & Raspberry Pi Infrared Fan Speed Control This project demonstrates using an infrared light beam to measure the speed of a fan, and to adjust the speed to a preset value. I used a small 12 Vdc fan from a PC CPU heat sink. It will run... Listed under: Wireless projects

634. Raspberry Pi Launches New Model B+ The Raspberry Pi Foundation today announced the final revision of the original Raspberry P development board. The Raspberry Pi development board since its introduction has actually sold over 3 million units globally, indi... Listed under: Development Board - Kits Projects

635. Raspberry Pi B+ Power Protection Circuit The circuit functionality is mostly obvious. There is polyswitch F1, a self-resetting fuse which protects the RPI from overcurrent condition. There is the Transient Voltage Suppressor (TVS) diode D5 which protects the RPI aga... Listed under: Other Projects

636. DIY диммер: guidebook to components In the recent past we have shared the complete set of gerber-files with our expensive readers. That all interested people have a possibility to order to themselves printed-circuit boards. As it are inexpensive, as it were ma by us. Today we taken the following step. We publish Listed under: How To - DIY - Projects

637. Solder Pen, PCB Circuit, Python Programming Solder Pen I had some color Sharpies, which never worked very well, even when I fir... them. I just tried them, and all but one, would not even write. I threw them in the trash. Later, I got them out of the trash because. Listed under: Development Board - Kits Projects

638. IO Pi Introduction: The I2C address bits are selectable using the on-board jumpers. The MCP23017 supports up to 8 different I2C addresses so with two MCP23017 devices on each IO Pi you can stack up to 4 IO Pi boards on a single Raspberry Pi giving a... Listed under: Development Board - Kits Projects
639. Controlling a Servo Motor Assembly
The servo motors have three pins, two for power: red(+) and black (-), and one for control. Because the servo motor draws too much energy, we need to use the batteries to power the servo (the Raspberry Pi doesn't have so much if...). Listed under: Motor Projects

640. Raspberry Pi CD Box Robot
English: This project is a work that is taking on many weekends. My son, Gabriel, watched the movie "W" and proposed that we built a similar robot. I see this model in Dx.com and get inspired by it. We use some scraps we find here... Listed under: Robotics - Automation Projects

641. Raspberry PI Safe Breakout
I have always wanted to access the Raspberry Pi GPIO pins in a safer manner. Those are not 5V tolerant, and need a level shifter. I came across this really nice level translator chip from TXB0108 from Texas Instruments. It is a bidirectional 3.3 to... Listed under: Security - Safety Projects

642. Physical computing with Raspberry Pi
Difficulty: beginner
This tutorial will help you to receive input to your Pi from physical switches buttons and to debounce if necessary. It will show you how to automatically run a program when a button is pressed (a GO button robot, for...). Listed under: Calculator Projects

643. Easy Temperature and Humidity on Raspberry Pi
Step 1: Connection
EzTemp uses the serial port on your Raspberry Pi to communicate. Identify the serial pins on your Raspberry Pi. Then connect: RPi GND to EzTemp GND. RPi Tx to EzTemp Rx. RPi Rx to EzTemp Tx. RPi 3.3V to EzTemp 3.3V. Notice... Listed under: Temperature Measurement Projects

644. Arduino-Based Blue Box (Phone Phreaking)
Step 1: Arduino IDE and Library Setup
The advent of the Arduino put power into the hands of the same type of folks who originally designed the first blue boxes. We can write our own micro-controller code, use easily obtainable Radio Shack parts to design... Listed under: Phone Projects

645. Tweeting coffee machine using Raspberry Pi
Observing that LED will give us knowledge if it is being used or not. I am using a Light Dependent Resistor (LDR) as eyes for the Raspberry Pi. The LDRs change their resistance as per the intensity of light falling upon it. Our goal is... Listed under: Home Automation Projects

646. ramanPi – The 3D Printable Raspberry Pi Raman Spectrometer
ramanPi is looking for developers!!! If you have Python, PyQt4, matplotlib, signal processing, optics, raman spectroscopy or FPGA experience contact dev @ ramapi.org! Or go to dev. ramanPi.org and sign up to the developer forums! What I want to do: Build... Listed under: Metering - Instrument Projects

647. Raspberry Pirate Radio
This simple hack turns your Raspberry Pi into a powerful FM transmitter! It has enough range to cover your DIY drive-in movie, a high school ball game, or even a bike parade (depending on the stragglers). PiFM software not only boldly en... Listed under: Radio Projects

648. [Project] Raspberry Pi Powered WiFi Streaming Camera
Scope: To build a Raspberry Pi powered video camera, capable of streaming over a home wireless network. BOM: – Raspberry Pi (With Raspbian OS) – RPi compatible WiFi Dongle (List here) – Camera Module (Here) – Wifi enabled PC with VLC media player
Instructions: Connect... Listed under: Video - Camera - Imaging Projects
Browse Anonymously with a DIY Raspberry Pi VPN/TOR Router
Surf the Internet securely with your own portable WiFi VPN/TOR router. You can configure a Raspberry Pi with Linux and some extra software to connect to a VPN server of your choice. The VPN connection encrypts your internet traffic so that hackers and spies can't access your data. Listed under: How To - DIY - Projects

PWM control on Raspberry Pi: installation and first test on Hatalógico board
Vendor's Description: Finally I got my first test with Hatalógico and it looks promising: just out of the box PWM working. That means servos working right in the same platform as a powerful Linux board! If you don't know the Hatalógico board for Raspberry Pi, you can find it here. Listed under: How To - DIY - Projects

"beet box" raspberry pi style
Step 1: Thing you need the thing’s you will need, Any vegetable that is able to fit inside a hole raspberries and power supply audio amplifier capacitive sensing board wooden enclosure (like on the image above) Step 2: Image if components they are all the..... Listed under: Home Automation Projects

Getting Started with Phidgets on the Raspberry Pi
This instructable is an adaptation of one of our blog posts. Before beginning, you want to have a few things in place. You’ll need: A functioning Raspberry Pi (obviously). A separately powered USB hub, since the Raspberry Pi isn’t capable of delivering enough power on... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Controlling your Christmas lights with Text Messages
Step 1: Components needed An Arduino Yun (WiFi Enabled!) - You could use another Arduino with a WiFi Shield though. A Protoshield with (or without) a tiny breadboard a regular breadboard will work as we will be less compact. If you want to solder..... Listed under: LED Projects, Wireless projects

How to drive Dynamixel AX-12A servos (with a RaspberryPi)
I decided to use some Dynamixel AX-12A motors for a project, and having to code a library for them, so I figured I would share what I learned. Despite being a bit more expensive, this motor has a few advantages over the...... Listed under: How To - DIY - Projects

WiFi Enabled Arduino – Interfacing with web APIs
Are you familiar with Arduino, but are looking for a little more connectivity in your projects? This Instructable goes over a new (and cheap) wireless module that has hit the embedded world hard - the ESP8266. This little module is a perfect way to hook..... Listed under: Wireless projects

Knit an LED Cuff
This instructable uses circuit knitting and is written specifically for knitters. We’ll cover how to create a circuit that lights up blue and yellow LEDs, with instructions for hand and machine knitting. Electronic machine users can download the pattern file and print the knitting.... Listed under: LED Projects

Raspberry Pi remote webcam
This will allow you to create a remote webcam for your Raspberry Pi so that you can view it from any computer on the local network. For this instructable you will need: • Raspberry Pi with an Wheezy Raspbian installed and internet connection established •...... Listed under: Video - Camera - Imaging Projects

Adding an external power supply to a cheap USB hub
One day I found myself in the need for a USB hub with an eternal power supply and when I went to a shop I verified they can be quite more expensive than the ones that don't have external power supply. No big deal... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects
Building robots with Raspberry Pi and Python
The goal of this tutorial is to help you begin programming with Python to control Arduino robots with a Raspberry PI. We will go over the basics like installation and some simple examples to control your robot from Raspberry PI. Step 1: Parts list...... Listed under: Robotics - Automation Projects

Read and write from serial port with Raspberry Pi
In this tutorial we will see how to use the serial port on Raspberry Pi. We will use serial port available on Raspberry with a RS232/TTL 3-5,5V adapter and a USB-serial adapter. By default the Raspberry PI's serial port is configured to be used...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Weather station using SAMIIO, Arduino, and Raspberry Pi
This article demonstrates using SAMI with simple, off-the-shelf sensors and hardware. Specifically, we will be gathering climate data from a low-cost temperature sensor and relaying that data to the cloud via APIs. From there, we can analyze our collected data in real-time or historically...... Listed under: Wireless projects

Adafruit PiTFT – 2.8” Touchscreen Display for Raspberry Pi
Overview
Is this not the cutest little display for the Raspberry Pi? It features a 2.8” display with 320x240 16-bit color pixels and a resistive touch overlay. The plate uses the high speed SPI interface on the Pi and uses the mini display as...... Listed under: LED Projects

Raspberry Pi simple blog server.
Step 1: Name change to protect the innocent. You will want to change the name of your Raspberry Pi or you might get a server from the web. Also I am sure you have already set up your router to set the raspberry pi address...... Listed under: How To - DIY - Projects

PSoc 4 Pioneer Kit Community Project#083 – Raspberry Pi Integration
We have been targeting two communities in the 100 days projects, Arduino and Raspberry Pi. In today’s example we will be adding support for the wildly popular Raspberry Pi hardware. In this example we will have the Pioneer board communicate to the Raspberry Pi. The Raspberry...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Raspberry Pi, PyFace Digital, the lost documentation, I found it finally
The Raspberry Pi or R-pi from http://www.raspberrypi.org/ is known these days. It is not an accident that I have one, I have been doing Linux stuff since 1991, and professionally since 1996 I can skip over these developments, have to keep up with the new...... Listed under: Development Board - Kits Projects

Controlling Hardware using GUI in Raspberry Pi
The Graphical User Interface (GUI) helps the user to communicate with the system effortlessly. The GUI is considered as the front end of an application. In a Linux operating system each hardware device is represented by a file. The device can be controlled by simply...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

How to Translate SMS Text Messages into Morse Code Using GSM/GPRS Mobile Kit
Contents
Introduction
Step 1: Connection
Step 2: Code Links and Documentation
Introduction
Go to index
This tutorial allows the user to translate SMS text messages into morse code. When the module receives a SMS it will reproduce it in morse code through the buzzer...... Listed under: GPS Based Projects

How to Get GUI on Raspberry Pi
In this project the Raspberry board is booted with the Ubuntu OS and is connected to the Ethernet port of a Windows7 PC. The board is connected to the internet connection as explained in the project how to connect the Raspberry to the internet. The...... Listed under: Internet - Ethernet - LAN Projects

Audio distribution with Raspberry Pi
At a glance use a Raspberry Pi to send and receive audio streams over the network streaming based on standard RTP streams uncompressed audio streaming over ethernet point-to-multipoint broadcasting uses PulseAudio. This guide has been written in 2011. Since this time, the software...... Listed under: Sound - Audio Projects

The Ultimate Raspberry Pi Bundle – SoftballCam – 2
This blog is the second installment of a review of the Ultimate Raspberry Pi Bundle provided by element14. I have been waiting for parts and struggling a bit with getting everything working, but finally all electronics are kluged together and functional. Also all software for...... Listed under: Raspberry Programmer Projects
671. How to Create Buttons in Qt
In this project the Raspberry Pi board is loaded with Ubuntu and is remotely accessed using VNC. The Raspberry Pi board is connected to the internet. Downloading and installing the fourth version, QT4 using commands are already discussed in a previous article. There is another article…… Listed under: How To - DIY - Projects

672. picoReow
Raspberry Pi Supported SPI driven Cold-Junction K-Type Thermocouple converter: MAX31855 MAX6675 GPIO driven S State Relays (230V heating/fan) PWM driven MOSFET (12V cooling) Python control daemon (running on the Pi) HTML5/Websocket independent multi user web-client Live Monitoring & control Browser based Profile/Curve Management +…… Listed under: How To - Projects

673. Raspberry Pi Sensors
In this article, by Rushi Gajjar, author of the book Raspberry Pi Sensors, you will see the basic requirements for building the RasPi projects. You can't spend even a day without electronics, can you? Electronics is everywhere, from your tooth to cars and in aircrafts…… Listed under: Sensor - Transducer - Detector Projects

674. How to Install Qt in Raspberry Pi
The Raspberry Pi is a device which uses the Broadcom controller chip which is a SoC (System on Chip). This SoC has the powerful ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller having peripherals like timers,…… Listed under: How To - DIY - Projects

675. LOGI Pi Quick Start Guide
Overview
This is an out of the box quick start guide that will give you the essentials of preparing and running the LOGI-Apps demos on your LOGI-Pi and Raspberry Pi. The guide will guide you through the following items to get you up and running…… Listed under: Raspberry Programmer Projects

676. Controlling a RGB LED attached to a Raspberry Pi through Android
Project Description
I need to be able to control turning on and off a RGB LED utilizing the Raspberry Pi. I also should be able to turn it on and off using an Android device. Design The design is made to utilize three different…… Listed under: LED Projects

677. Raspberry Pi 2 Kraft Case
I received my long-expected Raspberry Pi a few days ago. I just couldn’t wait to try out my crazy ideas on it, what if Pi can go portable. What if Pi can still rock on when a power source is unavailable. Problems to…… Listed under: LCD Projects

678. MBusConnector
Introduction
IoTSyS is an integration middleware for the Internet of Things. It provides a communication stack for embedded devices based on IPv6, Web services and oBIX to provide interoperable interfaces for smart objects. The IoTSyS middle aims providing a gateway concept for existing sensor and…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

679. Tripod Camera Mount for Raspberry Pi
This may seem like it already exists, but I couldn’t find it anywhere. So, I made it myself: a camera mount for the Raspberry Pi that you can easily mount onto any standard tripod. Step 1: Create the 3D Model I looked around for a example in…… Listed under: Video - Camera - Imaging Projects

680. e-Health Sensor Platform V2.0 for Arduino and Raspberry Pi [Biometric / Medical Applications]
IMPORTANT: The new generation of the eHealth Sensor Platform is called MySignals. You can find below a brief description and a comparative between the old eHealth v2 Platform and MySignals. If you want to go to the eHealth Tutorial just click here. Discover MySignals, the…… Listed under: Medical - Health base Projects

681. How to Configure Raspberry Pi
The Raspberry pi is a low cost single board minicomputer which can be used for learning the computer basics, programming and easy to interface with the embedded systems. The Raspberry pi is a mini computer which is designed in a board with all the…… Listed under: How To - DIY - Projects

682. How to drive a Character LCD display using the Raspberry Pi
In this tutorial we'll take you through how to connect a 16x2 LCD display to your Raspberry Pi using GPIO pins. Being able to display a message on the LCD is not only very cool but can be pretty useful too…… Listed under: LCD Projects
683. Raspberry Pi and Arduino Serial Communication Setup and Connections
Connect the output of the Arduino TX pin to a voltage divider. The output of the voltage divider is then connected to the RPi GPIO pin #10 (GPIO 15). The voltage divider drops Arduino TX voltage from 5V to 3.3V. In... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

684. Named Pipe Example Using Raspberry Pi
The Raspberry Pi is a device which uses the Broadcom controller chip which is a SoC (System on a Chip). This SoC has the ARM11 processor which runs on 700 MHz at its core. The operating systems like Archlinux ARM, OpenELEC, Pidora, Raspbmc, RISC OS and... Listed under: Blog, Other Projects

685. JTAGulating the Raspberry Pi 2
This instructable will cover how to get a root recovery console on a Raspberry Pi 2 with a NOOBS SD card using a Jtagulator, PuTTY, and three wires. It is thanks to the Instructables Raspberry Pi Build Night sponsored by Instructables an... Listed under: Raspberry Programmer Projects

Overview
The Hacker School space for our batch had two restrooms: one attached to the main work area, and one downstairs. We thought it would nice to know if the bathroom is occupied before taking the time to walk down. Our project makes it possible... Listed under: Sensor - Transducer - Detector Projects

687. Using a keypad with Raspberry Pi
I got two keypads from Jameco.com that I wanted to use with my Raspberry Pi. Turns out it’s quite easy, as long as you know what the pinout structure is for the keypad. This instructable will take you through the steps I had to go through to use it with the Raspberry Pi to expand the GPIO port by running eight outputs with just four GPIO ports. To start with, what is a keypad?... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

688. Using a shift register with Raspberry Pi
This instructable will attempt to explain, in simple terms, what a shift register is, and how you can use it with the Raspberry Pi to expand the GPIO port by running eight outputs with just four GPIO ports. To start with, what is a shift register?... Listed under: LED Projects

689. Raspberry Pi & Soundmodem – It works!! (Part 01)
Many months ago I was working on getting a Raspberry Pi working for APRS work. I was experiencing a ton of issues with getting soundmodem to decode aprs signals that were known to be good (ie. ideal recording played back as an MP3)...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

690. Raspberry Pi Fridge Minder: receive an email when the door is opened
The kit comes with project cards and a link to download the accompanying Python scripts. And projects already include a light meter and email notifier, so I decided to combine these two projects into one and make something that will send an email whenever the... Listed under: Home Automation Projects

691. RasTherm – A Smart Thermostat built on the Raspberry Pi
This page presents my implementation of a smart thermostat using the Raspberry Pi board as the controller, with an added Pi Plate expansion board. This thermostat is controlled using a web page interface so it can be controlled via any personal computer, smartphone or... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

692. The Pi Plane Project
Summary for the curious Commercial aircraft in Australia (and a lot of the world) periodically transmit their location and the altitude. Aircraft with ADS-B determine their position using GPS; and broadcast that position along with identity and altitude (plus other useful information such as speed). Using some... Listed under: Video - Camera - Imaging Projects

693. Raspberry Pi 3×3 LED Cube
About a month ago my dad bought a soldering iron and we both learnt to solder by making an LED cube. It was a cool project to show my friends and really easy to build so I have decided to make it... Listed under: Sensor - Transducer - Detector Projects

694. Raspberry Pi Controls LEGO Power Functions Train Project
Description
LEGO Power Functions RC infrared control is specified in LE Power Functions RC v120.pdf. But I wanted to know what my controller (8879 LEGO Power Functions IR Speed Remote Control) was actually sending. So I hooked it up to a scope. Right STOP...... Listed under: Wireless Projects
696. **Raspberry Pi AirPlay Tube Radio**

Vintage tube radios are nostalgic. The crackle of the game on the after dark high powered AM sta from 500 miles away. The smell of the tubes and the warmth of the tones. They remind us of simpler times. Times when families spent together -...... Listed under: Radio Projects

697. **Raspberry Pi Mobile Media Center with Smartphone Control**

Our main ideas of a perfect mobile media center are:
- watch videos or listen to your music anywhere (only power supply and a monitor/projector for videos required)
- easy control with your smartphone
- simple setup for non-programmers
- great sound and video quality

...... Listed under: Phone Projects

698. **Simple way to control 12V DC Motor using Raspberry Pi's GPIO port and NPN transistor**

I needed to control a DC motor from my Raspberry Pi's GPIO part of my time-lapse dolly project. I had to be able to turn the motor on for approximately 150ms which would in turn move the dolly along by 3mm 12VDC...... Listed under: Motor Projects

699. **Best Raspberry Pi home automation tutorial: Web based**

The Internet Of Things is the most trending technology today that stands alongside wearables and robotics. It is a very simple concept where devices in our home or wherever they are, have the capability to communicate with each other via the internet. Usually sensors are...... Listed under: Home Automation Projects

700. **Digital Music Stand: Raspberry Pi + Touchscreen**

IMSLP is one of the greatest things to happen in the classical music world in recent memory. For those who don't know, IMSLP.org is an online library of any and all sheet music that is no longer under copyright protection. You can find pretty much...... Listed under: Sound - Audio Projects

701. **Hello World Program using Qt in Raspberry Pi**

Installing the QT in Raspberry pi is very easy using the command line, but it will take minutes to 4 hours to finish the installation depending upon the speed of the internet connection. Downloading and installing the version, QT4 using commands are already...... Listed under: Raspberry Programmer Projects

702. **Debug GPIO with LED**

During the daily device driver development routine, we often need to understand the behavior of the GPIO understand if there is I2C traffic or if our driver is handling the coming interrupts and so on. Sometimes is not enough to mount the debugfs...... Listed under: LED Projects

703. **Raspberry Pi RetroPie Gaming Station (Optimized for N64)**

Do you want to relive your N64 childhood days or like older games and to play Zork? How are we going to do this you say? Well, this tutorial is for you! We are going to build a RetroPie Gaming station using Raspberry...... Listed under: Game - Entertainment Projects

704. **How to Read Inputs Using Signal in Raspberry Pi**

The Raspberry pi is a mini computer which is designed in a single board with all the essential components required for running an operating system. The Raspberrypi board is powerful enough to run large operating systems like Linux, Mac and Windows. Linux operating systems especially...... Listed under: How To - DIY - Projects

705. **Python Web Server for your Raspberry Pi**

You know some basic Python or you want to learn some and you want to make a website, a web server, a web chat etc. - But where do you start? Services like Heliohost or Vlexofree are great for free Python website hosting, but they...... Listed under: Raspberry Projects
706. How to Use Timer in Raspberry Pi

The Raspberry pi is a device which uses the Broadcom controller chip which is a SoC (System on Chip). This SoC has the powerful ARM11 processor which runs on 700 MHz at its core. This powerful processor and the controller having peripherals like timers,...... Listed under: Clock - Timer Projects

707. Connect Raspberry Pi to Projector or TV

When we have a meeting in a meeting room, we need to connect our laptop to a projector or TV to show our desktop. But sometimes, several persons need to show their desktop, they need to change their laptop. This is complex and waste some time. Currently,...... Listed under: Wireless projects

708. Raspberry Pi Sensor and Actuator Control

Typically as a programmer you will work with data on disk, and if you are lucky you will consider the display on the screen. This is in contrast to physical computing which allows you as a programmer to work with data sensed in the real world...... Listed under: Sensor - Transducer - Detector Projects

709. How to connect a Lego Mindstorms NXT Ultrasonic Sensor to the Raspberry Pi

Abstract

Directly connect a Lego Mindstorms NXT Ultrasonic Sensor to a Raspberry Pi. A TCA9517 I2C bus buffer and an additional GPIO pin for SCL is necessary. A short C++ program reads the measured distance is provided. Introduction Raspberry Pi (Pi), despite some shortcomings,...... Listed under: Sensor - Transducer - Detector Projects

710. Bartop Mini Retro Arcade – Raspberry Pi and Customised Icade

"Approaching" middle age, wanting an excuse to play with a Raspberry Pi and having great memories of 80s games (mainly spectrum, sega master system, neo geo, and Atari ST) i decided to build a mini arcade machine / retro emulator. Hopefully some of the things...... Listed under: Game - Entertainment Projects

711. Servo Motor with Raspberry Pi and PWM

After my dad and I got an LED to dim using Pulse Width Modulation on my Raspberry Pi, we decided to try to spin a servo motor. We had a bunch of old servo motors on my robotics team at school so I used one...... Listed under: Motor Projects

712. Social Alarm Clock

Authors: Alexandru Radovici, Ioana Culic, Maria Tudor - Wyliodrin Bogdan Doinea - Cisco Networking Academy

To build a Social Alarm Clock by a team of five people: a manager, a product designer, two engineers and a programmer. Introduction Alarm clocks are going...... Listed under: Clock - Timer Projects

713. Cubieboard/Raspberry Pi case from old external drive

This is the case I made for my Cubieboard/Raspberry Pi which, back in the day was an external CD writer drive. This case includes: Power supply Silent HDD mount Fan with speed control The first step (for which I, unfortunately, don't have any pictures) is...... Listed under: Other Projects

714. Running an Nginx, PHP, and MySQL Webserver on the Raspberry Pi

For my project, I am going to be hosting a website on the Raspberry Pi. I want to be able to set the alarm on the alarm clock through the website and have the C++ program interact with the MySQL database to get alarm times...... Listed under: Timer Projects

715. Raspberry Pi Scoreboard

This is a simple project that aims to use the Raspberry Pi as a Scoreboard. On a character LCD. What we want to achieve in this project is write a python script that will use httplib and rplcd to connect to the internet and display the...... Listed under: LC Projects

716. Controlling Raspberry Pi with Pi Buddy

This is a short tutorial to exhibit the abilities of the Pi Buddy app. Step 1: Setting up the Pi for the Pi to receive command from the device you must have the necessary files and dependencies installed. Pi Buddy runs off of...... Listed under: Raspberry Programmer Projects
717. Simple GPIO Control using Pi4J The following example demonstrates the simple control of a GPIO pin on the Raspberry Pi. Source
The source code for this example is included in the github repository: https://github.com/Pi4J/pi4j/tree/master/pi4j-example/src/main/java/ControlGpioExample.java /* *
ORGANIZATION : Pi4J * PROJECT : Pi4J :: Java...... Listed under: LED Projects

718. Connect Remotely to the Raspberry Pi Picture this: We are excited about hosting a Raspberry Pi build night at our maker space in San Francisco. We have keyboards ready, mice, power adapters, SD cards loaded with operating systems, refreshments, and a room full of creative technical folk. But...uh-oh...we are 1 monitor... Listed under: Raspberry Programmer Projects

719. PSoC 4 Pioneer Kit Community Project#051 – Music Player Today we are expanding on the SD card example that we posted last week. In that earlier post we showed you the new customer SD component used to interface with the SD card. In this example we want to expand on that example to play... Listed under: Sound - Audio Projects

720. DIY Raspberry Pi Connection Board Featured The PCB I did the project in eagle cad placing one Raspberry Pi 2x13 female connector 2.54mm - 0.01") and then placing 4 pin header strip 1x13 with enlarged pads. I need these pads only for soldering the wires to the After this... Listed under: Development Board - Kits Projects

721. Adding a Joystick to the Raspberry Pi Joysticks are really fun to use. They are also much more intuitive than other input devices. A joystick to your Raspberry Pi opens a lot of new doors. You can now use the Raspberry Pi and the joystick to control a robot, a camera,... Listed under: Development Board - Kits Projects

722. Internet Radio with Raspberry Pi Since long past times, when Gugliemo Marconi has amazed the entire World broadcasting his radio signals from the Elettra ship, a subject held dear by electronic engineers has been radio transmission. After these years, the scene has changed a lot, firstly with the appearing of... Listed under: Radio Projects

723. Raspberry Pi Picture Frame The picture frame has come a long way since the last post. I now have the wooden frame for it built and done but we will come back to that in a minute. Since the last update I have completely remade some of the... Listed under: Video Camera - Imaging Projects

724. Raspberry Pi Sous Vide WIP This project is to build a Raspberry Pi sous vide machine that can be controlled via the web or via a web GUI interface. The main goal is to get something fully functional for cheaper than most commercially available solutions, which stz... Listed under: Internet - Ethernet - LAN Projects

725. I2C + Raspberry Pi + Arduino Uno + RPi Camera Board UPDATE: I've revised the circuit design. I no longer recommend connecting the Arduino Uno to the Raspberry Pi's I2C pins together without the use of a logic level shifter. The revised design uses one from www.adafruit.com. As part of a larger project I'm doing right... Listed under: Video - Camera - Imaging Projects
Raspberry Pi Arcade Game High Score Display for Multiple Locations

This Instructable will show you how to use a Raspberry Pi box monitor to create an arcade game high score display for your home or office. You and your family or your co-workers can keep an eye on the latest high scores.

Listed under: Game - Entertainment Projects

Using both ownCloud and Adafruit’s WebIDE on the Raspberry Pi

Long story short, I installed both of the aforementioned programs on my Raspberry Pi, but, in doing so, I was able to navigate to only ownCloud. After doing some digging around the internet, I found the solution. As smithg400 on Raspberry Pi's forums pointed out, both WebIDE...

Ten months ago, the chipmaker Adapteva unveiled a bold q: to create a Raspberry Pi-sized computer that can perform the same types of tasks typically reserved for supercomputers. And ..... Listed under: Development Board Projects

871. Setting up phpMyAdmin and MySQL on Raspberry Pi
As part of my ongoing efforts to create a really awesome alarm clock with my some MySQL databases. I have very little experience with MySQL, and the idea of setting up tables, users, and all that jazz via ..... Listed under: Raspberry Programmer Projects

872. Raspberry Pi Heat Sink Project
Difficulty: Easy
Project Time: Less than 5 minutes
Materials Needed: Thermal compound
Small heat got mine form an on-board graphics processor on an old computer)
Tools Needed: Hack saw (With metal cutting blade) Vice File (Optional) Screw Driver (Optional) Knife (Optional) Step ..... Listed under: Development Board - Kits Projects
Solar Driveway Light to MSP430 Wireless Sensor Node The basic idea of this project is to convert a $3-4 solar light found at Lowes Home Depot hardware store (here in the US) into a wireless remote sensor node. The node will utilize an MSP430G2553 MCU and nRF24L01+(w/ spirilis library) wireless module. Listed under: Sensor - Transducer - Detector Projects, Wireless projects

1979 Bang & Olufsen Raspberry Pi Internet Radio This is a 1979 Bang & Olufsen Beocord 1500 cassette recorder that I’ve converted to standalone Raspberry Pi internet radio. The analogue VU meters are driven by the Pi via a DAC (Digital to Analogue Converter) circuit with the current time, station and track. Listed under: Radio Projects

PiRacerX – Android controlled RC car using Raspberry Pi Short description: We made a car, which acts as a WiFi access point. Users can access our car and then, they are able to access our webpage. There you’ll be able to download an application. After the application is installed, your phone makes an UDP session with...... Listed under: Car Projects, Raspberry Android

Raspberry Pi and ZenMINER Heatsink and Fan I wanted to overclock my ZenMINER which is a Raspberry Pi booting from a custom Raspbian image. The device is normally warm to the touch after it has been running for 30 minutes. This unit will be in service 24/7 and definitely needed extra... Listed under: Other Projects

Raspberry Pi Analog to Digital Conversion Experiments and Howto The Raspberry Pi is a great little educational computer, but all of the Raspberry Pi miss a critical ingredient for electronics experiments – an Analog to Digital converter. I am constantly working on upgrading my lab, and one of my needs is to measure...... Listed under: How To - DIY - Projects

Control Stepper Motors With Raspberry Pi: Tutorials and Resources The title of the article can be as well as ‘Let’s build robots using stepper motors and Raspberry Pi,’ because everything you need is a good example of where you can learn how to control the spin direction, speed, and rotation of a...... Listed under: Motor Projects

HY28B Touch Display with Raspberry Pi There are quite a few displays out there that can be used with the RPi. Apart from those that need an HDMI adapter or being connected via the composite output most bare bones displays have a parallel or serial data interface. But these last two...... Listed under: LCD Projects

An LCD Expansion Shield for your RaspberryPi Today we introduce a great LCD expansion shield for Raspberry Pi that allows you to create an interface to control applications without the need to constantly keep a monitor, keyboard and mouse connected. Cool! It: The enhanced value of a micro PC as Raspberry...... Listed under: LCD Projects

DIY Stripboard/Veroboard Enclosure for Raspberry Pi (Part 2) 16-LED Stripboard Top Schematics, Soldering, and Testing I had decided to design the top board of the enclosure with several LEDs, 3 LEDs on each side, and a Raspberry Fruit (6 red LED) and 2 leaves (4 green LED) in the middle. Before getting started...... Listed under: LED Projects

Raspberry Pi Internet Weather Station This Instructable will show you how to build a really cool Raspberry Pi Internet-based weather station. Actually, to call this build a "weather station" is a bit of an understatement. This build could easily be extended to provide more than simply the weather...... Listed under: Internet - Ethernet - LAN Projects
Raspberry Pi and Breadboard (Raspberry Leaf) If you are using your Raspberry Pi with Breadboard, and you have lots of connections to make, then the Pi Cobbler from Adafruit is pretty neat. However, sometimes you only need to make a couple of connections and the Pi Cobbler is overkill and a few... Listed under: Development Board - Kits Projects

X100/105/200/300 Function Expansion Board for Raspberry Pi B/B+ The X100 expansion board designed for use on the Raspberry (RPI) computer platform. The board supplies RPI with a regulated +5V from a wide-range voltage source and also contains a real-time clock, a RS232 master port, a HDMI to VGA converter, 3-port USB hub,... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Microcontrollers: The Basics Overview Different kinds of computers are designed for different purposes. The computer at the head of your laptop is optimized for different purposes than the one in your phone or the one in your mouse. The simplest computers are that are designed to take... Listed under: Development Board - Kits Projects

Simple Handheld controller for Raspberry Pi So I recently programmed a small game with python that was completely controlled by a few GPIO buttons. The past few days, I've been messing around with it, finding ways to make it better, when I decided, with my small breadboard, it would be... Listed under: Game - Entertainment Projects

Control a Relay From Anywhere Using the Raspberry Pi If you found this article after doing a search on Google, welcome! On this very first line you will find plenty of content around DIY home automation using open-source hardware. Enjoy the article! I have been asked a lot of questions about writing tutorials using the Raspberry Pi for home automation, as well... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Make Raspberry Pi a Multi-User Desktop Introduction I want my daughter to use the Raspberry Pi for her school work and learn programming. I could buy her a Raspberry Pi or I could share my Raspberry Pi with her. I chose to share the Raspberry Pi with her. I am completing this... Listed under: Raspberry Programmer Projects

Web control four rotator, fifteen relays and many other features that come from Raspberry Pi RemoteQTH server. Main functions: Control the four rotators using the light buttons, rotary encoder and with a two-line display for each rotor. Same control remotely over web interface or telnet - only click to map and confirm rotating. Rotator module can directly control the motor of the... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Wireless projects

Real Time Clock for RaspberryPi I bought a Real Time Clock module (RTC) about 6 months ago and I've only just taken it out of its static bag. With two potential projects in mind that require an RTC, I opened the packet, wired it to my RaspberryPi and then...not... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Raspberry pi Tracer interface Everything started with the fact that the MT-5 display wasn't what I really needed. I was in the need of checking the charging from the device using the battery: my trusty Raspberry pi (1 B at the time). I managed to stumble over this instructable... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Circuit for Photodiode-Pi Interface Here's a diagram I did today for the interface between the photodiode and the Raspberry Pi. The photodiode allows small amounts of current to flow when light is shone on the device. This current is amplified by the BJT (so, just a normal transistor)... 915. Raspberry Pi Lamp LAMP Server I was using a Raspberry Pi as a LAMP server. I also needed a new lamp for more lighting. My brain decided I should combine the two, thus creating a Lamp LAMP server. Fun and completely nerdy at the same time. Here is how...... Listed under: LED Projects

916. Geolocation Tracker (GPRS + GPS) with SIM908 over Arduino and Raspberry Pi The new shield designed for Arduino and Raspberry integrates the SIM908 module which counts with both GPRS and GPS technologies what allows to easily perform realtime tracking applications. The idea is simple: read the GPS coordinates (longitude and latitude) and send them by using...... Listed under: GPS Projects

917. Pi in the Sky transceiver – Raspberry Pi Frequency Synthesiser (Part 1) Method 1 The simplest way to generate a frequency is to apply a voltage to a crystal, the piezo-electric effect will take over and the crystal with resonate at a particular frequency. However, as this is going to be a multiband, multimode transceiver; crystals could...... Listed under: Radio Projects

918. Cardboard Raspberry Pi WIFI Internet Radio What to do with the small cardboard box full of Raspberry Pi related junk, besides what it is doing. Surely it should be doing something interesting? Failing that it could be a wifi radio, I suppose. Notes on how I converted a cardboard...... Listed under: Radio Projects, Wifi / Wlan Projects

919. Using CircuitDraw to create electronics diagrams Today I will show you how to use Estimcad CircuitDraw to create diagrams for electronics and robotics projects. This is the second article in a series outlining the installation and use of CircuitDraw. Other Article: Introduction to CircuitDraw Using CircuitDraw to create electronics diagrams Adding secondary...... Listed under: RFID - NFC Projects

920. Complete tutorial for a raspberry pi beginners . This instructable helps you to setup raspberry pi for the first time without hdmi monitor. By the end of this tutorial you can see the raspberry pi desktop screen from your server laptop. Difficulty level: 1/5 Not required technical knowledge My current project: (Check...... Listed under: Raspberry Programmer Projects

921. Interfacing an SPI ADC (MCP3008) chip to the Raspberry Pi using C++ (spidev) In this entry I will demonstrate how to interface the MCP3008; an SPI-based analog to digital converter (ADC) integrated chip, to the Raspberry Pi. This enables the Raspberry Pi to interpret analog voltages that are in turn typically emitted by analog-based sensors to reflect a...... Listed under: Interfacing(USB - RS232 - I/O) Projects

922. Raspberry Pi 2 (Model B+) Setup This is awesome: the newest version of Raspberry Pi (as of 2/25/15) has come out. It’s called the Raspberry Pi 2 Model B+. This little board is 6X faster than a Raspberry Pi Model B+ and has 1GB of RAM, which the B+ didn’t have...... Listed under: Development Board - Kits Projects

923. raspberry-pi-home-automation A node.js based home automation system based around the Raspberry Pi. For background around this project: Installation get started, clone the repository and install the required dependencies. git clone https://github.com/anders94/raspberry-pi-home-automation.git cd ras
Add a $15 Display to the Raspberry Pi

The Raspberry Pi is a great little board and packs a lot of punch. But many times you just need small display to show some information from your project. It can be the local weather, system status, an interactive menu or anything that you want. Listed under: LCD Projects

Arduino/Raspberry Pi 2 LED Matrices

Does anyone know if I can use a single Arduino or Raspberry Pi to control two 32x32 LED matrices as sold on the Adafruit website? Here is a tutorial where you can wire the 32x32 matrix. Ideally, I'd like to be able to control them. Listed under: LED Projects

Raspberry Pi GPIO Protection

After damaging the GPIO port on our raspberry pi while designing a new solar monitoring system, we decided that it might be a good idea to build a buffer/level translator to protect the GPIO pins from over voltage and ESD spikes. The board would need...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Home-Made Raspberry Pi Cobbler

Looking at the Raspberry Pi Cobbler in Adafruit’s wonderful collection of RPi accessories, I decided it would be a much better method of connecting the the RPi GPIO to a breadboard than an old IDE cable with wires stuck in the end. Didn't...... Listed under: Home Automation Projects

MoPi is mobile, hot-swap and 24/7 power for the Raspberry Pi. I want one! (how to order)

Something not working? Raise an issue. (In early 2014 we ran a Kickstarter campaign to fund the first production version, which is due for delivery in June 2014. If you missed it, you can get one from Pimoroni.)

Contents...... Listed under: Solar energy projects

Setting up a VNC Server on your Raspberry Pi

If your Raspberry Pi is purposed to do a task that normally does not require a monitor, mouse and keyboard (or any human interaction for that matter), sometimes it is useful to access your Raspberry Pi’s operating system without having to connect a monitor, mouse...... Listed under: Development Board - Kits Projects

DIY Alarm Monitoring System w/ Raspberry Pi + Foscam + Sensors

The Raspberry Pi is an amazing device. Although not the most powerful mini computer out there, it bolsters a tremendous support community, tons of hardware add-ons and coding libraries to make it exactly what your heart's desire. The Raspberry Pi also makes an affordable media player but so much...... Listed under: How To - DIY - Projects

USB sound card

Description. Designing and building a USB sound card is no longer a headache because we have got the PCM 2702 integrated circuit from Texas Instruments. The PCM2702 is an integrated 16 bit digital to analog converter that has two digital to analog output channels...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Lego Dashboard Mount for Raspberry Pi

When I got my Raspberry I've decided to develop an algorithm of real time lane and vehicle detection. I got it done. Now it's time to put the Raspberry Pi on my car's dashboard. However, I would not like to leave it fixed on the dashboard. Listed under: Car Projects

Controlling your TV or any infrared device with a Raspberry Pi

Although the Internet of Things is relatively new, controlling device remotely is as old as sin; devices have been using IR remotes for ages. There is a lot of untapped potential from the infrared device sitting in your home. Besides the raspberry pi, you can...... Listed under: Wireless projects

Customize and build your own smartphone using a Raspberry Pi and 3D printing

For anybody who can remember when the first smartphones came out such as the original Blackberry, the technology was groundbreaking and changed the way we interact with other and the world-at-large. Over the years, the various iPhone models have updated to make living in...... Listed under: Other Projects
**935. Turning your Raspberry Pi into an HTPC**

In this instructable, I will show you how to turn your Raspberry Pi into an HTPC with a Linux distribution called Raspbmc. From the About section of Raspbmc’s website: Raspbmc is a minimal Linux distribution based on Debian that brings XBMC to your Raspberry Pi. … Listed under: Raspberry Programmer Projects

**936. Building a Battery Board for the Raspberry Pi – Battery Board V0**

Two big features of the Raspberry Pi development board are its versatility (due to the hardware/software) and its compact size. I had read a couple of different project articles on the web on how to use a USB Wi-Fi adapter to convert the Raspberry Pi into a)

**937. How much power can be provided through USB?**

We can see that the 5 volt line (+5V0) is powered directly from the USB input power through a 1.1A, 6V Polyfuse (miniSMD). I believe this means that the 5V input is current limited to 1.1A (maximum hold current, no peak). Let’s assume that you’re…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

**938. Raspberry Pi OLED Internet Bandwidth Display**

This is a bandwidth monitor using a Raspberry Pi and an OLED display to graphically show the internet bandwidth into and out of our house. A video showing it working is above. Sometimes if the internet is slow or not working very well it can…… Listed under: LCD Projects

**939. A Raspberry Pi Build Light for TeamCity in Mono**

Some Background… After I bought my Raspberry Pi I went through a little period of uncertainty that most other owners have, asking myself “how do I make this thing useful?” It didn’t take long before one of my colleagues created a GitHub repository for a…… Listed under: LED Projects

**940. Controlling LIRC From the Web**

In this post I will cover how to create a web interface + API for LIRC, the Linux Infrared Remote Control project. I will be using NodeJS and a Raspberry Pi in this post, but the ideas generalize to other languages and hardware. This post…… Listed under: Wireless projects

**941. Raspberry Pi B+ Getting Started Guide**

This is a tutorial on getting started with raspberry pi b+ model. If you like it please vote and step 1: Downloading Noobs Google raspberry pi noobs download it will be the first result. You can download network or offline I recommend the offline one it…… Listed under: Development Board - Kits Projects

**942. Display and Control Section for AD9835 project**

Now that the power supply and filter section for the function generator have been designed and realised it is time to concentrate on the control section. We need a way of controlling the signal generator. Let’s dis…… Listed under: LCD Projects

**943. Communicating over serial between Raspberry Pi and Arduino.**

Now that my robot has a Raspberry Pi on board I wanted to be able to send commands from the Raspberry Pi to the Arduino telling the robot what to do. In the future I also want the Arduino to be able to send sensor…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Robotics - Automation Projects

**944. How To Boot Raspberry Pi With NOOBS**

In case you don’t know, the raspberry Pi is a credit card sized computer. It was originally created to help youngsters learn how to program. Since the projects launched, this tiny board has come a long way. There are several models of the Pi.…… Listed under: Development Board - Kits Projects

**945. PDC8544 LCD python bindings for the Raspberry Pi**

Documentation and Python library module for interfacing a PCD8544 LCD screen with the Raspberry Pi. Cheap Nokia 5110 modules can be picked up on eBay with a breakout board for a few pounds. Further technical details about the LCD screen can be found in the…… Listed under: LCD Projects

948. PiCy – The Tiny Raspberry Pi Powered Robot! Build your own tiny Raspberry Pi based robot out of a few easy to obtain bits! You will need: A Raspberry Pi. A PiCy pack kit, which contains: Two motors and two wheels. A battery holder for two AA batteries with battery clip. 40mm.... Listed under: Robotics - Automation Projects.

949. Prototyping Circuit Boards. Someone recently turned me onto prototyping circuit boards from dipmicro.com and wow! Awesome! I know, I am in no way affiliated with dipmicro, I was just really impressed. Yes, that's right, I'm excited about prototyping circuit boards. Let me tell you why, then let... 950. Raspberry Pi lirc_rpi – (IR Remote control) LIRC GPIO driver. The driver is a modification of the lirc_serial module decided to create a new one separately because I couldn't hack it into the serial nor the gpio driver. The serial driver uses the DCD serial port, which is not.... Listed under: Development Board - Kits Projects.

951. WhatsApp on Raspberry Pi. In this tutorial, we will see how to use WhatsApp with Raspberry Pi. We will use the Yowsup library we have already used in these tutorials: WhatsApp message from Phidgets SBC, Phidgets WhatsApp - ask the status of your sensors. These are the library.... Listed under: Other Projects.

952. DDR DIMM SPD Adapter for Raspberry Pi. All computer DDR memory today have little I2C EEPROMs to store vendor, configuration module spec information. This is done to allow the computer to detect memory type, and configure memory interface to correct speeds, voltages according to module spec. This mechanism is based on.... Listed under: Other Projects.

953. Building a Raspberry Pi Cluster – Part 2. The Grand Finale. In a previous post on Building a Raspberry Pi Cluster, I wrote about how we built a cluster using several Raspberry Pis. This cluster was used for hosting the WSO2Con App. In this post, we will take a look at the final touches.... Listed under: LED Projects.

954. IoT 101 Project: Stream Temperature from your Raspberry Pi “Hello World!” – This is likely the output of the first program you ever wrote in code. Setting up a device to stream temperature data is quickly becoming the de facto Internet of Things (“Hello World!”) project. If printing “Hello World!”.... Listed under: Temperature Measurement Projects.

955. ICStation Heart-shaped Colourful Dazzle Light DIY Kit 1. The circuit description: This circuit is consist of the STC89C52 minimum main system and 32 colorful LED display components. It uses the STC89C52 Microcontrollers as the control chip and drives 32 I/O with the 32 F5 colorful LED(s). We have finished the Microcontroller program for the DIY.... Listed under: LED Projects.

956. Biosignal PI, an Affordable Open-Source ECG and Respiration Measurement System. Farhad Abtahi 1,*, Jonatan Snäll 1, Benjamin A 1, Shirin Abtahi 1, Fernando Seoane 1,2 and Kaj Lindecrantz 1,3 1 School of Technology and Health, Royal Institute of Technology, Nobels Allé 10, Stockholm SE-141 52, Sweden; E-Mails: jsnell@kth.se (J.S.); aslamy@kth.se (B.A.); shirin.abtahi@gmail.com (S.A.); fsm@kth.se..... Listed under: Temperature Measurement Projects.

Use Raspberry Pi to Create Obstacle Avoiding Robot Chassis Raspberry Pi is quite suitable for robot creation. Its GPIO pins could be used to control the motors and sensors, and itself could work as a server, and get controlled via Internet. The plan I am going to create is a chassis, which could automatically detect obstacles and navigate around them. Listed under: Motor Projects

Raspberry Pi – Jack of all trades. Raspberry Pi is a sort of jack of all trades when it comes to being a single board computer based on an Arm processor. It can be a desktop, media player/streamer, web server, forensics machine, and do most of what all Linux-based machines can do. Listed under: LCD Projects

Jig To Load a Bootloader and Upload Sketches To ATmega328P Note: I only write about what I know. Although there are many Arduino type products, I only have experience with the Arduino Uno Rev3. Likewise, the only Atmel microcontroller I know is the ATmega328P. A little background (well not so little) I have… Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Bluetooth Speakers using Raspberry Pi Hi guys long time since I wrote a tutorial, this tutorial tells you how you can use any old speaker or bit of kit and turn it into a wireless Bluetooth speaker, this can also be an cheap Bluetooth audio device receiver for your car. This is not… Listed under: Bluetooth Projects

Raspberry Pi Powered Lego Car Two things have happened recently that have contributed to my tinkering hobby. Firstly - My Raspberry Pi arrived after a long (but worth it) wait. Secondly - My two girls (8 and 5) have got in to Lego and so slowly but surely I've been building… Listed under: Game - Entertainment Projects

Raspberry Pi PC remote power switch control board The default I/O port of SD card is 8081, you can change it. Use putty, ID pi, password 5585, key "sudo nano /etc/apache2/ports.conf", find out 8081 to change your desired port. Features: Plugs directly onto the Raspberry… Listed under: Development Board - Kits Projects

Raspberry Pi Print server A print server that tastes of pi. This project assumes that you have the latest version of raspbian (which can be downloaded at) https://www.raspberrypi.org/downloads/raspbian/. And an active internet connection. (When imaging the SD card… Listed under: Other Projects

rpp – Raspberry Pi PIC Programmer using GPIO Introduction Microchip PIC® 8-bit microcontrollers are quite popular amongst hobbyists and I’ve used them for a long time in several of my projects. They are very cheap, use only 35 assembly instructions that are easy to write and most importantly they use flash memory, which allows for easy programming and debugging. Listed under: Raspberry Programmer Projects

Control Android from Raspberry Pi Have you ever wanted to control your android smartphone or tablet directly from your Raspberry Pi? No? Me neither. I just thought it would be interesting to see if you actually could. You could use this feature to display your android screen during a presentation… Listed under: Raspberry Android

Raspberry Pi – Driving a Relay using GPIO There’s something exciting about crossing the boundary between the abstract world of software and the real world, and a relay driven from a GPIO pin seemed like a good example of this. Although a simple project, I still learned some new things about GPIO… Listed under: How To - DIY - Projects

Raspberry Pi and Arduino via UART In an attempt to get my Raspberry Pi talking to my Arduino I’m exploring various different options. The first was to just use the USB connection, but that was too simple. So, here is how to connect the two using the UART… Listed under: Development Board - Kits Projects

Medicine Reminder using Arduino Sometimes patients forget to take the medicine at the required time of medicines. And sometimes the patient also forgets which medicine He/She have to take at required time. And it is difficult for Doctor/Compounding office to monitor patients around the clock. To avoid this problem, we have… Listed under: Medical - Health based Projects

Web Based, Raspberry pi controlled, 2 channel relay mains control box. Using some off the shelf relays and some basic electronics components coupled with Raspberry pi with basic HTML, PHP and javascript programming, this Web Based relay control box can be used to turn on or off devices that are connected to the box’s plugs… Listed under: Internet - Ethernet - LAN Projects

Tank Day 23: Range and Bearing Step 1: Choose Sensors Two sensors were chosen for the Raspberry Tank’s first foray into detecting the surrounding environment: An ultrasound rangefinder (SRF02) and a 3-axis compass (CMPS10), both ordered from robot-electronics.co.uk. Beyond this, some basic electronics components coupled with Raspberry pi will be used to enable the robot to detect and avoid obstacles. Listed under: Game - Entertainment Projects
their I2C interface, these devices were chosen largely for cost reasons, though they...... Listed under: Game - Entertainment Projects

973. Simpcam raspberry pi shield — first steps Here are some first steps at a Raspberry Pi shield design. I don’t quite yet know what I’m doing but here’s the rough idea I’m aiming at. I’m not sure how sensible it is, so I’d love to get any feedback! It’d be nice to...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

974. Temperature based device Control system using LM35 A temperature based device control system which uses AT89s52 and LM35 temperature sensor is an embedded system which controls external devices (mainly household appliances heater, fan, coolers and more) by monitoring the temperature obtained from temperature sensor. This project called temperature based device control system can...... Listed under: Temperature Measurement Projects

975. Safe and simple AC PWM Dimmer for arduino / Raspberry pi Dimmer With MOSFET This circuit shows that dimmers intended for mains voltage do not always have to contain a triac. Here, a MOSFET (BUZ41A, 500 V/4.5A) in a diode bridge is used to control the voltage across an incandescent bulb with pulse-width modulation...... Listed under: PWM Projects

976. ESP8266 + Raspberry Pi Electricity Monitor I have always been monitoring my utility meters in the old fashioned way. First I wrote down in a little ledger (yep, I’m that old), later I wrote a spreadsheet for it and the last few years I’m using the ECAS smartphone app to...... Listed under: Metering - Instrument Projects

977. RaspiDuinoRover – (Yet another) iPhone driven moving Raspberry Pi and Arduino rover Architecture RaspiDuinoRover is made of two main parts: A Raspberry Pi which receives commands from a remote device through a TCP connection, and sends these commands to an Arduino Uno through an I2C connection. The same TCP channel is used to send back the remote...... Listed under: Development Boards Kits Projects

978. Raspberry Pi and Button Press Example Hi there. This post is not going to be on JavaScript but it will be a bit more centered on the Raspberry Pi and what you can do with it. As pointed out in an old blog post, I’m working on a software that creates streams of...... Listed under: Other Projects

979. Using the Raspberry Pi to control AC electric power We were trying to figure out if a Raspberry Pi could be made to control a device powered by 120 volts AC. Our first idea was to build a device based on this wiring diagram, which would have let us control two electrical devices...... Listed under: Solar energy projects

980. Raspberry Pi 2: Quick n’ Easy RCA Hello world, today I am bringing you another instructable at the request of another member. I re-made an instructable about booting the Raspberry Pi from a USB flash drive (Boot the Raspberry Pi from USB). In that instructable my RCA connection “jerry-rigged”...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

981. Setting up Raspberry Pi using SSH So you just bought a Raspberry Pi (RPI) because you heard of it and you want to figure out what can do with it (I like I did some time ago). But now you have it you are watching ad it and asking...... Listed under: Development Boards Kits Projects

982. Arduino Pi Step 1: Step 1: Connecting the Arduino and Raspberry Pi This step assumes you are using the external UART for connecting the Raspberry Pi with an Arduino Mega 2560. It’s also possible to use this with another Arduino. The Arduino uses 5V logic but the Raspberry Pi requires 3.3V logic...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

983. Beautify Raspberry Pi Login Screen Introduction The login screen that greets the user can be modified to make it more interesting and colourful. The login screen and greeter means the same thing in this instructable. Scope This instructable will show how to: Change the background image on greeter Add text messages Prerequisite...... Listed under: Security - Safety Projects
Ingredients: 1 x Raspberry Pi 1 x RFID 125 kHz shield for Raspberry Pi 1 x RFID Antenna 2 x Read only cards (EM4100) 2 x Programmi
cards (Read-Write Cards, T5557) NOTE: If you don’t have a…...

Programmable Thermostat with the Raspberry Pi

Required hardware: Raspberry Pi model B Dallas DS18B20 temperature sensor Relay board Push button display (Nokia 5110-3310) Edimax WiFi nano USB adapter Software installation

Some packages are required from the standard Raspbian repository: apt-get install python-dev apt-get install python-imaging

We need also PIP (a…...

PiPOE – powering a Raspberry Pi over Ethernet

This project enables a Raspberry Pi, Beaglebone, or other small computer to be powered over an Ethernet cable. This very handy if you have a Pi somewhere where getting mains power to it is difficult, or if you want to run several devices from one…...

Raspberry Pi Binary LED Clock

Binary clocks show the time in an unconventional format. They display the hours, minutes and some even seconds as numbers represented in the binary numeral system. Binary clocks and binary watches have grown quite popular but more and more people work in IT and become…...

PiPOE – powering a Raspberry Pi over Ethernet

This project enables a Raspberry Pi, Beaglebone, or other small computer to be powered over an Ethernet cable. This very handy if you have a Pi somewhere where getting mains power to it is difficult, or if you want to run several devices from one…...

AVR/Arduino ISP programmer using the Raspberry Pi GPIOs

Introduction

As a fully-featured Linux computer there are many external programmers that can be used with your Raspberry Pi to program the Atmel AVR range of microprocessors. It’s also possible to use the general purpose input/output lines (GPIOs) found on the Raspberry Pi to implement…...

Introducing the Raspberry Pi Model B+ Power Supply

LADY ADA

One of the most exciting updates/upgrades of the new Model B+ is the fancy new power supply. The power supply of a computer is terribly boring sounding, but its really important. A good power supply makes everything hum along cleanly. A…...

DIY SPY BOT PI Kit

Spy robots are remotely controlled robots, equipped with a camera, transmitting video data to the remote area. A movable spy robot with a remote controller by using raspberry pi. The spy robot is made up of a USB camera, Wi-Fi adaptor, batteries and movable wheels…...

Setting up and running NOOBS on a Raspberry Pi

In this instruction I will go over how to set up the Raspberry Pi and boot it into NOOBS for the first time. It is important to understand how to set up all of the hardware and how to set up the actual operating system…...

Setting up and running NOOBS on a Raspberry Pi

In this instruction I will go over how to set up the Raspberry Pi and boot it into NOOBS for the first time. It is important to understand how to set up all of the hardware and how to set up the actual operating system…...

Setting up and running NOOBS on a Raspberry Pi

In this instruction I will go over how to set up the Raspberry Pi and boot it into NOOBS for the first time. It is important to understand how to set up all of the hardware and how to set up the actual operating system…...
992. Introducing Ponte: Arduino – Raspberry Pi Bridge (This is a collaboration between myself and my friend and purveyor of fine electronic bits, S.K. Pang) would you connect an Arduino to a Raspberry Pi? Just plug it in via USB as you would normally do with an ordinary computer, right? That takes...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

993. Raspberry Pi Website Hit Tracker You just made a funky neon sign flash in my living room. How? I have just completed my latest project which is a neon lamp which lights up every time someone visits my website. It’s controlled by a little relay board I built out on...... Listed under: Development Board - Kits Projects

994. Raspberry Pi Spectrum Analyzer with RGB LED Strip and Python Looking for a first project to try out on a Raspberry Pi, I thought we had better than a Spectrum Analyzer? (Sometimes this display is erroneously referred to as a graphic equalizer—that let’s you change the sound, not display it) I was able to get it...... Listed under: LED Projects

995. Raspberry PI: Connecting a HD44780 Display over I2C Bus some application, i.e. XBMC can show informations on a display by using LCDproc as driver. This post describes a way to connect a HD44780 display to a Raspberry Pi by i2c bus. Let’s start with the physical setup. This is the overview schematic on how...... Listed under: Video - Camera - Imaging Projects

996. An MSF Atomic Clock for the Raspberry Pi The project is connected to GPIO 15 input pin 1 of my Raspberry Pi interface board. The nothing special about this pin, its location is simply convenient with my layout. Please be aware that this project will only work in the British Isles, because the transmitter...... Listed under: Clock - Timer Projects

997. Use a bare Arduino as an RF signal processor for Raspberry PI 433mhz RF transmitters and receivers are really cheap, so you might be tempted to add a RF receiver to your Raspberry PI. But there is one problem: the Raspberry PI may not be fast enough, or may be blocked totally while it tries to keep...... Listed under: Development Board - Kits Projects

998. Raspberry Pi Power Controller This article is a work in progress to create a power-controller for the Raspberry Pi based on a PIC microcontroller and MO The PIC implements an I2C slave to allow power control, and also to approximate the registers of a PCF8563 Real Time Clock (RTC)...... Listed under: Other Projects

999. Open brain wave interface hardware you can go directly to Section 9 also. make high quality brain wave interface as low cost and small size is my over 20 years of dream. To do so need mass production, need work with investor to realize that way. not just only my...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1000. Headless Raspberry PI WiFi setup (for mobiles) So you successfully configured your Raspberry Pi in a fully headless fashion, maybe with WiFi too, and you are very happy using it at home in your robotic projects... But when you go outside, at work or on any foreign network, you want to have the same powered and connected to...... Listed under: Wi / WLan Projects

1001. Creating a "Blinking LED" project for Raspberry PI This tutorial demonstrates how to attach a LED to the expansion connector on your Raspberry Pi and to make it blink with a simple C++ program. First of all, in order to programatically switch a LED on and off we could connect it between...... Listed under: LED Projects

1002. Airplay Multiroom radio with the Raspberry Pi, no additional hardware needed. Most ways to stream music to multiple sets of speakers cost more than it is worth. I don’t think I have to say much about it, you probably wanted to do this in the past but it just seemed so much to spend that much money...... Listed under: Wi / WLan Projects
AVC: Serial to I2C Bridge I finished designing, etching and silkscreening a new board last night and started populating it. It's a slight redesign of a board I did before last year's AVC. What's it for? Not telling yet. 😎 I can say this. It's an Arduino clone that will...... Listed under: Development Board - Kits Projects

Raspberry Pi XBee SMT backpack One of the earliest motivations for my work on the Raspberry Pi SPI driver was so that I could use Digi XBee ZB SMT modules. These are basically the same as the normal XBee ZB modules for doing ZigBee with but are on little... Listed under: Development Board - Kits Projects

Turn an old CRT Television into a Raspberry Pi Powered MAME Cocktail Cabinet Here I will show you how I went about building my machine that uses a Raspberry Pi running MAME to emulate games. As everyones setup will be different this will be general in nature and hopefully supply enough information so you can get started yourself...... Listed under: Game - Entertainment Projects

TiddlyWiki 5 on Raspberry Pi Server in 15 minutes Introduction Raspberry Pi's are inexpensive credit card sized computers conceived by Eben Upton and designed by the Raspberry Pi Foundation Team in the UK. They are now built in the UK as well. TiddlyWiki 5 is the version of TiddlyWiki which was created by...... Listed under: Other Projects

Get Started With Raspberry Pi Hello everyone. Welcome to my First Instructable. You may be asking yourself "I want a Raspberry Pi, but I don't know how to start." If you have ever asked yourself this thought, then this is the right Instructable for you. In this guide you will...... Listed under: Interfacing(USB - RS I2c -ISP) Projects

Powering a Raspberry Pi with a SW solar panel My plan was to make a solar powered raspberry pi. To run a Facebook AIML chat bot written in c#. (In the daytime) What you will need: 1 x Raspberry pi (we used model B) 1 x 5 Watt solar panel with USB connector 2 Listed under: Other Projects

Mapillary en Raspberry Pi Desde hace poco tiempo me he hecho fan de la comunidad Mapillary y su proyecto, he visto personas usando smartphone, GoPro y algunos otros tipo de cámaras para mapear su ciudad, es por eso que he realizado este proyecto para mapear la ciudad con...... Listed under: Phone Projects

LED Blinking with Raspberry Pi One of the classic electronic analogy to “Hello World” is to make an LED blink. Raspberry Pi has 8 Purpose Input/Output pins(4,17,18,21,22,23,24,25) which can be configured as input/output and turned on/off via software. In this Instructable I will be using python to control the...... Listed under: LED Projects

Turn Raspberry Pi ON with Remote Control I'm loving using my Pi with Openelec for my media center, but the need to pull the cord I power was just keeping it below the WAF(Wife Acceptance Factor). So I sat down and came up with this. In the future, the arduino... Listed under: Wireless projects

Raspberry Portable Pi Laptop Portability would generally be the main challenge with projects such as this; it can be difficult to get off grid. However, in my case this is one hurdle which I am able to easily overcome; as with all of my other projects I have...... Listed under: Development Board - Kits Projects

Home Automation using Raspberry Pi, Arduino, Domoticz, MySensors. Hi Fellow makers, This is my first Instructable on Home Automation. The idea is to build a controller and wireless nodes to control and monitor. After a lot of hit and trial with many different controllers like OpenHab, DomotiGa, Agio Control, finally I decided to...... Listed under: Home Automation Projects

Make a Portable Computer Using a Raspberry Pi Have you ever wanted a portable computer you can take with you? This is the easiest way to build your own. For those of you who do not know what a Raspberry Pi is, it is a complete computer about the size of deck...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Easiest Raspberry Pi Camera Mount Ever I bought the camera for the Raspberry Pi, and the after market mount just didn't suit my taste. At the same time bought a clam-shell case (~$6) I was padding the bill for free delivery, looking at the case it seemed that it...... Listed under: Video - Camera - Imaging Projects
A DIY Power Supply For Hi-Fi USB Audio With Your Raspberry Pi Overview

This is a guide for building a DIY power supply/regulator powering a Raspberry Pi and a USB audio output interface. The objective is to create a pure, regulated 5.0v power supply that allows your Raspberry Pi to run stably but also, more importantly,..... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Raspberry Pi Bluetooth

Hello, I'll teach you how to successfully install and use Bluetooth on your Raspberry pi. Just a heads up i'm assuming you have a version B and you've setup your raspberry pi already (for system preferences and ect.) Step 1: Hardware 1. You need a..... Listed under: Bluetooth Projects

Raspberry Pi Robot controlled over Bluetooth

This tutorial is based on a previous Instructable - Building robots with Raspberry Pi. Python The aim is to present an example of how to setup a Bluetooth serial connection with Arduino to control a Raspberry Pi robot. Let's take it one step further..... Listed under: Robotics - Automation Projects

Raspberry Pi Water Cooler

Hello, this is a step-by-step guide to building a water cooling system for the Raspberry Pi's ARM processor. It all started when I saw this project. I was instantly captivated, the thought of water cooling a pi had never occurred to me but once..... Listed under: Other Projects

Raspberry Pi Case

I made this case before my school offered 3D printing but I still decided to post it anyway. Step 1: Materials The materials you'll need • A block of wood • Acrylic • Raspberry pi • Screws • Nuts • Spacers Tools • Caliper • ...... Listed under: Home Automation Projects

Water Tank Overflow Alarm

Wastage of water is quite prominent in urban as well as rural areas and overflowing of water tanks is a reason for that. This water tank overflow circuit described here starts ringing as soon as the water tank becomes full. Thus, by war the..... Listed under: Home Automation Projects

How to use a kindle fire as a monitor for raspberry pi

In this instructable i will show you how to use a kindle fire as a monitor for a raspberry pi. I had an old kindle fire that i got a few years back that i no longer use and i thought, why not use it...... Listed under: IT Projects

Raspberry Pi + Motorola Lapdock

A few months ago I found through a MOOC at Universidad Galileo, that was possible to convert a Raspberry PI into a laptop. This idea caught my attention, by turning this "micro" into an independent computer. I investigate do it and i...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Raspberry media player casing

Look at this Raspberry board. It's a good choice if you want to make your own internet and multimedia station to play HD movies, browse on the web watch Youtube trailers listen your MP3 collections for literally peanuts. All you need plug all...... Listed under: Video - Camera - Imaging Projects

Simple, scalable Raspberry pi garden irrigation

This is one of the projects I'm currently working on. The idea behind the project is build a simple yet scalable and efficient garden irrigation, using as little resources as possible. The end product will be a IOT garden project, but I'll update you...... Listed under: Other Projects

Open Source Home Automation Project using Arduino UNO + Ethernet Shield

How Does it Work

The main brain for this project is a UNO Board along with Arduino Ethernet Shield to give it a wireless connectivity. Arduino runs a code to control a Relay board according to the input and also serves a web page through which...... Listed under: Home Automation Projects

Raspberry Pi + Arduino Serial with LCD Screen

Intro

This is my Raspberry Pi info LCD, I wanted to try and get the Arduino and Raspberry Pi talking to each other through USB serial and I made this little project. The Raspberry Pi uses a python script to get the data and then...... Listed under: LCD Projects

Raspberry Pi Internet Monitor

In my house, you can often hear someone shouting "Is the Internet down?" Sometimes it is but most time it's a "user problem". I decided to build a gizmo that would make it easy to tell whether the internet connection was working

Listed under: Internet - Ethernet - LAN Projects
1029. Use ssh to talk with your Raspberry Pi. This brief guide explains how to use ssh to talk with your Raspberry Pi. You will need: 1 Raspberry Pi connected to your router (Monitor and keyboard.) If you are looking for a guide to access your Raspberry Pi from the internet loc here: http://www.instructables.com/id/Raspberry-Pi-as-webserver/...... Listed under: Other Projects

1030. Floppy Drive music /w Raspberry Pi Use your Raspberry Pi to control a floppy drive to make music! Step 1: Materials Raspberry Pi A power supply (can be found in old computers) Floppy drive Breadboard Wires (9 female to male and 1 male to male) Step 2: Connect floppy drive...... Listed under: Sound - Audio Projects

1031. RDM6300 RFID with PIC18 Dev Board After getting a simple LED-blink program working, I moved on to the RFID portion of my project. It seemed to be the simplest of the three major parts (RFID, SD card, and MP3) because it's basically just configuring the UART to read and check the...... Listed under: RFID - NFC Projects

1032. Telegram on Raspberry Pi In one of our last tutorials we have installed WhatsApp on Raspberry. Whatsapp at the moment is definitely the messaging services, but there are also many alternatives although little known. One of these is Telegram. "Telegram is a cloud-based mobile and...... Listed under: Other Projects

1033. Raspberry Pi Arcade A few months ago, I decided that I wanted an all-in-one arcade machine. I started looking for some info on how to build one, and immediately, the name "Raspberry Pi" came up. This Christmas, I got a couple of them. I started experimenting with Raspberry Pi Arcade...... Listed under: Home Automation Projects

1034. Raspberry Pi powered by batteries In this instructable I will show you how to properly supply power to a Raspberry Pi or Pi 2 with a battery pack or any voltage between 2.9 - 32 volts DC. I will be using a efficient Pololu Step-Up/Step-Down Voltage Regulator and a toggle switch...... Listed under: Solar energy projects

1035. Raspberry Pi B & B+ boot SD card for PROTA OS (HTML5 UI) Follow this instructable to get your PROTA OS up and running on your Raspberry Pi without pulling too much hair. NOTE for your understanding PROTA OS is an alternative, headless-oriented OS for Raspberry Pi for people like me who seek I-just-want-to-plug-and-use. Burning the image, I'd...... Listed under: Other Projects

1036. H Bridge Control using Raspberry Pi / Micro controller I am looking for input on this circuit that I have designed. I am currently working on a project called the Net-EEL RC Car. It is an RC car that will be controllable using Network Socket Servers / Clients. Therefore, you will be able to...... Listed under: Other Projects

1037. Raspberry Pi & the Neo 6M GPS Previously I built a project where I connected a Neo-6M to an Arduino, but this time around, I want to show how to use a GPS with the Raspberry Pi. Now there are several USB solutions, and apps that work with them, but I wanted... Listed under: GPS Based Projects
1038. Automated Aeroponics System Using Raspberry Pi In this Instructable, we'll learn how to make an Aeroponics system that's controlled via the Raspberry Pi. It uses the Raspberry Pi Camera module to take photos of your plants. Aeroponics is a pretty unconventional method of gardening, that's what makes it fun! Aeroponics makes... Listed under: Home Automation Projects

1039. Old PC Accessories + Raspberry PI = DoorCam & surveillance Kit Step 1: You will need Raspberry PI B (this project is based on B+ model), a couple of PC speakers, TV/Monitor with composite input and its power supply, 3.5mm jack to RCA cable, and a compatible webcam (see at: http://elinux.org/RPi_USB_Webcams). Three... Listed under: Video - Camera - Imaging Projects

1040. Using Phidgets on a Raspberry Pi 2 Hello Makers, In this instructable I will be showing you how to prepare a Raspberry Pi2 for use with Phidgets Interfacekit 8/8/8. The Products from Phidgets allow you to connect sensors and actuators to your pc/pi/mac through the port. Most of the sensors... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1041. Home Raspberry Pi Project I just received a shiny, brand-new Raspberry Pi in the mail today! I've only been playing around with it for an hour or so but I already love this little device! It only took me about 30 minutes to go from unwrapping to running, which... Listed under: Home Automation Projects

1042. Motion Detection Alarm System A basic USB camera can be used to detect motion in a room. In the following steps we will show you how you can use Reactive Blocks to program a ready to run Java application that sends SMS when motion is detected. With Reactive Blo... Listed under: Sensor - Transducer - Detector Projects

1043. Remote desktop from Windows to Raspberry Pi Instead of connecting your Raspberry Pi to a large TV monitor why not use Windows Remote Desktop Protocol to access your Raspberry Pi computer? In this ible I'll show you how to use the windows remote desktop protocol to access your Raspberry Pi computer. Step... Listed under: Raspberry Programmer Projects

1044. Roberts 747 – DIY Raspberry Pi internet radio/streamer Roberts 747, great radio from 1990. Fully working in very good condition. I bought it on antique sale after a long hunt for something like this. I have a spare Raspberry Pi model B V1 home as a spare and it was just catching dust for... Listed under: Radio Projects, Wireless projects

1045. Blinking LED using 8051 This is the first project regarding 8051 and of course one of the simplest, blinking LED using 8051. The microcontroller used here is AT89S51. In the circuit, push button switch S1, capacitor C3 and resistor R3 forms the reset circuitry. When V is pressed, voltage... Listed under: LED Projects

1046. Piulator Portable Game System via Raspberry Pi This project was a lot of fun to put together. I was looking for a good Christmas present for my nephew, decided that a Raspberry Pi influenced project would be cool. He likes gaming and computers, so this made sense. I made an identical... Listed under: Entertainment Projects

1047. Shrink Your Raspberry Pi With MicroSD Card Slot The Raspberry Pi itself is about the size of a credit card, but it only has a standard sized SD card slot. When you plug in a standard full sized SD card into it, the card sticks out of the outline of the Raspberry... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1048. Low Power Raspberry Pi Fileserver This is a low power home file server I built from a raspberry pi and two USB drive cases. I've made it as a network drive on all of my home computers, so we have one common repository for files, documents, and pictures. It's set... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects
1049. How to use an Arduino shield with the Raspberry Pi
Adding Arduino shields to the Raspberry Pi can be a very big pain. You end up having a mess of wires running around and setting up the software is a challenge in its own right. Here is a simple solution to start your own.…… Listed under: Other Projects

1050. MCP3008 Raspberry Pi Breakout hat
Howdy Y'all Back when I was working on the Raspberry Pi portable emulator that became the backseat system, I thought that I would want to use an analog joystick like several of the other builds. However I was trying to get work via…… Listed under: Development Board - Kits Projects

1051. ThingSpeak Temperature Monitor with Raspberry Pi
Step 1: What You’ll Need
A RaspberryPi BrickPi 9V battery – for powering the BrickPi board and sensor
Dexter Industries Thermometer
Step 2: Signup for Thingspeak
First signup for the new account in things https://www.thingspeak.com
Step 3: Login to Thingspeak
Login to your…… Listed under: Sensor - Transducer - Detector Projects

1052. Iteadino Plus – ARM Cortex-A8 Dev-Platform
ITEAD studio is based in Shenzhen, China, which is located with China's biggest elec market as well as one of the most integrated electronic supply chains in the world. A vast number of exciting and innovative prods designed, sourced and manufactured around us every.…… Listed under: Other Projects

1053. AirPlay Radio with Raspberry Pi and WiFi
Before I started working for Pelagicore I won two Raspberry Pi's (short RP) which they sponsored. One because I was one of the first people on the foss-gbg mailinglist which they started. It is for people from Gothenb and surroundings who would like to join…… Listed under: WiFi / WLAN Projects, Wireless projects

4. Raspberry Pi FPV on RC TerraDrone
My progeny loves operating our Nerf TerraDrone named James. He is able to animate James while trying to stay out of sight so I got the idea of using the Pi Surveillance Project by Michael Castor from the April/May 2015 edition of Make Magazine to…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Video - Camera - Imaging Projects

1055. How to Make a Arduino+Raspberry Pi Robot Platform
This is not the definitive story on Pi and Arduino orchestration. Just my vers Step 1: Berryboot 1. Get Berryboot. Berryboot will allow you to download several Raspberry Pi images. Step 2: SD Card Preparation: extract the zip files to a blank SD card.…… Listed under: Robotics - Automation Projects

1056. Raspberry Pi 2 Media Center: Kodi on XBian
Overview This guide walks through the construction and configuration of a home media center from parts to running system. After following these steps, you will have a running Kodi media server on a Raspberry Pi 2 in Altoids tin case, ready for you to.…… Listed under: Video - Camera - Imaging Projects

1057. (Week 13) Testing with 16×2 LCD screen and Raspberry Pi using Fritzing
Here, I want to testing between 16×2 LCD screen with Raspberry Pi. As you can from my previous blog, the circuit have been construct based on this connection. If there had no problem with all the connection, I will proceed to co it with.…… Listed under: LCD Projects

1058. Using the Raspberry Pi to control an ATX power supply
I'm really enjoying my new 3D printer, but I just can't leave my laptop conne the printer all the time. I know that I could simply use SD cards or use another host computer, but there are better options. In orde untether myself.…… Listed under: Other Projects

1059. Simple Snap Together Raspberry Pi Wood Case
This is a simple low cost wood case for the Raspberry Pi version 1 rev B that I built off the Adafruit Pi Box (http://www.adafruit.com/products/859). Assembly is simple, all the pieces snap together so no glue or nail needed. I used this project…… Listed under: Other Projects

1060. Raspberry Pi Colored Server Case Mod
The purpose of this mod is to create a case for the Raspberry Pi, based on Adafruit’s case ci by Mike Doell. It will have a better airflow and be easily identifiable by color. For this project you'll need: Heatsink Heatsink compo Mike Doell…… Listed under: Other Projects
1061. Interfacing a VFD display to the Raspberry Pi I’m in the process of building a home automation controller using my Raspberry Pi, and figured it would be cool if it could display the current song and artist on my Pandora player. There were many options for a display could go…… Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1062. Modelling a Raspberry Pi case – from Cardboard. 2. Light Pipes This is a very common technique used in design - where for econom want the lights (LEDs) mounted on a circuit board, but the board is positioned away from the case or user-interface. By taking a pi clear plastic, one…… Listed under: Development Board - Kits Projects

1063. Raspberry Pi: Launch Python script on startup As I’ve been working on my own Pi projects, I’ve been discovering many little tricks and tips by scouring various websites and assembling information, testing and optimizing. So, here is another one of my ’meat-and-potatoes’ Raspberry Pi instructables. This Instructable will show you how to…… Listed under: Development Board - Kits Projects

1064. Raspberry Pi online SSH (easy way) Raspberry pi is a mini computer that can be carried easily. Usually people use Raspberry Pi as an embedded platform. And mostly people control or developing something with their Raspberry Pi using SSH protocol because it is more simple and doesn’t take many space. Some…… Listed under: Wireless projects

1065. Dedicated Automobile Traffic Monitor with Raspberry Pi Step 1: The screen The screen I have found a nice screen on ebay for ~18€ TFT LCD Touch Screen, cheap and small is ideal. - Installing raspbian-DVK512-12040725.img To use the touch screen, we run under Raspbian distribution, you can download the…… Listed under: Phone Projects

1067. Let’s get physical with Docker on the Raspberry Pi With Docker on the Raspberry Pi we are able to connect cloud tools with IoT devices. So how can we interact with the real world from inside a Docker container? Let’s see and get physical…… To keep the tutorial simple will use the binary…… Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1068. Raspberry Pi Dedicated Internet Radio and Music Player Have you ever wanted something to fill your day with lovely sounds but don’t want to dedicate a PC to this purpose? The Raspberry Pi provides exactly what we need, and with a few component parts laying around you can control it with a few…… Listed under: Internet - Ethernet - LAN Projects

1069. Raspberry Pi DropCam Alternative I was looking for a way to check in on my house while away as well as have any motion captured uploaded to the internet as a security camera. Doing a little research online and realizing that I had a raspberry pi and a…… Listed under: Video - Camera - Imaging Projects

A Raspberry Pi or Mr. Clock-workers server Part list: Picture No. 1 Raspberry PI model B with 512 MByte ram Raspberry PI camera 16 GByte SD card WLA stick (TP-LINK TL-WN722N) Freecom 500 GByte USB hard disk 4 - Port USB - HUB (Typhoon) Glasdome 11” high / 6,3” diameter Picture…… Listed under: Timer Projects

1071. How to get aMule on Raspberry Pi In this instructable I’ll show all the steps to get a nice, web managed, aMule node on a Raspberry Pi. The idea born from the need to have a low-cost and low-consuming aMule node always running and connected to internet. I don’t use…… Listed under: Internet - Ethernet - LAN Projects
1072. The best Raspberry Pi 2 starter kits compared and reviewed
The Raspberry Pi is an amazing low-cost computer. Unlike the ever-popular Arduino microcontroller, the Raspberry Pi was designed to be a full-blown computer from the start. It can run various flavors of Linux/Unix, act as a Media Center, and even moonlight as a Microcontroller. First…… Listed under: Other Projects

1073. Bitcoin Mining using Raspberry Pi
Want to mine some bitcoins? Want to earn for free? Have a pi not being used? Then let's mine some bitcoins! Step 1: What is Bitcoin? If you don't know already, Bitcoin is a virtual currency set up in 2009. Bitcoin has grown in reputation…… Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1074. Automated vegetable cultivation system
Welcome! rSense "Makashitakun" is the automated vegetable cultivation system which is up with Arduino and Raspberry Pi. Arduino is used for collecting sensors data and handling actuators. Raspberry Pi is used for controlling which manage all Arduino units to work properly and hooked up…… Listed under: Other Projects

1075. Raspberry PI L298N Dual H Bridge DC Motor
There are no examples that I could find that properly show how to get a simple DC motor working with Raspberry PI. This is a simple tutorial for "How to make a motor turn." Robots, wheels, conveyors, and all sorts of stuff can be made…… Listed under: Motor Projects

1076. Raspberry Pi Soil Moisture Sensor
Agriculture consumes between 80 - 90% of all freshwater in the United States. An easy way to conserve water in the agricultural sector is to install a soil moisture sensor. Soil moisture sensors measure the amount of water in the soil to maintain consistent and…… Listed under: Sensor - Transducer - Detector Projects

1077. Interfacing hex keypad to 8051 Hex keypad.
In an 8051 microcontroller, it requires 12 cycles of the processor clock for executing i instruction cycle. For an 8051 microcontroller clocked by a 12MHz crystal, the time taken for executing one instruction cycle is 1µs is according to the…… Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1078. Raspberry Pi "Google Glass" – simple and sleek
I have had this completed for a while now, but haven't spent the time to make this instructable which is actually the crux of my project. At the release of the Raspberry Pi, I immediately thought how amazing this would be as a wearable computer…… Listed under: Internet - Ethernet - LAN Projects

1079. Raspberry Pi Portable Games Console
Building this Portable Games Console is possibly the most fun I've had using a Raspberry Pi. It's not just the build that's fun; I've now got a fully functioning games console, so I can play all my favourite old arcade games, on-There's a…… Listed under: Game - Entertainment Projects, How To - DIY - Projects

1080. Touch Display for Raspberry Pi
We add to Raspberry Pi a TFT touch screen to display the system console, movies and favorite photo control a relay board … at your fingertips, literally! To avoid using an HDMI monitor the cost well above that of Raspberry Pi, in pi articles we…… Listed under: LED Projects
1081. Turn your Raspberry Pi into a desktop PC How to turn a credit card sized, $35 computer into a fully functional Desktop PC with sur
onto root of SD card. 3. Connect Pi to monitor, keyboard,…… Listed under: LCD Projects

1082. Ultimate Raspberry Pi Configuration Guide The Raspberry Pi is a great thing: it is real computer, it is cheap ($40), it can interface w
electronics, talk to the web and has full HDMI support. However it runs on Linux, which I have a love-hate relationship with. I love t
of…… Listed under: Wireless projects

1083. Connect-Program Raspberry Pi and a MMS451 LED Display Driver The subject here is connecting the Raspberry Pi to a MMS451 LE
display driver. This is written in Python to demonstrate bitwise programming and shift register operation. Using only two input p
(clock and data) for serial date input produces 35 open drain outputs. The…… Listed under: LED Projects

1084. Raspberry Pi Temperature Logger via Radio This project makes use of a raspberry pi, to read the temperature of several radio sen:
and store them on a Sqlite database. The same raspberry pi is used to serve webpages with the graph of the acquired temperature
live demo here. Step 1:…… Listed under: Radio Projects

1085. X105 EXPANSION BOARD KEY FEATURES Input Voltage - 6V to 23Vdc converted to 5V, 3A via step-down DC/DC converter to power the Raspberry Pi
output - HDMI to VGA converter supporting up to UXGA (1600×1200) and 1080p with 10-bit DAC RS232 serial communication - Control the Raspber
Listed under: Development Board - Kits Projects

1086. Turn your Raspberry Pi into a Hamster Fitness Tracker Have you ever wondered just how much your hamster runs throughout the
day/night? How far? How fast? My 9 year old daughter did, and we decided to find out. Turns out, it was pretty easy, and the result
unbelievable. Here are the supplies you…… Listed under: Sensor - Transducer - Detector Projects

1087. ICStation Electronic Dice DIY Kit 7pcs 5mm Red LEDs Description Electronic Dice Kit Instructions Electronic dice kit is based on the
oscillator circuit and fun circuit CD4017 counter display kit. Can simulate the dice, make fun of the game. One. Kit parameters: Sup
voltage: 4.5-5V Dimensions: 74 * 35mm Two. Function play: When…… Listed under: How To - DIY - Projects, LED Projects

1088. Raspberry Pi Webserver Wenn ihr euer Raspberry PI (2) A / B (+) mit Raspbian und aktiviertem SSH bereit habt, können wir sofort
loslegen. Für wen ist dieser (Web)Server geeignet? Das Raspberry Pi ist schlicht zu langsam, um eine vollwertiger Server zu sein, w
einigen Einschränkungen doch…… Listed under: Internet - Ethernet - LAN Projects

1089. Make a fire detector in minutes with Samsung SAMIIO, Arduino UNO and Raspberry Pi Let’s build an IoT device that sends flame se
data to SAMI using SAMI’s WebSockets. The IoT device consists of an o-the-shelf sensor, Arduino UNO and Raspberry Pi. In this
implementation, a Simple Manifest is used to create a new device type quickly. Then you…… Listed under: Sensor - Transducer - De
Projects

1090. Web-based IR Remote on the Raspberry Pi There are many devices that use infrared remote controls - TV’s, DVD players, cameras,
sockets. So getting a Raspberry Pi to be able to send remote control signals opens up many possibilities for projects. Combining t
pins with a web server on the…… Listed under: Wireless projects

1091. Raspberry Pi Case Fan I purchased an inexpensive snap-together acrylic case for my Raspberry Pi from a seller on eBay. Overall I w
happy with the case, but although this case has holes for passive air circulation I noticed that after running the Pi in the case that
some…… Listed under: CNC Machines Projects

1092. Raspberry Pi – Refrigeration Analyzer Refrigeration and air conditioning devices consume ~25% of all electricity generated on our planet! From smal
owners to franchised restaurant chains to medical facilities the initial, operating, and maintenance costs of refrigeration and air conditioning units ca
quite staggering. The biggest factors contributing…… Listed under: Other Projects

1093. Wiring RGB LED's So I've been looking into this a little more. I took your guys idea of using the TLC5940 LED Driver. So now I'm asking for some help agai
figured 1 long question that eventually solves this is better then a bunch scattered throughout stackexchange…… Listed under: LED Projects
1094. Breadboard Adapter for the Raspberry Pi

We don't need much in the way of parts or tools to build the adapter:

**Parts:**
- 1x 26-W IDC Header 2.54mm
- 2x 13-W Pin Strips 2.54mm
- 1x piece of Veroboard / Strip Board
- 1x 26-W Ribbon Cable with 26-W IDC Headers
- Too Cutters
- Pliers

Listed under: Development Board - Kits Projects

1095. Raspberry Pi Pandora's Jukebox

I recently had a Crosley mini jukebox/CD player handed to me with the intention of “fixing” it. The person who gave it to me only ever used it for a radio since nobody listens to CD’s anymore, so I decided it would be a much......

1104. Setting up a PiFace with your Raspberry Pi

This is a basic guide aimed at beginners who have just received a Raspberry Pi / Pi-face and want to know how to set it up, I felt the need to write this up after receiving a PiFace and not be able to find any….. Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1105. How to Make a Raspberry Pi Media Panel (fka Digital Photo Frame)

The goal of this project was to create a low cost Raspberry Pi Media Panel—a nice looking screen that could stand in the living room or attach to the refrigerator with the primary purpose of streaming personal photo and video content full time, but also…… Listed under: LCD Projects

1106. Redundant cloud storage with a friend and a Raspberry Pi

Do you enjoy the many benefits of cloud services but do you also like to have full control of your own data? Maybe you are worried about privacy or maybe you just want a little more flexibility. In my case I was having…… Listed under: Other Projects

1107. Smartphone Garage Door Opener

I had an extra Raspberry Pi laying around from when I ordered two of them a few months ago. The first one for a media center and it runs XBMC flawlessly allowing me to watch downloaded movies on my television. I pretty much…… Listed under: GPS Based Projects

1108. Coffee Table Pi

The purpose of this project is to create a modern slimline version of an arcade cocktail cabinet. Also to do other tasks such as browse web or write emails with the use of a wireless keyboard and mouse. The 24 inch LCD screen mounted in…… Listed under: Home Automation Projects

1109. Raspberry Pi Playstation Mod

I’ve always been a gamer but was more a C64 person back in the day so we never really had a console. I always loved popping around to friends and playing things such as Mario Kart as well as a host…… Listed under: Game - Entertainment Projects

1110. Port a Raspberry Pi Project: The eventual result of this instructable is, a portable (self powered) raspberry pi system to run field experiments. Part 1 Small inexpensive portable system that includes, Computer (RPI), Monitor with Audio speakers (Second screen from refurbished Auto DVD player $29 including the DVD player to be…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1111. Raspberry Pi moving timelapse

Step 1: Connect the Camera So to connect the camera is quite simple and there is a lot of help online. The social help video is here: https://www.raspberrypi.org/help/camera-module-set... but I found this to be more helpful http://thepihut.com/blogs/raspberry-pi-tutorials/1... once installed and you have enabled the camera…… Listed under: Video - Car Imaging Projects

1112. Read temperature with DS18B20 | Raspberry Pi 2

Hello! This is my first instructable project, so it won’t be as professional as other are using DS18B20 temperature sensor to get the temperature of your room. Enjoy! Step 1: Supply You will need: The sensor itself DS18B20 http://www.ebay.com/itm/Waterproof-Digital-Thermal... Resistor (I’m using 4,7k Ohm)…… Listed under: Temperature Measurement Projects

1113. Solar Powered Raspberry Pi

Step 1: What You need A raspberry pi A solar panel (with built in charger controller or a Solar Charging Regulator) A car power socket A usb car power adapter A battery and some wire Step 2: Connecting the Battery First off we need connect the…… Listed under: Solar energy projects

1114. Model Railway Automation with Raspberry Pi

The popular and inexpensive Raspberry Pi(1) tiny PC offers some interesting I/O like I2C and GPIO. Because I2C bus is a common and standard one, the idea to use it for Model Railway automation was born in 2013. Together with Peter Giling, who lives…… Listed under: Other Projects
1115. DIY Home Security and Automation with Raspberry Pi 2 In this instructable I will detail my methods for creating a fully custom Home Security and Automation System. This is a work in progress, and as I will be adding to it as I go. For now I will provide a breakdown of the tools and techniques I have used so far. Listed under: Security - Safety Projects

1116. Raspberry Pi, Internet Radio We have been aiming to do a mini hack for a while to bring some new life to an old radio and let us radio waves to our favorite internet radio stations. Step 1: You Will Need... Depending on the radio you are going to install your... Listed under: Radio Projects, Wireless projects

1117. Raspberry Pi Controlled Aquaponics Aquaponics /ˈækwəˈpɒnɪks/, is a food production system that combines conventional aquaculture (raising aquatic animals such as snails, fish, crayfish or prawns in tanks) with hydroponics (cultivating plants in water) in a symbiotic environment. In normal aquaculture, excretions from the animals being raised can accumulate... Listed under: Temperature Measurement Projects

1118. Introduction to controlling GPIO pins with Python Setting up your Pi for GPIO programming You need to install a few things to get Python to talk to the GPIO pins and control them. If you're using the standard Raspbian OS, it's an easy affair. Fire up your terminal... Listed under: LED Projects

1119. WiFi – Access Point out of a Raspberry Pi (Repeater) What do you need? A Raspberry Pi, model B. A boot SD card for the Raspberry Pi USB WiFi device that supports "Access Point" mode. An Ethernet cable to connect to the local network. How does it work? The Raspberry Pi is configured as... Listed under: Wi / WLan Projects

1120. Radio Caroline on the RaspberryPi The Swinging 60's This is an appropriate label for the 1960's for 2 reasons: (1) it was a decade of change, especially regarding popular music & fashion, (2) You have to now be in your 60's to have experienced it as a 1960's teenager. Listed under: Radio Projects

1121. Play Music on Raspberry Pi Using XMMS2 Introduction I installed and trialled the following music/media players in my Raspberry Pi: rhythmbox - Crashed every time I clicked on a song audacious - Did not respond every time I clicked on a song mplayer - Worked as expected clementine - Did not respond... Listed under: Sound - Audio Projects

1122. Raspberry Pi Irrigation Controller Gardening improves health and quality of life, connecting us to our local environment. Plus, you get to grow your own organic fruits and veggies at very little cost. Yet for all these fantastic benefits, remembering to water can still take a backseat to busy lives. Fortunately, home automation... Listed under: Home Automation Projects

1123. Build your own Raspberry Pi Mini 3D printing monitor While Adafruit’s builders have built up a reputation for constructing very cool original 3D printed toys, perhaps the most impressive of all their designs was the 3D printed Raspberry Pi Mini Computer, an actual working and customizable PC housed in a 3D printed structure... Listed under: LED Projects

1124. Laser Harp with Tah and Raspberry-Pi This valentines we made this wooden Harp and used Laser and Light Dependent Resistors (LDRs) to play music. I will not be showing you how to make the wooden structure, but you can find the images with exact dimensions if you want to use them... Listed under: How To - DIY - Projects, Sound - Audio Projects
1125. Installing and Using Pidora OS on Raspberry Pi

WHAT IS RASPBERRY?

Raspberry is a new (one year old), ultra small (credit card size) and cheap (35USD), Linux computer. The CPU is an ARM processor at 700MHz with 256 Mb (type A) or 500Mb (typeB) of RAM. The use of Linux for Raspberry...... Listed under: Development Board - Kits Projects

1126. Turn a keyboard into a Raspberry Pi case for around $20 or less.

My first published instructable. I wanted to have a cover for my RF and didn’t want to spend a lot to get one. I remember seeing one online and thought I could do something like this: http://www.howtogeek.com/121814/turning-a-keyboard-into-a-computer-with-raspberry-pi/ on the cheap. Sure, mine didn’t out as...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1127. Raspberry Pi: Minecraft Server

These instructions will provide you with a list of requirements and steps for configuring your own Minecraft server using the Raspberry Pi. Once complete, you will be able to access and play with your friends from across the world! Listed under: Internet - Ethernet - LAN Projects

1128. Raspberry Pi and GPIO pin: Controlling an LED with Bash and Python

To this effect a LED, resistor 330 ohmns, Wire, and protoboard, or tin and a solder. Also need our Raspberry tenga yes Raspbian preinstalled, if not your case, you can see how to do it in the following link directory. Mounting the circuit Y can...... Listed under: LED Projects

1129. OBD-Pi

Step 1: Hardware Required: Raspberry Pi Model B or B+ Aftermarket head unit (Note: Must support Auxiliary input) Plugable Bluetooth 4.0 Low Energy Micro Adapter 2A Car Supply / Switch or Micro USB Car Charger ELM327 Bluetooth Adapter or ELM327 Cable RCA cable...... Listed under: Bluetooth Projects

1130. Robot Using Raspberry Pi & Bridge Shield

The Bridge Shield is a board for students, hackers & researchers. You can use it along with Arduino Uno to create cool DIY projects with ease. This will be an open source board and we are presently designing the second generation. We...... Listed under: Robotics - Automation Projects

1131. Arduino & Raspberry Pi Camera Interface

Yes, we learned that we can take mobile phone camera modules from almost all mobile phones to interface them with our advanced hobby electronics projects just as with any other standard add-on modules. Since this calls for an appropriate microcontroller, it is better to use Arduino...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1132. Mechanical Pi

As part of the semester topic „Techno Legacy” David and I decided to focus on pocket calculators. These devices become more and more irrelevant due to the universal integration of their functionality into major digital devices, primarily smartphones. Doing some research on calculators and...... Kodi is a piece of software you can download and... Listed under: Sound - Audio Projects

1164. Multichannel Professional Data Logger on Raspberry Pi – Part 1 | See the Part 2 for the hardware and Part 3 for the software implementation. In this series of articles I'll explain how to build a multichannel Data Logger, capable of collecting voltage, current and temperature measurements over the specified intervals of time. Our alternate goal... Listed under: Temperature Measurement Projects

1165. USB relay module for Windows, Linux, Raspberry Pi | USB is a very well documented and reliable interface. Nearly every computer system today is equipped with one or more USB host connectors. Sometimes you need some inputs and outputs for tasks surrounding your PC or you have a cool idea for an automation with... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1166. Back-of-Monitor Raspberry Pi Mount | As Raspberry Pi computers begin to appear all over the world, people start wondering what I do with them. The first thing I wondered (after I got it up and running) was "how the heck am I going to get this mess of cables off.... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1167. Remote control with Raspberry Pi and Phidget WebService | Enable your Raspberry to control relay, led, sensor and digital input relay with Phidget WebService. The Phidget WebService is a background process that broadcasts all events and data from a USB Phidget to the network: It uses link local addressing which allows you to use.... Adafruit Prototyping Plate for the Raspberry Pi

As part of my Big Trak refurbishment (not going as well as I wanted it to), I decided to use Adafruit Prototyping Plate to mount the additional electronics on. If you’re not familiar with it, then this is it: So it’s a double-sided plate which has holes for mounting and comes with a variety of components.

1179. Raspberry Pi case with built-in surface mount for less than $2. I own two RPI’s: one is a media server for my prerecorded TV shows; the other is hooked up to a Motorola Lapdock to run experiments and for educational purposes. I am an engineer who volunteers for the Scouts of America. I teach computers. …… Listed under: Interfacing (USB - RS232 - I2C - ISP) Projects

1180. Raspberry Pi based Solar Street Light PROJECT DESCRIPTION: The project is designed for LED based street lights with auto intensity control using solar power from photovoltaic cells interfaced to a Raspberry Pi board. As awareness for solar energy is increasing, more individuals and institutions are opting for solar energy. …… Listed under: Solar energy projects

1181. Raspberry Pi 2 DIY LED LAN device counter: Do you know how many devices are on your local network? That is what we were wondering at our hackerspace HackBergen. Yes, there are available programs and apps to scan your network, but we can also scan with the Raspberry Pi (RPI) and show the …… Listed under: Solar energy projects

1182. "Portable" Raspberry Pi: Merry Christmas world!!! This is a special Christmas ‘ible that I’m making based off what I got for Christmas this year. I got a small monitor and small keyboard this year (AA battery for size comparison), and I decided to use it to make …… Listed under: LCD projects

1183. Raspberry Pi – Wireless Projector: Have you ever wanted to walk around the room with your laptop, not tethered to a projector, an easy project? This Instructable will show you how to make a Raspberry Pi powered Wireless Projector. What You Need: Raspberry Pi Model B+ (I used …… Listed under: Wireless projects

1184. How to connect Raspberry Pi UART to a computer: Significance of UART in embedded Linux development: Linux porting is a difficult task. We can’t simply boot a Linux board by building u-boot, kernel, and root file system images. This type of approach never works. It will usually lead to several issues like kernel panics. …… Listed under: Interfacing (USB - RS232 - I2C - ISP) Projects

1185. Using a USB external hard drive with your Raspberry Pi: Experimental introduction: In many cases, SD capacity is not enough. Luckily, Raspberry Pi can easily be connected to external USB hard drives. Follow the steps in this section, and you will soon have a lot more storage connected to your Raspberry Pi. Step 1: Experimental …… Listed under: Interfacing (USB - RS232 - I2C - ISP) Projects

1186. A Raspberry Pi Controlled Two Faced Clock: This Instructable shows how to use a ‘Simple but Strong Plastic Box’, (http://www.instructables.com/id/A-Simple-but-Strong-Plastic-Box/) from my previous Instructable, to make a Two Faced Clock which uses a Raspberry Pi to control two stepper motors. I'll not explain how to make the box itself, but will show …… Listed under: Clock Timer Projects

1187. GPS and the Raspberry Pi: This example will show how to use the Dexter Industries GPS shield with the Raspberry Pi using the Arduberry. Step 1: Hardware Required 1. Raspberry Pi 2. Arduberry 3. Dexter Industries GPS Shield Step 2: Connection the shield. Slide on the Dexter Industries GPS shield on the Arduberry. …… Listed under: GPS Based Projects

1188. Control a Lionel Train with a Raspberry Pi: What happens when you take an old Lionel model train system and add some web-contr…... project controls a Lionel model train set with the Raspberry Pi. In this project, we go step by step through the parts, hardware, and software to control a Lionel. …… Listed under: Interfacing (USB - RS232 - I2C - ISP) Projects

1189. Sizing a wind turbine to power your Raspberry Pi: This is Your Pi on Wind: Got a special project for your Raspberry Pi that requires it to operate off the electrical grid? If solar power doesn’t provide enough juice, add some wind to the mix with an inexpensive wind turbine. Project Curacao is a …… Listed under: Rad
How To Assign A Static IP to The Raspberry Pi Normally when devices connect to the network they are assigned IP address by the router which does so sequentially (in the order of devices being connected) or randomly. The same goes with your Raspberry Pi. But if you want to use your Pi without a static IP address, you can follow these steps...

Raspberry Kodi Streaming Speaker My dad liked to buy a high end streaming speaker. But he found no wifi speaker with the ability to stream music from a USB stick and listen music with the headphone. The most speaker we found had no display but I think it’s nice...

Raspberry Pi – single board Linux computer I have been working with the Raspberry Pi for a few months and have had a great time experimenting. I plan on documenting some of the things that I have been able to do and observations that I have made. My latest project is to use...

Cheap solderless reset button for Raspberry Pi This is my first Raspberry Pi. I’ve bought it as an XBMC home-theater box (and a “what else”). One of the annoying things I’ve found out right away was that it didn’t have a reset button. You can politely shut down...

Make any Dumb TV a Smart TV Do you wish your standard television could connect to the internet? You would have the ability to stream Netflix, Hulu, or look up anything on Google when your cell phone is out of reach. All of your music and movie files could automatically be linked...

Electronic Circuit Designing: Multitasking with Circuits (Part 4) Step 8) Find reusable modules from the circuit diagram Whenever hardware designing, the first rule is to make it in modules that can be reusable. The modules that we make for this particular project can come useful in another project and hence...

DIY Home Security + Automation using a Raspberry Pi This instructable should help you set up a DIY home security + automation system that uses 433Mhz door/window sensors, 433 MHz PIR motion sensors and webcams to monitor your home and 433MHz outlets to control lights etc. The original project was completed in phases and...

Create a video player with Dolby Digital/DTS output You have an older home theater receiver with an S/PDIF input (optical or RCA) and want to play movies with DTS or Dolby Digital soundtracks? This guide shows how you can get 5.1 sound output from a Raspberry Pi if your AV receiver does...

Raspberry Pi Motion Sensitive Camera Using a Raspberry Pi, a Raspberry Pi camera module, a PIR motion sensor, a USB WiFi adapter, and a handful of parts, and a couple of Python programs, you can construct a camera that will automatically snap photos or record short videos when something moves in...

Turning your Raspberry Pi into a personal web server LAMP is an acronym that stands for LinuxApacheMySQLPHP and are components required to run a Dynamic HTML webpage. This instructable will demonstrate how you can turn your Raspberry Pi into a personal web server. The steps to install all of the components are relatively straight...

Raspberry Pi Temperature and Light Sensor Design Required 2 x DS18B20, 2 x 4.7k resistor The DS18B20 is a rather useful sensor because you can read more than one of them using the same GPIO pin. The Raspberry Pi is able to recognise the input from each separate sensor. This system...

Dual Project: AirPlay-Pi and new life for an old radio Hey, Welcome to my first ever post on Instructables! The Project you’re about to read over is setting up a Raspberry Pi to use ‘AirPlay’ and how I used it, which clashes with the second part, the new life for my old radio...

Step 1:...
1202. Raspberry Pi Internet Radio / Music Player Introduction In the March 2012 issue of Nuts and Volts I wrote an article entitled “Build Own Wi Internet Radio” about how to build an Internet radio using a repurposed wireless router. While this project worked fine (still does) it had limitations driven...... Listed under: Internet - Ethernet - LAN Projects

1203. Detecting a button press through GPIO using Raspberry pi If you want to build electronic devices, at some point you’re going to need GPIO. In this exercise, we’re going to read the value of a push button on a breadboard. Set up the circuit as shown in the pictures carefully...... Listed under: Sensor - Transducer - Detector Projects

1204. engravR: Build a Pi-Powered Laser Engraver using Raspberry pi, engravR is a Raspberry Pi-powered laser engraver built primarily from two old DVD-RW drives. The idea of using DVD drives to make a laser engraver is not particularly new, but most systems use an An...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1205. GSM Remote Control – GSM Module Raspberry Pi, This GSM Mobile is used for our Remote Control (for example Gate Control, Temperature Control...... use the word ‘module’ because, unlike what we did in our remote control projects, this time around the mobile phone is not mounted on a printed b...... but rather on...... Listed under: GPS Based Projects

1206. Raspberry Pi – Stepper Motor Control & Breakout Board Overview Many of the previous Raspberry Pi projects I had been working on were based on fairly simple GPIO logic to turn things on and off. Today I wanted a little more of a challenge so I started working to control a stepper motor from...... Listed under: Motor Projects

1207. LCD Library (HD44780U) The wiringPi LCD devLib allows you to drive most of the popular 1, 2 and 4-line LCD displays that are based on the Hitachi HD44780U or compatible controllers. It allows you to connect multiple displays to a single Raspberry Pi. The displays c...... Listed under: LCD Projects

1208. Motion Sensor using Raspberry Pi This example shows how to use Raspberry Pi® hardware to interface to a motion sensor and connect an external LED. Introduction Raspberry Pi target enables you to create and run Simulink® models on Raspberry Pi hardware. The tar...... Listed under: Sensor - Transducer - Detector Projects

1209. How to Connect an LED to your Raspberry Pi The easiest way to turn on an LED using the Raspberry Pi is to wire it up to the +3.3v pins of the General Purpose Input Output (GPIO) header and ground (0v), making sure to place a resistor in series with the LED...... Listed under: LED Projects

1210. Analog Gauges Using I²C on the Raspberry Pi I’ve been intending to try driving Switec X25.168 motors using the MCP23008 I²C I/O port expander chip on an Arduino, but it occurs to me that it might be more interesting to try this on a Raspberry Pi. If it works, it will demonstrate a...... Listed under: Clock - Projects

1211. How to Connect a DDS module to your Raspberry Pi, Adding an Envelope Detector to convert an RF input to a DC output I connected the ADC PI module to the DDS header and stacked the DDS module on top. PCB support spacers were used to hold the modules together and to take the strain...... Listed under: Sensor - Transducer - Detector Projects

1212. A project log for FirePick Delta, the Open Source MicroFactory Software Topology and Theory of Operation OpenPnP is the high-level brains of the machine, that does the seemingly-simple stuff like “pick up that part” and “put it over there”. Lots of libraries and systems feed information to it, and it passes information to the various...... Listed under: Sensor - Transducer - Detector Projects

1223. List of required material using raspberry pi
- Raspberry Pi 8GB SDHC Class 10 Card
- Nano Wifi- Stick
- Flytron Navigatron I2C GPS 4ch
- I2Csafe Bidirectional Logic Level Converter
- ADS1015 ADC
- Suppo A2212/13 1000KV Brushless Motor
- 10"x4.5 GF Propeller Set
- OraStück 2 CW 2 CCW Flyduino HEXFET 20A Motor Controller
- Drotek IMU 10DOF

1224. Control home devices with Bluemix Internet of Things (Part 2)
This is a continuation of Part 1 Controlling home devices with Bluemix Internet Of Things
If you haven't read Part 1, please do that first... In Part 1 we got the work out of the way. We...... Listed under: Game - Entertainment Projects

1225. Build your own internet radio
This Instructables shows you how to build an internet radio (listen to jazz, house music, rock, salsa...) in less than 30 minutes without any technical knowledge nor soldering. The radio uses a raspberry Pi as hardware, a ready to flash file to write a SDCard...

1226. A Great I/O expansion Shield for RaspberryPi based on I2C
Today we introduce a I/O expansion shield for Raspberry Pi which allow to extend the number of digital inputs and outputs available for our applications. [See also our previous I/O expander for Arduino] having published the LCD display and GSM expansion shield we...... Listed under: LCD Projects

1227. Trigger a Webcam with a button and Raspberry Pi
This instructable will show how to trigger a webcam using Raspberry and a push button. A bash script run at startup and it launch a Python script that survey the GPIO port. When the button is pressed, a "fswebc command runs. Step 1: Materials...... Listed under: Video - Camera - Imaging Projects

1228. Adafruit Ultimate GPS on the Raspberry Pi
How easy is it to get your Raspberry Pi eavesdropping on satellites 20,000 km up in the Wonderfully easy thanks to Linux, and affordable thanks to Adafruit's Ultimate GPS Breakout! This quick learning guide will show you everything you need to do to add...... Listed under: GPS Based Projects

1229. Adafruit FONA using raspberry pi, Ring, Ring! Who's that callin'? It's your breadboard!
Introducing Adafruit FONA MiniGSM, an all-in-one cellular phone module that lets you add voice, text, SMS and data to your project in an adorable little package. This mod measure only 1.75"x1.25" but packs a surprising amount...... Listed under: Phone Projects

1230. Network Interface Failover using FONA
Do you hate it when the internet goes down in your area? Do you want to be notified whe internet goes down when you are away from home? Do you have a project that needs 100% internet availability where you would to be notified...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1231. Raspberry Pi orchestration
In this Instructable I would like to share my personal workflow for working with headless Raspberry Pi are interested in automating the setup and deployment process for one Pi or many this is the post for you. All the code is available Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1232. Web Enabled PIXEL on Raspberry Pi
The PIXEL kit from LED:ART consists of an RGB LED matrix, a IOIO Mint Bluetooth microcontroller drive the matrix, and some software to give instructions to the IOIO for what to display. Originally, only an Android and PC based software was available. Now, web...... Listed under: Internet - Ethernet - LAN Projects

1233. TMP006 Temperature Sensor Python Library using Raspberry pi
Are you looking for an easy way to measure the temperature of something? Consider using a non-contact temperature sensor like the TMP006! This sensor reads the infra-red radiation, or heat, emitted from an object and can...... Listed under: Sensor - Transducer - Detector Projects, Temperature Measurement Projects

1234. Running OpenGL-based Games & Emulators on Adafruit PiTFT Displays using Raspberry pi
The Ideal: Adafruit's PiTFT displays are really sharp. Whereas small composite screens on the Raspberry Pi usually require some video scaling (resulting in blurriness), PiTFT use
1235. Debugging with the Raspberry Pi WebIDE The Raspberry Pi WebIDE includes an advanced, yet easy to use tool, to help you work through code that you’ve downloaded or written in Python. If you haven’t used a debugger, either on the command line or in an integrated development environment (IDE), hopefully this guide..... Listed under: LED Projects

1236. Adafruit PowerBoost 500 + Charger PowerBoost 500C is the perfect power supply for your portable project! With a built-in battery charger circuit, you’ll be able to keep your project running even while recharging the battery! This little DC/DC boost converter can be powered by any 3.7V LiIon/LiPoly battery, and..... Listed under: Battery Projects

1237. SSD1306 OLED Displays with Raspberry Pi and BeagleBone Black Are you looking for a bright graphical display to use with you Raspberry Pi or BeagleBone Black project? Consider using one of the SSD1306-based OLED displays, with the SSD1306 Python library! Although they’re small (only an inch or so in size), these displays produce a..... Listed under: LCD Projects

1238. How To Setup A Web Server On Your Raspberry Pi This page aims to summarise the steps required to install a webserver with PHP support onto your Raspberry Pi. This will allow the Pi to serve HTML and PHP pages to users on the same network. This is a useful mechanism to view images and/or..... Listed under: Internet - Ethernet - LAN Projects, News & Updates

1239. Control Pi-Plate with Spark Core The ppDAQc board from Pi-Plates.com is an inexpensive yet powerful solution for expanding the input/output capabilities of the Spark Core. And since Pi-Plates are stackable, it is a simple task to scale up the I/O capabilities of a Core. All that is required for...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1240. Invisible dog trainer With a pressure sensor, led and speaker you can turn your Pi into an invisible dog trainer that trains your dog to stay on the couch. When the dog sits on the couch, the led blinks and the dog receives the command “Get off the..... Listed under: Sensor - Transducer - Detector Projects

1241. 3: More LEDs and a Button So we now have a traffic light/pelican (Tux!) crossing simulator. The 2nd Red LED is connected to wiringPi pin 3, (GPIO-22), an 2nd Green LED is connected to wiringPi pin 4, (GPIO-23). Test them as before with the gpio command, e.g. for i in...... Listed under: LED Projects

1242. Knight Rider & Cylon Lights for the Raspberry Pi The most obvious application for a Raspberry Pi is re-creating the sliding red light found on “KITT” from Knight Rider or the Cylons in Battestar Galactica. This can all be done with pure electronics but that doesn’t any programming and therefore isn’t as cool...... Listed under: LED Projects

1243. Raspberry Pi 1-Wire Digital Thermometer Sensor (DS18B20) While searching for a simple way to measure temperature using my Raspberry Pi I came across the DS18B20 1-wire digital temperature sensor. This promised an accurate way of measuring temperature with a few wires and almost no external components. The device only cost a few pounds...... Listed under: Sensor - Transducer - Det Projects

1244. My GPS disciplined Rubidium OCXO Frequency Standard and NTP server project Part 1 The Doctor: People assume that time is a strict progression of cause to effect, but actually from a non-linear, non-subjective viewpoint—it’s more like a big ball of wibbly wobbly... timey-wimey... stuff. Amy Pond: It's spacey-wacey, isn't it? —Dr. Who? Though delightfully silly, there is...... Listed under: GPS Base Projects

1245. Drive a 16×2 LCD with the Raspberry Pi Overview Adding a LCD to any project immediately kicks it up a notch. This tutorial explain how to connect a inexpensive HDD44780 compatible LCD to the raspberry pi using 6 GPIOs. While there are other ways to connect usin or the UART this is...... Listed under: LCD Projects

1246. Java ME 8 + Raspberry Pi + Sensors = IoT World (Part 1) Learn how to connect sensors to the Raspberry Pi and control them with Java. Published Septem 2014 The latest release of Java ME 8 includes a powerful API for controlling devices such as LEDs, relays, LCDs, sensors, motors, and switches. This article...
1247. Controlling an LED For this part of the tutorial you will need: USB to Micro USB cable. Ethernet Cable. A computer. An SD card (4GB bigger). A breadboard Female to male jumper cables or the Adafruit Assembled Pi Cobbler Breakout. 330 Ohm resistor. A bit of Electronics A...... Listed under: LED Projects

1248. BeagleBone and Raspberry Pi gain FPGA add-ons At the Maker Faire in New York City, ValentFX showed off two open source FPGA boards that stack with BeagleBone and Raspberry Pi SBCs, and also unveiled BBot, a BeagleBone-based drink serving robot built v earlier FPGA board version. The FPGA add-on boards use...... Listed under: Robotics - Automation Projects

1249. Totally Wireless Bird House Making of DIY bird house project with Raspberry Pi and Arduino Here is a detailed explanation how to totally wireless surveillance style bird house. About the design The main advantage of this device is that it is completely wireless, can hang...... Listed under: Wireless projects

1250. Tank Day 9: Power to the Pi Last time around, we proved that the Raspberry Pi could indeed be integrated into a Heng Long Tiger tank, and so control its functions. That’s a significant achievement, but there’s plenty more to do. Firstly and most importantly, we yet drive the...... Listed under: Other Projects

1251. Connecting an Arduino and Raspberry Pi The use case of the GPIO pins on the Raspberry Pi are rather limited and since I have an A Mega 2560 lying around I can easily connect the two. In the next couple of weeks I’ll explain my process of connecting the Arduino with...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1252. Operating a Simple Switch and LED on the Raspberry Pi GPIO, as may have been explained in other tutorials, stands for General Pu Input/Output and a GPIO pin can be set high (taking the value 1) by connecting it to a voltage supply, or set low (taking the value 0 connecting it to ground...... Listed under: LED Projects

1253. Adding a Real Clock Time to your Raspberry PI The Raspberry Pi doesn’t have a little coin-battery-powered ‘Real Time Clock’ (RTC module, which keeps time even when the power is off, or the battery removed. To keep costs low and the size small, an RTC is not included with the Raspberry Pi. If your...... Listed under: Clock - Timer Projects

1254. Control your Pi’s Desktop from any Mobile Device One of the great things about a Raspberry Pi is that it can fit in your shirt pocket out of the box if you want to use it you need to hook it to a keyboard, mouse, bulky monitor, etc... nearly defeating the Pi’s...... Listed under: Phone Projects

1255. How to Access Raspberry Pi Directly through the Ethernet Port of PC The Raspberry pi is a single board minicomputer which has essential hardware included so as to meet the goal of low cost. The board is Raspberry pi board runs on ARM11 processor but is av at extremely cheap price. The board is designed...... Listed under: Development Board - Kits Projects

1256. PiHub Hello! Welcome to another Instructable from NextFab. In this Instructable we will be showing you how to construct your very PiHub. What is a PiHub you ask? The PiHub is a free standing, desktop information center that uses a simple LCD screen and S...... Listed under: LCD Projects

1257. Adding shutdown/restart pushbutton for Raspberry Pi This article deals with adding a push button on the Raspberry Pi’s GPIO pin: and writing a daemon that handles push button events. If we press the push button for less than 2 seconds, we want the daemon to shutdown the system and if the push button is...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1258. Raspberry pi 2 water alarm with t cobbler plus This is our first try with the raspberry pi 2 We wanted to create an headless water a Parts used: Raspberry Pi 2 Funduino water sensor 1k resistor Red Led Adafruit T-cobbler Plus Large breadboard (too large ;p) Setup of the PI 2...... Listed under: Sensor - Transducer - Detector Projects
1259. Self Signalled Process System Using Raspberry Pi: The Raspberry pi is a mini computer which is designed in a single board with all essential components required for running an operating system. The Raspberry pi board runs on the Broadcom controller chip wh SoC (System on Chip). This SoC has........ Listed under: Development Board - Kits Projects

1260. MrRobot – Ubuntu Mobile app enabled Robotics( Raspberry Pi and arduino involved): Project MrRobot is an Ubuntu Mobile app enabled Robotics which has the feature of voice, touch and shake control to interact with the Rapiro robot. This project is done within 28 h Ubuntu Shenzhen Hackathon by our team E-minors. All the code is onpensourced...... Listed under: Robotics - Automation Projects

1261. Raspberry Pi and I2C devices of different voltage: After my recent posts on using the MCP23017 I/O expander with the Raspberry several people have queried the connection of an I2C device running at 5v to the Raspberry Pi’s 3v3 I/O. The reason why this is safe case is that on....... Listed under: Other Projects

1262. AUTOMATIC DOOR OPENER CONTROLLED THROUGH SLACK: The post was originally posted on http://www.visuality.pl/posts Nad Based Office Door Opener with using Raspberry Pi and Slack. Sesame At one of the hackathons we decided to automate our door opening process. It was a pain to do this manually because lots of clients and...... Listed under: Other Projects

1263. Build up a vehicle: Week 01 January 9, 2013 (1 hour): Meet as a team after class to discuss preliminary project proposal.it is decidew we are going to build up a vehicle like a Google street car. January 10, 2013 (2 hours): Met as a team after class....... Listed under: C Projects

1264. Cycle Chaser Project: animations from the rear of your bicycle. The framerate depends on the speed you are moving at. A couple ye ago, I created a dynamic bike headlight with a Raspberry Pi and a small, battery-operated projector. I've been eager to explore wh. I...... Listed under: Sensor - Transducer - Detector Projects

1265. Long-Range Wireless Broadcasts: Raspberry Pi Slow Scan Television (SSTV): Camera In this project the Raspberry Pi with the PiCam as a wireless camera which can transmit images over long distances, usually hundreds of meters! Images are transmitted by amate radio (ham radio) using slow scan television (SSTV) on the 2 meter band (144.5MHz)....... Listed under: Wireless projects

1266. Laboratory 'Weather Station': This article describes how to make a network enabled weather station that may be used to monitor ambient air temperature, humidity, and barometric pressure in the laboratory. Usage Example When conducting experiments on t rotating turntable in the GFD laboratory it is often desirable to...... Listed under: Sensor - Transducer - Detector Projects

1267. How to build a RaspberryPi Cluster: RaspberryPi was invented as educational device to inspire children to study computer science. Nevertheless, in a couple of years it has become the toy of computer scientists, engineers and curious of every age. This project is successful attempt to build an educational RaspberryPi Cluster composed by...... Listed under: How To - DIY - Projects

1268. Raspberry Pi SID Player Project overview: The Raspberry Pi SID player is a device which allows you to play music from the Commod computer using original audio hardware (the "SID" chip) through the Raspberry Pi. In addition to supporting the vast library of clas game music from the...... Listed under: LCD Projects

1269. Controlling an Effect with Real Sensors: For this lab you need your Satellite CCRMA kit, a laptop computer with Ethernet adaptor to program it, and some headphones with a mini 1/8" (2.54mm) stereo jack. You are also invited to bring the following optional items they are by no means required:...... Listed under: Sensor - Transducer - Detector Projects

1270. How to send SMS from a PHP website through HTTP by using Raspberry Pi: Background of sending SMS from website with Raspbe Are you curious about the most easiest way to send SMS from your website? Nowadays, I have become really interested in the fiel Internet of Things (IoT), therefore I thought it would be cool to...... Listed under: Internet - Ethernet - LAN Projects

1271. Pi-Rex – Bark Activated Door Opening System with Raspberry Pi (DISCLAIMER: Not meant as a security solution or a lesson in good behavior. It’s an experimental proof of concept to play with the application of embedded computing to solve particular use cases) deprivation has been driving me mad recently. And it's all down...... Listed under: Home Automation Projects
Macro Pi – Focus Stacking using Raspberry Pi
Here’s another in the series of articles of photographic uses for the Raspberry Pi SBC (Single Board Computer). This time, it’s re-purposing an old flatbed scanner as a macro rail for focus stacking images in macro photography. The Plan There’s a common issue with shooting…… Listed under: Video - Camera - Imaging Projects

Atlas Scientific and Raspberry Pi
This Instructable will you show you how to interface with Atlas Scientific’s sensors using a Raspberry Pi. There are 3 main ways to do this: By hooking a keyboard, monitor, and mouse up to the Pi and using it as a stand alone computer. I connecting…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

RPI Garage Door Opener for Rentals
The problem with renting a unit, is that we are unable to modify much of the furniture in the without upsetting our landlords. But we would still like to do it, and it is possible to do a few things. Our particular rental unit…… Listed under: Home Automation Projects

Raspberry Pi Cloud IP Camera with POE
I was inspired by scavix’s work with the instructable Raspberry Pi as low-cost HD surveillance camera so I decided make my own Raspberry Pi based IP camera that also features POE and supports integration with the Google Drive. The video stre can be simply…… Listed under: Video - Camera - Imaging Projects

Reading Analogue Sensors With One GPIO Pin
Unlike some other devices the Raspberry Pi does not have any analogue inputs. All its GPIO pins are digital. They can output high and low levels or read high and low levels. This is great for sensors that provide a digital input to…… Listed under: Sensor - Transducer - Detector Projects

Audio Solution with Control and Visualization on a Raspberry Pi with Touchscreen
(Squeezebox Touch functionality) We present your possibility to select and control your Raspberry Pi audio player directly through a touch display. Our setup is based on the Squeezebox technology and therefore also enables multi-room audio solutions. Our idea was to find a simple and affordable way to…… Listed under: Sound - Audio Projects

London Underground line status with Neopixels
In this quick tutorial, we’ll put together a snazzy London Underground tube line status checker using a Raspberry Pi and Adafruit’s awesome Neopixel LED rings, to recreate the classic Underground roundel! We’ll light Neopixel LEDs using the official colours of the Tube lines,…… Listed under: LED Projects

Raspberry Pi Music Fingers
Creating music is always fun, but making it with your own DIY musical instrument is much better!! Whether you are a professional musician looking for that next new instrument to try or an amateur enthusiast who has basic knowledge of electronics, use the Raspberry…… Listed under: Development Board - Kits Projects, Sound - Audio Projects

Making a datalogger for a Kamstrup electricity / gas meter with Raspberry Pi!
About Raspberry Pi So finally I received my new Raspberry Pi. This is a small, low power ARM linux board featuring an ethernet adapter, 2 USB ports and even a full-HD HDMI port for a mere $30. Check out www.raspberrypi.org for more information. After running…… Listed under: Other Projects

Honda Accord Raspberry Pi based onboard computer
Intro So I had this crazy idea about fitting onboard computer to my 04′ Honda Accord Tourer (Exec trim with premium speaker system – non-navi version). Been googling this and digesting available information and finally stumbled upon this excellent Engineering(DIY) project, blog and associated forum –…… Listed under: Car Projects

Raspberry Pi Robotics #1: GPIO Control
This video explains how to connect LEDs to a Raspberry Pi’s general purpose input-output pins, and how to write Python code to turn them on and off. This video shows how to construct a Pololu Zumo robot chassis, how interface it to a Raspberry…… Listed under: LED Projects

Plant Micro Climate
Some plants require pretty specific environments to thrive. Many beautiful plants grow best in a climate that is nothing like the climate where you live. Orchids are a perfect example of this. They require cool temperatures and very high humidity nothing like the environment where…… Listed under: Development Board - Kits Projects

Front door bolt unlocker
Opens your front door! see video of the end result (http://www.youtube.com/watch?v=9qZrc6Llg1o) Par 4xAA Rechargeable Switchable Battery Pack + case - Continuos Rotation Servo. (You can also a regular servo, with some modificati the software) I used - Futaba S148 - Bread board -…… Listed under: Home Automation Projects
1285. DIY Infrared Motion Sensor System for Raspberry Pi During the month of July 2015, I completed a high school internship at Colora State University, and one of the projects that I worked on was that of an infrared proximity sensor for Raspberry Pi. This short range infrared sensor can be attributed to a...... Listed under: Sensor - Transducer - Detector Projects

1286. Lunch Box Computer with Raspberry Pi This is a quick and easy project to build a portable Raspberry Pi computer that fits right in box. It’s a good first Pi project since it requires no coding, soldering or tooling of any kind. All you have to do is acquire...... Listed under: Development Board - Kits Projects

1287. Breakout RaspberryPi This instructable is a video game of breakout on RaspberryPi. It is easy to make this video game. Let’s make a!

Step 1: Materials 1. RaspberryPi (I used RaspberryPi rev2) ※ include keyboard, mouse, monitor, SD card 2. Tact switch × 4 × 3. Electrical ..... Listed under: Game - Entertainment Projects

1288. Building the MonkMakes Raspberry Pi Robot Kit The latest product from MonkMakes is a robot kit that I have designed using the RaspiRobot Board v2 (RRB2). The kit is available from MonkMakes. Overview The kit comprises: * a robot chassis, including two gearmotors and a 6 x AA battery holder. * a...... Listed under: Robotics - Automation Projects

1289. Gertboard – The Ultimate Raspberry Pi Add-on Board The Gertboard is an add-on board designed by Gert van Loo who is also one of the hardware engineers involved in the original design of the Raspberry Pi. The board was originally sold by Farnell/Element14 in kit form but has just been re-launched as a...... Listed under: Development Board - Kits Projects

1290. Picture – The 3D Printed Raspberry Pi Camera. Way back at the beginning of 2014 I published an Instructable camera called the SnapPiCam. The camera was designed in response to the newly released Adafruit PiTFT. It’s been well over a year now and with a recent foray into 3D printing I thought now...... Listed under: Video - Camera - Imaging Projects

1291. Analog Sensors without Analog Inputs on the Raspberry Pi The Raspberry Pi does not have any analog inputs, but that does not mean that you can’t use some types of analog sensors. Using a couple of resistors and a capacitor, you can use a "step response" method to measure resistance. Which is just great...... Listed under: Sensor - Transducer - Detector Projects

1292. Internet controlled SCALEXTRIC with Raspberry Pi! With this project I can use dataplicity (dataplicity.com) and a Raspberry Pi to control the speed of a car on a SCALEXTRIC system from the internet. I had a look around for tips on where to start and found a few people had a...... Listed under: Internet - Ethernet - LAN Projects

1293. Configuring the Raspberry Pi ethernet port for remote control This instructable will show how to quickly configure the Raspberry Pi network port for remote control. This eliminates the need to connect a monitor, keyboard and mouse to use the device. This is a very basic instructable for PC/Windows users or other not familiar...... Listed under: Internet - Ethernet - LAN Projects

1294. Beaglebone Black Web Control Using WebPy Ever wanted to create a way to control your garage door using your phone maybe check data and view it from your laptop. There is a single board computer called the Beaglebone Black which is an extremely powerful device that allows you to control its...... Listed under: LED Projects

1295. Pulse Width Motor Control My last project had me digging through old robotics parts to find an H-Bridge Motor Controller. I found that had several TTL chips on the circuit as well and it reminded me of a trick some of you may find useful. First, lets define...... Listed under: Motor Projects

1296. Raspberry Pi Bluetooth In/Out Board or “Who’s Home” I wanted to create an electronic In/Out Board. The type you may have to reprogram the board to be present or not in a company or home. It is usually placed by the front entrance so anyone can see who is in or out. I also wanted...... Listed under: Bluetooth Projects

1297. All-in-One Raspberry Pi Getting Started Guide Raspberry Pi, one of the most ingenious invention for makers and hackers. Before we started into the nitty gritty details of getting it setup, we first must ponder over the question that what the Raspberry Pi actually is a Linux based...... Listed under: Development Board - Kits Projects
How to make a DIY home alarm system with a raspberry pi and a webcam

Traditional wireless CCTV cameras are cheap but anyone wireless receiver can view your signal. On the other hand, IP cameras are secure but they can be quite expensive and usually the video quality is poor—unless you go for a really expensive model. Lately.

Raspoulette Prototype

Hi guys, when i see a raspberry pi contest i decide to make a prototype of an idea i had for few time, let me present my Raspoulette! I will try to explain how to make an amazing Raspoulette! Raspoulette is an autonomous solar powered...

BrickPi Bookreader

Wouldn't it be nice of someone read you a book aloud when you were feeling lazy to read it yourself? Have you ever wanted to get your Kindle Book into another format, or just copy the text? Have you ever wanted to get all of...... Listed under: Robotics - Automation Projects

Wireless IKEA DIODER mod, the cheap way

If you are looking for a cheap and easy way to control your lights with your smartphone or your computer this is the tutorial for you! These are the required items for this mod: Ingredients 😊 An ikea DIODER An arduino (arduino do but...... Listed under: Wireless projects

Raspberry Pi Wireless Auto-Sorting NAS/Media Server using MiniDLNA and Samba

I have a couple of spare USB hard drives lying around and of course a Raspberry Pi (headless). I put them to use as a wireless NAS / Media server. I'd also like my clients to be able to make Pi automatically download torrents...... Listed under: Wireless projects

Browser Controlled Bot

We would like to introduce the BrowserBot: a project at Dexter Industries to turn the Raspberry Pi into a robot. "The browserBot" is a web-browser controller robot using the BrickPi. With this project, we demonstrate how to control a BrickPi directly from the browser...... Listed under: Robotics - Automation Projects

Sump pump water level: The hardware

The second part of this tutorial about the software can be found here: http://www.instructables.com/id/Sump-pump-water-level-The-software/ What you need: * 2 X pieces of wood 4X6. 1/4'' and the other 1/2'' thick * 1 X 3 inches pipe. length varies depending of the deep of your pit...... Listed under: Home Automation Projects

Real World Minecraft

We all know Minecraft is an awesome game, and raspberry pi has made it more awesome. With the Minecraft we can now write simple python scripts to interface read world sensors and button to the Minecraft world. I have listed out some cool ideas on...... Listed under: Game - Entertainment Projects

Prototype and configure your own Real Time Clock module for the Raspberry Pi (Open Source Hardware and Software Configuration)

Keep the price of the raspberry pi down the developers left out some of the essentials one of those is the real time clock. At the raspberry pi gets its time over the Ethernet from updating the time automatically from the global ntp (network...... Listed under: Timer Projects

*Preliminary* SPI on the Pi: Communicating with a SPI 3-axis accelerometer using a Raspberry Pi

Step by step guide on how to setup Raspbian, and communicate with a SPI device using bcm2835 SPI library (NOT bit banged!) This is still very preliminary...... I need to add better pictures of physical hook up work through some of the awkward code. ...... Listed under: How To - DIY - Projects, Interfacing(USB - RS232 - I2c - SPI) Projects
Garage door controller using Raspberry-Pi: Monitor status and Control your garage from anywhere in the world! Have you ever driven out of your garage and after few minutes into your drive, feared you did not close the door? ** What if you did really leave the door open? The garage door might close itself after few minutes, but that means your…... Listed under: Home Automation Projects, Internet - Ethernet - LAN Projects

Turn your Raspberry Pi into a Wireless Portable Bluetooth Audio System A2DP Howdy folks! I had the idea of turning my Raspberry Pi into something like the Beats By Dre portable audio system found here: http://www.beatsbydre.com/speakers/beatbox-portable-usb/beatbox-portable-usb/default.pdf It's a cool product, don't get me wrong, but I'm not really down to pay $400+ tax for so fancy looking...... Listed under: Radio Projects, Sound - Audio Projects

Easy Project – Control an LED Light with Python Using a Raspberry Pi This will be the easiest Raspberry Pi GPIO LED project ever. If you follow this guide it should take less than 20 minutes to setup and have running. The goal of this project is to get a single LED light blinking based on a Python...... Listed under: LED Projects

The Tweeting Intercom: (Door Strike) Relay Monitoring w/ Raspberry Pi This instructable is all about monitoring the state of relays a Raspberry Pi. In the particular case we will have a look at a sophisticated Telegärtner DoorLine Pro intercom which holds two vol free relays. Normally, those are used to trigger an electric door strike...... Listed under: Home Automation Projects, Interfacing(US RS232 - I2c -ISP) Projects

Reuse Unwanted Infrared Remote Control to Use With XBMC/KODI on Raspberry Pi Introduction Remote controlling the media center is a major application of Linux Infrared Remote Control (LIRC). There are quite a number of tutorial on how to implement infrared remote control with XBMC/KODI. After following the excellent tutorial published by adafruit.com, my DVD remote control unit...... Listed under: Home Automation Projects, Interfacing(USB - RS232 - I2c -ISP) Projects

Fireside Internet Radio Player for Elderly Users – built with Raspberry Pi Introduction: Today we have amazing access to great stereo content: music, news, weather, stories, etc. Yet, this access is limited to those who can navigate today's electronic devices. This project is based on a belief that the elderly want and need this access - they...... Listed under: Internet - Ethernet - LAN Projects

Log and Graph 24V Thermostat Events (Optocoupler + Raspberry Pi) using raspberry There are a lot of Instructables that show how to make a thermostat. But what if you already have a thermostat, and you want to log or monitor when it turns on and off? This Instructable shows how to use an optocoupler to obtain logic-level...... Listed under: Temperature Measurement Projects

Bluetooth Low Energy: Read-Write to Sensor Network from Raspberry Pi using Raspberry Pi Originally published in this blog. The goal of this tutorial is to demonstrate how you can read and write from a Bluetooth Low Energy (BLE) device. For example, if you want to get the 'number of steps' data from your fitbit and make interesting apps...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Blink a series of LEDs using Python Programming Language and Raspberry Pi using Raspberry Overview of Steps In the first phase I will install only one LED. Next, I download the LED class python module that represent one hardware LED. I will run the LED class python module to blink that LED. The first phase serves as a "Proof...... Listed under: LED Projects
1317. IoT based Raspberry Pi home automation using IBM Bluemix We all have at some point of life desired to control everything at the a button. May it be turning off unnecessary lights when you are not at home to detecting intruders when you are not around. This tutorial will guide you to…… Listed under: Home Automation Projects

1318. A novel design for raspberry pi wireless shield extension board using raspberry Recently, we design a type of raspberry pi wireless (or extension board) for raspberry pi. By using this rpi shield, you can conveniently control your objective, like LED, TANK, CAR, etc example, by using this wireless shield, we control the LED lamp…… Listed under: Radio Projects

1319. A Really Inexpensive Raspberry Pi GPIO cable This instructable can be accessed at the author’s website - http://www.neatinformation.com/howto/Pi%20GPIO.html. If you link to this instructable from another website, please include a link to the Neat Information website. The project described in this article requires basic mechanical and electronics skills and is provided Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1320. Pure Pi: Control custom stompbox effects on a Raspberry Pi with a smartphone This is my first instructable, although I have been with Pure Data, Raspberry Pi, and other digital audio for quite some time. If you’d like to see more instructables like this, vote for me! Ever wonder how digital effects are created? Want to customize…… Listed under: Phone Projects

1321. A combined MSF/DCF atomic clock receiver For this to work you must obviously live in an area that can receive both signals. My circuit is based on two modules taken from two radio clocks bought at Lidl’s supermarket. Originally both were for the DCF clock but by substituting the original 77.5KHz…… Listed under: Clock - Timer Projects

1322. LED circles using multiplexing This project uses two groups of eight LEDs sharing eight GPIO pins via one of my Pi interfaces. The of each group of LEDs are commoned and driven by a BFY51 transistor. The two transistors are controlled by a further two GPIO p to…… Listed under: LED Projects

1323. GitPi: A Private Git Server on Raspberry Pi Git is usually used in synchronization with GitHub — the former is a source code manage system and the latter is a website where you can share/contribute Git repositories with the larger internet community. For those who to get started with GitHub, I've written this…… Listed under: Internet - Ethernet - LAN Projects

1324. Raspberry Pi Turing Machines Prototype Step 1: Set up the supply rails Components: – 1 × Breadboard and jumpers. – 1 × M/F jump cables. Link the rails together as before using the jumpers and connect the M/F jumper cables to the rails (red to 3.3V, black to GN Listed under: LED Projects

1325. Remote Raspberry Pi Robot (PS3 Controller) – Fablab NerveCentre These instructions try to assume very little. Hopefully, if you can a Raspberry Pi and have an internet connection you should be able to complete this great little project. Basically, this is a project v will result in some specific areas which can be…… Listed under: Game - Entertainment Projects

1326. Transfer file from Computer to Raspberry Pi Using USB-Serial Cable Introduction This short tutorial extends on Adafruit’s excellen tutorial on using Serial Cable(also known as Serial Console) to remote control the Raspberry Pi (RPI). Adafruit’s tutorial demonstra how to connect the correct USB-Serial cable to the correct GPIO pins. However, the tutorial ended with no…… Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1327. BrickPi Bookreader: Digitize Books With Mindstorms and Raspberry Pi A few months ago, we made a Book reader powered by the which had the ability to read pages from your Kindle. There was a huge response to the project. But what everyone really wanted bookreader that could read a real paper…… Listed under: Other Projects
1328. Automatic USB HDD power control for a Raspberry Pi based NAS

The Raspberry Pi board is widely used to build home-servers by the Do It Yourself (DIY) community, so it seemed a good choice to be the base for my home Network Attached Server (NAS). This NAS should have two main types of storage: Solid State...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

1329. FerretPi: Using Raspberry Pi as a Secure FTP Server

I know what you’re thinking: “How cool would it be if I had my own Google Drive/SkyDrive/Dropbox that I can use whenever I like?” Or maybe you are just getting into the Maker movement and you think it’s the greatest thing since canned bread. You’ve probably...... Listed under: Internet - Ethernet - LAN Projects

1330. RaspiBoy, Raspberry Pi Gameboy, SuperPiBoy: A RaspberryPi inside a Gameboy

Do you have a Gameboy case? Do you have Raspberry Pi now let’s build a RaspiBoy. It’s a RaspberryPi inside Gameboy running multiple emulators. It makes you feel back the old days and the best gadgets for Retrogaming. My RaspiBoy features: 3.5” TFT display...... Listed under: Game - Entertainment Projects

1331. TweeToy by Raspberry pi using Python

I created a Toy which Talks somebody’s tweets using Raspberry Pi. This Toy catches object distance sensor and then make sound (Tweet). The architecture is very simple. For getting Tweets, just using twitter api for python playing sound with “AquesTalk Pi” (free) which...... Listed under: Game - Entertainment Projects

1332. How to build a People Counter with Raspberry Pi and Ubidots

In this simple project we’ll use a motion sensor to detect if an object passing in front of our Raspberry Pi. Then we’ll count how many times that happens, and send this value to Ubidots. People count is typically expensive devices used in the...... Listed under: Calculator Projects

1333. Raspberry Pi controlled Red Car Trolley

Now the train around your Christmas tree or your favorite remote controlled toy can be controllable from the web or any mobile device. Why would you do that if you already have a remote? You do this just because you used a Red...... Listed under: Car Projects

1334. Programming the ATtiny85 from Raspberry Pi

These instructions tell you how to setup and program the ATtiny85 microcontroller Raspberry Pi via the SPI interface. Lots of people use the Arduino to do this (then you can use the Arduino IDE and simplified C commands), or you can use a...... Listed under: Raspberry Programmer Projects

1335. DIY iPhone controller for Raspberry-Pi (OSC)

To start off this project I would like to explain how all this will work. We will be using of communication called OSC (Open Sound Control) and an app called “TouchOSC” which is available on the Google Play and Apple store, along...... Listed under: How To - DIY - Projects, Phone Projects

1336. PiFace LED Chasing Lights

Raspberry Pi This instructable will allow you to use your PiFace to control 8 LEDs in a chasing flashing pattern. This will help ya to grips with basic use of python to control the PiFace as well as a basic electronics, I’m writing this up in full...... Listed under: LED Projects

1337. Raspberry Pi Photocell log and alert system

This is a simple instructable for making a RasPi-based photosensor-triggered alert and logging system which can easily be extended to show possible entries into a room like a closet or equipment locker that’s usually not in need to monitor light levels for any other reason. In...... Listed under: Sensor - Transducer - Detector Projects

1338. Power to your Living room via Raspberry Pi

The idea is to create a controlled living room/entertainment station using the raspberry as a media center, torrent down-loader/file storage and to operate electrical switches. Please use caution and diligence as components live AC and hence is dangerous. Step 1: Items you will...... Listed under: Home Automation Projects

1339. Environmental Monitoring with BeagleBone or RaspberryPi and Arduino

This is a project I’ve been working on for a while, and still ways to go, but I have enough success right now that I can share what I’ve got. This covers connecting a Beaglebone and an Arduino TTL serial and I2C...... Listed under: Metering - Instrument Projects
1340. Web Enabled Garage Door (Raspberry Pi) Goal to create a web based garage door opener that should retrofit to most standard garage doors. Tested with circa 1990s Chamberlain 1/2 hp opener. Once competed your garage door could be opened from your cellphone or computer. Raspberry Pi - Raspbian (Rev B used for.... Listed under: Internet - Ethernet - LAN Projects

1341. Raspberry Pi and Wiimote controlled Robot Arm I received a robot arm as a birthday present, but after about the first day the control panel that came with it became a bit dull to use. Later I bought the usb controller that was made for the robot, but once again the controller software was dull to use. Listed under: Robotics - Automation Projects

1342. Raspberry Pi Arcade Game Emulator in an Atari Lynx This project is the summation of various similar tasks to use a Raspberry Pi as a portable games emulator. It's heavily indebted to the excellent and fun Adafruit PiGrrl project and DDG's great work to add sound to it project here. Whilst I was happy with the results Listed under: Game - Entertainment Projects

1343. Raspberry Pi – Revision 2 DIY Add-On Board On the Raspberry Pi, there are several connections which can be used for expansion: • Rpi GPIO (General Purpose Input/Output) pins are exposed, that means that expansion boards are able to talk directly to the CPU. DSI connector will allow low-level interfacing. Listed under: Development Board - Kits Projects, How To - DIY - Projects

1344. How to make your own portable Raspberry pi This tutorial show you how to make your own portable raspberry pi, with a screen, a battery, and USB, Ethernet and HDMI ports open to access on the side of the case. This is by no means a good tutorial, it is simply a way of getting started. Listed under: How To - DIY - Projects

1345. Raspberry Pi Media Server – MiniDLNA Hey. In this instructable I will be showing you how to make a raspberry pi media server using MiniDLNA. This will allow you to stream your photos, videos and music around your network. This is my first instructable so sorry if it is not very good..... Listed under: Raspberry Programmer Projects

1346. Raspberry Pi (security) Slow Scan Television Camera For project updates, visit: AgriVision - Raspberry Pi SSTV Camera. The goal of this project is to use the Raspberry Pi with the Picam as a wireless camera which can transmit images over long distances, usually tent kilometers. Images will be transmitted by amateur radio operators. Listed under: Video - Camera - Imaging Projects

1347. Controlling a Raspberry Pi RC Car With a Keyboard In this intermediate tutorial you will learn how to operate a hacked RC car with keyboard using a model B Raspberry Pi device using Python. The key points in this tutorial include: • Configuring the virtual Pulse Width Modulation (PWM) for the GPIO pins.... Listed under: Car Projects

1348. Raspberry Pi Smartphone Controlled Rc Car Use your raspberry pi to control a 1/10 scale RC car via a web page hosted wirelessly on the Raspberry PI. All you need to do is set up your PI to use your mobile as a hotspot then log onto the appropriate web page (hosted..... Listed under: Car Projects

1349. Raspberry Pi water alarm system Instructions for employing a Raspberry Pi as a water alarm system Version 1.0, published in Jan 2021. The Raspberry Pi reads the status of one or two water sensor device(s) on one or two of its GPIO pins. When water is detected the Raspberry Pi..... Listed under: Clock - Timer Projects

1350. Python and Raspberry Pi Temperature Sensor It’s been quite a long time, when I’d first posted this RPI sample. Time passed, I’d gathered some feedback from the community, took into account the comments, and this sample is ready to be published at Instructables for public interest in microcontrollers and the like. Listed under: Sensor - Transducer - Detector Projects, Temperature Measurement Projects

1351. Vintage DAC for Raspberry Pi audio ideas... I was curious about some old school R2R DACs namely the BurrBrown PCM56P. They were in the late 80’s in some of the better CD players like SonyES222/DenonDCD1500/Marantz2X whatsoever. There is some discussion about these units which are more or less superior sound..... Listed under: Sound - Audio Projects
1352. LOG Raspberry Pi with car monitor So this Lazy Old Geek (LOG) decided to buy a Raspberry Pi. Now the Pi itself is really small (see picture) but the first problem I found was that with all the cables connected, it’s not very stable. The cables, especially my HDMI cable...... Listed under: Car Projects

1353. Arc Software Consultancy using the Raspberry Pi I know it has been ages since I posted here so I thought I would put something up for Halloween. I have a brilliant and simple project here. It’s easy to understand and, more importantly, it actually does work. I accide scared myself with it...... Listed under: Development Board - Kits Projects

1354. Making Your Apartment Buzzer Party Friendly With Raspberry Pi and Twilio Amy Ciavolino’s friends were stuck outside of her apartment waiting to be let in to the party. They repeatedly pressed Amy’s apartment buzzer with no luck. The buzzer was too quiet, and Amy’s party was too loud. Throughout the night, the cycle repeated: Amy’s friends...... Listed under: LED Projects

1355. Wireless Raspberry Pi Radio: Pianobar * This entire process should take about 20 minutes Pianobar is a free/open-source, console-client for the personalized online radio Pandora. Feature: play and manage (create, add more music, delete, rename, ...) stations random songs and explain why they have been selected upcoming songs/song history...... Listed under: Radio Projects

1356. Raspberry Pi Garage Door Opener Hello Everyone! This instructable explains how I setup a Raspberry Pi to open my garage door using a smartphone. While this has been done before, I thought I'd post my solution. This was my first hardware project and instructable and I'm sure I made...... Listed under: Home Automation Projects

1357. Home Automation Raspberry and Phidgets In previous tutorials we used Raspberry Pi to drive Phidgets InterfaceKit. We have also used a web server on Raspberry. In this tutorial we will use the information gathered to create an Home Automation System managed by a Web Application. You need: a Raspberry...... Listed under: Home Automation Projects

1358. Raspberry PI auto-boot Ever want your Raspberry pi project to have a script that interfaces with I2C to start automatically after a power cycle? Would you like the vnc session to start at power up as well? This instructable will show how to make a perl script that...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects, Raspberry Programmer Projects

1359. DIY tACS: Hardware for machine-human telepathy experiments These are instructions for building a computer-controlled tACS device. Transtranial alternating current stimulation (tACS) is a form of neuronal stimulation that operates by running an alternating current through the human brain. This current can be any waveform from random noise (tRNS is the official research term...... Listed under: How To - DIY - Projects

1360. Intel Edison Spectrophotometer This instructable will explain how to build a fairly basic. Of course, this device is nothing compared to a commercial spectrophotometer, but it will allow the builder to understand how such a device works to using it for DIYbio. Know-how: spectrophotometry is the quantitative...... Listed under: Metering - Instrument Projects

1361. Raspberry Pi Camera Spinner 3D Print This Instructable is for a 3D printed camera-spinner module for the Raspberry PI Camera board. Fitting two camera boards...... Listed under: Video - Camera - Imaging Projects

1362. Mho PlayGround Circuit Scribe Siempre he querido jugar el juego de Adafruit Industries de "Mho Playground" pero solo esta para iOS y tengo Android, así que decidí hacer mi propia versión en el mundo real, les presento "Mho Playground Circuit Scribe" Beta, con arduino uno, processing y circuit...... Listed under: Game - Entertainment Projects

1363. BristleSwarm: Explorations into Swarm Robotics A growing branch of robotics research is the study of swarm organization, emergent behavior and artificial intelligence through the use of autonomous robotic agents. In this Instructable, I’m going to walk you through one week project that I created as part of my Masters...... Listed under: Robotics - Automation Projects

1364. Raspberry Pi Medal Light You love the Olympics but you don’t have time to check if your country has won any medals. Using IFTTT Ledborg on the Raspberry Pi, you can know get notified of any medal just by looking at your Pi (and then tell the whole...... Listed under: LED Projects

Micro Raspberry-Pi arcade cabinet
Fully functional micro arcade machine using a Raspberry Pi model B or B+. I always wanted a tiny desk, I decided to build it as small as possible. It may look simple from the outside but a lot of engineering went on. Listed under: Entertainment Projects

Free Landline Using Google Voice and a Raspberry Pi
Disclaimer: The following article is intended for users comfortable working on their own based machines. In this article, I'll review the steps I used to configure a VoIP landline using a SIP interface through a Raspberry Pi PBX with Freeswitch and Google Voice. In other words, I set up a free home telephone service with my own hands! Listed under: Internet - Ethernet - LAN Projects

0-5V Analog input from Raspberry Pi graphed on Web
Using the PIC PI expansion board combined with your Raspberry Pi I will show you how you can graph analog Voltages to Cosm. Hardware needed for this project: 1 x Raspberry Pi, 1 x PIC PI expansion board (you'll need to purchase one of these). Listed under: Internet - Ethernet - LAN Projects

"ArdiPi" Wireless Arduino and R-Pi Rover
"ArdiPi" The Wireless Arduino and Raspberry Pi Rover
By: Greg
So basically let me tell you how this project works. You simply have an Arduino (Uno or Leonardo) which you use to connect to two motors and control them. Then you have a RaspberryPi which... Listed under: Radio Projects

Raspberry Pi Alamode CNC Controller
This is my first attempt at an instructable. I hope it helps someone else. Switches and Lights fans, oh my... I bought a CNC machine some time ago and I was never happy with it. It used a traditional parallel port controller and... Listed under: CNC Machines Projects

Uber Home Automation w/ Arduino & Pi
[EDIT] I created a forum to collaborate on gateway code.
http://homeautomation.proboards.com/board/2/openha... A few years ago, I became a dog owner for the first time. I didn't like leaving Cody in the kennel alone all day. I had a webcam on him, but I couldn't watch... Listed under: Home Automation Projects

My Portable Pi-Cam
Well, when I say "portable" I wouldn't want to lug it around London on a site-seeing trip. Maybe transportable is a better description. At least I can move it around the garden and film the wildlife. This post provides more technical detail on this system,...... Listed under: Video - Camera - Imaging Projects

Raspberry Pi Shutdown Button
As everyone at some point will recognise the Raspberry Pi doesn't include any kind of shutdown button. So the only way to power it off is by unplugging it from the power supply. To make sure you get no corruption of your data files,... Listed under: Other Projects

Raspberry Pi Universal Remote
In this tutorial I hope to convince you that this is the ultimate universal remote built using a Raspberry Pi! This job simplifies many of the more difficult tasks that we need to accomplish. Step 1: Parts 1 x...... Listed under: Sensor - Transducer - Detector Projects

Interface to Wireless Driveway Sensor
I have a driveway that is over 300 feet long and it is nice to have some advance notice that someone is driving or walking in. Previously, I have used a very expensive IR beam-break detector. It gave a lot of false alarms and... Eventually,..... Listed under: Sensor - Transducer - Detector Projects, Wireless projects

Making an autonomous boat using a Raspberry Pi (WiP)
The wave of enthusiasm for the Raspberry Pi has driven many people to want to explore the possibilities, and marvel at its simplicity. The credit card sized SBC is perfect for just about anything. Maybe even for crossing the Atlantic Ocean. FishPi is a project with the goal of... Listed under: Game - Entertainment Projects

Pulse Oximeter Data Capture with Raspberry Pi
My daughter has some health issues that require her to be hooked up to a pulse oximeter at night that monitors her oxygen level and heart rate. We have night nurses so we can sleep, but sometimes we wake up at night and want to... Listed under: Video - Camera - Imaging Projects

Raspberry Pi Pulse Width Modulation Demonstration
This instructable is a demonstration of the settings used to control the hardware Pulse Width Modulation (PWM) on a Raspberry Pi. If you are just fading an LED the default settings are good enough, but if you are trying to control a servo, a stepping motor,...
1389. RaspbAIRy – the RaspberryPi-based Airplay speaker
With the delivery of my second RaspberryPi I finally got the chance to start the planned project: I wanted to replace my old bathroom radio with a more contemporary device by building a network-enabled speaker. Because I'm a user of several iDevices, the idea of making... Listed under: Sound - Audio Projects

1390. Robot for the Office Tele-Presence (sort of)
Robot for the office. Work from home and yet attend the boring meetings. Scare vendors into telling the truth about their products. Chase tiny children when they come to the office for the Hallowe’en or Christmas parties. 1: Gather Tools and... Listed under: Robotics - Automation Projects

1391. IPhone remote controlled lamp
This project uses the iPhone and a raspberry pi to remote control the lamp. Both the iPhone and the raspberry pi are connected to the wifi router. The lamp on/off commands are sent from iPhone and received by the raspberry pi embedded system. Then the... Listed under: Phone Projects

1392. Raspberry pi – simple 2x2x2 led cube
I built this pretty simple 2x2x2 led cube for my raspberry pi, and wanted to share what I learnt is my first time using transistors so the circuit is probably not perfect, but it works as I intended it to. Here is what you... Listed under: LED Projects

1393. Raspberry Pi Web Server — Nginx – PHP – MySql
This tutorial will describe how to install and set up a light web server on Raspberry Pi that supports PHP and MySql. Apache is the most widely used server, but Raspberry has limited resources so it is better to opt for a system that uses... Listed under: Raspberry Programmer Projects

1394. LiPo to MicroUSB adapter
In anticipation of my Raspberry Pi arriving I have created a LiPo (Lithium Polymer) to Micro USB adapter. The adapter converts the power from a 2s – 4s LiPo to a regular 5v. This is then outputted through a Micro USB to be plugged into a... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1395. The RR.O.P. – RaspRobot OpenCV Project
FIRST: I used a translator to help me, because I’m not fluent in English, I apologize for the poor English. My intention really is to collaborate. SECOND: My thanks to you I got an award in the MICROCcontroller CONTEST SPONSORED BY... Listed under: Robotics - Automation Projects

1396. PICAXE Raspberry Pi ADC
In this instructable I will show you how to use a cheap PICAXE micro-controller as a multiple channel analog to digital converter. We will be using I2C to access the PICAXE, which will be writing the adc values into the memory registers. The Raspberry Pi... Listed under: Development Board - Kits Projects

1397. RaspiRover
Hello! I have done a little wifi robot with a Raspberry Pi and other components. Let me present it! Ps: be indulgent, it’s my first instructable! Step 1: Things You’ll Need You will need: - a Raspberry Pi (35 Eur) - raspberry cam (17,50 Eur)... Listed under: G Entertainment Projects

1398. Portable raspberry pi (the easy way)
Today I will be showing you another project you can do with a raspberry pi. I’ve seen some people doing this project in a really complex way and I was basically just wasting money on screens and additional components, I decided to come up with... Listed under: LCD Projects

1399. External device control (i.e. coffee machine)
Note: Try any or all of these at your own risk. I will not be responsible for any issues. Contact a professional to help if you are unsure. The concept is that we take a controlling voltage from the computer or a micro-controller, via the ESP8266... Listed under: Home Automation Projects

Hardware...... Listed under: Internet - Ethernet - LAN Projects

1450. Apple Pi Media Centre Hello there, this is just my step by step on how i made my apple pi media case! in short, it is an apple airplay extreme case which i have gutted and replaced the circuit boards with a raspberry pi and a powered usb hub...... Listed under: Other Projects

1451. Raspberry Pi Project – A 1960s wallbox interfaced with Sonos The inspiration for this project came from @nivnov pointing me to http://wallbox.weebly.com/. I had somewhat of a different take on the circuitry and software than it's author, Steve Devlin. The pulse train of my Wallbox A was also different. This is all explained below. The Wallbox A...... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1452. Make an Internet Controlled Lamp with a Raspberry Pi and Flask Overview Here I will be showing you how to turn on and off a lamp from anywhere in the world. However, you can control any device that works by toggling its power source, such as a fountain, TV, Christmas tree lights, projector, etc. Requires a Raspberry Pi and a web server...... Hardware...... Listed under: Internet - Ethernet - LAN Projects

1453. Smart Power Outlets These are Raspberry Pi driven smart power outlets. The two power outlets are controlled using a web browser and a smartphone. It is also possible to configure the outlets to turn on and off based on the time or room temperature or combination of both...... Listed under: Blog, Interfacing(USB - RS232 - I2c -ISP) Projects

1454. Raspberry remote control with Telegram Telegram is a very versatile instant messaging software that can be used with the same phone number on different devices simultaneously. In this tutorial we saw how to install it, and we tried to send text and media messages have also seen that it...... Listed under: Wireless projects
How to use Kernel GPIO interrupts on the Raspberry Pi

Presumably everyone knows what the Raspberry Pi is, by now, so I'll not state that. You may or may not know that the RasPi has General Purpose Input/Output (GPIO) pins as standard. Some of these provide power, some provide 5V power, some are grounded...... Listed under: Development Board - Kits Projects

Raspberry Pi Robot – Connecting the H-Bridge & Motors

For this project we will be using four of the Raspberry Pi's GPIO pins, two per motor. In the diagram below you will see a diagram of a L298N (hopefully yours will look the same or very similar). Each motor will have two wires running from...... Listed under: Motor Projects

Raspberry Pi, I2C LCD screen and Safe Power Down button

The Raspberry Pi, just sitting there, asking to be played with... As I look through my existing projects I noticed this sad little lone R-Pi sitting on my desk. Some time ago I bought it. Played with it a bit, installed N image on the...... Listed under: LCD Projects

Raspberry Pi Robot – Flashing LEDs – The Circuit

In this brief guide we will show you how to connect up two LEDs to the GPIO ports on your Raspberry Pi and control them via Python Script. From this point onwards I will assume that your Raspberry Pi has a fully working install of Raspbian...... Listed under: LED Projects

Build a remotely activated sprinkler using PiFace and Ubidots

This is a cool example that teaches you how to use a Raspberry Pi, a and Ubidots to water your garden from far away. You'll be able to control an electro-valve remotely to water your plants from any just using your phone. Step...... Listed under: Development Board - Kits Projects

Controlling a servo using Raspberry Pi and WiringPi software based PWM

Controlling a servo using raspberry pi PWM generator is not a trivial task since period cannot be defined by the user. To overcome this issue we will use wiringPi C library in order to create a software generated pulse. Of course the generated pulse...... Listed under: PWM Projects

Raspberry Pi: Multiple Buttons On One Digital Pin

If you ever find yourself running out of GPIO pins on a Raspberry Pi you can put multiple pushbutton switches on a single pin using this method. It sets a variable by timing the charging of a capacitor through a set of resistors with the switches...... Listed under: Interfacing(USB - RS232 - I2c - ISP) Projects

Evade georestrictions with the Raspberry Pi

In this article I will talk about the use of a professional VPN service called Hide My Ass (no affiliation with them). This allows you to send and receive data online while appearing (to everyone else on the Internet) as though you are...... Listed under: Internet - Ethernet - LAN Projects, Wireless projects

Arduino weds Raspberry. The "Freeboard" project

"If you imagine it’s possible, someone else is already trying to doing it, or has already done it." The Installer. This was how I left my musing on the fictitious open source Celestronic M1 chart plotter system. I wasn't aware of the time how extensive the efforts...... Listed under: Development Board - Kits Projects

Control LED via website

Hello! In this project you will learn how to control an LED via your phone or desktop computer through a website! Step 1: What are we going to do in this project I've been working with the Raspberry Pi 2 for about a month now...... Listed under: LED Projects

Child Safety: How to sandbox your children's web traffic cheaply using a Raspberry Pi

You can pick up one of these for under £30 ! Disclaimer Although the Raspberry Pi described here is super cheap, you will have to have some slightly specialized network equipment to do this. In particular you will need a VLAN aware network switch and...... Listed under: Internet - Ethernet - LAN Projects

Detecting Lightning with a Raspberry Pi

Rious methods can be used to detect lightning. Commonly it involves sensing the electromagnetic radiation generated by a strike. Most people have probably heard this at some point as static, crackles, and pops sounds on an AM radio. Some detectors are capable of picking up the flashes of...... Listed under: Sensor - Transducer - Detector P
PC racing set controlled RC car with video streaming Project overview The project aims to equip standard remote control (RC) car improved control. Commonly used RC car control joystick is replaced with PC racing set. This improvement ensures more precise d and exceptional user experience. Moreover camera attached to car enables view from perspective...... Listed under: Car Projects

Use your Raspberry Pi to move parts of a robot or control anything that can rotate Servos are similar to motors, but can typically only move from 0 to 60/120/180 degrees, rather than rotate continuously. Unlike a motor, you send a servo a signal that makes it go to a specific position (eg 30 degrees), mi them ideal for applications such...... Listed under: Robotics - Automation Projects

Construct a wireless switch or motion sensor Project Description This project assumes you already have a Model A or B Raspberry power supply, HD card, screen, keyboard, network etc. Raspbian Wheezy OS. In this project I will show you how to construct a wir switch. This project can be...... Listed under: Wireless projects

Installing and running PICPgm on Raspberry Pi Installation Steps The following commands download and install PICPgm on your Raspberry Pi: cd ~ mkdir picpgm_install cd picpgm_install wget http://picpgm.picprojects.net/download/picpgm_v2810.tar.gz tar x picpgm_v2810.tar.gz sudo ./install.sh cp pgmifcfg.xml ~ Note: For PICPgm versions till 2.8.1.0, a copy of pgmifcfg.xml has to be in j home...... 1563. DNA ashing LED box with a Raspberry Pi How the idea came about... I've been meaning to do a science oriented project with my Raspberry Pi for a while now, but with the existing components at hand, I was rather limited with what I could do. Most of the sensor started...... Listed under: LED Projects

1564. Arduino and Raspberry Pi: We need them in classrooms across the world It is great being introduced to science and technology at a young age. Do you remember that moment you used a computer for the very first time, or the first time you played Tetris or Snake? How fascinating was that? I have fond memories of...... Listed under: Development Board - Kits Projects

1565. Controlling a stepper motor with the Raspberry Pi and Piface Updated April 2015 I have made this because I have found no project the PiFace. Forum topic at www.raspberrypi.org: http://www.raspberrypi.org/phpBB3/viewtopic.php?f=37&t=54314&p=413902 H simple project that only needs a Raspberry Pi, PiFace, Python, jumper wires, and a stepper motor - that’s it! Step 1:...... Listed under Interfacing(USB - RS232 - I2c - I2P) Projects

1566. We controlled any AV technique with phone. An IR transceiver for Raspberry On the sly I does the house a little bit more cleverly. Making control of light with phone by means of a board of the extension of RaZBerry (Z-Wave) for Raspberry, then programming with microcontrollers were fond and collecting the small meteorological...... Listed under: LED Projects

1567. USB Dial Up Modem for Raspberry Pi For the first time in probably 15 years, I find myself needing to use a modem. This time on a Raspberry PI. I have a few old modems in the junk bin, but they need an RS232 serial interface which would be a pain to...... Listed interfacing(USB - RS232 - I2c - I2P) Projects

1568. Home Energy Centre using Raspberry Pi and Nook Simple Touch Introduction Following on from using a Raspberry Pi to capture the electricity consumption of my home, I have over the last 2 years installed Solar Thermal Hot Water panels and very recently Solar Feed meant that I had an opportunity to create something I...... Listed under: Home Automation Projects

1569. Accessing A Headless Raspberry Pi using SSH and TightVNCServer Scope: To gain access to a terminal on a headless Raspberry Pi a then to display the Pi's desktop remotely using tightvncserver and x11vncviewer BOM: – WiFi enabled Raspberry Pi with Raspbian WiFi enabled computer on same network as Raspberry Pi. Instructions: To...... Listed under: Wifi / WiLAN Projects

1570. WebRTC Creeper Drone – Browser Controlled RC Car This is an advanced Instructable, which describes the process of building a drone controlled remotely from a browser. The drone uses an Android phone to stream video and audio back to the browser via WebRTC. Since the software used in this project is
somewhat complex,...... Listed under: Car Projects

1571. Interprocess Signalling in Raspberry Pi The Raspberry Pi is a mini-computer board which is powerful enough to run large operating systems like Linux, Mac and Windows. The Raspberry Pi is called a mini-computer because the SoC has the powerful ARM11 processor which runs on 700 MHz at its core and having the...... Listed under: Internet - Ethernet - LAN Projects

1572. Home Automation using Raspberry Pi and IoT Components Required Raspberry Pi Sensors - Temperature sensor (DS18B20) 8 Channel Relay (12V/ 7A/ 240 V AC) Bulb (60W) Description of components: Raspberry Pi The Raspberry Pi is a credit-card sized computer that plug into your TV and a keyboard which was found for...... 1573. Learn How to Use Raspberry Pi GPIO Pins With Scratch In this tutorial, I'll show you how to install the ScratchGPIO expansion pack, how to assemble a breadboard with LEDs and buttons, and run a simple Scratch game that uses the LEDs and breadboard buttons play. Scratch With the Raspberry Pi's emphasis on education...... Listed under: Game - Entertainment Projects

1574. How to use Alarm Signal in Raspberry Pi A signal is a software interrupt that can be sent to a process which is currently executing in Operating System. Most of the time the Operating system send signals to the processes automatically and sometimes the user can initiate a signal sending. A process...... Listed under: Clock - Timer Projects

1575. Minecraft on the Raspberry Pi Model B+ Can you learn with Minecraft? The Raspberry Pi is the ideal platform for learning and the two great ways to learn coding, and they are physical computing and Minecraft. Physical computing merges the code with electronics produce all manner of cool projects...... Listed under: Other Projects

1576. Raspberry Pi WEMO Control Center This project provides a webpage and automated interface for controlling Belkin's WEMO light switches and plug switches using the Miranda library. At the end of the project you will have a webpage that can show real time status of all WEMO switches. Clicking the lightbulbs...... Listed under: Internet - Ethernet - LAN Projects, LED Projects

1577. Hacker uses Kindle as Raspberry Pi screen A hacker named Gef has rigged up his Raspberry Pi to use a Kindle e-reader as its monitor. "Hacker" may not quite the word, actually, as the individual responsible identifies himself as an "eclectic yogi discovering the world of computational art and new media"...... Listed under: Internet - Ethernet - LAN Projects

1578. Introducing LightingPi Features: Control strings of LED pixels with a raspberry Pi Control strings of analog RGB LED strings (up to 10 channels per PWM board) Control Incandescent lighting via SSR boards (work in progress) Control servo position Control of all fixtures provided over all major lighting...... Listed under: LED Projects

1579. Fast Development of ISP Algorithms with MIPI IP and FPGA Platform From smart TVs with gesture control to the high-resolution cameras integrated into today’s smartphones to applications boasting multiple cameras, image processing has become a key component in consumer electronics products. To support the need for more pixels and fast-changing requirements, designers are finding that...... Listed under: Video - Camera - Imaging Projects

1580. Internet Of Things with Raspberry Pi – 1 When I was new to IOT (Internet Of Things), I saw that there were hardly any tutorials which were simple enough for a beginner to understand and try out. There was either to much technical jargon, or the hardware was too complex. So now that...... Listed under: Interfacing(USB - RS232 - I2C -ISP) Projects

1581. Orange Pi Development Boards Are Raspberry Pi Clones Raspberry Pi - Wikipedia, the free encyclopedia - Orange pi debian sd image | igor pečovník, Ora is a raspberry pi / banana pi clone. it identifies as banana pi so almost everything what works for banana works for orange. i made one special...... Listed under: Car Projects
1582. Getting Audio Out Working on the Raspberry Pi I want to deliver sound from my Raspberry Pi's (RPi) Audio Output 3.5mm jack. I'll need to get audio drivers working on Audio Out, and to test it, I'll need some sound files and players. I'm choosing the Advanced Linux Architecture (ALSA) drivers because its widely supported. 

1583. Raspberry Pi Camera Module Mechanical Dimensions Having played around with the Pi camera I quickly realised I needed to make a sort of stand for it. The module weighs almost nothing and is tiny so it can be quite hard to keep in one place when you are experimenting. The Raspberry Pi

1584. Arduino / Raspberry Pi Internet Radio This is a project for Arduino and Raspberry Pi to make an Internet Radio, aimed at intermediate skill level. Some familiarity with Linux usage will be beneficial (or access to someone who can help out if required). Raspberry Pi runs a music player daemon to

1585. ADC Circuit: Raspberry Pi Analog Input Circuit on Breadboard This project shows how to construct a simple MCP3002 Analog-to-D Converter (ADC) circuit with a test potentiometer input. It shows how to wire the SPI pins for successful data communication between the ADC and the Raspberry Pi. Breadboard Build A breadboard, or “solderless breadboard”, is

1586. Ultrasonic Distance Measurement Using Python – Part 1 LEDs, buzzers and switches are the most common items people attempt to interface to their Raspberry Pi's. Something I found in eBay that is a little bit different is an ultrasonic measurement module. This allows you to measure the distance to the nearest wall or

1587. Camera Platform Electronics As I said in the previous part, I'm not an electrical engineer. I haven't touched any real electronics since school. However, the internet is a wonderful place, and thanks to a number of other sources I was able to figure out how to get the Raspberry Pi to do what we need. Listed under: Video - Camera - Imaging Projects

1588. How to connect Raspberry Pi over Serial Port? Hellooo^^ ! Today I'm gonna show how to connect your rpi with Serial, so you can attach it's terminal. You need: Breadboard - Cables - Connectors, so you can attach them to pins - five 0.1 uF capacitors (I used the ceramic ones). Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

1589. MouseAir Block Diagram – Raspberry Pi Here is the hardware block diagram for MouseAir. MouseAir is a cat toy (fake mice) launching system. It has the ability to read the cat's RFID tag, motion detection as well as ultrasonic detection all controlled remotely from your iPad/iPhone running RasPiConnected. MouseAir system is

1590. Recording Sound on the Raspberry Pi The Raspberry Pi does not have a microphone socket, which is inconvenient when you wish to record sound. To fix this you will need a USB Sound Card, for which I bought a Creative Sound Blaster Play! for about £20 and a short extension. Listed under: Sound - Audio Projects

1591. Lazarus on Raspberry Pi The Raspberry Pi is a credit-card-sized single-board computer. It has been developed in the UK by the Raspberry Pi Foundation with the intention of stimulating the teaching of basic computer science in schools. Raspberry Pis are also used for multiple other purposes that are

1592. Making Fun | PiLarm: How to Build a Raspberry Pi Room Alarm I'm always on the lookout for those teachable moments. Inspiration came when my 5-year-old asked for help in keeping his little brother from sneaking into his room. I spotted the perfect time to teach about inputs, outputs, and programming. Learning is easier when

1593. Raspberry Pi Video Streaming This instructable will show how to stream a Raspicam to a web using a Raspberry Pi and the UV4L driver. Step 1: Material - Raspberry Pi or Odroid-W Running Raspbian - Raspicam - Router - Ethernet Cable Step 2: Enable Raspicam Before starting to configure... Listed under: Video - Camera - Imaging Projects
Line follower robot using 8051. Line follower robots were one of the earliest automatic guided robots. They are able to follow a line marked on a contrasting background, usually a black line on a white surface or a white line on a black surface. Usually the line follower robot works. . . . Listed under: Robotics - Automation Projects

DiddyBorg: The Mini 6 wheeled Raspberry Pi Robot! DiddyBorg is our robust robot kit for the Raspberry Pi. He can be controlled with an autonomous software, via a Bluetooth controller such as the PS3 or over WiFi through a keyboard. Check out this video of him rolling around! This Instructables is concerned with the . . . . Listed under: Robotics - Automation Projects

Give Your Raspberry Pi Robot a Worm Brain The C Elegans worm is one of the most studied animals in science. In neurobiology, it's most basic brain model scientists use to study how the brain works. Now you can have a robot that thinks like one! The C Elegans worm has been. . . . Listed under: Car Projects

Powering a Raspberry Pi from 12 V DC I'm new to electronic engineering and am trying to learn electronic engineering by creating little projects. I have a few questions about powering my Raspberry Pi (5 V DC @1000 mA) from a 12 V DC 1000 mA power supply. The 12 V power supply will provide power to the. . . . Listed under: Other Projects

Host your Smartphone App on your Raspberry Pi Background: I'm currently working on a Sencha Touch project making an Entrepreneur application, which will be released in a couple of months... Stay tuned! I only want say that it is a bit more complex than an example... but you have to start with something, right?! . . . Listed under: Phone Projects

Twitter to Teletype The Museum of Computing in Swindon has a working Teletype and a desire to get it to print out tweets as part of the display in the museum. Since the Swindon Hackspace is based in the museum it was a perfect project for hackspace members. . . . Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Laser Cut Raspberry Pi LCD Case I wanted a decent size portable display for my Raspberry Pi's that I could easily pack up and take to work, friend's houses, gatherings, and TechShop. I bought an inexpensive 10.1" LCD display from eBay and using a laser cutter, 1/8 plywood, 1/16" clear. . . . Listed under: Other Projects

PicoBorg – Control small motors from your Raspberry Pi with PicoBorg, you can turn on and off fans, motors, solenoids, relays etc. from your Raspberry Pi. There are 4 low side drivers so you can turn on and off 4 devices One is connected to the RPi PWM pin, so you can control the duty cycle. . . . Listed under: Motor Projects

Host your website on Raspberry pi Raspberry pi is a low cost development board by the raspberry foundation, for this tutorial I am using the distro provided by Adafruit that can be found at http://learn.adafruit.com/adafruit-raspberry-pi-educational-linux-distro/occidentalis-v0-dot-2 all you have to do is download the image and use WIN32 disk to burn the image on to the . . . . Listed under: Internet - Ethernet - LAN Projects

Raspberry Pi WiFi Internet Radio Player For my first project after getting the Raspberry Pi ($35 Linux computer) I wanted to extend very good blog post I read from MightyOhm about turning a cheap WiFi router into an internet radio: http://mightyohm.com/blog/2008/10/building-a-wifi-radio-part-1-introduction/ In that article he also had a cheap. . . . Listed under: Projects

3d Printed Raspberry Pi Security Camera Update: If you like my instructable please vote for me in the Raspberry Pi and Epilog challenge. I will also update the 5th step to include how I setup Motion on the first boot. Thank you for your clicks and thank you Instructable. The. . . . Listed under: Security - Safety Projects

Python – Traffic Light Introduction Hopefully now you have received your LED electronics kit and have followed our basic LED tutorials. Now you are waiting to get started and create some more complex programming using both inputs and outputs. The following tutorial will get you programming :)

Raspberry Pi Screenshots Learn how to capture and view screenshots on your Raspberry Pi For project documentation. Use Scrot and ShotWell to do this solely through the command line. Scrot is a command line screen capturing application that’s easy to download and use, and Shotwell is a light-weight. . . . Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

A Better Mobile Display for the Raspberry Pi As I described in an earlier post, I run my Raspberry Pi (RPI) as a headless system, using Cygwin/X's xterm to command line interaction with the RPI, with my PC being my X server to support any X Window applications. I can move files between the PC and the RF
How to use the ADXL345 on Raspberry Pi I have found that there is not much out there to actually find out how to use the ADXL345 on the web, but first, what is an ADXL345, well it is a 3-axis accelerometer with high resolution (13-bit) measurement at up to ±16 g.

Simple Raspberry Pi Game Pad for Ball Catching Game There are eight general purpose IO pins on the 13*2 pin connectors of the Raspberry Pi board and among them four pins has been selected as input and the remaining four pins as output. The input pins are connected to push buttons and are pulled down.... Listed under: Game - Entertainment Projects

Raspberry Pi Ball tracking (Note: This is an advanced tutorial, it is not intended for a Linux beginner.) In this tutorial, I will demonstrate how to track table tennis balls using OpenCV on Raspberry Pi. It can be used to track any circular object as long as it can be seen.... Listed under: Sensor - Transducer - Detector Projects

The Ladder Game-Hardware emulated in Python and C Prerequisites: Basic Raspberry setup step by step Refreshing the Software of the Raspberry Pi Hardware: Breadboard and Jumper cables or soldering equipment 12 LEDs of any color and fitting resistors 1 Pushbutton The ladder game is a good project for getting warm with the Raspberry.... Making Things Interactive Vicious Cycle – Final Documentation ‘Vicious Cycle’ is a machine that ‘promotes’ health and active lifestyle through a portion-controlled diet. Today’s obsession with insane workout routines and different types of diets (whether it be no-carb, raw food, or an-apple-a-day diet – you name it).... Listed under: How To - DIY - Projects

Home Automation Framework I. Title and Abstract The Home Automation Framework provides a web interface that allows users to control devices in their home using the browser on a smartphone, tablet, or PC. So far, the system allows for powering outlets on and off, locking and unlocking a.... Listed under: Home Automation Projects

Raspberry Pi Digital Signage: Exchange Rate Display Boards Raspberry Pi (Model B) is a single-board computer that uses an ARM 1 (ARM1176JZF-S core) processor running at 700MHz (it can overclock up to 1GHz) with 512MB RAM. This article shows you how to install your Raspberry Pi into a cheap, browser based digital signage.... Listed under: Development Board - Kits Projects

Simple and intuitive web interface for your Raspberry Pi The Raspberry Pi is an amazing 35 dollars mini-computer. It allows you to do everything you could do with a regular Linux computer (Connecting to the internet, watching videos, launching applications, ...) but to interact with the world surrounding it, just like an Arduino.... Listed under: Interfacing(USB - RS232 - I2c -ISP) Projects

Wireless Multi-Channel Voice-Controlled Electrical Outlets This project is a combination of several different resources: My single control project with Raspberry Pi and Python, originally inspired by user wilq44’s Raspberry Pi GPIO home automation WiringPi, sc written by Gordon Henderson that allows “Arduino style” control of the GPIO pins from the.... Listed under: Radio Projects, Sound Audio Projects

WeggUp – A sleeping cycle and light alarm clock I often have the problem, that I have trouble getting up in the morning, while at the same time, I have trouble falling asleep at night. I’ve checked out several possibilities to make both easier. Getting up in the morning can be improved with a Sunrise alarm / light.... Listed under: Clock - Timer Projects

Black Box Timelapse Black Box Timelapse is a simultaneous timelapse recorder and player, which I built using a Raspberry Pi. It is portable and so I can bring it to different places and set it up. Why not use an iPhone? Simple: the iPhone looks like a device.... Listed under: Game - Entertainment Projects

ISPRESSO: Remote Controlled, Raspberry Pi Powered Espresso Machine iSPRESSO is an appliance modification comprised of Raspberry Pi computer, solenoids, relays, sensor, buttons and a display, a custom Printed Circuit Board, and custom Linux shell scripts and a good bit of Python code. The instructions.... Listed under: Development Board - Kits Projects
1621. Playstation 2 controller with Raspberry Pi This tutorial will show how to use the Playstation 2 Controller (PS2) with the Raspberry Pi, use the Arduberry to adapt the shield to the Raspberry Pi. Step 1: Hardware Required Raspberry Pi, Arduberry, Dexter Industries PlayStation 2 Controller Shield for Arduino. Listed under: Game - Entertainment Projects.

1622. Playstation 2 controller with Raspberry Pi This tutorial will show how to use the Playstation 2 Controller (PS2) with the Raspberry Pi, use the Arduberry to adapt the shield to the Raspberry Pi. Step 1: Hardware Required Raspberry Pi, Arduberry, Dexter Industries PlayStation 2 Controller Shield for Arduino. Listed under: Game - Entertainment Projects.

1623. Raspberry Pi – SMS Garage Door Butler Most Raspberry Pi garage door remotes had open ports, or other features I wasn’t too fond of. So I created my own that contains much more security, logging of who opens the garage, video capture, garage status and more. Fea... Listed under: Phone Projects.

1624. Pumpkin PACS/Pumpkin Pi The Pumpkin PACS was constructed for the MGH Radiology Pumpkin Decorating Contest. It is a stand-alone DICOM workstation capable of displaying many standard types of radiology images. The pumpkin contains a Raspberry Pi which pi images onto a screen using a Microvision SHOWWX+ HDMI pico projector. Listed under: Game - Entertainment Projects.

1625. Overclocking a Raspberry Pi In this instructables I will show you how to overclock a Raspberry Pi. You don't need a heat sink or a fan because the temperature won't go over the 50-60 C (120-140 F). Please vote for me in the Raspberry Pi contest. Good luck with... Listed under: Clock - Timer Projects.

1626. Piano Stairs with Arduino and Raspberry Pi Who doesn't love music? These Piano Stairs are an interactive, relatively portable, music installation that can be applied to basically any stairwell. I built them for HackPrinceton along with my friends Erica Portnoy and Victoria Castaneda, and we won 2nd place in the hardware track. Listed under: Game - Entertainment Projects, Sound - Audio Projects.

1627. Simple timelapse camera using Raspberry Pi and a coffee tin Whilst developing BerryCam I thought it would be pretty cool to create a timelapse camera that could be left outdoors over a period of time, to capture a sequence of images that could be later joined together into a video clip. From the outset thoughts... Listed under: Video - Camera - Imaging Projects.

1628. Raspberry Pi Multi-Room Audio (Mobile/Tablet/PC Controlled) I have been lurking on instructables for a few years but have never posted one myself. Now that I have bought a home of my own it's time to undergo some projects and share them with the community. In my first project I'm going to show... Listed under: Sound - Audio Projects.

1629. Raspberry Pi as low-cost HD surveillance camera This instructable describes how to build a surveillance camera using Raspberry Pi. It records HD video when something moves in the monitored area. Live picture can be viewed from any web browser, even from your mobile while you're on the road. What...
